We explained in our last advertisement how we back up what we advertise to do and, in our next article, we hope to give you information that will be interesting.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

meeting from every prominent Poland China state in the country. It appears that breeders are very much interested in this, the first meeting of the American Record under its new charter. Those who attend will not only get the benefit of the very low railroad rates which will prevail during the stock show, but will find many other things of interest besides the Record meeting.

Owing to the change in the charter, which has been made since the last meeting of the Record at Cedar Rapids, in February, it will be necessary to elect a full board of directors, as there will be no "hold over" members on the board. This, in connection with the election of the other officers, makes the meeting a very important one. It seems practically certain that there will be a very large attendance of breeders from all parts of the country, and those interested in Poland China breeding will certainly want to attend this meeting and identify themselves with what will doubtless be the first meeting of Poland China breeders, thoroughly national in its character, that has ever been held.

A cordial invitation is extended to all Poland China breeders, whether members of the American Record or not, to attend this meeting and the banquet. Those not members of the Record will be supplied with the regular notice and the program in regard to the meeting and the banquet, if they will address

Union Stock Yards, Chicago, Ill.

Handling Pigs in Cold Weather.

To the Editor of The Homestead:

I was much interested in the article which recently appeared in your paper relating to the matter of raising early pigs. There was considerable loss in this locality last spring, and the trouble was due to the fact that milk was scarce and many young pigs were improperly nourished. Cold, damp, cloudy weather also prevailed for several weeks at a time when the early pigs came. Pigs seem to need plenty of sunshine. Their bedding should be freely renewed from time to time, and it should never be allowed to remain until it is damp. More bedding is required on cement than on other floors. One reason why early fall pigs do so much better than early spring pigs is that sows are usually on grass and this has a beneficial effect working through the sow on the young pigs.

Where men expect to breed for early litters in the spring they should have a supply of clover or alfalfa to feed before the sows farrow. Give plenty of warm slop in the winter and do not allow the sows to become too fat. They should be given plenty of water, but never water that is down to freezing point.

A. B. Dwigans.
Benton County, Iowa.

Send Us Your Subscription Today.

Five excellent newspapers and magazines for \$1.25 a year—supplying your home with news, literature, agricultural information, market reports, entertainment and general instruction all the year round. If already a subscriber for one or all, your time will be extended for one year. All these for \$1.25:

The Chicago Weekly Inter Ocean, a grand general newspaper for the family—all the week's news, reliable market reports, a wealth of prose and poetical miscellany, departments for women and children, something for each member of the household.

The Kansas City Weekly Star, an able, fearless, independent newspaper, filled with information and entertainment, containing much that you cannot find in any other paper.

The Homestead, the greatest farm paper in the world, reaching more than double the number of paid subscribers taking any other weekly agricultural paper in its field, having departments covering every interest of the farm; edited by actual farmers and numbering among its contributors a larger number of successful farmers, breeders and experiment station workers than any other farm paper.

The Homemaker, a delightful monthly of entertainment and instruction for the women folk of the farm; something to brighten the lives of your wife and children.

The Farm Gazette, the most beautiful farm magazine in the world; elegant illustrations, printed on fine paper; cover in five colors; reading matter both helpful and entertaining.

Send us \$1.25 today, stating whether your subscription is a new one or a renewal. Address, The Homestead Co., Des Moines, Iowa.

Home Music.

There should be an organ in every home. Its influence for good is felt in the entire community. The children will stay home nights and sing the old familiar songs instead of running around. The older folks will enjoy the sweet music equally well. Write the W. W. Kimball Company, 108 Kimball Hall, Chicago, today for their special offer on the genuine Kimball Organs, comprising free trial and wholesale prices on convenient terms.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should have them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

CHattel MORTGAGE—WAGES.

Mr. David Moore, Bloomfield, Iowa.—A gave a chattel mortgage in June, 1905. Would a claim against him for wages earned in the summer of 1906 come in ahead of said mortgage?

Answer.—It would not, provided the chattel mortgage was properly recorded.

INHERITANCE IN WISCONSIN.

A Subscriber, Whitewater, Wis.—A husband and wife in Wisconsin have no children. The wife has no brothers or sisters. The husband owns property in his own name. The wife also has property in her name. (1) If the husband should die first, who would be entitled to his property? (2) If the wife should die first, who would be entitled to her property?

Answer.—(1) His widow. (2) The surviving husband.

PATENT RIGHT.

Mr. U. C. Lane, Prophetstown, Ill.—Has a person a legal right to make and use a patented article, provided he does not try to sell the same?

Answer.—He has not. In such a case, he would be liable for damages to the person who holds the patent right, and also liable to injunction proceedings to restrain him from making or using the article.

ELECTION PRECINCT.

A Reader, Cantril, Iowa.—The town of Cantril is in Jackson township. The east part of it borders on the west line of Des Moines township. Four voters in Des Moines township have been taken into the town corporation. Where is the lawful voting place of these four voters at a general election?

Answer.—At the polling place in the election precinct where they reside. See Section 1090 of the Iowa Code, page 408.

LEASE—NOTICE TO QUIT.

A Subscriber, Platte county, Neb.—(1) A rented a farm to B for one year. The contract was signed at the end of March, 1906. At what time in the spring can B be compelled to leave the premises? (2) Is it necessary for A to notify B in writing or otherwise, to quit?

Answer.—(1) At the end of the year, of course. If the time of expiration of the tenancy is not specifically stated, but it is merely stated that the period of the lease is one year, the time of expiration or end of the year would be one year after the time the contract was signed. (2) It is not necessary for A to notify B to quit in order to terminate the tenancy, but if B refuses to

leave at expiration of his term, and A wishes to put him off by a suit for forcible detainer, he must give him three days' notice in writing to quit.

LEASING CONTRACT.

A Subscriber, Estelline, S. D.—One year ago I rented a farm for the year 1906 on shares, and took possession on October 25, 1905. The contract was not in writing. The usual time for moving here is in the fall of the year, but not always. When do I have to give up the place, or move off?

Answer.—It makes no particular difference whether the contract was in writing or not. The main question is, what was the contract? If it was for one year from October 25, 1905, then you should give up the place on October 25, 1906. If it was only for the crop season, then your time expires when the crop is harvested, or when it should be harvested.

BRUSH AND WEEDS ON ROAD.

A subscriber, Oxford, Iowa.—Our land is inclined to produce brush, such as hazel, sumac, thorn, wild plum, cherry and the like. These grow along the sides of the road eight or ten feet high in some places. Since the law was changed we pay our road tax at the court house, and do not work it out on the road. The township trustees have ordered us to cut away the brush on our side of the road and threaten if we fail to do so, that they will have it done at our expense. Can they do so? Does the law require a man to mow or cut the weeds on the roadside adjoining his farm?

Answer.—They cannot. It is not made the duty of a land owner, by law, to cut brush or weeds growing in the roadway. That is the duty of the road supervisors (superintendents). See Supplement to Code, page 164, Section 1562a.

CONSTRUCTION OF LEASE.

A Subscriber, Kalona, Iowa.—A owns a farm in Iowa. He rented it to B for one year, with the privilege of two years if both parties were satisfied at end of the first year. The term began March 1, 1906. The contract provided that A rented all his land excepting cow, horse and hog pastures, and that A was to receive as rent one-half the grain, straw, corn stalks, and hay. In May B told A that there was more land than he could handle, and requested A to rent it to someone. B told C about it, and rented some of the hay land to him, on the same terms he had rented it to B. In July C took from it a good crop of hay and later a crop of clover seed was taken from it. Who is entitled to the clover seed?

Answer.—Under the arrangement between A, B and C, as above set forth, A is entitled to one-half of the clover seed mentioned, and C is entitled to the other half.

FAILURE TO PAY RENT.

A Subscriber, Coffeyville, Kan.—D rented a house and five acres of land to C for twelve months for \$50, and C paid at the time \$25 and agreed to pay the other \$25 on the 1st of November, 1906. C does not want to pay D the other \$25, but wants to stay on the place till March 1, 1907. (1) Can he lawfully do so? (2) What kind of notice must D give to C in order to put him off the place?

Answer.—(1) He cannot. (2) If C does not pay the \$25 when he agreed to do so, on November 1st, D should serve a written notice on him to quit within ten days and such notice will terminate the lease, unless C pays the money within that time. If he does not do so, then D should serve a three-days' written notice to quit, and if C still remains, D should bring a suit of forcible detention against him before a justice of the peace, and have him forcibly but lawfully put off the place.

SLEEPING ON RIGHTS.

A Subscriber, Whiting, Kan.—About nineteen years ago my father died, leaving 160 acres of land to his heirs, consisting of mother, sister and myself. Mother was appointed administrator of father's estate. A short time afterwards she mortgaged her undivided share of the land. Soon after this she moved away and gave no more attention to any of the land. The land was all sold afterwards, presumably to satisfy the mortgage given by my mother. All this happened nearly nineteen years ago. My sister and I are now of age, and we wish to get our share of the land, or its equivalent in money. The administrator has never made any settlement. She claims that there was nothing to settle, as the mortgage had taken all of it. What proceedings must my sister and I take in order to get our rights?

Answer.—Your mother, the administrator, has no right whatever to sell the share of you and your sister in the land. The mortgage did not cover that at all, but only your mother's share. You should engage a competent lawyer to examine the records and bring suit against the present claimant if not too late. In Kansas, possession of land by an adverse occupant for more than fifteen years, which is actual, notorious, continuous and exclusive, will give title thereto, even if such possession is entirely destitute of color of title. This may bar you. If you had stated the ages of your sister and yourself, I could have told you whether or not it is too late. See a good lawyer.

ROOFING

requirements, so far as weather is concerned, are always the same, whether the material is intended for an immense business building or a structure on the farm. The roofing must be sun-proof, water-proof, and fire-resisting. It must be strong and elastic to resist expansion and contraction. There can be no avoiding these issues.

RUBEROID

(REGISTERED U. S. PATENT OFFICE.)

was the first and is today the only roofing made which combines all these qualities. It contains no tar or paper; will not melt or rot. Saturated and coated with Ruberoid Water-proof Compound. Absolutely weather-proof. Burning brands or flying sparks will not ignite it. It has proved its elasticity by enduring torsional strains for years. These are all statements we can prove if you will write to us. Send for samples and Booklet "L."

100 WILLIAM STREET, NEW YORK

Union Trust Bldg.

1856—Sandwich—1906
Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, helted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the head of the "gang."

They shell clean and they clean the corn they shell clean.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

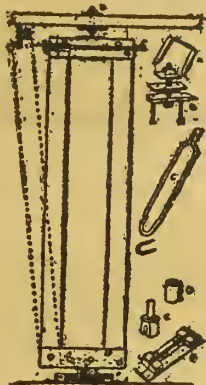

Mr. Argus M. Spencer, of Delaware county, Iowa, writes: "I have come to the conclusion that the ordinary rigid stanchion is not the embodiment of comfort desired by the dairyman, and having in mind a change to something of a swinging nature, I wish you would give through your hints and devices department some designs for swinging stanchions so I may profit by the ideas they give." Mr. F. G. Simple, gives the following description of his stanchion in the Farm and Fireside: "I send you herewith a sketch and description of a stanchion which we used in our stables with much satisfaction. We have used both chains and the old stationary stanchions, and have seen some of the modern patented cattle ties, but consider this stanchion superior to any of them. With this stanchion the cows are given sufficient freedom without undue liberty.

They can turn around to liek themselves, yet cannot get back on the walk or ahead in the manger. Figure 1 shows the stanchion closed. Figure 2 shows it open. The two sides are made of hard wood four feet long, one and one-fourth inches thick and two and one-half inches wide. The end pieces are also of hard wood, and are one foot long by three and one-half inches square, and are mortised to receive the sides as shown in Figure 3. The sides are fastened to the ends with bolts, one side on bolt as X, and being held when closed by clevis C. Eyebolts are affixed at each end, to which short chains are fastened, and by which the stanchion is suspended. The whole stanchion, including bolts, labor, etc., should not cost more than sixty or seventy-five cents, and may be made for even less than that amount."

Here is a simple idea for building and maintaining a salt box to be attached to the fence in the pasture where stock can have access to it. It has the disadvantage, perhaps, of being somewhat exposed to the weather, nevertheless, says the Prairie Farmer. Two pieces of plank are cut as indicated by the side of the box. These are placed about eight inches apart and nailed to two end pieces, the rear end of the box being cut so as to give about six inches of projection. The idea is that when the framed end is placed between two fence boards the pieces A and C can be nailed on securely and thus hold the box in place. Obviously the fence boards will pass through the portions between A and B at both top and bottom. This box will give better satisfaction when placed under cover where it will be out of the way of storms. It can also be used in a pasture where a mare and colt are kept and can be used for feeding the mare a little grain while in the pasture.

Another design for making a swinging stanchion is illustrated and described as follows, from the Live Stock Report: "The stanchion sticks are made of strong 2x4's, five and one-half feet long. The blocks at the bottom and top in which

the stanchion works are scant 6x6 and about ten or eleven inches, according to the size of the animal's neck. On the top of the head block, plate B is fastened with a five-eighths bolt which passes from the under side of this plate up through the 2x6 that runs the entire length of the stable to hold all the stanchions in position. The long iron yoke C, which is made of three-eighths iron, is fastened with a staple to the top of the moveable stanchion. The stanchion is opened by raising this yoke which permits it to swing back until the yoke strikes the bolt as shown by dotted line in cut. A commendable feature of this stanchion is that it swings when closed and is rigid when open. As the stanchion swings back it falls into a sort of a clevis, A, which makes the entire stanchion stationary, and prevents the cattle putting their heads into the wrong place, or getting through into the manger. The bottom of the stanchion works on a swivel similar to the top. A two-inch hole is bored in the middle of the under side of

the foot block D into which a short three-quarter-inch piece of gas pipe is inserted. Iron F can be either cast or made of strap iron and is fastened to the floor. On this the V end of the swivel iron E rides, which gives the sidewise motion to the lower part of the stanchion. The upper end of this swivel iron passes into the socket D in the under side of the foot block to give it a swinging motion. All the material for making these stanchions can be obtained at a lumber yard and blacksmith shop, and the work can be done by a blacksmith and carpenter; however, if there were a foundry in the neighborhood it would be best that the foot irons be cast instead of being made or pounded out of strap iron.

Cancer Cured by Anointing With Oil.

Cancerol, a compound of essential Oils, has been discovered which readily cures all forms of cancer and tumor. It is safe and sure and may be used at home without pain or disfigurement. Readers should write for free book to the originator, Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

Van Patten Duroc Sale.

The Gilbert Van Patten sale held at Sutton, Neb., during the latter part of October, resulted in an average of \$84 on twenty-three head sold. The top price of the sale was \$320, paid by Mr. H. G. Warren, of inland, Neb., on a Billi K. gilt out of Miss Martin 1st by Martin Prince. The top boar brought \$300 and was purchased by Mr. C. H. Raymaker, of Prairie View, Kan. The following is a list of the animals sold:

The Man Who Stands
Back of the "Knodig"
Pitless Scale.

My New Direct From Factory
Selling Plan Gives You All
Jobber's, Agent's and Dealer's
Profits on Knodig Pitless Scales.

No Money Down—No Notes to Sign.
30 Days Trial—10 Years Guarantee.

The New Protected Bearing "Knodig" Pitless Scale is Fully
Covered by Patents.

If you think \$50 is worth saving, don't do a thing about getting a scale until you write me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings.

I don't care whether you expect to buy a scale now or in the future, or for the matter of that, whether you ever expect to buy one, send for the "Knodig" book anyway.

It contains over 40 half tone pictures that will interest you, and it is chock full of good common sense from cover to cover.

You just simply can't read this book without getting interested in the "Knodig," and if you don't want one, yourself, I'll take my chances on your saying a good word for my scale to your neighbors.

Why, two-thirds of the thousands of Knodig Pitless Scales now in use in this country were sold as a result of satisfied users telling others about it.

Yes, that's just the kind of scale the "Knodig" is.

Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather.

Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be.

Absolutely accurate, because tested according to U. S. Standard of weights.

My plan saves you all middlemen's profits. Deal direct with me. No Agents, Salesmen, jobbers or Dealers between you and factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer?

Does it make the scale any better? Does it add one single penny to its value?

Then why not save the middleman's profits and keep them in your own pocket?

That's good common sense, isn't it?

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you are satisfied,—no deposit,—no notes to sign,—nothing to do but give the Knodig a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover.

Free. Write for it to-day, sure, to

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

LAME COW.

I have a six-year-old cow that is lame in the ankle of her right front leg. There is no sore; her leg is swollen above the joint several inches and below to the hoof, but it feels soft. It evidently gives her some pain, but more so when she first gets up. This trouble came about three months ago. What can I do for it?

Poultice swollen parts with any plastic dressing such as antiphlogistine, which you can buy at a drug store. When swelling and soreness subside, if lameness remains, blister the parts with cerate of cantharides.

HYSTERIA.

I have a black mare six years old that from two to four days prior to coming in season will kick at the least thing that touches her. While in season she is as gentle as can be, but when anything touches her she will urinate; for instance, while plowing, in turning corners, etc. I have tried to breed her to different horses, but she will fight and kick at a stallion at any time. Is there any cure for her?

The only feasible way of curing such a case would be to have her spayed by an expert veterinarian. If this cannot be done, try effects of two-dram doses of bromid of potash in water every four hours at time of irritation.

RING WORM.

What is the matter with my calves and what can I do to stop it? They have spots around the eyes and on the neck the size of half a dollar. The hair comes off and it looks like ring worms.

The disease is ringworm. Turn calves out of the barns and clean up, disinfect and whitewash the woodwork and walls. Treat the calves by scrubbing affected parts with soap and hot water; then scrape for removal of scales and scabs and when part is about ready to bleed, rub in a little iodine ointment and repeat the application every other day until well.

SCOURS.

Will you kindly tell me what to do for an eighteen-year-old mare that has had the scours all summer. I put her up and fed her dry feed, but it seems to have no effect. She has done no work all summer and is in fair condition. Mare is not with foal.

Have her teeth put in order by a veterinary dentist and see that all food is free from mold or taint. If you have a qualified veterinarian in your district, have him treat the case with Merck's Veterinary Tannoform. If this drug cannot be had, feed mare very lightly and three times daily give a tablespoonful of a mixture of equal parts powdered wood charcoal, ground ginger root, hydrastis canadensis and hyposulphite of soda.

SPLINT.

I have an iron gray pony six years old that I thought sprained her right front ankle last spring. I bathed it with warm water and put turpentine and lard on it, but the swelling never went clear down. Her ankle is quite large and is swollen some clear to her knee. It feels hard and seems to be tender when you rub it. A small hard knot has just formed on the inside of her leg just below the knee. I think it is a splint. Her ankle and leg swell more when she is kept up. Do you think that the knot is a splint, and what is good for it? Can you tell me what is wrong with her ankle and leg?

There is inflammation of the periosteum (bone skin) of leg and possibly the joint may be involved. The splint is not probably doing much harm. Give the pony perfect rest and poultice the ankle with a plastic dressing such as antiphlogistine, and when all soreness subsides blister with cerate of cantharides after removal of hair.

Boog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid) is a special remedy for soft and semi-solid blemishes—Boog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be limited. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

A Cleveland Cream Separator

Direct from the Factory on Free Trial. **NO MONEY IN ADVANCE.** We ask no deposit, no note, nothing to bind you. We depend solely upon the work that the Cleveland will do on your place to make the sale. If you don't want it after giving it a fair trial, send it back. We can afford to make this offer because the Cleveland is the Only High Grade Separator Sold at a Reasonable Price. Our guarantee covers these points: Easiest Running—Easiest to Clean—Most Durable. Send for Free Catalogue and full particulars.

CLEVELAND CREAM SEPARATOR COMPANY,
Dept. H, 33 Michigan Avenue, N. W. Cleveland, Ohio.

gistine, and when all soreness subsides blister with cerate of cantharides after removal of hair.

SCAR.

I have a three-year-old colt that got cut in a barb wire fence some four weeks ago. The cut was just below the fetlock of the front foot and was about four inches long and two inches deep. It is now healed up nicely and there is no swelling left. Can I get any remedy to grow hair on the scar?

No medicine will cause hair to grow upon the scar as the hair roots have been destroyed. The only way of removing the blemish would be to cut out the scar and bring the edges of the new wound together by stitching, in which case healing might take place by "first intention," which would leave no scar behind. It would require the skill of a surgeon to accomplish this result.

WEAK STIFLE.

A five-year-old horse of mine became lame in the stifle about three months ago. One morning I went to feed and the leg was stiff. I pushed him over and I heard something give a snap; then he stepped up all right, but has been a little lame since. There is no swelling.

The patella of the stifle joint slipped out of place and you heard it snap back when the horse was moved. The muscles and ligaments of the joint are weak and should be strengthened by repeated blistering or by stimulating liniment rubbed in once daily. A liniment composed of one ounce each of aqua ammonia and turpentine with four ounces of druggist's soap liniment and water to make a pint should prove beneficial, but if the horse can be rested for a couple of months, we would prefer to use the blister. Use the blister prescribed in answer under heading of "Injured Hock Joint."

TETANUS.

Two fat shoats ten days ago acted like they were choked, breathed through nose and mouth with great difficulty. They lay on their stomachs as they could not breathe lying on one side. Soon their jaws set tight. They could suck a little water between their teeth, but milk would nearly strangle them. I rubbed turpentine on their throats, as it hurt them to swallow. They walked around as usual, only they seemed a little stiff. They died, and on cutting open throat could find nothing wrong. Another lean shoat was similarly affected, though not so bad, and recovered. They are following steers that are fed on fodder. Is it possible a cockle bur out of the fodder caused the trouble?

The symptoms point to lock jaw (tetanus) but it is rare among hogs and would come from invasion of a wound with the germs of the disease. It is of course possible that some other cause of spasm locking mouth might have been present, but without an examination at the time we could not make a diagnosis other than the above. Hypodermic injections of tetanus antitoxin given by a veterinarian would be about the only beneficial treatment in this disease, and there would at best be little chance of saving the patients. An acute throat trouble to which hogs are prone would cause the other symptoms mentioned, but we have not seen lock jaw in such a disease. On general principles, we would advise you to use disinfectants freely and keep the hogs away from the cattle in clean quarters and feed upon easily-digested slop.

INJURED HOCK JOINT.

I have a horse that was cut on the wire six weeks ago and his hock joint is swollen and running some. It has been opened and has also been blistered, but is still swollen.

Clip hair from joint and wash thoroughly with a 2-per-cent solution of coal tar disinfectant; then inject into each discharging place a little of an emulsion of one dram of iodoform in an ounce of sulphuric ether. Repeat the injection twice daily and blister the joint repeatedly at intervals of three weeks, using a mixture of one dram of biniodid of mercury and two ounces of cerate of

APRON PATTERN FREE!

This is the best apron pattern ever offered and it is something every lady needs. You cannot fail to be pleased with this one and all new subscribers to the

People's Popular Monthly will receive one free. This is a prize pattern. Takes 1 1/2 yds. of material one yard wide. Only 3 buttons. Small, medium and large size. THE PEOPLE'S POPULAR MONTHLY is a fine, 24-page beautifully illustrated home magazine for women and girls, filled with bright, interesting stories and well edited departments on Fancy Work, Home Dress-making, Cooking, Flowers, Chats with Girls, etc. It is being improved with every issue and is now one of the most "popular" story papers published. It would be cheap at 50c a year, but in order to introduce our magazine to new readers we send THE PEOPLE'S POPULAR MONTHLY a full year and the apron pattern for only 25c. Address,

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

BUTTER FAT CONTENT AND BUTTER YIELD.

The following communication has been received from a subscriber at Tabor, Ia.:

We are at the present time using one of the standard makes of separators and we sell our cream. The creamery company pays on the basis of the butter fat and do the testing themselves. We are not always satisfied with the test, as we think our cream is richer than it sometimes appears to be. When we churn for ourselves we usually get over 50 per cent of butter, though the company's test runs from 36 to 41 per cent. Should not their test and the butter test agree, or nearly so? Would the small Babcock tester be practical in the hands of anyone who is not an expert?

We very much doubt if the creamery in this instance gives anything but a correct test. If cream tests 40 per cent of butter fat, one hundred pounds of cream would make from forty-five to forty-seven pounds of butter. The butter-fat content and butter yield of a given amount of cream are two very different things. In the churning, the butter fat incorporates anywhere from 12 to 16 per cent of water, about 1-13 or 1-12 per cent of curd material, and about 2 per cent of salt and ash. One hundred pounds of butter fat will make about 116, or 118 pounds of butter. The law does not allow more than 16 per cent of water in butter.

Even if allowance is made for this increase in the butter yield over the butter-fat content, there is liable to creep in another error. For example, if one is making his butter at home, he may incorporate, without any intention to do so, an illegal percentage of moisture, and yet if the butter is consumed in the home, no one will be the wiser. It is not a difficult matter to incorporate 18 per cent of water in butter, which of course would make an overrun of churn earnings of practically 20 per cent or better.

The Babcock test is simple in every respect and can be run and run accurately, or at least be made to do accurate work by a non-expert. It may be used in keeping tab on the individual cows at home, as well as testing the cream, and should be found on every farm where five or ten cows are kept.

Winter or Summer Dairying.

To the Editor of The Homestead:

My experience has convinced me that winter dairying is much more profitable than summer dairying. In practicing winter dairying we have dairying all the year around, provided we feed and care for our herd as we should during the winter. I like to have the cows come fresh sometime between October and January 1st. Then, with plenty of good corn silage fed twice a day and good clover hay once a day, with bran, gluten or some other protein feed, according to the price, allowing the cow to be the judge as to the amount she will digest properly, we can look her in the eye and say, "You pay for your board or you will go to the butcher." If she is a good dairy cow she will comply with the request every day through the winter, will go onto grass in good shape and will do nearly as well through the summer as a cow that is fresh in the spring. She will take her yearly vacation in the

fall when the pastures are dry, while her spring sister will shrink in her milk.

Then a dairyman has more time to take care of his calves during the winter than in the summer, with good, light, comfortable quarters they will do better than in summer. By spring the calves will be ready to go onto grass and can stand the hot sun and flies better than young calves, and you can have the skimmed milk for your pigs instead. Whenever the cows are fresh, feed them so as to keep them doing their best. Do not think you can let them shrink in their milk a week or a month and then have them make up for lost time, for they will not do it. They must do their work every day or they will run their owner in debt.

There is nothing like the silage to keep the dairy cow's appetite on edge throughout the long winter period. It also keeps her system in good condition, which is a very important matter, and gives her a good relish for her feed. In fact, silage well made can be fed in the summer to great advantage, as we have demonstrated in our own work. The dairyman who proposes to maintain the milk flow of his herd will find either soiling crops or silage a necessity during dry summers, for even on the best managed farms the grass if utilized to best advantage will become dry and short from one to three months, depending on the season. A well built, permanent silo can be put up for about \$1.50 per ton capacity; that is, a cost of \$300 for a silo that will hold 200 tons of feed. This amount of feed will supply twenty cows with all the silage they should have, even if they are big cows and fed all the year round.

If the farmer were to build a barn that will hold hay for twenty cows, even for a winter, can he build it for \$300? Not at all. He would have to invest very much more than that sum in a barn to hold the hay for that number of cows. So we see that silage is the cheapest thing possible to feed if we are to consider the cost of the structure that contains it. The farmer who intends to largely increase the number of his cows will have to put hundreds of dollars into a barn structure if he intends to confine himself to the feeding of hay for roughage. It will be far easier for him to extend his stables and build a silo than to construct a stable sufficiently high to hold the hay.

When a man is freed from the necessity of providing for bulky feed he can then construct his stable with the object of getting cleanliness and light. He can build his stable long and low and secure a flood of light from three sides. His foundation does not have to be as heavy as it must be if it is to sustain a heavy superstructure. A silo is thus not expensive, and moreover it is a great factor in the development of dairying. It solves the problem as to how a dairyman can make a living on from fifty to 100 acres of land. That is going to be the great question in the not far distant future, for the farms are already being cut up into smaller ones. If any man doubts whether or not it will pay him to build a silo let him look into the cost and benefits by actually getting estimates on the cost of construction.

I make silage my main cow feed. I feed from thirty to forty pounds of silage per day, in proportion to the size of the cow. It is my intention that the cows have all they want and in the best condition. The silage ration is balanced with bran and clover and alfalfa hay. The bran is fed in proportion to the period of lactation of the cow, and as much as she will consume at a profit. I feed silage and bran the first thing in the morning, then do the milking and separating, then feed as much clover and alfalfa hay as the cows will clean up before noon. The same method is followed in the evening, feed hay the last thing at night. I do not depend on grass alone more than ninety days in the year. Then if I have any silage left over from winter I feed about twenty-five pounds per day. If I have no silage I plant a small plot of early corn in the spring and sow oats and peas. I begin feeding as soon as it will do, cutting from the field and hauling to the pasture each day. This is a more expensive way of feeding than the silage, but it is far better than to let the cow go hungry, for a hungry cow will not give milk.

No man is in a better position to build up his soil than a dairyman, if he uses wisely the forces at his command. You

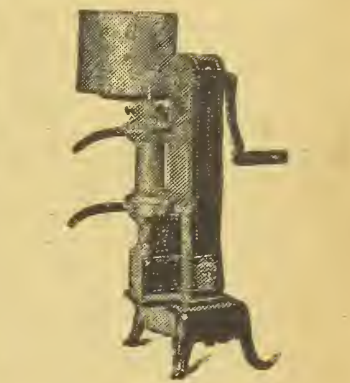

Lost Strayed or Stolen—One Cow

That is about what happens each year for the man who owns live cows and does not use a Tubular cream separator. He loses in cream more than the price of a good cow. The more cows he owns the greater the loss. This is a fact on which Agricultural Colleges, Dairy Experts and the best Dairy men all agree, and so do you if you use a Tubular. If not, it's high time you

did. You can't afford to lose the price of one or more cows each year—there's no reason why you should. Get a Tubular and get more and better cream out of the milk; save time and labor and have warm sweet skimmed milk for the calves. Don't buy some cheap rattle-trap thing called a separator; that won't do any good. You need a real skimmer that does perfect work, skims clean, thick or thin, hot or cold; runs easy; simple in construction; easily understood. That's the Tubular and there is but one Tubular, the Sharples Tubular. Don't you want our little book "Business Dairymen," and our Catalog A. 121 both free? A postal will bring them.

The Sharples Separator Co.
West Chester, Pa.
Toronto, Can. Chicago, Ill.

A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

cannot afford to raise timothy, which impoverishes your soil, and buy high-priced fertilizers for your land. Raise legumes to replace your concentrates and add nitrogen and save both a fertilizer and a feed bill.

J. P. Fletcher.

If you have not been interested in the articles written so far by the Litchfield Mfg. Co., and which have been appearing weekly in The Homestead, just turn to page 5 this week and see how they analyze a very important question with the farmers and land owners in this country.

"CHEAPEST" CREAM SEPARATOR.

The really "cheap" cream separator, like all other machines, is the one which will perform your work in the most profitable and satisfactory manner, and last the greatest number of years. A cream separator which wears out in two years is worth only one-fifth of what the one is that lasts ten years.

DE LAVAL CREAM SEPARATORS

have proven to be capable of lasting from fifteen to twenty-five years. The very best of other separators at the most cannot last more than five or six years. The poorest ones become "junk" within a few months and represent simply a pure waste of money to buyers of such machines. "Cheapest" in first cost does not mean "cheapest" in the end, nor does the manufacturer's unenforceable guarantee mean that you are getting the most for your money. Low prices and extravagant guarantees are the capital stock of the "faker." Before buying a separator write for a **DE LAVAL** Catalogue of "durability" facts and reasons. It will cost you nothing to know the truth.

UPLAND Poultry Farm stock for sale from Lt. Brahmas, S. L. Wyandottes, R. C. B. Leghorns. Pure bred, well-marked birds. Albert Haus, Waucoma, Ia.

WHITE Wyandotte cockerels for sale from birds scoring 94 and 96. These birds are farm raised. Write for prices. W. F. Kilpatrick, Harlan, Ia., R. 5.

OTTUMWA Poultry Yards. Light Brahmas exclusively. Some bargains in last year's stock. Write for prices. R. T. Cameron, Ottumwa, Iowa.

FANCY White Holland Turkeys. Partridge Cockerins hens; farm raised; \$15 per doz. Write for prices on show birds. Mrs. Floy Collins, Viola, Ia.

S. C. B. LEGHORNS. I have a limited number of fine cockerels and pullets that I will sell very reasonable if taken soon. J. P. Eskildsen, Lawler, Ia.

FOR SALE—Toulouse, Embden, White China geese, Pekin, Aylesbury, Muscovy, Cayuga ducks, Bronze turkeys. Exchange for Indian relics. Box H. Dawson Bros., Frankville, Wis.

150 SINGLE Comb Brown Leghorn cockerels, \$3 to \$10 per doz. Buff Cockerins Bantams, Indian Runner Ducks. Mrs. Will Michael, Selma, Iowa.

FOR SALE.

BUFF WYANDOTTE cockerels and Canary birds. John Huegerich, R. 2, Carroll, Iowa.

WHITE Wyandotte cockerels for sale. Pure bred. Prices low for quick buyers. Address Rose-lawn Farm, W. S. Gregory, Keota, Iowa.

BUFF ORPINGTONS and Buff Rock cockerels. Large, even colored birds, \$1.00 to \$1.50 this month. Mrs. G. R. Fuller, Rolfe, Iowa.

WHITE ROCKS—Scored cockerels and pullets \$1.50 each. Unscored cockerels, \$1.00. G. H. Blake, Route 2, Oelwein, Iowa.

WHITE Wyandotte hens, scoring from 94 to 96, all yearlings. \$1.50 to \$3 each. Mrs. L. M. Estes, Audubon, Ia. Route 2.

DOGS.

AN EXTRA FINE BUNCH OF COLLIE PUPS from working parents. The kind that pays to raise. Pedigree furnished. Address, Leroy A. Hays, Rural Free Delivery No. 7, Knoxville, Iowa

THOROUGHBRED dogs, wolf and coon hounds. Puppies to trained dogs for sale at all times. Low prices and guaranteed. S. A. Smith, Keosauqua, Ia.

RATS! MY Scottish terriers will make them git. Very fine pups from recorded parents for sale. S. W. Harr, Riverside, Iowa.

SCOTCH Collie Shepherd dog, broken, sent on trial; 2 broken coon hounds, guaranteed; runt rabbits by day, coons by night. E. K. Rodgers, Montezuma, Ia.

FOR SALE—Fine registered Scotch Collie puppies, bred from trained parents; natural beelers; males \$6, females, \$5; guaranteed. A. H. Gerot, Riverside, Ia.

When writing please mention this paper.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

A Significant Item.

To the Editor of The Homestead:

In a recent issue of an exchange appears the following statement:

"Reports from all over the country show that there are fewer eggs in cold storage than there were at this time last year. This shortage is nearly 20 per cent in New York, 10 per cent in Boston, and nearly 15 per cent in Chicago. The consumption is enormous—in Boston above 10,000 cases more are required per month than last summer."

This means simply that the consumption is greater than the supply. The summer surplus is being exhausted, and the cold storage people are finding it impossible to obtain as many eggs as they need to fill their warehouses. Never has there been such scarcity since the development of the cold storage business. Surely the American hen is coming into her own.

But why this scarcity? There is no reason to believe that the egg-production of the country has fallen below the normal figures. There is another reason. It will be remembered that the unprecedented mildness of last winter kept the hens laying in such a fashion that speculators were forced to the wall and compelled to throw cold storage eggs on the market at seven cents per dozen, which, while it did not affect the price of the fresh article, put the cheap eggs within the reach of the poor people of the cities.

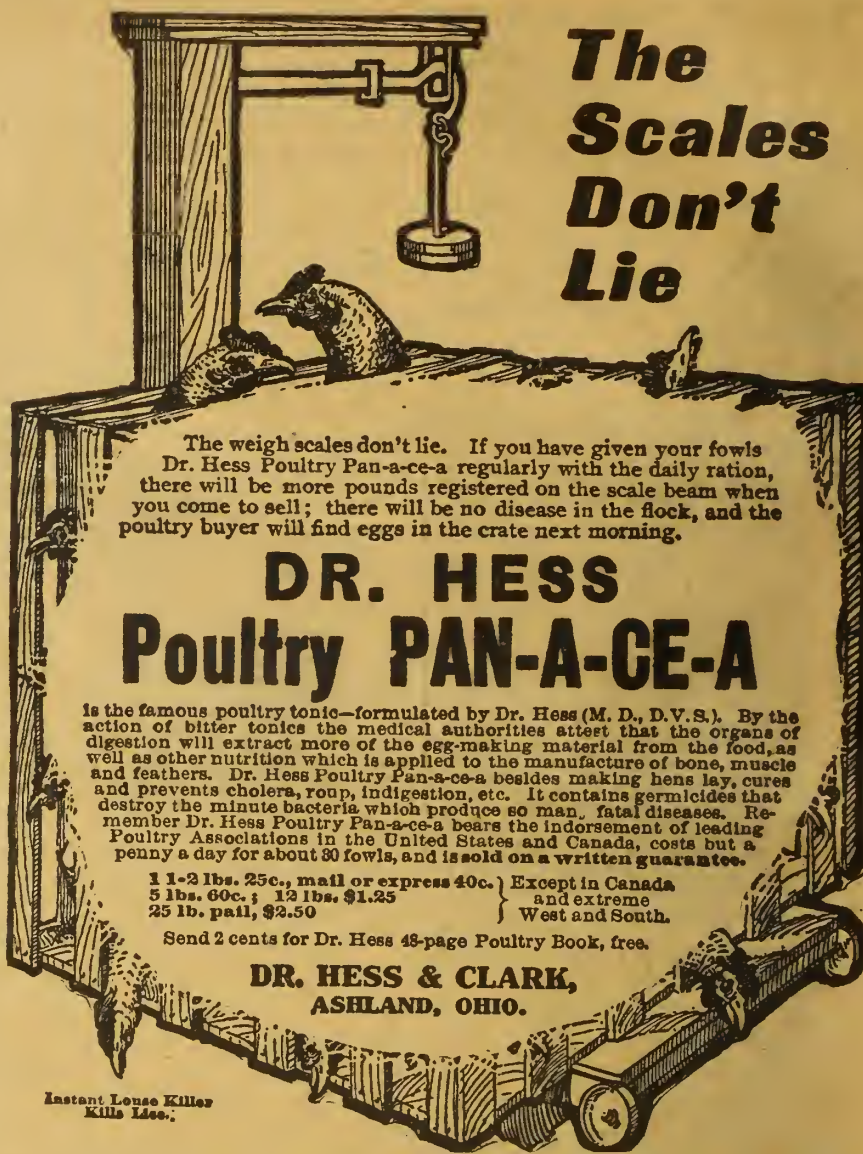

Eggs were so much cheaper than meat that they became an article of general consumption. Thus the egg-eating habit was formed, and when the cold storage supply was exhausted, they continued to buy eggs, finding to their surprise that not only were their families better nourished, but that even the higher priced eggs were cheaper than meat. Housewives noted the decreased grocery bills and found that a dozen eggs would offset two pounds of beef or pork. The absence of waste in eggs was another point in their favor. So we see the ill-fortune of the speculators has proved of great benefit to the poor people in our cities, and the educational campaign thus started, has caused the growing demand right through the summer months.

The conditions mentioned make the prospect for winter prices exceedingly bright. And the lesson appeals more forcibly to the farmers' wives and those raising poultry on a small scale than to the large commercial poultry plants. For these big plants are conducted on scientific principles, and the effort is to keep them up to the maximum of production. In small, private poultry yards, matters are apt to be run in a more haphazard way, and "luck," rather than careful management reigns supreme.

Who of us comprehend the aggregation of littles? If every man, woman or child who raises poultry, even with the smallest of flocks, would study the principles of success, and care for their fowls accordingly, egg-production would increase by leaps and bounds. If every farm should increase its market output by even six dozen, the ware house would be crowded to repletion, and the supply would meet a rapidly growing demand. In this way many dollars would find their way to pockets sadly empty of coin, and the whole country would rejoice over the bounteous supply of one of God's best gifts to man.

Nebraska. S. B. Titterington.

The spanking of children is as old or older than Solomon. But it remains for a Chicago man to herald the good disciplinary effect upon roosters addicted to fighting of spanking their combs. Of course this can only be inflicted upon birds with large single combs. The offender whose pugnacity needs curbing is grasped by the legs with the left hand, the body being held under the left arm. With his comb hanging over the right knee, it is struck with the open hand, first on one side, then on the other, until the administrator thinks the punishment enough. The head is not hurt, nor the comb bruised. It is claimed that the bird thus punished will seek a dark cor-

The Scales Don't Lie

The weigh scales don't lie. If you have given your fowls Dr. Hess Poultry Pan-a-ce-a regularly with the daily ration, there will be more pounds registered on the scale beam when you come to sell; there will be no disease in the flock, and the poultry buyer will find eggs in the crate next morning.

DR. HESS Poultry PAN-A-CE-A

Is the famous poultry tonic—formulated by Dr. Hess (M. D., D.V.S.). By the action of bitter tonics the medical authorities attest that the organs of digestion will extract more of the egg-making material from the food, as well as other nutrition which is applied to the manufacture of bone, muscle and feathers. Dr. Hess Poultry Pan-a-ce-a besides making hens lay, cures and prevents cholera, roup, indigestion, etc. It contains germicides that destroy the minute bacteria which produce so many fatal diseases. Remember Dr. Hess Poultry Pan-a-ce-a bears the indorsement of leading Poultry Associations in the United States and Canada, costs but a penny a day for about 30 fowls, and is sold on a written guarantee.

1-2 lbs. 25c., mail or express 40c. } Except in Canada

Instant Louse Killer Kills Lice.

ner, reflect in solitude upon his sins, then come out meek as Moses, at peace with all his kind.

In mating breeders, several things should be kept in mind. External points, such as plumage, symmetry, etc., depend upon the sire. The old saying that the male bird is "half the flock," conveys an important truth. From the hen is inherited the internal features, egg-production, and the like. As ideal birds are few and hard to find, we must make the best of what we can get, offsetting weak points in one parent by strong points in the other.

Good mothers and good layers are profitable assets. Therefore be slow to discard a hen especially strong in these points. Keep her just as long as she is profitable, in spite of what many poultry writers advise.

If in need of barn door hangers insist on having Protury No. 77, guaranteed for 25 years.

The South English Sale.

The sale of Scotch and Scotch-topped Short-horn cattle, Polled Durham cattle and Poland China swine, held at South English, Iowa, November 15th, attracted a goodly number of people from various parts of Iowa and Nebraska. The Poland China swine were owned by Mr. S. B. Wenger of South English, who was making a dispersion sale with the view of leaving the farm and going to Indiana to educate his children. The Poland Chinas sold low, forty-five head making the low average of \$20 per head. The Poland Chinas were sold in the forenoon by Col. Geo. P. Bellows, assisted by Shaver, Lemon and others. Immediately after dinner, the sale of Short-horns took place after a neat speech by Colonel Bellows, and fair prices were obtained. Unfortunately the attraction of the sale, Scottish Myrtle, had met with an accident and was not in condition to offer. The grand good cow, Imp. Dora 3d, was also blemished, which reduced the selling price to that of a bargain price. Mr. C. L. McClelland, of Loudon, Iowa, secured her at \$170. Those who paid \$100 or over for Short-horns were Messrs. E. Barnhardt, South English; C. D. Parkhill, of Ollie, Iowa, and E. Barth, of Evely, Iowa. The average made on the Short-horns belonging to Messrs. Smith & Barnhardt, was \$100 per head. The Polled Durhams belonging to Messrs. Wenger & Yoakum sold low. Those wide-awake breeders, Messrs. Shaffer & Dueker, of Kalona, Iowa, secured the bargains of this breed. Interest in the Polled Durhams centered in the splendid young bull, Scottish Archer X, bred and owned by Mr. Wenger. He was a Cruickshank Bra- with Bud with one Polled Durham cross. Mr. W. D. Emery, of Delta, Iowa, was the fortunate purchaser, securing this fellow at \$325, which was the top price of the entire sale of either breed. \$180 was paid for Clan-

DAY BY DAY

Agricola

Agricola believes in a home sanitarium, and that a good garden with an orchard annex is the sensible provision for a farm sanitarium.

Though you pay \$300 for a lunkhead horse, he will still be a lunkhead.

Our patience depends largely upon whether the blunder was ours or the other fellow's.

Somewhere in every corn-belt rotation should come clover, and corn is the natural subsequence of clover.

I have tried mammoth red clover and liked it. I have tried common red clover and liked it. I have tried alsike clover and liked it. Each has its particular advantages, and none general superiority, in my experience. Alsike for wet, flat land—mammoth for bringing up fertility fast, and common red for common use. Mammoth will, in a good season, grow so large with me that mowing it is a weariness to the flesh and an aggravation to the spirit. But I have had it body high in a cow pasture all summer and the next year the corn was like a forest. Still, I am not sowing mammoth any more.

Poultry farming is profitable, but it is not a soft snap. Just as you get things down pat, they cease to pan out right, and the why and the wherefore are among the obscure things of this mundane globe.

Cold storage eggs lost money last year, but the high price of eggs this fall indicates that not all dealers have lost confidence in the fruit of the hen ranch. Perhaps the pure food laws help to stiffen the price, for the eggs sent to market must be guaranteed eggs.

There are ideal men and ideal women. The ideal man is like the equator—imaginary—and the ideal woman is practical only when she has several streaks of good horse sense ingrained with her ideality.

Agricola read in the family bible that the Jews were commanded—yes, commanded—to let the land lie idle one year in seven. The science of modern crop rotation was unknown and impracticable in that land at that time, had it been known, and one year in seven was necessary to permit the bacteria—an un-

known creation to them—to multiply undisturbed. Crop rotation with grass and clover in the rotation beats letting the land lie fallow. Rotation is the text of the modern gospel of agriculture.

I have tried the King road drag some, and find that on a road where every neighbor goes to town after a rain, there are drawbacks to good success with the King drag. Just as you get the mushy material swept into the road nicely, and before it has had time to "set," along comes a string of loaded wagons and squirts the slush all out again. If teams would only take the side track meantime all would be lovely.

Dairying is a solid business and will be so long as the inborn laziness of the genus homo and his natural disinclination to milk causes cows to increase at a less rate than population. If all farmers should get a move on themselves—a dairy hump in their backs—or if a successful milking machine should gain wide use, then the tables would be turned and stock farming revolutionized.

One spring I looked aghast at my young apple trees. The mice had girdled them during the winter. Banking with earth in the fall is a good preventive, and perhaps the best where the number of trees is great, as in nurseries. Painting with white lead is said, by an eastern orchardist, to be a sure preventive. I have never tried the latter method, but I have put wire screen around trees with satisfactory results. It keeps off all such pests, and partially shades in spring and summer, which is a protection against sun scald. But one year while I trusted to fall banking I was too late, as the field mice got in their destructive work while it was yet October. Generally they wait until snow covers the ground.

I think we make a mistake, practically all of us, in saving seed potatoes. We dump them all together and then in the spring select the individual potatoes according to our ideals of what a potato should look like. But the potato we select may be one of two or three in the hill which had unlimited room for symmetrical development. We should select from productive hills. A pig from a litter of three may have more attractive form than one from a litter of eight, but we do not wish to reserve for breeders hogs which have only three-pig litters, nor potatoes which grow but three in a hill.

I have no general experience in having a breeding plot for corn, but this spring I had three ears of corn sent me from

FREE

For a limited time I am offering the catarrh suffering public a full month's treatment free. You may have catarrh of the nose, throat, bowel, stomach, that if cured now will never return again. The most obstinate cases have succumbed to my new method in a few months—it costs nothing to give it a month's trial, and in that time you can determine if the benefits warrant you continuing the treatment until a permanent cure is effected.

Cured Patients Recommend My Treatment.

Dr. T. F. Williams.—I am perfectly cured of my head and ear catarrh trouble. I will not need any further treatment. I can truthfully say that I am in full enjoyment of good health, which is a good deal for one of my age, being in my sixty-third year. I want to thank you for your treatment and the interest you have taken in my case. W. H. PARKER.

Stuart, Iowa.

Dr. T. F. Williams.—My troublesome symptoms have all disappeared. I have a good appetite, and bowels regular, and have gained several pounds of flesh. I cannot express my gratitude to you for all that your remedies have done in my case. GEO. W. SMITH, Louisville, Ky.

Consulting Physician.

Dakota and I planted three rows, each from one ear, and a fourth from the mixed seed of the three ears. The results were suggestive. I shall not continue the test by selecting ears from the best row and planting each ear in a separate row, as I am convinced that my field corn which I grew from other seed is better for this locality, and have saved my seed from this.

Those who husked by the bushel this fall complained of the good stand, calling

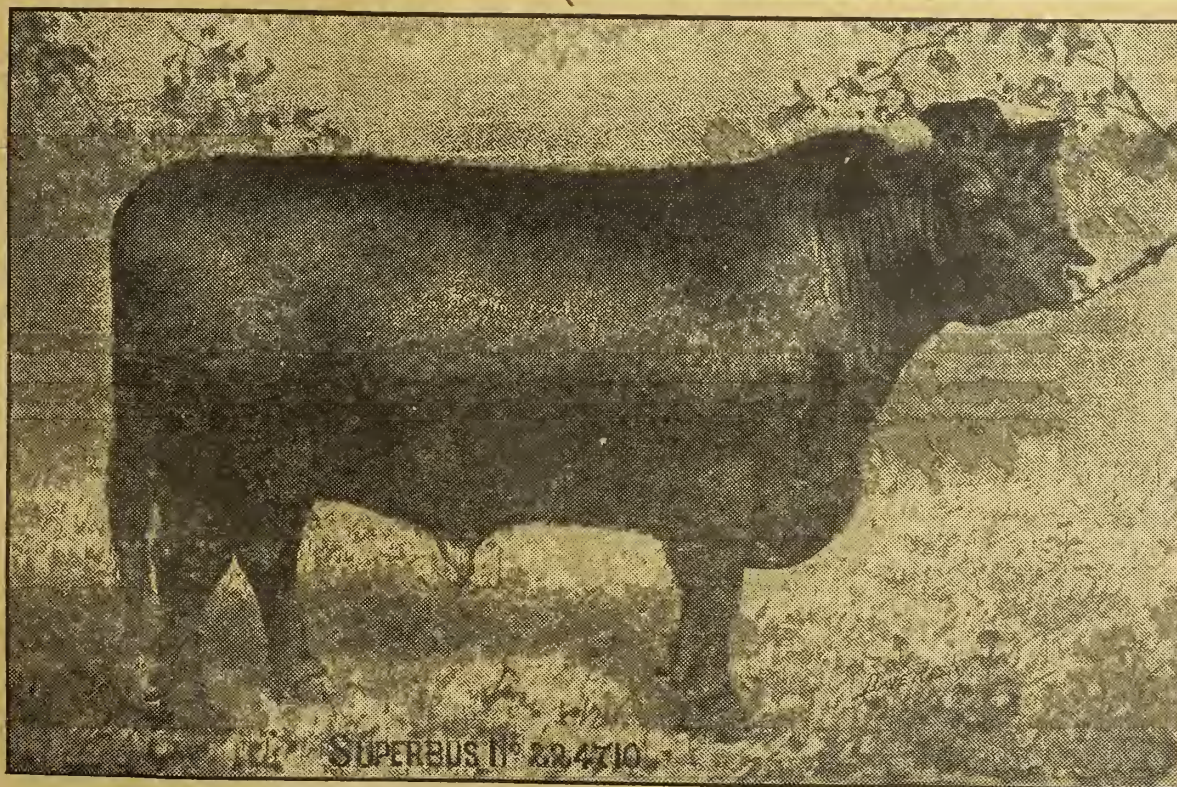

MORE BUSHELS WITH LESS POWER
Means that "Corn Belt" Feed Mills are made right and work right—that's why we can sell them on 20 Days Free Trial with full guarantee. The "Corn Belt" Mill grinds grain faster than any other, with less power, without heating feed. Catalog describes all its points of merit. Write for it. Besides sweep mills we make several sizes for power, and one combined sweep and power. Spartan Mfg. Co., 283 Chambers St., Galveston, Ill.

LADY AGENTS WANTED In every community. Our representatives make \$15.00 per week working afternoons. The Werner Home Treatment Co., L. Box 1133, Des Moines, Iowa

it a bad stand. That is, a thick stand is a bad stand for the husker by measure, as the ears are smaller and he has to husk more of them for the same amount of grain that he would have for a thinner stand. This recalls a fact incidentally which we do not always hold in mind—that much of the food of corn comes from the air, and depriving it of good air circulation and sunshine limits the amount of starchy material appropriated by the plant. Not much mineral matter is in the corn, and less than half the dry matter comes from the soil, so making the ground rich is simply furnishing plenty of soil food, and planting thinly gives the leaves a chance to revel in atmospheric food, and work it over under the stimulus of sunshine.

The government in one of its publications regarding the sugar beet treats of the kind of manures best fitted for the appropriation of atmospheric food. It may seem strange that the addition of any particular kind of soil food would affect the abstraction of atmospheric food, but it is found that it does. Some manures tend to make the plant grow longer leaves, and some broader leaves. It is better to have the increase in the breadth, as more leaf surface is produced by broadening than by lengthening, and consequently more carbonic acid gas (the common name) is decomposed by the leaf and the carbon appropriated for sugar formation. Other manures lead to the production of salts, which interfere with sugar manufacture.

But for general purposes, common farm manure is the thing needed. It furnishes fertility, it furnishes yeast—like bacteria, and it furnishes humus. Stock keeping is the handmaid of agriculture.

SUPERBUS 224710.

The public is already acquainted with this grand young Scotch bull. At the Interstate Fair at Sioux City he was placed second to the bull that was afterwards made reserve champion at Chicago in 1905. At twenty-three months of age he weighed 1,630 pounds, and was again made second to reserve champion at the International. He is low-set; has well-laid shoulders, well-sprung ribs, with almost faultless quarters. He has been bred to roan cows and to a few badly spotted white and red, and yet in every instance the calves up to date have been a beautiful red. The Ardmore Stock Company, of Holstein, Iowa, are offering this grand young bull in the Short-horn sale held during the week of the International in Chicago. This same firm is putting in, also, an extra good eight-year-old Scotch cow, Nana Lass, due to calve in January to Superbus.

ADVERTISING NOTES.

The Werner Home Treatment Company, Lock Box 1133, Des Moines, Iowa, announce on page 11 of this issue that they want lady agents in every community.

Agents are wanted to sell the Dr. Haux famous "Perfect Vision" spectacles. The advertisement giving further particulars will be found on page 8 of this issue of The Homestead.

The Jamison Mercantile Company, of Newport, Iowa, are placing on the market the Pixie sewing machine, which they are selling for only \$3.50. See their advertisement on page 8.

A business education is most eagerly looked for by the average young man or woman, and in this day, when the best is demanded by employers, too much care cannot be used in the choice of a modern business college; a college where the course of instruction is practical and where competent students are placed in permanent, good-paying positions with every chance of advancement. Such a college is Boyles Commercial College, 1804 Harney St., Omaha, Neb. The course of instruction in the various branches of business is complete and in every way calculated to fully equip the young man or woman for entering business. Many a successful young business man or woman of today date their success from the completion of their education at Boyles Commercial College. The large number of students enrolled and the constant stream of new pupils proves the success of the institution. Mr. Boyles believes in teaching the practical side of business as it is conducted today in our large offices, banks and stores. No old-fogy methods—and both building and methods fully up to date. As a practical man of business, Mr. Boyles is eminently fitted to impart the true principles of successful business. Many Omaha merchants and business men depend on Mr. Boyles to furnish them competent bookkeepers, stenographers, etc., and a competent student need fear no difficulty about being placed in a good position. The winter term of this highly popular and successful school begins December 3d. A fine catalog has been issued, full of illustrations and information of great value to those intending to take a practical reliable course of business instruction. Mr. Boyles will be pleased to send one free on request. Please mention The Homestead when writing. Address Boyles Commercial College, 1804 Harney St., Omaha, Neb.

Parke, Davis & Co. take pleasure in announcing through The Iowa Homestead that during the forthcoming International Live Stock Exposition at Chicago they will again be represented in the Record Building, also in the exposition building, just as last year. Visitors will be made welcome at both places. If you are one of the many who have visited Parke, Davis & Co.'s displays during the past seasons, come again; renew acquaintances and see the exhibit this year. If you have missed these displays before, this year is a good time to get acquainted. You will find there products for the cure and prevention of animal diseases that every live, up-to-date stockman is thinking and talking about. This will include Blacklegoids, for the prevention of blackleg in cattle; Anthraxoids, for protection against anthrax; Kresol and Kresol Dip, everywhere recognized standards of disinfectants and dips; Formaldehyde (P. D. & Co.), for the prevention of smut on grain; Mallein, for testing horses for glanders; Antitetanic Serum; Influenza Antitoxin; Cultures of Nitrogen Gathering Bacteria; Rat Virus, a means of destroying rats and mice by inoculating them with a disease that destroys only rats and mice. No doubt you have often wanted information on these very subjects. This is an opportunity to get some facts and talk the matters over with people who are making a scientific specialty of these problems. Parke, Davis & Co. are known the world over for the production of the highest grade of medicinal products, both for human and veterinary use. In their home laboratories in Detroit they are constantly carrying on experimental work along chemical and biological lines, seeking to improve old remedies and to discover new ones. The Parke, Davis & Co. representatives that you find at these displays will be men who are familiar with these investigations and who will take pleasure in discussing questions of this kind and supplying you with interesting reading

matter on any or all of the above subjects. Remember the places, Record Building at your left as you go in, and in the large exposition building. Cut this out and take it along as a reminder of one of the things you want to see at the International.

One hundred and sixty acres of good land, located in Nebraska, good for all kinds of grain, grass and vegetables, is offered for sale at \$10 per acre, only part of which may be carried, by Mr. J. H. McAllister, of Agee, Neb. See his announcement on page 23.

On page 23 of this week's issue appears the advertisement of the Rex Poultry Farm, a beautiful twenty-acre farm near the city of Des Moines, Iowa, which can be bought at a bargain. It is covered with fine fruit trees and berry bushes, and the improvements are also in elegant shape. The owner is obliged to sell on account of ill health, and hence, will make a good bargain for some man who would like a nice small fruit and chicken farm near the best city in the state.

There appears on page 7 of this issue the advertisement of the Southern Iowa Normal School, located at Bloomfield, Iowa. It is the leading school of southern Iowa and under its present management is one of the up-to-date educational institutions of the state. They teach normal, scientific, literary, preparatory, shorthand, typewriting, pen, art, music and elocution courses. None but the best specialists are employed as teachers, and students who are qualified are found positions if it is at all possible. We would suggest that farmer boys and girls who are thinking of attending school this winter write them for their free bulletin, addressing Mr. H. T. Brown, president, Bloomfield, Iowa.

DON'T BUY A FARM

Until you read the announcement of the Allen Investment Company on page 23 of this issue. They make a specialty of farms near Kansas City and are an old, reliable firm.

SOUTH MISSOURI LANDS.

The Davis Bros. Realty Company are offering some excellent bargains in Pulaski county, Missouri, farms. Do not fail to read their advertisement in the Lands and Homes department on page 23.

MORE THAN ANYBODY ASKS.

The great lamp chimney maker of the world, Macbeth, of Pittsburg, not only makes the best chimneys, but prints a most useful index to lamps and burners; from which one can find out what shape and size to get for his particular lamp. One is no longer dependent on grocers, etc., for the somewhat delicate service of fitting his lamp.

LOOK THIS UP.

To those who are interested in eastern Kansas farms the announcement of Messrs. W. H. Slaughter & Co., of Kansas City, Mo., will be of interest. Mr. Slaughter, of this firm, was formerly in the banking business in the locality where these farms are situated and does not list anything but those actually quoted at bottom prices. See their advertisement in the Lands and Homes department on page 22.

"ABSORBINE IS A GRAND ARTICLE."

Mr. F. L. Evans, of Plano, Ill., writes under date of November 14, 1905: "Send me one bottle of Absorbine. This is the fourth bottle I have had from you. I find it a grand article." You will find it the same. Absorbine merits continued patronage and gets it. It is a pleasant remedy to use—does not blister or remove the hair and horse can be used. Absorbine can be procured from your local druggist or I will send you a bottle express prepaid upon receipt of \$2. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

"TWO TO ONE."

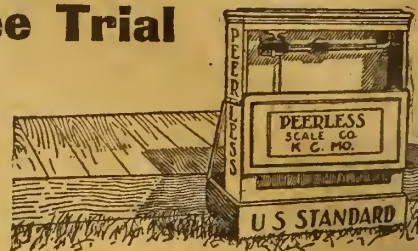

It's "two to one" that a pair of Rubberhide Boots will outwear two pair of ordinary boots. That may sound like a broad assertion, but there is every indication to believe it to be a fact. Rubberhide boots are not made simply as a boot. They are made as a boot to wear. On that quality the makers depend for sales. Some wearers might prefer two new pairs of boots to one at first thought. But on second thought their opinion will change. In wearing out two pairs of the ordinary article, there are two pairs of leaky boots and twice as many days to have cold, wet feet. Not so with the one pair. Just half the trouble at half the

Get This Peerless Pitless Scale

on 30 Days Free Trial

Direct From Factory

No Money In Advance
We Pay the Freight.

Don't Pay Two Prices: If the Peerless was sold through dealers you would have to pay from \$65 to \$80 for it.

If it had a steel frame you would pay from \$60 to \$100 for it anywhere. Peerless Frames Are Of Wood:—the others, costing 33 1/3 to 100% more, are steel; all inside working parts are practically the same.

We can sell this high grade U. S. Standard Scale at \$46.50 because we pay no profits to Salesmen, Agents, Jobbers or Dealers.

We can offer you a genuine free trial because the Peerless will stand the test.

The Peerless will do the work as well as any high priced Pitless Scale and better than the best old style pit scales, because more convenient to operate and saves you the big expense of digging and walling a pit.

A Peerless Scale is portable, too. You can move it to any point on your place, wherever it is most convenient for you to do your weighing.

Is it good business for you to take chances on the other fellow's weights

\$46.50

being right when you can absolutely protect yourself from loss at an outlay of \$46.50?

You might lose that much on one or two transactions!

If you weigh your grain, stock or anything else on a Peerless you know you're right and no one can contradict you.

The Peerless is Standard.

It's not a "cheap" scale at a "cheap" price. It's a high quality scale at a low factory price.

* * *

Send For The Catalog and you will be convinced. It describes every feature and every part of the Peerless in detail. You will make a big mistake to buy a high priced scale of any kind before investigating.

Remember our free trial is a real genuine free trial. No deposit, no notes to sign, no freight to pay, no red tape—

Absolutely no expense or no obligation until you are satisfied.

Let us send you a set on these terms for you to use a month.

Just put this paper down and write for the catalog now, before you forget.

PEERLESS SCALE CO., Dept. G, Wyandotte St. & Milwaukee Ave., Kansas City, Mo.

price. There is a lot more told about this boot question on page 19. If your local dealer does not keep Rubberhide Boots write to the Rubberhide Company, 612 Essex Bldg., Boston, Mass. Kindly mention this paper when writing them.

COLORADO LAND.

The W. F. Shelton Land Agency, of Kansas City, Mo., offer investors in western land exceptional opportunities in Cheyenne county near Cheyenne, Wyo., Colo. They have sixteen sections of good land that must be sold at once. Owing to the fact that the time is short the entire tract will be sold at a very low price, and on most favorable terms and reasonable cash payment down. Land in eastern Colorado has advanced rapidly during the last few years, and if you will please read their advertisement on page 22 you can form some kind of an idea of the great bargains offered by the above-named firm. If interested, better wire for particulars, as the time is short.

WHERE THINGS GROW.

In California things grow. That is the first impression of the newcomer. It impresses him stronger, the longer he remains. In one year trees grow two and three times as much as they do where winter holds forth for several months. For people looking for a more perfect climate it will certainly pay them to investigate a proposition in California. In the southern part of that state is some of the best land that can still be purchased at reasonable prices. A good place to write to is the Chino Land & Water Co., 516 Wilcox Bldg., Los Angeles, Cal. Some very neat booklets will be mailed if you mention The Homestead. See page 23 for further information.

HAVE YOU CATARRH?

If you are discouraged over money spent without any benefit to you, write Dr. Williams, of Des Moines, Iowa, asking him to send you his symptom blanks and books which treat of catarrh and its allied diseases. To convince you that he has faith in his treatment, Dr. Williams is offering one month's treatment free. So confident is he that you will receive prompt benefits and continue his treatment until cured, that he has no hesitancy in making this exceptional offer. His advertisement will be found on page 11. The writer has known Dr. Williams personally for the past twelve years. His business and professional methods are genuine and the reader need not hesitate to consult him.

THE CAREFUL STOCK FEEDER.

When it looks like feeding money to feed corn, oats, and grains, the careful feeder of stock begins to study. Every pound of grain must be made to produce the largest possible gain. In other words its efficiency to produce growth and gain must be as near 100 per cent as can be devised. If the common sense of the feeder tells him that he is not securing such results then he must act. The young calves can't make the best use of whole grains. The old milk cows could likely fill the bucket fuller on ground corn and oats. The old ewe, almost toothless, needs cornmeal to fatten acceptably for the butcher. So it goes; there is always a demand for ground grains on the farm. Time is money to the farmer as well as to any other business man. In buying a grinder consider its efficiency in this respect. Consider its durability and price. In fact, there are a number of points to think over, and the best way to get

next to such points is to send for a good grinder catalog. Such a booklet can be obtained from the Spartan Manufacturing Company, of Galesburg, Ill. Turn to their advertisement on page 11 and kindly mention The Homestead when writing them.

WHERE TO BUY YOUR NEW CUTTER.

Messrs. Sears, Roebuck & Co., of Chicago, are selling their new 1907 cutter gear for \$4.95—such a gear as is shown on page 13 of this issue in their advertisement. Their new piano body cutter costs \$8.95, while their finest high-grade Portland cutter costs but \$15.75. No one can tell in advance just how much sleighing there will be during the winter. When there comes a good fall of snow there is then a grand rush on the implement dealers for cutters and sleighs. It is much better to take time by the forelock and send to Messrs. Sears, Roebuck & Co., Chicago, for their cutter catalog, in which you will find some of the greatest offers along that line that have ever been made to the public. We have in mind a case last year where it was strictly impossible to purchase a cutter in a town of 6,000 population, and there were dozens of men in that community who passed through a six weeks' period of excellent sleighing and used nothing but wheels during that time. It is hard on a buggy to run in the winter if a sleigh can be used instead, and we therefore urge all our readers who contemplate buying a cutter to send to Messrs. Sears, Roebuck & Co. for their catalog. Three styles of cutters are given in their advertisement on page 18. Mention this paper when you write.

A NEW BOOK.

Most persons are interested in parrots and the new book entitled "Parrots and Other Talking Birds" just written by Mr. Chas. N. Page, of Des Moines, Iowa, the well-known author of "Feathered Pets" and other books on cage birds, will doubtless be received with pleasure by the reading public. This new book is written in such an entertaining way and is so full of amusing anecdotes and incidents that it will prove of much interest to the ordinary reader aside from its value as a technical book. It tells of the parrots in their native haunts; how they are captured and transported to market with very full and complete instructions for feeding and caring for them, and information as to the best methods of taming and training, including new ways of teaching them to talk, sing, etc. There has been a need for such a book as this for many years, and hundreds of persons have lost their birds through ignorance as to the best manner of caring for them, and strange as it may seem this is the first complete book ever published in America on this subject. It is written by a man who has had many years of experience in handling these birds and who has spent a great deal of time in traveling among the parrot dealers and trainers in various parts of the world. It is a book of 128 pages, thirty-two illustrations and a beautiful colored frontispiece showing six of the most prominent varieties of parrots in their natural colors. Price twenty-five cents, or cloth-bound volume seventy-five cents.

TREAT YOUR OWN HORSE AILMENTS.

Many animal owners make a serious mistake in not being prepared to do for themselves many things upon which they habitually seek aid from others. If a horse goes lame or a shoe ball develops, their first thought is of the veterinary. This means valuable time lost and is a waste of money.

ONE LEVER DOES IT ALL

ON THE

I.H.C.

You would rather operate one lever than to get mixed up with three or four. The I. H. C. Spreader has but one lever—the only spreader of that kind.

This is just one point of superiority over other spreaders. There are others.

No other spreader has a vibrating rake to level the load and bring the manure up square to the cylinder. Everybody knows a spreader works better and gives a more even distribution when the load is level.

Great power is required when a spreader is in operation to run its cylinder, move its apron, level the load, etc. The I. H. C. Spreader gets ample power from both the rear wheels of the wagon.

It not only gets more power but it is surer of its power at any moment. It makes no skips, and it avoids friction, side strains, and consequent breakage.

This same thing helps to secure the light draft for which I. H. C. Spreaders are noted.

Call on the International local agent or write us for catalog.

Send three two cent stamps for a copy of "Farm Science," Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U. S. A.
(INCORPORATED)

The commonest ailments of horses are not difficult to understand. With the aid of that matchless little book, "A Treatise on the Horse and His Diseases," published by the Dr. R. J. Kendall Company, of Enosburg Falls, Vt., there are but few ailments that every horse owner cannot understand. Then with the wonderful Kendall's Spavin Cure, which has been the foremost remedy for nearly two generations, he will be able to cure, absolutely, the great majority of injuries and ailments. It is the rarest thing that a spavin or a ringbone, curb or splint, if treated in time, does not yield to this great remedy. If horse owners will keep it constantly on hand, they will be able to treat for themselves and to treat promptly upon the first appearance of the growth. They will be far more certain to effect an absolute cure than the veterinary will if treatment be delayed. It is the old cases that are stubborn. Veterinaries cannot certainly cure them. But when taken in time we doubt whether a single case can be produced where this old standard remedy will not effect its cure. What is true of spavins, ringbones, curbs, splints, is doubly true of such casual ailments as cuts, wounds, ordinary lameness, etc. Kendall's spavin cure is a dependable remedy, and horse owners would do well to keep it always on the shelf.

A MAMMOTH NEW INDUSTRY FOR KANSAS CITY.

This periodical takes pleasure in calling the attention of its readers to the full page advertisement of the Crude Oil Power Company, which appears on page 15 of this issue. A reporter for this paper, in order to verify the statements of this company, visited its offices and lands and finds that located at the junction of the Missouri Pacific and Mexico & Orient belt line railways on a five and one-half acre tract of land in Kan-

E. E. RICHARDSON.

Vice-president and the active manager of the Crude Oil Power Co., who, for thirty-two years, has been the secretary treasurer of Kansas City's most successful institution, the Kansas City Stock Yards Co.

sas City, Kan., a company called the Crude Oil Power Company is, by the expenditure of upward of \$100,000, establishing in Kansas City an industry that will prove a most valuable acquisition to the large number of manufacturing industries already located here. The Crude Oil Power Company will, however, occupy among them a unique place, as the company proposes to manufacture an engine that will eventually supersede all engines now operated by gasoline, alcohol, naphtha, and in some instances by steam. This

remarkable invention uses, as the name of the company implies, ordinary crude oil as fuel. The company claims to produce as much power from a barrel of crude oil as can be produced from a barrel of gasoline. Inasmuch as a barrel of gasoline costs about \$6.50 and crude oil only about sixty cents per barrel, power can be generated by this crude oil engine for about 10 per cent of the cost of operating a gasoline engine. Another, and perhaps more important invention will be manufactured by this company. It is called the portable refiner. Its inventor and the company claim for it that it can be attached to the pumping apparatus at the oil well, no matter how great or

MAJOR F. C. VINCENT.

Fiscal agent of the Crude Oil Power Co., formerly officer of the United States Army, and successful organizer and financier of many of the largest industrial propositions in the middle West.

small the flow of oil, and that it will refine the crude oil as it flows from the well. This latter invention should prove a veritable boon to the independent operator, for it will enable him to refine his own product and market it, the company says, at 50 per cent less cost than by any other method of refining oils. At present Kansas City has no manufacturers of cast steel and malleable iron castings. Heretofore all such products were purchased in Chicago or St. Louis and as the eastern factories were generally from six to eight months behind with their orders. Kansas City users of this material have been greatly inconvenienced and forced to pay extraordinary large prices for same. The Crude Oil Power Company is building an up-to-date, first-class foundry for the manufacture of cast steel and malleable iron castings and by so doing is filling a long-felt want in this community. The company is already assured of orders that will tax the full capacity of this department of its works. The Crude Oil Power Company will undoubtedly be of great benefit to this community. Kansas City needs industries of this character. The officers of the company are: President, G. W. Fitzpatrick; vice-president, E. E. Richardson; treasurer, W. C. Howe; secretary, A. A. Oshorn. Mr. F. C. Vincent is acting as financial agent for the company, and is in charge of the offices. It is expected that the company's plant will be in operation by January 1, 1907. In justice

SUCCESSFUL TOOLS

These Chisels have carved their way to fame. To-day, those who know tools pronounce the Keen Kutter the perfect Chisel Success. Tempered nearly to the handle; hand whetted; sharp and ready for use; handles of selected white hickory with leather heads.

KEEN KUTTER

QUALITY TOOLS

are all successful tools—tools that have won their way by hard, honest, true work. Every step in their success has been reached by sheer force of merit and quality. Keen Kutter Tools include—Saws, Chisels, Bits, Glimlets, Axes, Planes, Hammers, Hatchets, Axes, Drawing-knives, Pocket-knives, Screw-drivers, Files, Pliers, Glass-cutters, Ice-picks, and a full line of Farm and Garden Tools. For 37 years Keen Kutter Tools have been sold under this mark and motto:

"The Recollection of Quality Remains Long After the Price is Forgotten."

Trade Mark Registered.

If not at your dealer's, write us.

Tool Book Free.

SIMMONS HARDWARE COMPANY, St. Louis and New York, U. S. A.

to its readers it is the policy of this paper not to accept advertising of this character, without first thoroughly investigating the legitimacy of the enterprise. This paper is personally acquainted with the officials of the Crude Oil Power Company, and does not hesitate to give this enterprise its fullest endorsement and co-operation. See page 15 for advertisement.

1,000 Pointers for Stock Raisers.

We have just received from Sears, Roebuck & Co. a copy of a book entitled "1,000 Pointers for Stock Raisers," published by the Davis Stock Food Company, and distributed by Sears, Roebuck & Co., that is a radical departure and a much more pretentious volume than has ever been attempted along similar lines.

The book consists of 548 pages, and from cover to cover is filled with valuable information for the farmer and stock raiser. The book treats exhaustively all the feeding problems that the stock raiser will meet with. Every disease known to live stock is thoroughly covered, giving the cause, symptoms and treatment, and the treatment is not confined to that supplied by the various remedies manufactured by the company, but good, common sense treatment that the farmer himself can obtain from his local druggist is given in perfect candor. There are numerous

plans and specifications, together with itemized bills of materials, for poultry houses, farm residences, barns and dipping vats. There is a chapter devoted to irrigation, explaining fully how the farmer may lay out and construct his own irrigating ditches. There is also a full chapter on good country roads that is worthy of more than passing notice, and the final chapter in the book, entitled "The Truth About Stock Foods," will prove an eye opener to the up-to-date stockman. This question is treated exhaustively. Many of the fallacies and heretofore mysteries surrounding the manufacture of stock foods is laid bare, and the ingredients of stock foods are openly published.

There is some mighty interesting information on page 36, regarding the true and comparative value of feed stuffs, and horse-men will be more than interested in the information contained on page 39. The up-to-date dairyman will find some valuable information on page 73, and there are some mighty interesting facts regarding the digestibility of feeds on page 101.

The book, however, is much too extensive and treats its subject much too exhaustively for us to attempt to describe it in a short article. Suffice it to say that the value of such a book cannot be estimated in dollars and cents, and it has evidently cost a world of time, research and money to get the book out.

We cannot too strongly urge our readers to send for a copy of this book at once. It is being sent to all farmers and stock raisers who will write Sears, Roebuck & Co., Chicago, and tell them how many head of stock they own. By all means send for it today. You will be agreeably surprised at the hook.

Short-horn Sale Results at Milton, Iowa.

One of the popular sales of the season was held last week in southeastern Iowa. It consisted of a collection of animals from the herds of Messrs. E. C. Holland, of the above place; J. E. Guernsey, of Keosauqua, and Sample Bros., of Lebanon. A good-sized crowd gathered at the sale tent situated on the outskirts of town. Strangers and neighbors were very hospitably entertained at the house and an enjoyable time was spent. A great many of the animals remained in the neighbor, which speaks well for the esteem in which these breeders are held by their countrymen. Colonel Barclay, assisted by Colonel Burchard, conducted the sale in a very satisfactory manner. Bids came only moderately fast and the best and highest-priced animal was a splendidly-built young roan bull which, after a spirited contest, went to Mr. A. C. Browning, of Memphis, Mo. It was a good, useful lot of animals that sold at bargains. Animals are herewith designated by catalog numbers:

BULLS.		
Lot.		Price.
4	A. C. Browning, Memphis, Mo.	\$137.50
3	E. E. Hargrove, Milton	70.00
7	H. Pittman	47.50

Tillicairn 150069, the subject of the above illustration, was imported in dam by Messrs. Hannah & Co., of Howard, Kan. He is a nicely-bred Scotch bull got by the Marr-bred bull, Spicy Monarch, he by Spicy Robin and out of a daughter of the great Wm. of Orange. Spicy Monarch's dam, Imp. Circe 3d, is a richly-bred Scotch cow that has proven a good producer. Tillicairn is a rich red roan, weighs in his every-day clothes 2,250 pounds. He sells in Mr. W. W. Brown's dispersion sale of Short-horns at Kansas City, Mo., Wednesday, November 28th.

Echoes From a Kansas Farm

By Henry Hatch

The man who visits this fine weather may be compelled to work during the bad weather that follows. This is the way we look at improving the fine weather during the fall.

"Do you know of any farm to rent?" This is the question asked us almost every time we are off the farm. About everything has been rented, with renters still looking for locations.

We believe in the young man making every lick count towards getting a home of his own. In twenty years from now, if land keeps advancing in price, the man without a farm, starting in at the bottom, will stand a poor show of getting one right away, especially if he be a man of past middle age.

Of all the different varieties of corn we have raised this year, we have settled down to the white, and nothing but seed of that is being saved. It is a variety we call "Kansas King;" at least it resembles that variety nearer than any other we know.

There is a talk of trying to repeal the present road law in this state, enacting another that is hoped will be more satisfactory to all concerned. As it is now we pay all road tax except the polls in cash. It is noticed that the cash is often not expended very near to where it was collected. Some heavy tax-paying sections of the different townships have received little or no benefit.

If this present fine weather holds out for a few days longer we hope to get one job done this fall that is a nuisance in the spring—that of breaking stalks. We aim to harrow one way, then cut the other way with the disk harrow. This helps the land and cuts the stalks up well, if the weather is dry. Trying to cut stalks before freezing weather is a useless piece of work if the weather is the least bit damp.

It doesn't do to get in too much of a hurry to shell corn after it has been husked, if any amount is going to be stored in one bin. Many pile outside, then shell and put in a granary, to save room. Where rats are bad, it gives them less chance to get in their work, but shelled corn is not the best to feed to hogs in all kinds of weather, without having some sort of a feeding floor.

We notice that the packers like to get prices for hogs down as low as possible about this time of the year. Some say it is on account of tax-paying time, reasoning that many have to sell about this time to get money with which to pay taxes, but we believe it more on account of the beginning of the heavy packing season. They like to start on as low prices as possible.

Did you ever go out to the corn field, perhaps over a half-mile from the house, with the husking peg you have been used to using left behind? We did that trick this afternoon, so had to fall back on an old straight peg we happened to have along. After using the hook husker, the old style seemed awkward. It is strange how one adapts himself to any certain thing, but it doesn't take long to get back to a way that was once learned. They say a calf that was used to being tied will not forget it when a cow.

We have been particularly fortunate in one thing if we have been unfortunate in others; we never have yet lost a hog by cholera. We claim it has been no power or prevention of ours that has kept the disease off the farm, but we seem to live in a section where the disease has never done much injury to the hog raiser. Cholera seems to live for years in a community where it was once wide spread. The germ must be a hard one to kill.

The going-to-town habit is strong with some. Altogether too many farmers buy in too small quantities of those things they must have within a few weeks. What's the use of buying sugar by the half-dollar or quarter's worth, when a

hundred-pound sack will be used within six months? Other groceries and necessities can be bought at a great saving by buying in quantities. We sometimes think there are some who buy in small lots—the supplies for a week—just to have an excuse to go to town every Saturday.

It seems the later seasons have been moved ahead a few weeks in each year. The winter is slower in coming than was once the case, and weather when field work can commence is slower to arrive in the spring. This may be imagination, but we can remember when it was not safe to depend upon husking much corn after the first week in December, without doing it in the snow. For several years, too, we have growled around about seasonable weather being so slow to put in an appearance in the spring.

WORST FORM OF ECZEMA.

Black Splotches All Over the Face—Affected Parts Now Clear as Ever—Cured by the Cuticura Remedies.

"About four years ago I was afflicted with black splotches all over my face and a few covering my body, which produced a severe itching irritation, and which caused me a great deal of annoyance and suffering, to such an extent that I was forced to call in two of the leading physicians of my town. After a thorough examination of the dreaded complaint they announced it to be skin eczema in its worst form. They treated me for the same for the length of one year, but the treatment did me no good. Finally my husband purchased a set of the Cuticura Remedies, and after using the contents of the first bottle of Cuticura Resolvent in connection with the Cuticura Soap and Ointment, the breaking out entirely stopped. I continued the use of the Cuticura Remedies for six months, and after that every splotch was entirely gone and the affected parts were left as clear as ever. The Cuticura Remedies not only cured me of that dreadful disease, eczema, but other complicated troubles as well. Lizzie E. Sledge, 540 Jones Ave., Selma, Ala., Oct. 28, 1905."

Care of the Herd Boar.

To the Editor of The Homestead:

The selection, care and management of the boar to head his herd is the greatest problem that the breeder of pure-bred swine is called upon to solve. Much, if not all, of his success depends upon his choice in this, and the man who is a breeder cannot look upon this as an unimportant item for consideration.

The individual himself, the family lines and the reputation of his breeder are all important facts to be taken into account. He may be a fine looking animal, but what about his sire, his grand-sire and his great grandsire, his dam, his grandam and his great grandam? Were they all good ones?

We cannot expect a boar, no matter how good an individual he may be, to make a great sire unless his ancestors for a number of generations have been good ones. We are very fortunate when we secure a good one, and when we have him we should give him the best opportunity possible, for a large part of our success depends on how we care for and manage him.

Many a good boar is put in a dirty pen and confined the year round without exercise, and by the time he should be in his prime he is ruined by excessive service and lack of proper nourishment. Give him a yard of an acre with a strong fence around it, away from the rest of the herd. Give him a warm, dry sleeping place in the winter. Make him think he is of some importance and not look upon him as some wild beast and carry a club or an axe every time you go near him.

His disposition toward you will be just what you make it yourself. He will remember all the kindness and rubbing you do for him and won't forget all the meanness you do to him. The average boar is not such an ugly animal as most people think he is, and he is as quick to understand kindness as any other animal. Do not envy him his feed; give him all that is necessary to keep him in good thrifty condition. Skin and bones with the best of pedigree cannot beget good pigs.

His feed when not in service may be

L. F. BERRY,

General Agent, C. & N.-W. Ry.,

401 Walnut St., DES MOINES, IOWA.

of a succulent nature, mainly pasture during the summer months and roots in winter. He can hardly be sustained on this alone and some grain should be fed to keep him in condition. This should contain a large per cent of protein, middlings, shorts, bran, some oil meal and a little corn. As the breeding season approaches his feed should be increased so that he will be in good condition. While not in service plenty of exercise should be given him, even if against his inclination.

Without exercise it is impossible to keep well developed muscles and general thrift. With a boar in a thrifty condition and active, soundness of the reproductive organs is reasonably certain. During the breeding season care should be taken that his energy is not wasted in too much exercise and excessive service. The drains on a boar during the season of breeding fifty or sixty sows are severe. Careful feeding will do much to keep him in condition and bring good results. A well-matured boar should not serve more than two sows

daily and not more than fifty or sixty during a season.

Many breeders fail to make a success of the business because of the careless and indifferent care and management of their boars; the sows occupy by far the greater amount of attention. Too much attention cannot be put to the care of the boar if a success is made of the business.

Willard M. Kelly.

Cowley county, Kan.

About ten years ago a man in one of the western states discovered that it was mud that made the roads muddy. That was a pertinent discovery and it is a wonder some man did not discover that before. Now if some man will only discover what makes mud and how to get rid of it, we'll have the good roads solution solved and soon there will be good roads all over the country.

When the husking mittens have been cut out and are ready to sew up, they can be made to last longer by sewing the scraps on the parts where wearing is hardest so they will come on the outside. When sewed on then they can be finished and turned for business. No better material has been found than heavy cotton flannel.

**The Only Steel and Malleable Iron Casting Plants in the
Entire Southwest**

No Stock Jobbing Mining
Scheme. A Safe, Conservative
Manufacturing Enterprise.

The Crude Oil Power Company

Strongly Endorsed by the Manu-
facturers and Merchants' Asso-
ciation of Kansas City, U. S. A.

A MANUFACTURING INDUSTRY THAT CANNOT BE SURPASSED AS A DIVIDEND EARNER.

The Crude Oil Power Co. is incorporated under the laws of the District of Columbia, under Federal Supervision for \$1,000,000, divided into 1,000,000 NONASSESSABLE shares, par value of \$1 each.

The Company is now building two great factories, one in Kansas City, Mo., and the other in Sour Lake, Texas. The Kansas City plant alone covers 5½ acres of ground. These factories will be in operation by January 1st. They represent today an outlay and value of \$235,000. There is not a cent of incumbrance on the property.

This mammoth steel and iron casting foundry will be the only one for the manufacture of iron and steel in the Southwest. All orders for steel and iron castings have to be placed in the East. The factories there are about nine months behind with their orders.

The Crude Oil Power Co., turning out at the very start 30,000 pounds of steel and malleable iron castings per day will be without competition in the entire Southwest.

This Company controls, furthermore, all rights to manufacture the new Crude Oil Engine and Portable Refiner and Generator. This engine will be manufactured at a very minimum cost and will be sold at a very large profit. As it can be operated from the crude oil it will absolutely displace the gasoline engine.

The Portable Refiner will refine crude oil at the wells. This will effect a revolution in the oil business, as the independent producers can cut down 50 per cent of the cost of refining.

The profits from the casting foundries alone will reach \$200,000 a year. With no freight to pay and with no fuel bills, as ample natural gas is developed at the Company's own plant, this Company can drive the eastern producer out of the Southwest. It has the field to itself. The demand for steel and malleable iron castings is limitless. Now, look; sit up and take notice that the Crude Oil Power Co., WITH ITS FACTORIES ALMOST COMPLETED, makes the following remarkable offer:

To procure additional funds for the development of the company's properties, and to complete its work, the company is now offering an issue of 100,000 shares of stock.

THIS ISSUE IS OFFERED AT 25 CENTS PER SHARE, PAR VALUE \$1.00. The subscriptions of careful investors is invited to this issue. The stock will earn at least 15 per cent from the foundry department alone, making at present prices a profit of 60 per cent on the investment.

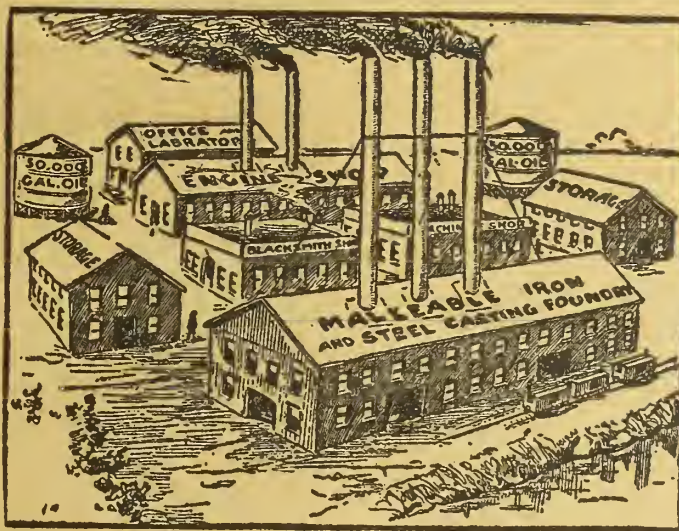

In this estimate no account is made of the profits accrued by the sale of the crude oil engine and portable refiner. This department alone will add vastly to the financial possibilities of the company.

The high character, business ability and integrity of the personnel of the officers and directors of the CRUDE OIL POWER CO. could not be excelled. They are as follows: President, G. W. Fitzpatrick, M. D., physician and capitalist; vice-president, E. E. Richardson; secretary-treasurer, K. C. Stock Yards Company; treasurer, W. C. Howe, president S. W. Oil & Mineral Co.; secretary, A. A. Osborn, inventor and constructing engineer, all of Kansas City, Mo. The Company most cheerfully invites and urges full inquiry as to the character and standing of the above-named gentlemen.

We refer you by permission to the Interstate National Bank, Kansas City, Kan., and State Bank of Kansas City, Kan.

IMPORTANT NOTICE.

As our 25c allotment of stock is almost subscribed for, it is important that I should have your subscription immediately if you want stock before the price advances. This stock advances in price December 10, 1906. Everybody who has investigated this Company has either bought stock or reserved same. Another opportunity equalling this will probably never be offered you. I earnestly advise you to let me hear from you by return mail or by telegram. F. C. VINCENT, Fiscal Agt., 425 Gibraltar Bldg., Kansas City, Mo.

\$235,000 ALREADY EXPENDED ON THE COMPANY'S PLANTS

A Practical Illustration of the Two Mammoth Plants of the Crude Oil Power Co. at Kansas City and Sour Lake, Texas, as They Will Probably Appear When Completed. Invest in a Sure Thing.

Substantial Investment

We are building an enterprise the demand for whose product is as STABLE, PERMANENT, AND SUSTAINED AS THE DEMAND FOR BREAD AND BUTTER. Investment in this industry carries with it NONE OF THE SPECULATIVE RISKS incurred by an investment in mining stocks or a gambling flyer in the wheat market. We are offering you stocks whose values are, and will be, as safe as a real estate purchase, or an investment in Government bonds, with infinitely GREATER PROFIT to you. Every dollar derived from the sale of the treasury stocks will be used for further development of the Company's interests. Investment in an industrial enterprise, manufacturing a staple commodity, having no competition and for whose products there is heavy demand, carries with it no risk.

The Metropolitan Street Railway Company, the twenty-three railroads entering Kansas City (the second largest railway center in the world), the fifty odd automobile repair shops, the Kansas City Automobile Company, the many great Portland cement plants in and around Kansas City, the packing houses, and a hundred other important industries contiguous to Kansas City each use thousands of dollars' worth of new steel and iron castings each year.

Kansas City has entered upon the era of steel and iron buildings. If the CRUDE OIL POWER CO. were in operation today the chances are that no Des Moines or other outsider would have supplied the iron for the magnificent R. A. Long building. No other foreign firm would be erecting and supplying the iron frame work of the great Scarritt Building.

This Company proposes to be in the market when the new Bank and Commerce building, the new Victoria hotel, the new Y. M. C. A. building, the new Armory, and the new Union Depot are ready for construction. Kansas City has, for many years, felt the dire need of a factory of this character. We are supplying this need and WE PROPOSE TO GET THE BUSINESS.

Millions of tons of malleable iron and steel castings are used every year in Kansas City and the southwest states. Every pound of this material has come out of the eastern factories, which are now from six to nine months behind with their orders. Our foundries, machinery buildings, blacksmith shops, offices, and laboratories will cover upward of five (5) acres of land, advantageously situated on the Missouri Pacific and Orient Belt Line Railways. WE HAVE DEVELOPED OUR OWN NATURAL GAS ON OUR OWN GAS AND OIL LAND. Thus there will be no fuel cost. We are in Kansas City, so there will be NO TRANSPORTATION to the great Kansas City market, which in itself can take our entire product. With NO FUEL AND NO FREIGHT TO PAY, eastern producers can not compete with us. We have the field to ourselves. Kansas City alone is using upward of 300,000 tons of steel and malleable iron castings annually. There will be no limit to our development.

Carnegie, Schwab, Fick, Nixon, Ellis, and a host of other multi-millionaires have accumulated IMMENSE FORTUNES FROM THE STEEL AND IRON INDUSTRY. They were the pioneers of this industry in Pittsburgh. WE ARE THE PIONEERS OF THIS INDUSTRY OF KANSAS CITY. If you are anxious to participate in our absolutely assured profits you will fill out the coupon below and mail it today. It costs you nothing to inquire.

The Crude Oil Power Co. will manufacture at the very start 30,000 pounds of steel and malleable iron castings daily at a net profit of at least \$600 per day. Our factories, in order to supply the demand, must run day and night. Thus our annual net profit on this department alone will exceed \$200,000. This Company will be compelled to constantly increase its output, so \$30,000 will be set aside each year for this purpose. This will leave a net dividend of 15 per cent on the entire capital stock the first year, and largely increased dividends each year thereafter.

Read This and Permanently Increase Your Income

**It Costs You Nothing To Inquire. Fill Out Coupon Below
and Mail Today.**

This Company

is building TWO GREAT FACTORIES, one at Kansas City, the other at Sour Lake, Texas. Both plants will have the same initial capacity, and both will have the advantage of natural gas for fuel and splendid transportation facilities. The Company's purpose in both plants will be:

First—A Steel and Malleable Iron Casting Foundry—to manufacture Malleable Iron and Steel Castings at a larger net profit than by any other known process. THIS WILL BE THE ONLY PLANT OF THIS CHARACTER IN KANSAS CITY, and we are already assured of orders that will tax the full capacity of this department. This department alone will pay big returns on the total investment.

Second—A Portable Crude Oil Refiner and Burner—to manufacture Special Machinery for Refining Crude Oil at the wells. These machines can be manufactured at a nominal price for great profit, and they will REVOLUTIONIZE the Refining of Crude Oils. The use of this machine makes it possible to refine crude oil at 50 per cent less than by present methods. The Burner is the only satisfactory one invented.

Third—A Crude Oil Engine—to manufacture a Crude Oil Engine which is destined to SUPERSEDE the present gasoline engine, because the same initial horse power can be developed at one-half the present fuel cost. These engines can be used wherever the gasoline or steam engine is used. The special Crude Oil Burner manufactured by this Company can be affixed to any stove, furnace, or boiler at low cost and large profit. The use of this Burner will make it possible to heat, cook, and steam at less cost than by using natural gas, gasoline, kerosene, wood, or coal. Just think of an engine that will develop the same horse power at half the cost. No need to use gasoline, coal, or even denatured alcohol; just crude oil at less than 60c per barrel, instead of gasoline at \$6.30 per barrel.

Our Monthly Payment Plan

Gives everyone, rich or poor, an opportunity to become a stockholder in one of the big industries of the country. The proposition is up to you. If you neglect to investigate it and learn for yourself what an investment in this stock means to your future you have yourself to blame.

You can buy stock now at 25 cents per share and have several months' time to pay for it. It will pay you to buy all you can carry before the advance, as stock with such value behind it cannot remain long at such a low price.

\$10 buys 40 shares of stock, payable \$5 down and \$1 per month.
\$50 buys 200 shares of stock, payable \$15 down and \$5 per month.
\$100 buys 400 shares of stock, payable \$30 down and \$10 per month.
\$250 buys 1,000 shares of stock, payable \$50 down and \$25 per month.
\$500 buys 2,000 shares of stock, payable \$50 down and \$50 per month.
\$1,000 buys 4,000 shares of stock, payable \$100 down and \$100 a month.

F. C. Vincent, Fiscal Agt.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

There were six women in the party; they were all wives, and three of them were grandmothers. As they left the dining room after luncheon, the hostess remarked that she wanted their advice for a young man who had appealed to her as editor of the Home Department. "You will understand better if you hear his letter," said she, walking toward her desk and picking up the open missive, "so I shall read it aloud to you. Here is what he says:"

A young man age twenty-eight and a lady of twenty-five are engaged, but have decided to delay marriage a few years. On Sunday he takes her to her people, with whom she does not stay during the week, but frequently visits them. The older sisters usually constitute the other company at the home. (1) Can the young man expect her to visit with him alone a good share of the time? (2) If the stay of the couple at the home during afternoon and evening lasts four or five hours would an hour after others have retired be all that a young man ought to demand of her company exclusive? (3) If she who is acquainted with the ways of the world, possessing a high school education, and does her own thinking, treats former suitors, with whom she has had many good times, just as friendly and familiarly as before, can the young man base any conclusions on that as to whether there existed sufficient congeniality, liking or love between them?

"Tell him to trust the girl, said white-haired Dr. A., almost before the last word had died into silence. "His trouble is that he is mistrusting the woman he asked to be his wife. My prescription is: 'Daily doses of trust—large doses—repeated regularly until the malady disappears.'"

"Tell him he should marry the girl at once if he wants her all to himself," said Mrs. W., a little Irish gentlewoman of the old school. "If he lived in the old country, he wouldn't be allowed to see a girl even one hour after the family had retired."

"Not after they were engaged?" queried Mrs. H., who was wearing one of her trousseau frocks.

"Certainly not. Then less than ever. Engaged girls are most carefully guarded. Except walking a few times, I was never alone with my husband until after we were married. Such a thing as an engaged girl sitting up alone with her lover would have been thought positively indecent where I was brought up."

"Well, it's different in this country," said Mrs. M., the mother of Mrs. H. "We go too far the other way, perhaps, but I believe young people should be given opportunity to become thoroughly acquainted, which they cannot do in company. They should learn each other's tastes and characters, so that if they are unsuited they may find it out before marriage, instead of after."

"Well, what would you say to the young man, then?" asked the hostess.

"Oh, I don't know. So much depends upon circumstances. One thing I do know, I don't believe in young people courting after the family has gone to bed. But we haven't a word from Mrs. P. What would you say to the young man?"

"I don't know, exactly," responded Mrs. P. "Like you, I believe young folks should be permitted to see a good deal of each other. I think perhaps those sisters might take themselves off a little earlier, or at least withdraw to some other part of the room. I should be in favor of giving the young couple more time alone, but in the earlier part of the evening. While we trust our girls and our lovers, we all know that many a heart-break has come from too much liberty in this direction."

"Better advise the young man to give his sweetheart or her sisters a gentle hint along the line Mrs. P. suggests, Mrs. Editor," said Mrs. M. "And now, what was the other question?"

"I noticed that one specially," said the bride. "I don't understand an engaged girl caring for the company of other men."

The company smiled, and the hostess murmured: "Circumstances alter cases." "Yes, indeed," echoed gentle Mrs. P., "and I don't see why a girl should give up all her men friends, or even change her manner to them, just because she is engaged—particularly if the engagement is to last for a considerable time."

"Now, we've all said our say; tell us what you intend to say to him, Mrs. Editor," said Mrs. M., turning to the hostess. The editor smiled and shook her head. "Giving editorial advice is

FROM DRUDGERY TO BUSINESS SUCCESS

IS A SHORT STEP

Thousands of boys grow to manhood toiling at the hardest kind of work because they do not know that good business positions are within their grasp.

Big commercial houses and railroad companies want capable young men. They have positions as bookkeepers, shipping clerks, cashiers, stenographers, telegraphers, etc., which they can't fill satisfactorily because the right kind of boys are scarce. Banks, wholesale houses, railroads and packing companies have standing orders with Boyles Business College for all the competent young men and women the college can turn out.

FARM BOYS PREFERRED BY ALL BIG BUSINESS HOUSES

They prefer farm boys because of their steady habits and willingness to work and learn. Used to outdoor life farm boys have health and strength. Used to work, they don't shirk. Men at the head of the largest mercantile houses in the United States were once boys on the farm. Business men know this and prefer farm boys.

A boy of ordinary intelligence and industry can equip himself by a course in a business college to fill one of the many good positions waiting for competent young men. Boyles Business College is the largest commercial school and institute of shorthand and telegraphy west of the Mississippi River. Owns and occupies an entire building. It has a large staff of competent instructors. Graduates are assisted to positions. Students may work stenographers, bookkeepers, or telegraphers. Write today.

Big Catalog Mailed Free—Write Now

The Easy Way

A child of ten can run an O.K. washer, standing or sitting, and do the work right. It is just simplicity itself. No complicated and expensive parts like machines that squeeze, pound and force water through the clothes. Fly wheel turns either right or left—pin wheel reverses automatically. Clothes are turned back and forth through the hot suds, dirt is dissolved and they are cleaned thoroughly and perfectly and quickly.

O K WASHING

O.K. washers are sold on their merits alone. We make no "free" offers.

So is every other washer sold. Do not be caught by "free" talk. If you don't believe it just try to get one of their machines for nothing. O.K. sales have increased in six years from 25 a week to 350 a day. Sold, mind you, not given away. It's the washing machine people are glad to buy when they know it. And it's sold at a fair price. Our free book explains. Write for it.

H. F. BRAMMER MANUFACTURING CO., 1455 Rockingham Road, Davenport, Iowa.

pretty serious business. I don't know yet what I shall say to him. I shall have to think it over."

She has thought it over. What she thinks, you shall hear next week.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.
 We cannot make bargains for blisses.
 Nor catch them like fishes in nets;
 And sometimes the things our life misses
 Help more than the things which it gets.
 —Alice Cary.

For us—whatever's undergone,
 Thou knowest, willest, what is done.
 Grief may be joy misunderstood:
 Only the Good discerns the good:
 I trust Thee while my days go on.
 —Elizabeth Barrett Browning.

THE THANKSGIVING TABLE.

If you cannot get autumn leaves or flowers for the Thanksgiving table use crepe tissue paper. Cut out leaves and spread on the table—maple leaves, oak leaves or ivy leaves look the best against the white tablecloth. The fruit—apples and oranges—may be placed in a dish lined with green tissue paper. Deep yellow and orange paper doilies under the white or blue and white china add to the decorative effect.

THE THANKSGIVING DINNER.

The Thanksgiving dinner is primarily a family dinner, and because of that fact more

than any other great care should be exercised in the appointments and the serving. Be sure to have a pumpkin as a center piece. Cut it out about one-third from the top and fill it to overflowing with the prettiest fruit you can find, including small red apples and Malaga grapes. If the room is to be darkened, or if your dinner is to be served at night, the candle shades for the table may be yellow. At each place a little paper-mache turkey with the name card attached

IOWA FARM GATES

Swing over the Snow

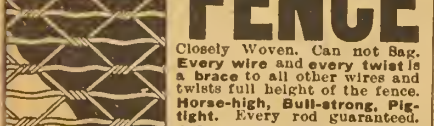

NOTHING bothers a farmer more than his gates in snow time. With the IOWA raise your whole gate from the ground. Besides the snow will not drift about the wires. Works as well in winter as in summer. If the wires get loose there is a stretcher on each to tighten it.

The IOWA gate is so simple we can sell it cheap, but being made from Rolled Steel Tubing will last for a lifetime. No wearing parts, simple hinges going clear thru the post, can readily be adjusted to a hog and chicken tight gate. Your stock laughs at wooden gates—why not get some IOWA gates to match your fences?

Cheaper than Wooden Gates, Write at once for our low prices and a dozen reasons why every farmer should have them.

**IOWA GATE CO., Ninth Street

WANTED 10 men in each state to travel, distribute samples of our goods and tack advertising signs. Salary \$80 per month, \$3 per day for expenses. Saunders Co., Dept. 9, Jackson Blvd., Chicago

will be unique and amusing. For the menu the following is suggested:

Consomme. Oyster Dressing.
Roast Turkey. Gravy. Mashed Potatoes.
Sweet Potatoes. Turnips. Pickles.
Waldorf Salad. Walnuts. Ice Cream.
Pumpkin Pie. Coffee. Raisins.

The Consomme—Serve the consomme in cups, and the following is a good recipe: Take a good strong stock, remove all fat from the surface, and for each quart of the stock allow the white and shell of one egg and a tablespoonful of water, well whipped together. Pour this mixture into a saucepan containing the stock; place it over the first and heat the contents gradually, stirring often to prevent the egg from sticking to the bottom of the saucepan. Allow it to boil gently until the stock looks perfectly clear under the egg, which will rise and float on the surface in the form of a thick white scum. Now remove it and pour it into a folded towel in a colander set over an earthen bowl, allowing it to run through without moving or squeezing it. Season with more salt if needed and serve quickly very hot. This should be a clear amber color.

Roast Turkey—Select a young fowl and after thoroughly cleaning wipe it perfectly dry inside and out with a clean cloth, rub the inside with salt and stuff the breast and body. Dredge with flour, rub on a little soft butter, sprinkle with salt and pepper, place in a dripping pan and pour in a cup of boiling water. Baste often and when pierced with a fork if the liquid runs out perfectly clear, the bird is done.

Dressing—For an eight or ten-pound turkey, cut the brown crust from pieces of stale bread until you have as much as the inside of a pound loaf; put it into a suitable dish and pour tepid water over it; let it stand one minute, as it soaks very quickly. Now take up a handful at a time and squeeze it hard and dry, placing it as you go along into another dish; this process makes it very light. When it is all dry toss it up lightly with the fingers, add pepper and salt, a teaspoonful of powdered summer savory and the same amount of sage, a half cup of melted butter and a beaten egg. Also add half a can of oysters, slightly chopped. Work all together and it is ready.

Sweet Potatoes, Southern Style—Select potatoes of an even size and pare them carefully and smoothly. Cover them with water as soon as pared that they may not turn dark. Put over the fire with enough boiling water to cover them and cook until almost done, when the cover should be removed from the saucepan and most of the water allowed to boil off. Now add a generous piece of butter and two or three tablespoonfuls of sugar. Allow the potatoes to remain in this and cook not too fast until a thick sirup is formed when they should be put in a covered dish and the sirup poured over them.

Creamy Mashed Potatoes—Mash the potatoes while dry and hot in the vessel in which they have been cooked and drain with a strong wire potato masher until light and free from the slightest lumps. Add about a tablespoonful of butter to eight good sized potatoes, half a cupful of rich hot milk, a heaping teaspoonful of salt and a little pepper. Whisk well up together in a creamy light mass with a large strong silver fork and serve in a hot dish.

Waldorf Salad—Mix equal parts of fresh celery and tart apples cut into small dice. Add to this the meats of English walnuts cut in pieces not too small. Pour over this a good French dressing to which a generous supply of cream has been added and serve at once. A nice way to serve this salad is to hollow out smooth red apples into cups, place them on a lettuce leaf and garnish the top with the nut meats and a nasturtium blossom or a small sprig of parsley.

Pumpkin Pie—One quart stewed pumpkin pressed through a sieve; nine eggs, whites and yolks beaten separately; two scant quarts of milk, one teaspoonful of mace, one teaspoonful of cinnamon, and the same of nutmeg; one and one-half cupfuls of very light brown sugar. Beat all well together and bake in a crust without a cover.

SAD TIME FOR THEM.

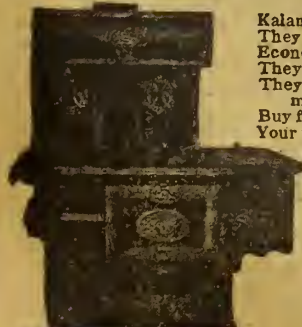

Of what are the turkeys thinking
Out yonder in the yard,
With their red eyes sadly blinking?
Do they think their fate is hard?
Are they on life reflecting
And to hear their final call
Each moment now expecting?
No; turkeys don't think at all.

AMONG OURSELVES.

Although initials are easily forgotten I have an idea—the wish is father to the thought—that the friends have not forgotten I. R. M. B., who gave us such fine letters a couple of summers ago when the "farm drudge" was being discussed. Today she comes with some little stories from life and some characteristic comments upon the situation which prompted them:

I mean to tell you some stories, and I want the girls particularly to listen, for they are true stories. Daisy was a pretty, fair-haired girl, an only daughter, and because she was pretty and bright she was duly spoiled with flattery and attention. And because her hands were so dainty her mother made her own more brown and calloused that they might remain so. And because her refined little nose objected to the smell of the cows and chickens and soiled clothes and all the many necessary, if objectionable, things of life, Daisy was dressed and schooled and taught music and art as if she were the daughter of a millionaire instead of a most ordinary American farmer. Eventually she became about the silliest little useless snob of a creature you ever saw. She even turned up her refined little nose at her coarse parents and brothers. And then the proper thing happened. Daisy married what turned out to be a plain farmer, who promptly became a bed-ridden invalid, while Daisy became the mother of two children. Now, I suspect the human mind could not devise worse torture than that otherwise sensible father and mother had unwittingly inflicted on their child, for her husband refused to eat the bread of charity, and—well, I know Daisy peddled books and washed and I don't know what else, but I do know she became a most excellent woman. And Fannie was a nice, quiet little brown-faced girl, who was always busy. She did not believe in girls working out of doors, or did not think of it, I don't know which, and she reared her girls in the same fashion. Supper was always ready when Joe came in, but it had largely come from the store, for there was little or no garden, and Joe did the chores and the milking, and Fannie and the girls went to bed. She reared the babies and kept house, nothing more. Perhaps it was enough, but Joe died of consumption, and the oldest boy took up the burden of work necessary to keep mother and the girls. He found it too heavy, fell a victim to disease, and Fannie and the girls were without a provider. As they had never known the luxuries of life, there were the necessities only to be cut off. Two girls married to escape poverty—to find there are worse things. Fannie moved to town and bought a house and lot, put away the rest of her money for old age or sickness, and "took to the tub," put the other girls out to work and the remaining boy on the street, and if she doesn't one day shed bitter tears over a felon's grave—well, Providence may intervene. And she had money sufficient to buy a small patch of ground and was close to a splendid market for eggs, cream, berries or anything select. I had intended to tell you of two women pinning up their skirts and with "rub ons" and steaming blankets relieving the sweating agony of a valuable horse until men and a veterinarian could be reached, but some caustic-minded person might say I would require my girls to take a veterinary course and I would not. I would simply ask them for the sake of dumb animals, if for no other reason, to learn a little of their needs in your life on the farm. If they did father wouldn't think any "old nag" good enough for "the girls" to drive. I have told you these stories (and I could multiply them indefinitely) because although many women's lives are ruined by becoming farm drudges, this does not prove that the principle of helping is wrong. I have personally known many more families reared without a home of their own, many more lives ruined and ambitions effectually blighted by a woman's incompetence, than I have known of the other sort. Yet there is a woman in between these two who profits by the mistakes of both. She does not pine for a career, for she is wrapped up in her husband's career, is a part of it, and she contrives that he shall recognize the fact. She considers a floor scrubbed every day a luxury which, for the present, she must forego if there is no home, or a heavily-mortgaged one, and she can be of service outside. She remembers that sheets, towels, babies' napkins, etc., are sweeter and just as comfortable unironed, and time and fuel

"A Kalamazoo Direct to You"

Kalamazoo is a fuel saver—
They last a lifetime—
Economical in all respects—
They are low in price and high in quality—
They are easily operated and quickly set up and made ready for business—
Buy from the actual manufacturer—
Your money returned if everything is not exactly as represented—
You keep in your own pocket the dealers' and jobbers' profits when you buy a Kalamazoo.

are saved. She economizes her time that she may help toward this great undertaking—the building of a home together—and when her services are not recognized she properly withholds them for a time. She is too refined to eat the bread of idleness, the product of the labor and sweat of another. Knowing the influence she has on her husband's life, she has in mind a master model and shapes him toward it, and helps build the best possible home, and I am sure in old age she enjoys the living it over again and again.

I feel constrained to quote a paragraph from the note which accompanied I. R. M. B.'s article for Among Ourselves, it reads:

Life is a school; we should not sigh for the play ground when we should be about our books, and for those who deliberately choose the play ground there is the emptiness of play and the one-sided development which follows.

Latterly we have a man on the program almost every week. This time it is Mr. C. E. K. As he seems a manly, straightforward sort of fellow everyone will be interested in what he has to say:

I have been interested in the various articles called forth by Mrs. Streeter, but I have not heard any satisfactory answers to the various questions propounded by her. It seems to me that the lives and influence of such women as Clara Barton, Frances Willard and Susan B. Anthony and other noble, self-sacrificing souls, should be a sufficient answer to the article in last week's Home Department by Mr. R. S. In regard to Mrs. Streeter's first question, why men pretend to have contempt for women just because they are women? To endeavor to answer this, one must admit it is true, which I am not ready to do. No doubt some men of small minds may profess contempt, but I believe the great majority of men hold women in the highest esteem, and regard them as man's superior in things moral and spiritual, and his equal in all other things except physical strength. No. 2. Why do they hate to go to church as a general thing? Again, no doubt large numbers do not go because during the week they mingle with and meet men

and do not feel the need of the social part of the service, and do feel they need the quiet and rest of a home on the Sabbath. But on the other hand I know an equally large

number of men who every Sunday (weather permitting) usher their little flock into the sanctuary. "Why do they grow?" etc. My only answer is that "to err is human," and that's the man; and "to forgive is divine," and that's the womanly part of it.

I have been uncertain as to the place on the program it would be well to place the person who comes to us under the pseudonym of Cousin Hardmaster—probably this is as good as any:

In obedience to your editor's request for names of correspondents, I will introduce myself at once as Cousin Hardmaster. That is my true name. I am at home in any community large enough to organize a granger's society. I come on behalf of myself and family, of whom Mr. R. S. is a valued member, to thank the ladies who have written letters telling what splendid helpers they are. My old mother used to say, "A woman that ain't self-sustaining ain't worth having." I think so, too. And when she saw a woman mincing along with a veil over her face and gloves on her hands and holding a parasol over her head, she used to say, "That woman hasn't hurt herself working." She herself took great pride in numerous ailments brought on by exposure and hard work and spoke of them continually. I don't like women who are afraid of hurting themselves working. But when I tell my wife that, she goes into a corner with the baby and cries. Then, to cheer her up, I read some of your rousing letters to her. "There!" I say, "you can see there are women who aren't afraid to work. A man would make money if he had a helper like that." Say, girls, when you want homes of your own, just remember there are a lot of my relations looking for you. Nice, helpful fellows who will make it just as easy for you to bring the water for your washing as to carry pails of milk from the cow yard. Bring your pianos along. There will be no objection, I guess, to your playing if you want to, after the chores are done.

It is not often that Cousin Hardmaster and his relatives show their real nature when they are seeking wives; they follow the lead of his Satanic majesty who, according to the story, proved as long ago as Eden days that it pays to disguise oneself as an angel of light. The only comfort about this family is that it is slowly, but surely, dying off. A generation of intelligent, noble mothers would see it extinct.

Although Agricola rarely lifts up his

voice here Among Ourselves, I fancy, he slips into a quiet corner every once in a while. I hope he is here this week to get the benefit of XXX's good natured rallying:

Poor Agricola! Where do you live, where have you lived, not to know the "golden tints of autumn" are a reality? The apple trees and berry bushes in this vicinity are still wearing their summer dresses, but Miss Maple here by the window has a new yellow dress, and her sister over by the well lately came out in a yellow dress with a crimson overdress, or is it a crimson dress with an overdress of golden net? And all their relations are wearing similar gowns. Stately Miss Poplar is wearing the same dress of emerald green that she wore at the flower show last June; but she has retrimmed it with polka dots, and French knots, and dear knows what of yellow, and wears a magnificent corsage bouquet of yellow and a glowing golden tiara. The old elm on the hill at the corner of the cross roads stretches its naked arms above the passers by, hut over in the corn field a noble specimen of those graceful trees bears a magnificent globe of old gold; and all along the lane the same variety of trees are supporting delicate draperies of filigree in old gold. All around, among the gay throng, cotton woods, like old heaux, may be seen donning their buff waistcoats and straw-colored ties. Staid hickories, the chaperons of the company, as becomes their position, are dressed in soberer hues; yet even they have yellow ribbons in their caps and the linings of their russet mantles are plentifully besprinkled with gold. I think I should say "brilliant autumn hues," for the white oaks are donning their "Joseph's coats;" the sumac is hanging out scarlet pennants, and that old tree, denuded by successive storms, is reclothed by festoons of flaming ivy. Soon after the first frost Dame Nature brings out her color pots, and is as lavish of their contents as a little boy with his first box of colored crayons. Not a leaf, not a tree, but banks on banks of the most gorgeous coloring! Gold there is in plenty, every shade of red from flaming scarlet to delicate pinks, browns, grays and a generous sprinkling of greens; such a profusion, such a confusion of color, that no mortal painter has ever been able to copy it, no inspired poet has ever adequately described it. Yet such a harmonious whole, the eye never tires, the saddest heart must respond with a thrill of gladness. Ah, Agricola, I have sat at your feet, like Paul at the feet of Gamaliel, learning of the old, old world, and then of the new; I have revered your learning, I have admired your optimism, I have joyed in your floral treasures, I have profited by "the madam's" poultry suggestions as set forth by your pen, I have pointed with pleasure at the dignity with which you upheld the farmer's calling, but I pity your skepticism about "autumn's tints," and I am scandalized, yes, scandalized, that you should characterize the rhapsodies of the poets as (oh, awful word)—"hosh."

Since XXX penned these words the leaves have lost much of their beauty. It is a pity we could not have had them when they could have been verified by glancing out of the windows or strolling down the lane. Agricola would seem to be left "without a leg to stand on." If he can still maintain his position we shall be pleased to know how he does it.

Dressmaking and Millinery—No. 544.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

There is almost no end to the variety of colors worn this season, new ones being added from time to time, while the older ones retain their favor, but also from time to time we get something new in the way of a "tone" in some favored color, and just now the shade of blue most favored is hya-

[5472 Fancy Blouse Waist, 32 to 40 Bust.]

cinth, a deep soft tone similar to bluet, Russian green, a deep tone verging on the emerald and "Jacqueminot red," which is one of the wine shades. Then we have a new very rich shade of seal brown that promises to supersede the other shades in this popular color. It is well to keep posted in "shades" as well as colors from season to season, for in these fashion changes quite as rapidly as in the cut of our garments, and while we

"Buffalo Calf" Shoes Can't Rip

COMMON shoes often rip in the seams before their soles are half worn through. That is because they are sewed with ordinary thread which begins to rot the first time it gets wet. "Buffalo Calf" Shoes are sewed with waxed thread which is not affected by water. The back seam is "cylinder fitted," to give it extra strength, and where the vamp is joined to the upper, the seam is sewed with three rows of stitching—one more than on other shoes—and all with waxed thread.

"Buffalo Calf" Shoes don't have to be broken in, because their tops are made from the skins of young cattle, raised inside, and these skins are tanned by a special process, and softened, like Indian buckskin, by "boarding" and handworking. Leather so handled is freed from all the tanning juices and will not harden after a wetting. The shoes always dry out soft and easy to your feet.

Old cattle have age wrinkles that stiffen their hides. These come sooner on old cattle than on those raised inside. Their skins have to be tanned with powerful chemicals and bark juices, and the leather can be softened only by artificial greasing. The acids and tan juices left in such leather, draw and irritate your feet.

The leather in "Buffalo Calf" Shoes is tough and close grain, because made from hides of cattle killed in July, August and September. Only such hides are known as "short hair hides." They are fine, close grain and very tough. Animals slaughtered in winter and spring have "long hair hides" with coarse, loose fiber, because much of the strength of the skin goes into the heavy winter coat of hair.

The soles of "Buffalo Calf" Shoes are made from Hemlock tanned Texas steer hides, and their heels, counters, insoles and slip soles are all solid leather. We use no "horn fiber" nor moided counters. Linings of "Buffalo Calf"

Shoes are heavy twilled duck—seamless so there will be no edges to roll up and chafe and blister your feet.

Under the toe caps of all "Buffalo Calf" Shoes, the vamps go clear over to the soles. So if you wear the toe caps out, the vamp toes under them are still good.

These are the main reasons why "Buffalo Calf" Shoes

Out-Wear All Others.

They will stand all the hard knocks you can give them. Weather makes no difference. Neither snow, ice, mud nor water have any effect on "Buffalo Calf" Shoes.

Ask your dealer for "the shoes with the Buffalo Calf." Every pair of "Buffalo Calf" Shoes has tied to the straps, a piece of our special vamp and upper leather, cut in the shape of a buffalo calf. If you can tear this piece of leather with your fingers, we will give you a new pair of shoes FREE.

If your dealer does not carry "Buffalo Calf" Shoes, write to us for one of the leather buffalo calves to test, and then tell him about it.

"Buffalo Calf" Shoes are made in all sizes—men's, youths' and boys'—they will outlast any others you can buy, and they don't cost any more than common shoes.

Why should you pay good money for common shoes that have to be broken in—that draw, chafe and blister your feet—that cause corns, bunions and callouses—and that are bound to rip long before you can get half the wear you should out of the leather, when you can just as well—and for the same money—or less accordingly—get shoes that are always soft, can't rip and will outwear and outlast any others made.

In "Buffalo Calf" Shoes you get your money's worth always. Insist on getting them. Remember the little Buffalo Calf tied to the straps. Ask about it and tell your dealer how tough the leather is. If he refuses to investigate, write direct to us.

Bentley & Olmsted Co., "The Western People," Des Moines, Ia.

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date190..

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaker, as per your special offer to Homestead readers.

Name

Rural Route State

may not always be able to lay aside such as are declining in favor we may keep ourselves more nearly up-to-date by avoiding the purchase of these when selecting new.

Much has been said about buttons and their very general use on all kinds of garments whether in the way of use or mere ornament, but I think nothing has been said of the novelty in plaid buttons for either purpose. These may be had in glass and enamel, and vary in size from the very small to the size of a dollar. Of course you understand that in the number used the size is taken into consideration, and that only in the very small sizes are they used in groups and in numbers. On a plaid garment these would be especially effective applied on hands of braid or cloth in a plain color harmonizing with the predominant tone in the plaid. They are effective also when plaid trimmings are used on plain material.

No. 5472 shows a fancy blouse waist that may be used as part of a costume or as a separate waist, and it may be developed in one material or in a combination, as liked. For instance the trimming hand and other touches may be of the material trimmed in any of the modes heretofore suggested, or it may be of velvet or taffeta, braid trimmed or lace trimmed, and having the rosettes as pictured, or for these any of the button modes of trimming may be substituted. On plain material plaid silk or velvet may be used for trimming hand, for belt and to

Gold Watch FREE AND RING

We positively give both a Solid Gold Laid STEM WIND American movement Watch highly engraved and fully warranted timekeeper equal in appearance to a Solid Gold Watch, also a Solid Gold Laid Ring, set with a Famous Congo Gem, sparkling with the Berry Brilliance of a \$50 diamond, for selling 20 pieces of hand-saws and when sold send us the \$2.00 and we will positively send you a Gold Watch and Ring, also chain, Ladies or Gents style. **ALTON WATCH CO., Dept. 131, Chicago.**

finish the bottom of the sleeves. The waist is made over a fitted lining on which the chemise is arranged, and this may be of lace as represented, or it may be of any material used for such purposes. The closing is made invisibly at the back. Pattern No. 5472 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering.

The Princess gown is still a favorite, and no prettier design has been seen than that illustrated in No. 5458. Its many long lines are a feature that is appreciated both in the making and the wearing, as it is more easily fitted than is a design having fewer seams, and gives a slender appearance to even a partially heavy figure. The lace yoke is applied over the material, or the material may be cut away if preferred. This, how-

ever, after the yoke is adjusted. The sleeves may be in elbow or full length, the pattern providing for the close fitting lower portion to be used if desired. I may repeat what I have often said in connection with these Princess designs, that the amateur more often wants this design as a foundation for a home dress or wrapper than she does as a dressy toilette because she hesitates to undertake the work on expensive material. The trimming design as shown is

[5488 Princess Gown, 32 to 40 Bust.]

part of the pattern and is novel and pretty for whatever purpose the garment is intended. This garment is shown closed invisibly at the back, but such are frequently closed with small buttons, a row of these extending from the neck to the bottom of the skirt. One may easily arrange to have the garment front closing. The pattern No. 5488 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

Whitehall Duroc Sale.

Breeders from several states were present at the second semi-annual Duroc sale of the Whitehall Combination Sale Company, of Yellow Springs, Ohio. These sales are held at the noted Whitehall Farm, owned by Mr. E. S. Kelley, well known as a breeder of Short-horn cattle. Messrs. S. E. Morton & Co., of Camden, Ohio, and the following breeders of Yellow Springs are members of this company: Messrs. E. S. Kelley, C. E. Speaks, G. H. Fogg and G. D. Black. Each of these

gentlemen consigned stock to this sale. The offering was one of the best the writer has seen put through the sale ring this year. Uniformity of type and the absence of poor-footed hogs were the most noticeable facts concerning the offering. The breeding was of the best to be found anywhere. The get of numerous prize-winning boars throughout the entire country was included in this offering. No sensational prices were paid, but numerous bargains were secured by those present. Messrs. Manning Bros., of Chillicothe, Ohio, topped the offering, paying \$130 for a son of Model Chief. This boar gives promise of developing into a prize winner this coming season. Mr. Ira Jackson, of Tippecanoe City, Ohio, topped the female offering, paying \$76 for a granddaughter of Dictator Chief. This sow was of the ideal brood sow type and bred to one of Mr. Jackson's noted boars should produce something exceptionally good. Colonels Vinnedge and Isenhower conducted the sale in a very satisfactory manner. Animals selling for \$25 or over are listed below:

SUMMARY.

60 head\$2,542.80; average....\$42.38

Lucas County Short-horn Show and Sale.

Lucas county Short-horn breeders are fast developing a strong organization for stock breeding. On Wednesday of last week they held a very notable show of breeding stock at Chariton, Iowa. In all 102 head were on exhibition and the town and large show barn were crowded with farmers who felt it fully worth their while to leave the corn field, while many breeders came from a distance for the sale which followed. Women and children were quite in evidence and with a little more help from the people of Chariton this affair can be made one of much importance, besides being of high educational value. Mr. W. H. Pew, of the agricultural college, made the awards, and though rivalry was keen in many classes, his work was very satisfactory. A most friendly spirit prevailed throughout the show, which indicates a strong organization and augurs for much success in future exhibitions. A parade of the prize winners took place just before the sale opened, after which Col. Geo. P. Bellows congratulated the association for the showing they had made and encouraged breeders to buy good stock then give it the proper care and the results would be right. A list of those animals selling above \$75 follows:

Watson Duroc Sale.

Mr. H. E. Watson, of Edinburg, Ind., held one of the best sales this season that has ever been held in Indiana. The offering was a very good one and the breeders of Indiana realized this fact and were present in large numbers. A daughter of High Chief, one of the best sons of Ohio Chief, sold for \$605, the highest price ever paid for a Duroc sow in Indiana or Ohio. The entire offering of fifty-two head sold for \$2,577, an average of \$49.56. Colonels Vinnedge, Isenhower and Tibbett conducted the sale in a satisfactory manner. Have You A Cold Room?

In most houses there is a room without proper heating facilities—to say nothing of chilly hallways. Even though the heat of your stoves or furnace should be inadequate to warm the whole house there need not be one cold spot if you have a

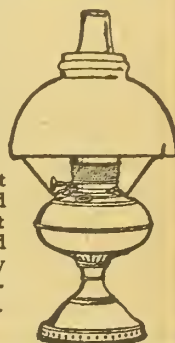

PERFECTION Oil Heater

(Equipped with Smokeless Device)

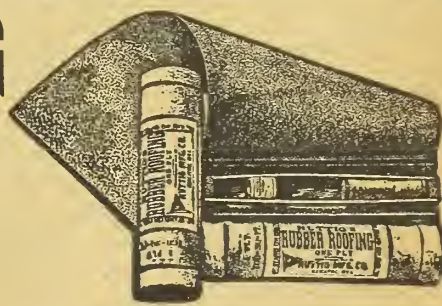

It will heat a room in no time and will keep it warm and cozy. Operated as easily as a lamp and perfectly safe. Wick cannot be turned too high or too low. Gives no smoke or smell because fitted with unique smokeless device. Can be carried about, which cannot be done with an ordinary stove. The Perfection Oil Heater is superior to all other oil heaters and is an ornament to any home. Made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds four quarts of oil and burns nine hours. Every heater warranted. If not at your dealer's write nearest agency for descriptive circular.

THE Rayo Lamp is the safest and best all-round household lamp. Made of brass throughout and nickel-plated. Equipped with latest improved burner. Every lamp warranted. An ornament to any room whether library, dining-room, parlor or bedroom. Write to nearest agency if not at your dealer's.

STANDARD OIL COMPANY

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co., Muscatine, Iowa.

OUT-WEARS TWO PAIRS

If our boot does not outwear two pairs of the best quality rubber boots we will refund your money. The

Rubberhide Boot

has best reinforced rubber upper; heavy out sole of best leather; inner sole of leather, with rubber welt sole between.

All joined together so securely that a team of horses can't pull them apart.

They are sewed, not pegged or nailed, and they simply cannot leak.

The heavy leather sole protects the foot from uneven surfaces, and makes the boot warmer in cold weather.

The leather inner sole prevents excessive perspiration.

Any cobbler can resole them; they can be hob-nailed if you like.

It is the most durable, comfortable and economical rubber boot ever made.

Will You Try a Pair?

If your dealer handles the Rubberhide, he will refund your money if it does not outwear two pairs of even the best rubber boots of other makes.

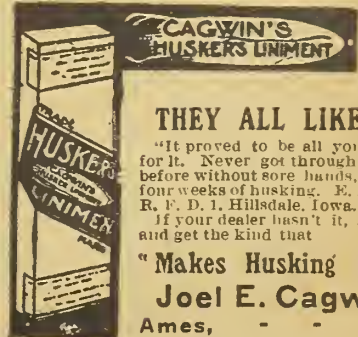

If he hasn't them, send direct to us for a pair on this guaranty. We pay express charges. Catalogue free.

Rubberhide Co., 612 Essex Bldg., Boston, Mass.

PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range
Among the pleasant fields of Holy Writ
I might despair.
—Tennyson.

The International Sunday-School Lesson.

Fourth Quarter. Lesson VIII. Isaiah V, 11-23, November 25, 1900.

The World's Temperance Sunday.

Isaiah appears in a new role. The prophet becomes the temperance lecturer. The seer who has seen the Messiah, and described His person and kingdom, now stands forth as the public rebuker of the immoralities of his days. But there is no change of style or diction. He does not drop to vulgar familiarity, or facetiousness, or epithet. He maintains his dignity and his elevated mode of speech even when dealing with drunkards and drunkenness.

The extraordinary assonance of the exordium cannot be reproduced in translation. It is fairly mellifluous. But the jewels of the hilt detract nothing from the keenness of the blade. In the prophet's fearless hand, this highly-tempered and richly traced sword lays wide open the national heart with all its wicked thoughts and evil intents.

National opportunity and national responsibility are graphically pictured under the figure of the vineyard advantageously located, planted with choice seed, protected with wall and tower, and furnished with substantial wine-press. National failure is portrayed under the figure of the favored vineyard producing wild grapes. Retribution comes in the desolation of the vineyard. And now Isaiah's auditors feel the relentless grip of the iron hand beneath the velvet glove of his diction, as he says: "The vineyard is the house of Israel. What the Divine Planter expects from His vineyard is judgment and righteousness. What He gets is oppression and a cry!"

This graceful, but skillful and fearless, arraigner of public morals proceeds now to specifications under his general charge. He denounces the prevailing rapacity, the inordinate greed of those who increase their landed estates by foreclosing upon the unfortunate whom they have charged extortionate rates of interest. He arraigns those who, in violation of the reversionary clause of the Jubilee Law, illegally hold on to their ill-gotten estates. With an index finger of steel, he points out the irretrievable ruin involved in this violation of the divinely instituted agrarian law.

The second specification is drunkenness. The greed of money is accompanied by a greed for the pleasurable sensations of intoxication. Men pursue it as they would a remunerative occupation, rising early and continuing late at it. Others engage in it in a social and festive manner to an orchestral accompaniment. But both are equally forgetful of the Lord.

Violation of agrarian law spoils land; but violation of physiological law spoils men. The prophet's woe against the land is fulfilled to the jot. A land that once flowed with milk and honey is now

comparatively desolate, and its yielding power immeasurably decreased. But what is that compared with the fearful ruin of men impending? The prophet sees an endless procession in its descent to hell. It is a glorious multitudinous, pompous, and rejoicing procession; but on its way to hell, none the less. The harmless silken cords of the first stages of inebriety have grown to the size of cart-rope traces. But these drunken wretches are, in a measure, oblivious to the fact that they have degraded themselves to the level of dumb, driven cattle.

In the height of their drunken audacity they profanely and unbelievably challenge the Almighty. "Let him come on with His judgments. We would like to see of what manner they are." Their moral senses are so utterly perverted that evil is good to them, and good evil; darkness is light, and bitter is sweet. In the prophet's degenerate day the winetankard is the gauge of the hero. And there is such an utter perversion of public justice that the guilty never fails of an acquittal if he can furnish the bribe.

To receive this rapacious, drunken, skeptical generation, the jaws of hell are opened wide. His hideous tusks are still dripping with the blood of generations previously consumed. But the multitude already doomed and damned scarcely halts in its descensus Averno to listen to the prophet's fervid temperance address.

Analysis and Key.

1. Isaiah as a temperance reformer. Elevated mode of speech unchanged. Nothing lost in effectiveness.
2. National opportunity and responsibility under figure of vineyard. "The vineyard is the house of Israel." What is expected.
3. Prophet's arraignment. National response not judgment and righteousness, but oppression and a cry.
4. Specifications. (1) Violations of agrarian law. (2) Drunkenness.

The Teacher's Lantern.

The woe of God against the drunkard is not a capricious or sporadic affair. It is interwoven with the physiological constitution. The sources of retribution are not external, but internal. Every inebriate carries the fire and brimstone of his own hell in his very person.

The prophet talks by the book. He is true to physiological science, not of his date only, but of ours. He vividly depicts the imperceptible growth of the alcoholic appetite; the cord becomes the cart-rope. How soon the bon vivant finds himself in the hopeless treadmill of an uncontrollable passion! Hence-

forth his might consists in his capacity to drink, and simple wine gives place to fiery concoctions. Then follows complete perversion of moral ideas. The denouement is death and hell.

There is a hint to modern temperance lecturers in this Old Testament temperance address. They are sometimes themselves intemperate. Intemperance can show itself, also, not only in the length of time and vital force wasted, but in the language used; in extravagance and vindictive vituperation.

Again the predilection for funny stories, the dramatic imitation of the drunkard's staggering gait and maudlin speech, "Ten Nights in a Bar-room," and all that, tend to familiarize youth with vice, and to minify the towering evil of our day.

Isaiah is the model temperance orator. His style is elevated and elevating. He is a conscious ambassador of God. His great heart is stirred to its depths. He depicts the case as it is. He stands across the downward track of a nation, and, with the self-obliviousness of a noble nature, uses every worthy argument and entreaty to stay its course.

Lyman Beecher was the Prophet Isaiah's style of a temperance reformer. One of my saintliest of stewards, in an early charge, startled me one day by admitting that he kept a barrel of whisky in a back room, and, like most shopkeepers, treated his customers; but on hearing Dr. Beecher, he went home, rolled the barrel into the yard, broke in the head, and poured the whisky on the ground. For sixty years he has not touched or tasted liquor himself nor offered it to others. He said that Beecher was like a flame of fire on his conscience. His logic was remorseless, his appeal irresistible.

Lyman Beecher was the instaurator of a noble college of temperance apostles—President Hitchcock, Albert Barnes, Stephen Tyng, Wilbur Fisk, Eliphalet Nott, Moses Stewart, Francis Wayland, Leonard Woods, Justin Edwards. The prophecy of Dr. Tyng has its fulfillment. "The names of the good men who have founded and urged on this moral temple shall live in the hallowed recollection of millions as men of high and spotless honor." The imperative need of the hour is that men of this high intellectual, social and ecclesiastical grade shall supplant the shallow, illiterate, mercenary, political, and ranting order. Pray ye, therefore, that the Lord will send the Prophet Isaiah style of laborers into this vineyard.

Roach's Duroc Sale.

Mr. Jay Coy Roach, of Girard, Ill., held his first annual sale of Duroc Jerseys on Saturday, November 3d. On account of the day and because many breeders from a distance wished to reach home, there were not as many breeders present as in the preceding sales. Those who were in attendance, however, were much pleased with the offering, and the bidding was spirited throughout the sale except on the boars, which sold at low prices, considering breeding and quality. Few better herds are to be found anywhere than this one. Messrs. Fred Kraschel & Son, of Macon, Ill., topped the sale, paying \$200 for Jay's Model, a daughter of Model Chief. Her mother went to Mr. Oscar Miller, of Loami, Ill., at \$176, and was a bargain at that figure. Col. C. C. Keil opened the sale, and was assisted by Colonels McGowan and Organ. List of sales \$25 and over follows:

1 White & Dewey, Shannon City, Ia.	65.00
2 Ed A. Baxter, Pawnee, Ill.	65.00
7 Fred Allen, Ripley, Ill.	73.50

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

FATTENS SHEEP WITHOUT GRAIN.

Mr. W. P. Adams, of Sac county, Iowa, fattens thousands of sheep annually without a cent's outlay for grain. Mr. Adams has 6,800 acres of land devoted to the production of corn. In order that the fertility of the soil may be kept up, once in five years he sows clover and turns it under as green manure. He pastures the clover with sheep until time to turn it under in the early fall and thus obtains all the manurial value of the clover.

There are no permanent fences on the Adams farm, but four miles of movable fence has been provided. This temporary fence is made in panels eighteen feet long, made of four-inch pine strips, held in place by triangular brackets at each intersection. Two men can take down and set up a mile of this fence in a day.

An exchange describes his system when pasturing 1,200 ewes and their lambs in one flock and in another 1,000 wethers and dry ewes. Each flock had the run of about one hundred acres, and a fresh pasture was furnished every two weeks throughout the season. At the opening of spring, a fence is run through the middle section to remain there through the

season. At right angles to this, a fence is run on the section lines and another about a third of the way down the section; then fences are run on the section lines parallel to the center fence, which gives two fields of about one hundred acres each.

When the sheep have pastured in these fields ten days or two weeks, the fences on the section lines are taken up and swung around so as to form two new fields of about one hundred acres each.

After the sheep have pastured in these for ten days or two weeks, the fences are again moved, and the unpastured balance of the section fenced into two fields of about one hundred acres each.

When these last two have been fed on two weeks the first portion of the section fed off has about four weeks fresh growth, the fences are moved to where they were first built in the spring and the sheep are again in green pastures. This rotation is continued throughout the season. This plan can be worked on small lots just as well.

In the fall, when the huskers have cleared a field of corn, sheep are turned in to pick up the corn that has been left, for, no matter how clean the husking has been done, there will be many bushels left.

A careful man on horseback and a good dog or so will look after one thousand or more sheep in the stalks. The sheep are not allowed to wander all over a section at a time, but are kept on a given area until they have cleaned up the waste on it. Then they are moved to a new area.

While eating the waste corn, they get roughage, and, being furnished what salt and pure water they want, they thrive and lay on fat. When ready for market, they are shipped by the carload direct to Chicago.

When the waste corn in the fields is all saved, the sheep are fed screenings from the previous corn crop. Mr. Adams does not believe in paying freight on light corn, chaff and other "trash" to reduce the quality and price of his corn, as it is all screened and fanned before being shipped, and the screenings carefully housed for sheep feed.

If at any time the corn, or the corn screenings need balancing to give the

Now or Never

same fair this year. My Poland Chinas are easy feeders and milky fellows. For prices write, F. C. THACKABERRY.

NO. 27493, weight 400 lbs. The Champion Oxford, sired 1st prize Buck lamb, 175 lbs., also 1st prize Ewe lambs at Bureau Co. fair. 2d only to State fair, in hot competition. sheep a proper ration, it is done with wheat screenings, also produced upon the farm. Wheat is sown once in five years rotation, and, like the corn, the wheat crop is thoroughly cleansed before sending to market and the screenings saved for the sheep.

Mr. Adams makes money raising corn and makes money from the waste the sheep save for him.

Poland Sale of W. J. Crow.

The Poland China sale of Mr. W. J. Crow, of Webb, Clay county, Iowa, was held November 7th. Mr. Crow has been making a specialty of prolific qualities, length of body and feeding qualities in his Poland Chinas, and his offering exceeded the expectations of every man who attended the sale. The entire lot averaged \$36 per head. There were a number of March pigs in the offering that weighed 350 pounds, though they were not fat. The top sale of the day was \$55, paid by Mr. H. B. Bushman, of Moneta, Iowa. Only three in the whole lot sold for less than \$30. Mr. Crow will sell the gilts out of the dams of these young boars on February 20, 1907. Those looking for size combined with quality in the Polands should keep this date in mind. Following is a list of the buyers at Mr. Crow's sale:

Town..... State.....

IN THE GREAT SOUTHWEST.

A petition of the government instituting suit against the Standard Oil Company, of New Jersey, seven subsidiary companies and seven individuals, the head men of the great oil corporation, was filed in the United States circuit court in St. Louis last week. The suit was filed by the special counsel for the government, Frank B. Kellogg, of St. Paul, under the direction of the attorney-general of the United States, Wm. H. Moody. The object of the suit is to have the control of the Standard Oil Company of the stock of seventy corporations declared unlawful, and that the said corporations be prohibited from paying any dividends to the Standard Oil Company of New Jersey.

There is at present in the city of Muskogee, I. T., a party of United States senators gathering information upon which to base congressional legislation this winter. The party is composed of Senator Heller, of Colorado; Senator Clark, of Wyoming; Senator Brandegee, of Connecticut, and Senator Long, of Kansas. They are given hearings to representatives of the Snakes, Creeks, the Nighthawks, the Cherokee nation and the Choctaw or Chickasaw Snake Indian.

It is reported that Indian Territory cast 6,310 more ballots in the election for delegates for the constitutional convention than did Oklahoma. The canvassing board of Oklahoma announces that the total vote on that side was 94,690. This included the Osage nation.

The government field notes of the "big pasture" have been completed. Engineers and soil experts have gone over all the sixteen townships and carefully analyzed the soil. These notes have been embodied in a report that can be secured from the government land office in Lawton. In these notes each township is not only considered, but the topography of each section is described minutely, the courses of all the creeks and ravines traced and the out-croppings of the sandstone are delineated. Even the number and size of the prairie-dog towns on each section are enumerated on these maps.

Governor Folk has drafted a law aimed at lobbying, which will be introduced in the house the first day the general assembly meets. If this becomes a law, it will not permit even the presence of representatives of state institutions on the floor of either branch of the assembly.

Agents of the bureau corporations are again in Kansas, investigating the Standard Oil Company and all its works. The work has been going on for several days and will be kept up until all the Kansas territory field has been thoroughly seined

for information. The government is obtaining all the evidence possible to bring out in the case to be tried in St. Louis.

Some idea of the business that is being done in the post-office in Kansas City may be obtained from a perusal of the statement that last week four hundred thousand dollars in value was received in the form of stamps and stamped envelopes at the Kansas City office. This has been put in at this time to replenish the stock for Christmas trade, when the demands are enormously increased. The Kansas City office sells from three to four million two-cent stamps every month.

Many hundreds of people from all sections of the North and East are entering the big pasture reserve in Oklahoma, their object in coming at this time being to gain information regarding the bidding. All the Creeks in the pasture are lined up with camper wagons and outfits. It will be remembered that bids on land in the pasture reserve will be received between December 3d at 9 o'clock in the morning and December 8th at 4 o'clock in the evening. The present estimate indicates that there will be at least three thousand bids received.

Cured by Anointing With Oil.

Cancer and Tumor permanently cured with a Combination of Oils. Write to the Originator for his free books. Beware of imitations. Address Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

A Splendid Separator Offer.

There are thousands of farmers with cows who need a cream separator. They need one badly. Many of them know it. A great many are on the fence over the question. It is quite likely that many a man has argued it all out. He decides to buy, but when it comes to drawing out those crisp bills he hesitates. A great big "if" confronts his mind, almost as a nightmare. "What if it should not work?" he thinks. Well, what if it didn't work. The satisfaction of knowing for sure would be worth a great deal. Then what a relief it would be to get the perplexing question off one's mind. If you have doubts don't buy a separator. Have one sent on trial. Impossible to lose a cent. Everything in the farmer's favor. A very reasonable-priced machine is made by the Cleveland Cream Separator Company, Dept. H., 33 Michigan Ave., Cleveland, Ohio. They will send you direct from factory a machine for free trial. Then you can be convinced. Full particulars will be sent for the asking. Write them and mention The Homestead, please. The advertisement is on page 8.

THE MARKETS.

CHICAGO MARKET LETTER.

Under date of November 17th Messrs. Clay, Robinson & Co. quote the Chicago live stock market as follows:

Receipts of cattle have been more liberal this week and the market is 15 to 25 cents lower than the best time last week. Notwithstanding this there has been a satisfactory demand, especially for the best cattle, and a few very choice ones have sold higher than any previous time this season, \$7.40 being paid for a full car load and \$7.50 for part of a car. It has been a very uneven market and while possibly here and there a load of fancy heaves brought fully steady prices, the general run, as already stated, have sold at considerably lower rates.

The butcher stock market has been liberally supplied and outside of choice heifers and good dressed beef cows bulk of the female butcher stock has sold 10 to 20 cents lower, old inferior canners being very hard to dispose of even at the decline. All classes of hulls are 10 to 20 cents lower than a week ago. There has been very little eastern demand for this class of stock and export demand has also been very limited. Veal calves are very little changed from the close of last week.

The stocker and feeder trade has been uneven, with a slight dropping off in receipts and more limited selection to draw from as compared with conditions a few weeks ago. Demand is strong for heavy, fleshy feeders on account of a good market for well-finished fat steers. The stalk fields are being opened up and with fair weather for the next few weeks we naturally expect a gradual strengthening in values. Hence do not think persons who are going to place orders for stockers or feeders will gain much by waiting. On present market we quote stockers and feeders as follows:

Fancy selected feeders, 1,050 to 1,150 pounds, \$4.35 to \$4.60; good to choice feeders, 900 to 1,000 pounds, \$4 to \$4.25; fancy selected stockers, 600 to 850 pounds, \$4 to \$4.25; good to choice stockers, 600 to 850 pounds, \$3.60 to \$3.90; fair to good stockers, 500 to 850 pounds, \$3.35 to \$3.60; medium to fair stockers, 500 to 850 pounds, \$2.85 to \$3.25; fair to good thin young cows, 650 to 900 pounds, \$2.25 to \$2.50; good to choice stock heifers, 500 to 650 pounds, \$2.60 to \$2.85; fair to good stock heifers, 500 to 650 pounds, \$2.35 to \$2.50; stocker and feeding bulls, \$2.50 to \$2.75; heifers and heiferish cows (fair killers), 700 to 850 pounds, \$3 to \$3.65.

Notwithstanding a heavier supply of hogs the market has held up very well; in fact, is very little lower than a week ago. Average cost of the droves yesterday was \$6.25, whereas a week previous it was \$6.20. Present values are \$1.25 to \$1.50 per cwt. higher than a year ago, and in fact, the highest at this season of the year since four years ago, at which time hogs were selling in just about the same notches as now. Extreme top yesterday was \$6.45, bulk of the good hogs selling at \$6.25 to \$6.40.

The sheep and lamb market has ruled considerably stronger this week and last week's decline has been more than recovered; in fact, prices may be generally considered 15 to 25 cents better than last Friday. Choice native lambs are selling as high as \$7.75, a price which had not hitherto been paid for some little time. The demand for feeders continues active and strong. The sheep dipping plant has been closed down for the season, so that from now on it will be impossible to dip consignments of feeding sheep and lambs sent to the country. Persons sending in orders for feeders will kindly bear this in mind and not stipulate that stock must be dipped.

HAY.

Reported by Freeman Bros. & Co., grain, hay, etc., commission merchants, of Chicago: Receipts—Hay and straw, 31 cars.

Timothy—Market continues strong and unchanged with light offerings of hay of all grades. Values are firm and nothing can be foreseen to indicate any lowering of prices, but rather a stiffening of values if present conditions much longer prevail. From every direction and quarter comes the complaint of shippers of their inability to secure cars and to our mind it is clearly this factor which governs. Choice, fancy, \$16.50 @ 17.00; No. 1, \$15.50 @ 16.00; No. 2, \$13.50 @ 14.50; No. 3, \$12 @ 15; No. 1, light mixed, \$13 @ 14.

Prairie—We can only repeat that market is in prime condition, with arrivals small and no unsold hay on the market for the demand is such that all offerings of every kind and nature are readily taken. The facts above noted with reference to scarcity of cars is the dominant feature and controls the situation. As yet no indications of change or relief are visible and a keeping up of this condition cannot help but advance prices. Choice Kansas, Indian Territory, \$13.50 @ 14.50; No. 1, \$12.50 @ 13.00; Iowa, Minnesota, Nebraska, Dakota, \$11.50 @ 13.00; Illinois, Indiana, Wisconsin, \$8.50 @ 9.50; Indiana, Wisconsin, common packing, \$7.

Straw—Market quite bare of offerings, while demand is sharp and active. Current prices are certainly tempting and ought to be taken advantage of if possible. Choice rye, \$9; good, \$8.50; wheat and oat, \$7.

NOTICE.

When you write your friends in North Dakota advise them about the low-rate tick-

EASTERN KANSAS FARMS!

Near Kansas City at \$40.

240 Acres: Sixty miles south of Kansas City, 2 miles from good Catholic town; very nicely improved. Large house, good repair, good barn and outbuildings; lots of apples, grapes, pears, etc. The home place is all in crops and tana meadow fenced and crossed with hedge and wire, lies low and level (don't overflow), deep black soil, good water and a very healthy place. The 80 acres across road and cornering only a few rods from barn and is all in pasture; 65 acres has been in other crops, but is now in tame grass, fenced with wire, a little shade; is also good land (about 10 acres has a little limestone); clean of weeds and clear of encumbrance, \$40 per acre, half cash.

390 Acres: Five miles from above farm and being only a mile and a half from station, 3 miles to better town, in crops as follows: 120 acres timothy and clover, 80 acres corn, 41 acres fall wheat, 60 acres natural blue stem meadow, 40 acres English blue grass, balance Kentucky blue grass, feed yards, large old orchard, immense shade in the yard; buildings are, 7-room dwelling, newly painted, with good cellar, 5-room tenant house in corner of yard, stone horse barn, hay shed for 200 tons baled hay, cattle sheds, hog sheds, crile, tool house, small stable with 6 box stalls; waterworks supply house, barn, feed lots and pasture. No encumbrance, \$40 per acre, one-third cash, balance five years.

84 Acres: One mile from town near the above farms, 4-room house, quite a large, well-built barn and four or five sheds; good rye, fair orchard, land nearly level and good little farm; land adjoining held at \$60. Can sell this, same quality of land at \$45 per acre.

160 Acres: Two miles from Amoret, Mo., and 25 miles east of last named farm, all tillable except 10 acres of timber, which is mostly pecan. Good 7-room house, all necessary outbuildings, well fenced and crossed with wire; all kinds, about 3 acres fine apple orchard, bearing all kinds of berries, grapes, pears, peaches, pecans, black walnuts, \$47 per acre; can give good terms.

FURTHER: these farms are connected by telephone and are on mail routes; they are either dark red or black limestone soil; is a comparatively smooth prairie country; it is an old settled farming community, where the improvements compare favorably with the homes of the readers of this paper.

WE have been in the banking business in the locality of these farms for a number of years and know of 30 or 40 more good farms there offered for sale; we have endeavored to anticipate inquiries concerning the country and if anyone reading this advertisement is desirous of obtaining a good farm home at from \$35 to \$50, two hours' ride from Kansas City, they may come to our office and go with a member of the firm to look at the farm; in the event of a sale, their railroad expenses to be paid by us.

"On to Canada!"

Get a Home and Farm in the Heart of Saskatchewan, the World's Great Wheat Bin. Help Canada Feed the World

Western Canadian Farmers Raised a \$60,000,000.00 Wheat Crop This Year.

Farmers, get in the line of prosperity and progress up here in Western Canada. Come out where the soil is three feet deep—rich enough to grow anything—where crops never fail—where every farmer has money in the bank—where paupers and poverty are unknown.

Come and raise wheat where the average yield is 25 bushels to the acre. Where the first crop from virgin soil nearly pays for your land—no clearing to be done—the soil is ready for the plow.

This is the place to live, among an intelligent, industrious and prosperous people—most of them from the States. Give the young folks a chance, let them enjoy the advantages of Canada's fine schools and churches—bring them up to rugged manhood and splendid womanhood in this great land of health and opportunity.

Let us write you a personal letter about this wonderfully rich agricultural region, and send you our Free book, "The Home Builder," which tells why the country is rapidly filling up with the best and most intelligent farmers in the whole world.

It tells you how newcomers from worn-out farms get independently rich in a few years.

"The Home Builder" tells you everything you naturally want to know about this Great Wheat Region of Western Canada—about the healthful climate, the abundance of pure water and cheap fuel, the social and educational advantages.

Remember that land values are advancing rapidly and there's no time to lose. You can buy a 160-acre farm from us now for cash at the lowest price, or on easy payments, if you prefer, and our Company will give you a Guarantee Bond, stipulating that if at the end of five years you are in any way dissatisfied, we will buy back the land at an advance of 50 per cent over the purchase price.

We make this guarantee offer because we know the fertility and crop-producing power of the land, and that five years from now, under cultivation, it will be worth very much more than what you paid for it.

Over 125,000 people are coming into Western Canada this year. "On to Canada!" is the watchword of the hour. Come over while the choicest land that lies outdoors is yours at much less than its actual value. Write for free book F, at once, and ask as many questions as you wish. They will be cheerfully answered.

Saskatchewan Realty & Improvement Company

(Capital \$250,000.00)

312 Jackson St., St. Paul, Minn. Regina, Saskatchewan, Canada.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS,
KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. This is no experiment, as the country has been thoroughly tested. Special inducements to parties buying this fall. Railroad fare refunded to purchasers. Write for pamphlet to

FOR sale, S. E. Mo. farms and timber land \$3 to \$30 per acre, fairly improved \$10 to \$18 per acre, reasonable terms. Frank Pearce, Fredericktown, Mo.

LIVE STOCK SALES

The Angus Sale at Holbrook, Iowa.

One of the most successful sales of Aberdeen Angus cattle that has been held in the state of Iowa during the past few years was that of the above named breeders held in the new pavilion at Holbrook, Iowa, on the above date. A splendid gathering of breeders assembled from all parts of the country, Iowa furnishing the major portion, while Kentucky, Illinois and Nebraska were well represented. Every preparation was made by those contributing to the sale for the convenience and comfort of their guests, the sale being held in the new \$5,000 pavilion recently constructed by these enterprising breeders, which, by the way, is one of the most commodious sale pavilions in America. Colonel Woods, who was to make this sale, assisted by Colonel Silas Igo, telegraphed that he had started for the sale, but was again taken sick and prevented from putting in an appearance. The duties of selling devolved on Col. Silas Igo, who did most excellent work in the box, and was ably supported in the ring by Cols. W. K. Henss and Gus Judy. The very large and commodious Hibernian Hall, located within a block of the sale pavilion, furnished one of the best places in which to serve meals for the large gathering of breeders in attendance. One of the most sumptuous dinners was served by the ladies of Holbrook, and every one expressed themselves as having been treated to one of the most elaborate sale dinners they had ever seen. The complimentary remarks for the dinner served so generously by the most excellent ladies, prompted them to have supper ready for all in attendance, and this, if possible, exceeded the most excellent dinner. At the close of the sale all repaired to the Hibernian Hall again, where they sat down to four long tables, well spread with all the substantial, topped out with many delicacies, being all that a hungry crowd could well wish for. The crowd was then taken back to the railroad station of Parnell, where the major portion left on the evening Milwaukee train for Cedar Rapids, in order to attend the Messrs. Baker & Smith dispersion sale at Mt. Vernon on November 14th. From every point of view, this sale was a decided success. Bidding on all the better class of cattle was spirited, and the best things stubbornly fought for by some of the local breeders, most prominent among which was Mr. W. J. Hansen of Holbrook, who got several of the plums of the sale. The beautiful Blackbird cow, Blackbird Mary, went to Mr. Hansen at \$495, while Blackbird Favorite and bull calf were captured by Messrs. Christian & Lang, of York, Neb., at \$595. \$600 was paid for Blackbird of Cherokee 18th by W. J. Hansen. Blackbird Lassie 5th and cow calf went to Messrs. Harrison & Harrison of Indianola, Neb., at \$500, and Homedale Blackbird was secured by C. J. Martin of Churdan, Iowa, at the same figure. \$695 was paid for the beautiful Erica cow and bull calf, Eronda D. Mr. W. J. Hansen was the fortunate purchaser. This was the top price of the females. Mr. James Nichols, of Williamsburg, Iowa, paid \$405 for another Erica cow and Messrs. Harrison & Harrison \$385 for one of the same family. The Blackbirds and Ericas were in great demand. The Blackbirds averaged \$348 and the Ericas \$495. The top price for a bull was \$425, paid for Woodlawn Blackbird Lad. He was purchased by Col. Gus Judy for Messrs. Harry Weissinger & Son of Shelbyville, Ky., and this was certainly a bargain counter-price for a bull of this character. The Messrs. Weissinger have had a covetous eye on this bull ever since his prominent winnings in the bands of his former owners, Messrs. Cantine Brothers. Mr. O. V. Battles, of Maquoketa, Iowa, was a liberal bidder and buyer, more largely of show cattle than of cattle for breeding purposes. The first-prize yearling bull at the Iowa State Fair this year, Glenfoil Thickset 2d, was secured at the bargain price of \$290 by Mr. Battles, who purchased him to place in the show ring and not for a herd bull. The next highest price paid for a bull was \$200 for the Blackbird bull, Homedale Black Jam, a splendid Blackbird bull top and bottom. This was a bull that had been used by these breeders on some of the daughters of Black Woodlawn. Mr. L. E. Newkirk of Homestead, Iowa, was the fortunate purchaser. There was rather an over-offering of cattle for one afternoon's sale, which forced the selling into the late evening for such short days, and some cheap cattle were sold at the close of the sale. Nevertheless, the subjoined report will show good, healthy prices, and we are assured by the contributors that they are well pleased with the results.

FEMALES.

Blackbird Mary, two years, sire Brookside Star, W. J. Hansen, Holbrook, Ia.	\$495
Glenmere Blackbird, seven months, sire Black Woodlawn, E. J. Davis, Iowa City, Iowa	350

Fifty-one females sold for \$12,050, an average of \$236.30. Twelve bulls sold for \$2,005, an average of \$167. Sixty-three head sold for \$14,055, an average of \$223.10.

The Baker & Smith Sale.

November 14th brought to the little city of Mt. Vernon the largest crowd of Aberdeen Angus breeders that had ever assembled at this historic educational center. They came for the purpose of making Angus history, which we are pleased to chronicle is important at this particular time. A large percentage of the same crowd that was in attendance at the Donohoe & Cash sale at Holbrook, Iowa, November 13th, was also in attendance at this sale, augmented by a fresh supply of Aberdeen Angus breeders which swelled the number to the full seating capacity of the tent. It was certainly a representative gathering, assembled to see a great herd of Aberdeen Angus cattle dispersed. There were forty-eight high-class cattle to be placed on the market, thirty-five of which were of the famous Blackbird family. This was the feature that attracted so many breeders from so great a distance. Col. George P. Bellows, of Missouri, made the opening speech, after which Col. Silas Igo took the block and sold about one-half the cattle, after which Colonel Bellows mounted the rostrum and put renewed enthusiasm into the crowd and completed the sale in a highly satisfactory manner. Colonels Judy, Johnston and Day were assistant ring workers during the entire sale. As this was a dispersion sale, buyers recognized that they had an opportunity at some of the good things and went after them accordingly. Good prices prevailed throughout the sale. Great interest centered in the sale of Lot 24 of the sale catalog, a six-year-old Blackbird cow sired by Heather Black Jim and out of Blackbird of Woodlawn 5th. A battle royal as to who should be the future owner of this cow was engaged in by that veteran breeder, Mr. Alex Spear, of Tipton, Iowa, and Mr. Matt Baker, one of the sellers. Mr. Spear finally surrendered to Mr. Matt Baker, of Manning, Iowa, on the \$1,000 bid made by Mr. Baker, this price being the top of the sale. Mr. Charles Escher, Sr., of Botna, Iowa; Alex Spear, of Tipton, and O. R. Stevenson, of

Rubber Roofing

SOLD DIRECT TO THE FARMER.

A PERFECT ROOFING requiring no COATING. Suitable for steep or flat surfaces. Will stand any climate. Is WATERPROOF. Put up in rolls containing 108 square feet. Packed in center of roll are directions for laying and sufficient nails, caps and cement to lay 100 square feet complete. 1-ply, weighs about thirty-six pounds, per square, \$1.50. Every roll guaranteed. Send for samples. Cash with order. If not satisfactory, it can be returned or money will be refunded. Reference, Citizens Bank.

FARMERS SUPPLY COMPANY, - WEST BRANCH, IOWA

ATTENTION, BOYS!

Would you like to own a knife like that? It would make the other kids' eyes stand out, wouldn't it now? Well! you can have a knife just like it for nothing, no money, not a cent, just a few minutes' work—easy work at that. No woodpile business in this! It's just dead easy. Write us a post card, a letter, any old thing; but give us your full name and address and tell us you want to earn the PRESS BUTTON KNIFE. That's all you need say. We'll send you full particulars as soon as we receive it. It's a cinch you earn the knife the same day you get our letter. Address,

Boys' Department, THE HOMESTEAD, Des Moines, Iowa.

Quimby, were among the new acquisitions who furnished ample competition at this sale. Mr. Baker has been handicapped in and development of these cattle to their highest state of perfection by not having sufficient land so that he could have an abundance of pasture. Accordingly some of the cattle were somewhat undersized and others thin in condition. Had the offering been in the pink of condition, we doubt not that the prices recorded would have been much larger. Thirty-two of the thirty-five Blackbirds sold were the descendants of one cow, which serves as another illustration that by judicious selection of one good female of some well-known family possessed of real merit and properly banded, she will, in a very few years produce a neat little fortune for the owner, providing he will do his part in the way of care and management. The following subjoined list of all buyers' names and postoffice addresses, who paid \$100 or over for their purchases, will be of interest:

FEMALES.

Black Beauty of Cloverland 3d, one year, sire Black Keillor 3d, H. J. Hess, Waterloo, Iowa	300

47 head sold for \$10,855; average, \$231.00	

Thompson & Smith's Short-horn Sale.

Though corn husking and other farm duties were pressing, a fair-sized crowd of farmers and breeders gathered at West Liberty, Iowa, on Wednesday, of last week, to witness the sale of some of the best Short-horns in the offerings of this fall. The dangerous illness of the auctioneer, Colonel Woods, made it impossible for him to attend and the lack of his presence was felt keenly throughout the afternoon. However, local talent was secured as a last resort and the outcome of the sale was highly complimentary to the strenuous efforts of Auctioneer P. N. Gibson and his helpers, Jean Pagan, of Marion, and T. A. Alexander, of Morning Sun, that so high an average was secured. Messrs. Thompson & Smith brought out an offering equal and above the expectations of many. The best of spirit prevailed throughout the sale. Splendid entertainment was afforded and the heated sale pavilion at the fair grounds near by is a splendid place for such an event. Twenty-eight females averaged \$147.85. Eight bulls averaged \$146.63. Thirty-six head made an average of \$147.63. The following sales running over \$100 were made:

FEMALES.

you or anyone else wishing to order millwork.

And whether the order be for \$5 or \$10,000 worth, the price of each article is the same and the saving is from 50 per cent to even more on doors, windows, etc., including every piece of woodwork that goes into any kind of a building.

All you have to do is to write Messrs. Gordon Van Tine & Co. a postal card for

THE LARGEST WOODWORK FACTORY IN AMERICA.

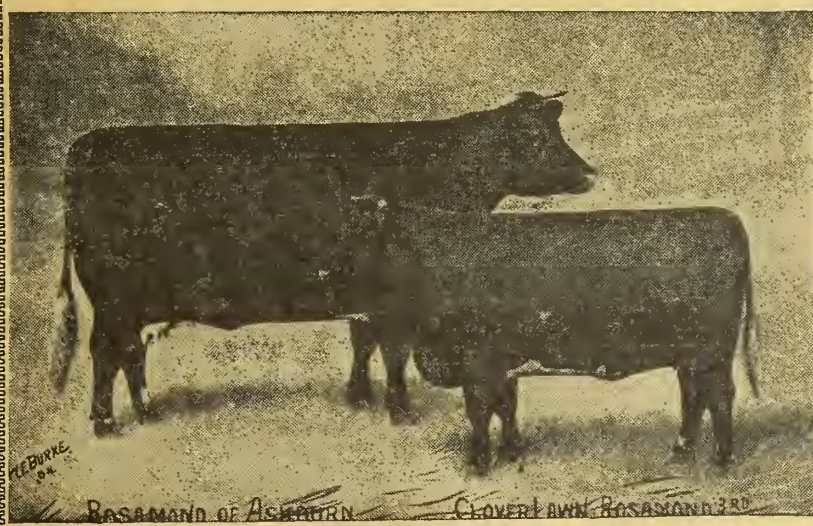

their free catalog, which plainly tells how to order any of their products.

One of its main features is a set of pictures and complete architect's plans for houses of moderate cost, which in itself saves many a builder the expense of having plans drawn.

Other features of the catalog are the tables of sizes and prices on front doors, grained doors, painted doors, storm doors, white pine doors, art windows, plain rail windows, storm windows, barn windows, base moldings, casing, sash thresholds, lattice, molding, hardwood flooring, window screen stock, door frames, window frames, gable ornaments, colonial columns, turned porch columns and porch newels, stair work, stair newels, porch frames and rails, stair balusters, building paper, stepladders, window glass, glaziers' supplies, art glass, etc.

And the company also send a free book of plans for barns, hen houses, hog houses and other outdoor buildings, together with a free book on high quality roofing which they sell direct at half dealers' prices.

Messrs. Gordon Van Tine & Co.'s catalog

Rosamond of Ashburn, the splendid Scotch cow, and heifer calf included in the dispersion sale of Mr. Chas. Neff, of Walnut, Iowa, on November 20th.

FARMERS OUGHT TO KNOW ABOUT THIS.

Messrs. Gordon Van Tine & Co., of Davenport, Iowa, have cut dealers' prices in half everywhere on windows, doors, woodwork, roofing, etc., by selling only direct from their factory to the man who is building or repairing.

Here is something that every home owner will recognize as a favorable tendency of the times—because instead of increasing the cost of necessary materials for improvements of the home, it cuts the price in two, and the home owner, building or contractor gets the benefit of the saving.

Messrs. Gordon Van Tine & Co., of Davenport, Iowa, operate the largest woodwork mill in America, and they have used their strong position to revolutionize the woodwork and roofing business of the whole country by withdrawing all their salesmen and agents and giving this saving of expense to the man who buys their products direct from the mill. They guarantee to deliver safely and promptly to any man in the United States and Canada, who is building or repairing, just exactly what he wants in high quality millwork, or roofing, and save him half what it would cost him if he bought the same thing from his home dealer—freight included.

This company have been in business since 1865 and their responsibility runs into the hundred thousands, as any banker can tell

is such a complete one that it has become a standard reference book in thousands of country homes, to be consulted whenever any building is to be done.

Another point which protects the consumer is that the quality of Gordon Van Tine millwork is always the highest, being made strictly in the official grades adopted by the Sash, Door and Blind Manufacturers' Association of the Northwest. Not all millwork is.

Besides this, any order may be returned at the company's expense if not exactly as represented and all money will be refunded at once.

Without doubt the reason this firm save the consumer 50 per cent of the cost of millwork below his local dealer's prices, freight included, is that they sell direct from the largest mill in the world. It covers 163,000 square feet of space, four acres. Besides, the company own their own timber lands, saw mills and lumber yards and can keep large stocks of the finished millwork on hand to supply the demand even quicker than the local dealer can order and deliver it to the farmer or builder. And it is a great advantage to the consumer to deal directly with the mill rather than through ordinary mail order houses. He gets a lower price, as no middleman's profit is figured upon, and he gets what he wants.

We feel certain that every one of our readers who has any building or repair work to do now, or in the future, will do well to write for this company's millwork catalog.

If you address the company, Station A92, Davenport, Iowa, it will be known that you are one of our readers, and all the company's literature will be sent to you promptly, including the free book of plans, roofing book and the grand millwork catalog. Only a postal is necessary. See advertisement on page 40.

I CURE CANCER

MY MILD COMBINATION TREATMENT IS NOT A NEW REMEDY.

It has the experience of years back of it and has cured hundreds of cases where the hand of death seemed to forever have closed upon them. Endorsed by physicians, ministers, bankers, business men and others.

Treatment Not Painful

There is no necessity for the patient enduring the intense pain caused by applications of caustics, burning plasters, fiery poultices, etc. Scores of the most advanced cases of Cancer have been cured by my Mild Combination Treatment entirely without pain.

BEWARE OF THE KNIFE

No case of Cancer was ever cured by a knife operation. The patient suffers untold agony and shortly finds himself in worse condition than ever. I cure cancer by a combination treatment. Local treatment destroys the deadly cancerous growth; constitutional treatment drives the disease out of the system, thus preventing its return.

Names of a Few of the Many I Have Cured

Mrs. Anna E. Guffy, Arcadia, Kans., Cancer of Breast.
Mrs. Frances Downey, Slidell, La., Cancer of Jaw for 14 years.
Mrs. A. E. Foyt, Rosebud, Texas, Cancer of the Womb after operation failed.
Mrs. D. E. Stone, Harper, S. C., Cancer of Lip after operation failed.
Mrs. J. W. Groshong, Wright City, Mo., Large Cancer in the Forehead.
Mr. N. J. Bell, Newburg, W. Va., R. No. 2, Box 11.
Mr. Peter L. Rice, 1225 14th St., Des Moines, Iowa, Cancer of Stomach.

FREE BOOK—CANCER AND ITS CURE

I send this large book to sufferers free of charge. Tells how and why my treatment cures. If you cannot come to my office for treatment I can cure you at home. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—do not give up hope but write at once.

DR. O. A. JOHNSON,

THE OLD RELIABLE
..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.
 TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.
 30,000 Bu. With One Set of Burrs.
 I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.
 Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog.
 Bovee Grinder & Furnace Works, Waterloo, Ia.

FIELD NOTES.

Mr. A. A. Rogers, Inwood, Iowa, has some good Chester White boars for sale.

Shropshire rams are offered for sale by Mr. George Allen, of Lexington, Neb.

Mr. John Schneider, Remsen, Iowa, has a few splendid Poland China boars for sale.

Mr. W. J. Wendt, of Marcus, Iowa, is offering some good Duroc Jersey boars for sale.

Messrs. Sandquist Bros., Oakland, Neb., are offering a few choice Poland China boars for sale.

Choice Chester White boars are offered for sale by Mr. J. L. Barber, R. R. No. 3, Harlan, Iowa.

Buff Orpington and Buff Rock cockerels are offered for sale by Mrs. G. R. Fuller, of Rolfe, Iowa.

White Wyandottes are offered for sale by the Forest Home Poultry Farm, Box 253, Audubon, Iowa.

Messrs. Reubel Bros., Rockwell City, Iowa, have some good March and April Poland China boars for sale.

Duroc Jersey boars and Short-horn bulls are being offered for sale by Mr. Jas. T. Dollison, Sac City, Iowa.

Some very choice registered Suffolk fillies are offered for sale by Messrs. Peter Hopley & Son, of Lewis, Iowa.

Thirty choice Single Comb Brown Leghorn cockerels are offered for sale by Mr. John C. Miller, of Harlan, Iowa.

Some splendid Duroc Jersey boars sired by Osceola Chief are offered for sale by Mr. Gus A. Pederson, of Ocheyedan, Iowa.

Messrs. Chandler Bros., of Kellerton, Iowa, are offering some splendid imported and home-bred Shropshire rams and ewes for sale.

Some splendid big-boned, good length Duroc Jersey boars are being offered for sale by Roy E. West, Route 1, Box 6, Churdan, Iowa.

Some extra good Chester White boars are offered for sale by Mr. W. R. Webb, Spencer, Iowa. He also offers some good open or bred gilts.

Fifty top Duroc Jersey boars and gilts sired by the great Junior Jim and Orion are offered for sale by R. C. Poston, of Corydon, Iowa.

Messrs. C. W. Daws & Son, of Harlan, Iowa, offers a grandly bred Scotch bull for sale, sired by the international champion Nonpareil King.

Messrs. White Bros., Perry, Iowa, are offering a Pride, a Queen Mother and a few other good Angus bulls for sale at bargain prices in order to make room.

If you want a Poland China boar and you want a good one, write Mr. John Schneider, Remsen, Iowa. These are sired by Winning Perfection and Keep On Third.

Crimson Wonder Again, the great Iowa State Fair sweepstakes boar is the sire of a few pigs offered for sale by Mr. Grant Summers, of Malvern, Iowa.

Read the new advertisement of Messrs. Mack Stevens & Son, of Iowa City, Iowa, offering stock of both sexes for sale on page 35 of this issue of The Homestead.

Mrs. L. C. Reece, of Prescott, Iowa, is offering some very choice Plymouth Rock cockerels of the best strains of blood and strictly first-class birds at from \$1.25 up. Also a few good pullets.

Poland Chinas of the great big type are offered for sale by Mr. Jas. Cockerton, Route 1, Whiting, Iowa. He offers twenty-two March and April boars for sale that will weigh from 175 to 225 pounds.

Ten Duroc Jersey boars, with which pedigrees will be furnished, are offered for sale by Mr. S. S. Krcbill, of Donnellson, Iowa, in an advertisement that appears on page 29 of this issue of The Homestead.

Mr. Jas. P. Spearman, of Papillion, Neb., is one of the best young auctioneers in the West. He has a few open dates and will be pleased to hear from any of our best breeders who are contemplating making a sale.

Mr. Hal T. Hooker, of Maryville, Mo., advises that he has been obliged to change the date for the Aberdeen Angus sale at South Omaha to March 12th and 13th instead of March 19th and 20th, as claimed in our sale date columns.

Mr. Harmon Gruver, of Brewster, Minn., breeder of Duroc Jersey swine, writes that he has April pigs that weight 200 pounds or over, in a nice growing condition, for sale to Homestead readers. His advertisement appears on page 38 of this issue.

Six yearling Poland China boars, of good length, large bone and from large families, sired by Perfection E. L. 2d 11003, are offered for sale by Messrs. Judy & Delashmutt, of Salem, Iowa, in their advertisement found on page 36 of this issue of The Homestead.

One of the most successful poultry breeders in a noted poultry district is Mr. J. D. Smith, of Montezuma, Iowa. He opens an advertisement in this issue on page 10. On his farm may be found some very fine specimens of S. L. Wyandottes, Bronze turkeys

and Pekin ducks. Anyone looking for high-scoring stock at moderate prices will do well to write for prices and other desirable information.

A public sale of Hereford cattle is announced to take place at Harlan, Iowa, on February 1st, the consignors of which will be Mr. F. W. Hann and others.

An advertisement of the Turligano Land Company, of Chicago, Ill., offering land for sale in Cuba, will be found on page 22 of this issue of The Homestead. For descriptive booklet, prices and terms write them.

Messrs. J. B. Fuller & Son, of Alden, Iowa, are offering Duroc Jerseys that will weigh from 175 to 200 pounds for sale. They can supply Homestead readers with both boars and gilts. Their advertisement appears on page 37.

Single Comb Brown Leghorn cockerels are offered for sale by Mr. J. B. Eskildsen, at Lawler, Iowa, in his advertisement which appears on page 10 of this issue. They will be sold at a reasonable price if taken soon.

White Leghorn cockerels are offered for sale on page 10 of this issue by Mr. J. H. Pieper, of Leigh, Neb. He announces that they are extra fine birds and of his special bred-to-lay strain. Low prices will prevail until January 1st.

Mr. J. T. Kelley, of Gilmore City, Iowa, has fifteen Duroc Jersey boars sired by Ambition, Keep On 3d, Crimson Orion, and other good sires, which he is offering for sale on page 29 of this issue of The Homestead. Write him for description and prices.

Some splendid Iowa farms are offered for sale and for rent by the Allen Land Company, of Laurens, Iowa. It will pay you to investigate these if you want to buy a farm or if you want to rent a farm. Their lauds are located in the best section of the state.

Mrs. Will Michael, of Selma, Iowa, has 150 Single Comb Brown Leghorn cockerels which she is offering at a very low price per dozen in her advertisement on page 10 of this issue of The Homestead. She also has Buff Cochins Bantams and Indian Runner ducks for sale.

Mr. Grant Summers, of Malvern, Iowa, has two good Duroc Jersey boars for sale, sons of the sweepstakes boar, Crimson Wonder Again; also some right good boars sired by Lottie's Top Notcher, a son of Top Notcher Again. He also has boars by Top Notcher Again for sale.

Mr. H. C. Cunningham, of Weston, Missouri, is offering a few choice Hereford bulls. All are the get of Lord Southington, a son of Imp. Southington. Write Mr. Cunningham about them. They will be priced right and the man hunting a bunch will do well to look after them.

Breeding stock from the White Clover herd of Poland China swine is offered for sale in the advertisement of Mr. M. T. McEvoy, of Emmetsburg, Iowa, which appears on page 36 of this issue of The Homestead. His hogs are sired by Black Perfection 10515L. Write him for description and prices.

Messrs. Joseph Skluner & Son, of Bedford, Iowa, proprietors of the state road herd of Duroc Jersey swine, have a number of choice boars of March and April farrow for sale. They are the growthy, prolific kind. Their new advertisement appears on page 29 of this issue of The Homestead.

Mr. R. J. Peckham, breeder of Poland China hogs, of Pawnee City, Neb., writes that he still has a number of good growthy boars, among which are several good herd headers, that he is offering at prices that anyone wanting animals of this kind cannot afford to miss. His advertisement appears on page 35 of this issue.

Mr. A. C. Berry, of Unionville, Mo., owner of the great Short-horn bull, Imp. Mutineer, is offering thirty Scotch and Scotch-topped cows and heifers at a bargain price. The cows are all in calf to Mutineer and the heifers were got by him. Mr. Berry also has a number of young bulls by Imp. Mutineer that are ready for service.

Mr. F. A. Strong, of Orient, Iowa, has an advertisement on page 37 of this issue, announcing a brood sow sale on February 14th. He writes: "My hogs are doing fine and I expect to be able to put up as good a bunch of Duroc Jerseys for my sale on February 14th for breeding and individual merit as will be sold next winter."

Messrs. E. L. Nagle & Son, breeders of Chester White swine of Deep River, Iowa, announce on page 35 that all their hogs are sold and that they only have ten gilts left, except a bunch of September farrow, pigs which they are now offering for sale. They think they have some great herd headers to supply breeders in want of such.

Mr. Cbas. Sobotka, of Cainesville, Mo., proprietor of the Elm Lawn herd of Duroc Jerseys, is offering both boars and gilts. Among the boars is the yearling hog got by Elm Lawn Orion and out of Roycroft Princess 154th. Mr. Sobotka prices his hogs right, breeds them right and pleases his customers. See page 37 for his advertisement.

Mr. Carl Hansen, Herman, Neb., writes as follows: "I have purchased a yearling boar and now offer my old herd boar Bar None 30241 for sale after December 1st. I consider him good enough to do service in any herd in the state. Were it possible to use

him longer in my herd I would not think of disposing of him. Any Homestead readers who want a good boar and a good sire should correspond with me at once."

Mr. R. P. Downing, of Albia, Iowa, has some Chester White yearling and April boars which he is offering for sale in an advertisement on page 29 of this issue. He also has Silver Laced Wyandotte cockerels and 200 head of recorded high-grade Angora goats which he would like to find purchasers for through the columns of The Homestead.

The Allen Land & Loan Co., of Laurens, Iowa, have seven farms of all sizes which they are offering for rent to right parties. These are all Iowa farms. They also have over 100 farms for sale, and always have two or three bargains on hand. Write them for catalog and map, which will be sent free. See advertisement on page 23 of this issue.

Mr. A. B. Holbert, of the Greeley Horse Importing Company, of Greeley, Iowa, writes: "Business looks very promising. We are sending horses into all parts of the United States, and have never before had such a fine lot to dispose of." The advertisement of the Greeley Horse Importing Company will be found on page 32 of this issue of The Homestead.

Mr. M. A. McWilliams, of Wall Lake, Iowa, has a few good Duroc Jersey boars for sale sired by the well-known boar, Orion J., a full brother to the noted prize-winner, Arion. These are out of granddaughters of Duroc Challenger and Orion, and one is out of a full sister to Crimson Wonder. Write Mr. McWilliams at once. He can suit you in price and in boar.

Mr. James Fisher, of Eastman, Wis., the well-known breeder of Chester White swine, makes the announcement in his advertisement on page 35 of this issue that his spring pigs are all sold and that he now has to offer sixty choice fall pigs. He is going to sell them cheap, and if any Homestead readers want something choice, Mr. Fisher has it. Write him for catalog and prices.

Custer county lands, some of the very best lands in the state of Nebraska, are offered for sale from \$15 to \$30 per acre by Mr. P. M. Marlay, of Mason City, Neb. This will only be for a short time, so if you are thinking of making an investment that will double your money you must write him at once. Tell him you saw his advertisement in The Homestead, and you will be sure of an immediate reply.

Do you want some good Barred Plymouth Rock cockerels? If so, the advertisement of Mr. Samuel Bone, of Montezuma, Iowa, on page 10 of this issue, will be of interest to you. Mr. Bone writes: "We have a nice lot of early cockerels, great big fellows, with heavy bone and nicely barred. I think your readers will find them real bargains at \$1 each. We must close them out for we need the room. Those who send early orders will get first choice."

Mr. Ernest L. Mear, of Neponset, Ill., breeder of Chester White swine, in asking us to make a slight change in his advertisement which will be found on page 35 of this issue of The Homestead, says that he is entirely sold out of boars, excepting some of May farrow. These will weigh from 125 to 150 pounds and he is pricing them at \$20 and \$25 each. He also has some very good gilts for sale which will be sold either bred or open. He has five good boars in service in his herd and reports that his hogs are all healthy and doing well.

The advertisement of Messrs. W. L. Addy & Son, of Parnell, Mo., appears on page 38 of this issue of The Homestead. These gentlemen, writing in regard to their stock, say: "We are well sold out of spring males, but have one splendid farmer's pig which would be appreciated by an enterprising farmer. We would be pleased to correspond with those in need of such an animal. We have a fine string of summer and fall males that are full of promise, and it might be of interest to those looking for something to fit for next year's show, to make our herd a visit. We have a had a good trade this year, having sold since our March sale hogs from California to Missouri, the Dakotas to Texas. Most of our pigs have gone at farmers' prices. We have reserved all of our female stuff for the brood sow sale which will be held about February 22d. We have a nice lot in course of development and feel that we will be able to furnish the boys with

something new and attractive." Messrs. Addy report a visit recently to the well-known herd of Mr. L. H. Roberts and speak very highly of the stock they found there.

The advertisement of Mr. M. A. Easthouse, of Hartley, Iowa, will be found on page 29 of this issue of The Homestead. In furnishing copy Mr. Easthouse writes: "My Poland Chinas are in good condition, the pigs are growing and extra heavy boned. I guarantee satisfaction or will refund the money. My herd boar, Oris Duke 88967, which I am offering for sale, is of extra good length, heavy-boned and with well-sprung ribs. I will ship this hog on approval to any reliable purchaser. I guarantee him to be a good breeder."

Mr. W. J. Prather, of Russell, Iowa, writes in regard to his Duroc Jersey swine, an advertisement of which appears on page 37 of this issue: "I have some good growthy boars for sale by Proud Advance and Top Notcher Again. Some of them are of extra length. I also have a nice bunch of gilts and as I will not have a sale I will sell them bred or open, with more than sale expenses off. If any reader of The Homestead is in need of something lengthy, I have them sired by the second-prize yearling at Des Moines this year and the first prize at the Nebraska State Fair."

On January 25th at Fullerton, Neb., Mr. Thomas F. Miller, one of the oldest and best breeders in the state, will close out his entire herd of Poland Chinas, including some of the best brood sows that have ever been brought to the West. Mr. Miller became well known in the West through his herd boar, Peter Sterling, a son of old Chief Tecumseh 3d, that had more size and bone than is usually found in one hog, and he was a great breeder. Many of his daughters will be in this sale and they are great brood sows. We will let our readers know more about this sale in due time.

"The pigs I am offering for sale," writes Mr. W. A. Bender, of Rowley, Iowa, in furnishing copy for his advertisement of Large English Berkshires, which appears on page 29 of this issue, "are a fine lot. They are first class in every way. All are strong, growthy fellows and ready for business. They are of the best of breeding and the gilts will be bred to a first-class boar, bought at the state fair from prize-winning stock. These pigs will be bargains at the prices that I am quoting them. I have been breeding Berkshires for fifteen years and have as good as money can buy. I will send out none but the best to customers."

Mr. J. T. Judge, of Carroll, Iowa, proprietor of the Walnut Grove herd of Short-horn cattle and Poland China swine, has a new advertisement in this issue of The Homestead. It will be found on page 34. At the head of his Poland China herd stands the boar, Clear The Way 23482, winner of first in two-year-old class and first as champion at the Iowa State Fair in 1906. He is assisted by Defender 98447 by Old Corrector 63379. Mr. Judge considers him one of the greatest sires known to the breed. Billy Sunday 83621, a very large-boned hog, has also been used in the herd. Stock is offered for sale at reasonable prices.

Messrs. A. M. Avery & Son, of Mason City, Iowa, who have been offering Shropshire rams for sale, write: "We have to report that our yearling Shropshire rams are all sold and the nice thing about it is, without a single exception our customers have been more than pleased with their purchases. Now, we want to make thirty more pleased customers with our Duroc Jersey boars. We have an extra good lot which we believe will suit the most exacting buyer. In fact, we guarantee them to meet with the approval of the buyer or they may be returned. It has always been our aim to deal on the square and we shall try to please every buyer." See advertisement which appears on page 29 of this issue.

Mr. W. F. Hemmerling, of Dike, Iowa, breeder of prize-winning Chester Whites, wishes to call breeders' attention to Modeler 13235, whose "sketch" will be found on page 28, also to his advertisement on page 35. Look at the sketch and then at the winnings of this magnificent boar, sired by Nashua Boy 12563, also a state fair winner. Modeler is just as his illustration shows. He is extra long with a splendid wide back, well-sprung rib, great bulging hams and shoulders, fine head and ear, good heavy bone and extra good feet and legs. Modeler made a trip to five of the best state fairs this year—Iowa, Minnesota, Wisconsin, Kentucky and Illinois—and made a clean sweep, landing first in class at each and breeders' champion at the great Iowa State Fair, a record that has never been equaled by another Chester White boar under one year of age, we believe. A few choice White Plymouth Rock cockerels for sale.

Within a comparatively few years the Watson, Woods Bros. & Kelly Co., of Lincoln, Neb., importers of draft and coach horses, have risen to a point where few if any importers handle more horses within the year than does this firm. The Percherons are brought in largest numbers, with English Shires next. German Coachers and Royal Belgians are also handled by this firm. Their horses are selected by that veteran importer and judge, Mr. Joseph Watson. It is a well-known fact that Mr. Watson likes the good ones only, that he selects horses with scale, good legs, sound feet and that quality is never lost sight of. The first shipment of thirty black and gray Percherons, twenty English Shires, a few German coachers and Belgians arrived in fine condition and are now quartered at the barns in Lincoln, Neb. This firm have never had a better class of horses in their barns than now. They are mostly dark colors with now and then a beautiful gray among the Percherons or a chestnut among the English Shires. The Watson, Woods Bros. & Kelly Co. point with pride to the regularity with which their old customers return for stallions. That the buyers of stallions have confidence in this firm was proven at the public auction they held at Lincoln last winter. They this year are selling at the barn door and at very close prices. Mr. Watson is now on his way over with another importation of fifty or more. To the man wanting a stallion the Watson, Woods Bros. & Kelly Co. extend a cordial invitation to visit their barns. Pictures of their horses are being made and will be sent to prospective purchasers on request. See page 33 for advertisement and when writing this firm kindly mention this paper.

Registered Scotch Collie puppies, bred from trained parents, are offered for sale on page 10 of this issue, by Mr. A. H. Gerot, of Riverside, Iowa.

For the next fifteen days Mr. J. O. Walton, of Belle Plaine, Iowa, will sell April and May Poland China boars, at very moderate prices. The advertisement which appears on page 29 of this issue, will give further particulars. He also has Mammoth Toulouse geese for sale and high-scoring Barred Plymouth Rock cockerels.

"The Best Insurance for the Least Money" is the motto of the Bankers' Accident Insurance Company, whose advertisement appears on page 14 of this issue of The Homestead. The company is now operating under the supervision of eight states and is contemplating entering others. The Bankers' Accident Insurance Company, of Des Moines, Iowa, is one of the strongest institutions of its kind in the middle West, and those of our readers who are interested along this line will do well to write the company at 508 Youngerman Block for particulars regarding their policy. The following is an extract from the official report of the bank examiner of the state of Iowa: "The records and correspondence of the company show that it is prompt in the settlement of its losses. The business on the books of the company is of good character, and its affairs seem to be intelligently and honestly managed."

Writing in regard to his Duroc Jersey herd, Mr. H. S. Allen, of Russell, Iowa, says: "I still have some good boars for sale, sired by Leather Stockings 2d and Top Notcher Again, also one April boar by Crimson Wonder Again, the Iowa champion, and one pig by Keep On, Messrs. Johnson Bros.' herd boar. We have one especially fine pig sired by Leather Stockings 2d and out of the best Top Notcher sow that is on the farm. He was farrowed March 16th, there being thirteen pigs in the litter. He has extra good back and hams and good short head and nose, heavy bone, good legs, built close to the ground and is ideal in color. He should go to head some good herd and will be priced very reasonable. The Crimson Wonder pig has heavy bone and best of feet, with a good body and best of color. He will be priced to move him. In fact, any of our hogs will be priced very reasonable, as we wish to close them out to make room for our sows that are being bred for our February sale."

One of the best herds of Short-horns in southwest Iowa is owned by Mr. C. F. Mitchell, of Shenandoah. At the head of the herd is Gondomar 25394, a son of the great Choice Goods and out of Golden Lassie, by Galveston. The late Colonel Casey paid \$2,000 for Golden Lassie and she was one of the best cows in his herd. The youngster was purchased at the closing out sale of the Tebo Lawn herd, and he cost Mr. Mitchell nearly \$500. He is a richly bred Victoria and a roan in color. He has made splendid development in Mr. Mitchell's hands and he is going to make one of the best Short-horn bulls in the state. He has a choice lot of females in his herd, and these will all be bred to this son of Choice Goods. He also breeds Poland China hogs, and the combination has made him plenty of money. He will make a sale later on when we will have something of interest to say to Homestead readers about what he will sell on that occasion.

"Our sales have been very satisfactory in both stallions and mares during the past month," write Messrs. Maasdam & Wheeler, of Fairfield, Iowa, under recent date. "We are having numerous inquiries for stock. Both our imported and home-bred stallions are doing well and are in fine condition. We do not hesitate to say that we can show more size, bone and quality in our Percherons than any other dealer or breeder. Our mares are black and dark grays in color. We can mate up several well-matched teams of well-broken pairs. The oldest mares are seven years old and we offer them from weanlings to this age for sale. We have a three-year-old mare that is pronounced by leading breeders, who have seen her, to be the largest Percheron mare in America, in size of bone, width and all points that go to make up a large draft animal. We give a liberal guarantee with all stallions sold and our prices are more reasonable than other breeders on first class stock. We would be pleased to entertain anyone coming to see our stock, and will meet them at Fairfield when notified of their coming." Read their advertisement on page 32 of this issue.

Mr. U. G. Davidson, of Manson, Iowa, breeder of Duroc Jerseys, writes: "I still have half a dozen good boars by Crimson Wonder I Am, and several by the massive yearling, Iowa Wonder 44863, that should head good herds. It will be remembered that at the boom sales last year boars sold for four and five times what was asked for hogs sold from this herd, yet at the final roundup at Des Moines this fall Crimsons were easy winners. There is still show yard material in the herd and no breeder will have to mortgage his farm to buy it, either. I will sell my herd boar, Iowa Wonder 44863, and let him go December 1st. I also have a good son of Orion for sale. These boars have proved their ability to sire good stuff and are sold for no faults. Any breeder who desires a good herd header or who would like a boar to fit for the show next year is cordially invited to come and visit my herd. I have a few prospects yet that are as good as some I sold last year that made great records in the show ring. Call and be convinced. I sell boars by mail order to all who care to purchase that way, and guarantee my descriptions, but prefer personal inspection of the herd. Parties writing, after reading advertisement on page 39, please mention The Homestead."

Mr. Clyde H. Smith, breeder of Duroc Jersey swine at Riceville, Iowa, writes: "The pigs that I am offering for sale are a first-class lot in every way. As my advertisement on page 29 states, most of them are sired by Pine 37903, winner of second in class at the Minnesota State Fair, 1905. I also have a few boars sired by a son of Improver 2d. I would like to book orders for a few more extra good gilts to be bred to either of my two herd boars. One is a son of Iowa Notcher, winner of first in class at the Iowa, Minnesota and Interstate Fairs. His dam is Galva Lena. She was sixth in class at Iowa State Fair, 1905; also

Home Offices and Laboratories,
DETROIT, MICHIGAN.

sixth in class, 1906, and was one of the fifth prize aged herd at Iowa and one of the second-prize aged herd at Minnesota State Fair, 1906. He is one of the heaviest boned hogs I ever owned. My other herd boar was bred by Mr. A. B. Wingerd, of Kingsley, Iowa. His sire is Golden Star by Advance. His dam, A's Choice, was first in class under one year at Sioux City. Her litter brothers won first, second and third last year. A's Choice is also a full sister to W's King, first-prize and sweepstakes boar at Sioux City this year. Now, if these boars are not bred right I don't know where to get them and if any of The Homestead readers want a good boar or a gilt, either bred or open, I think I can please them."

Mr. B. M. Boyer, breeder of Chester Whites at Farmington, Iowa, writes: "I wish to state that I have enjoyed the best trade this fall that I have ever experienced since I have been in the business. I have sold twenty-six head in the last three weeks, not over three to any one man, and not one dissatisfied customer. I will give anyone the names of those to whom I have sold upon request, and they can write them and see what kind of hogs I am selling. I still have nine head of boars, weighing 150 pounds or better, that I am pricing down right; also eight head of boars weighing right around 200 pounds or better, any one of which is good enough to head any herd. I am pricing them for what they are actually worth and no more. My gilts will weigh from 150 to 200 pounds, and I keep none of my stock fat, just in breeding shape, and can supply pairs and trios not akin. Remember I pay the express charges and ship C. O. D., or on approval, to anyone giving good reference. I will be pleased to mail anyone my catalog on request, giving the breeding and a full description of my herd. If anyone desiring to purchase will describe just what they want, I can then tell if I can fill their order or not, and hold same for them; otherwise if they write for me to describe them I may sell the one that I describe before they can order, as I am receiving from four to ten inquiries daily." See advertisement on page 35.

PRITCHARD'S BIG POLANDS.

Dr. H. Pritchard, of Wisner, Neb., one of the best Poland China breeders in the West, is offering a splendid bunch of young boars for sale. These are sired by his 1,000-pound boar, Big Tom 2d; Wisner Chief, a son of Chief Tecumseh 3d; Perfection Keep On, and Black Joe. He has some choice pigs with size and finish for sale.

TILLMAN HAS GOOD ONES.

One of the coming bred sow sales that should attract the attention of breeders and farmers of the corn belt is the sale to be held at Ragan, Neb., February 27th, by Messrs. S. J. Tillman & Son. These gentlemen have been breeding Durocs for some time and were among the very first to bring the Duroc hog into this section of the country. Messrs. Tillman have been buyers of some of the choicest stock at many of the good sales and by good judgment of mating hogs they now have an extra good bunch of sows to offer the lovers of this breed when they arrive on sale day. This herd is headed by Jumbo's Ideal, a large, strong fellow with much substance and quality enough to be used in any herd. Messrs. Tillman have just bought a son of Nebraska Wonder by Crimson Wonder that we consider one of the best things in the male pig line we have had the pleasure of

seeing this year. The sows in the sale will be mated with these two fine young males and we earnestly request our readers to attend this sale and whole circuit, as you don't know what these boys have in store for you. Remember the date, February 27th, and make arrangements early to attend the sale.

GOOD HEREFORD COWS AND HEIFERS.

Any of our readers who want some good Hereford cows and heifers should write to Mr. W. W. Wheeler, of Harlan, Iowa. He is long on females and says that he will make special prices for the next sixty days. These are royally bred and are good individuals. He needs the room, and the man that needs cows and heifers will get some bargains if he will only go and see Mr. Wheeler.

SOME GOOD SHORT-HORN CATTLE FOR SALE.

On page 34 will be found the announcement of Mr. J. H. Moyer, of Newton, Iowa, announcing the sale of some good Scotch and Scotch-topped Short-horn cattle. Mr. Moyer's herd has for some time been headed by Scottish Baron, a straight Cruickshank bull that has left his impress on the herd for good. Parties in quest of either bulls or females and who desire to buy at private treaty will do well to correspond with Mr. J. H. Moyer, of Newton, Iowa.

ALLDRITT'S DUROC JERSEYS.

Mr. Frank Alldritt, of Friend, Neb., wishes to say through the columns of The Homestead that he has a few extra good male pigs left that will be priced right if taken at once. He has three sons of Ohio Chief that are good ones and one of them he considers good enough to head any herd. Their dam was Fortune Teller by Won't Be Beat by old Kan't Be Beat, the \$2,500 boar. You will find here an extra good bunch of male pigs from ten of the most noted sires in the business. Write him at once and get your choice before the good ones are gone.

THREE GOOD YOUNG SCOTCH BULLS FOR SALE.

Mr. J. D. McDermott, of Wiota, Iowa, offers to sell three good young Scotch Short-horn bulls. Two of these are sired by Imp. Fashion Favorite, one being out of Imp. Augusta Bruce, and the other out of Imp. Gilted Maid. The other is sired by Imp. Craibstone, out of Miss Bess by Bap-ton Spice. There is no better breeding than is behind these three young bulls. The breeder who is looking for a herd bull should go and see these. Mr. McDermott says that he will price them at such a figure that any man that has a herd can afford to buy. Write him or go and see them. Kindly mention The Homestead when doing so.

FARMERS, LEND YOUR EARS.

The above attention is all that is asked by the Farmers' Supply Company, of West Branch, Iowa. They will convince every thoughtful farmer that big money can be saved by purchasing rubber roofing direct and save money. One ply weighs thirty-six pounds per square, and sells at \$1.50 per square, with nails, caps and cement for laying. No such prices have ever been made to farmers direct on a first-class roofing. This roofing needs no coating. It is suitable for either steep or flat roofs. It will not leak. The Farmers' Supply Company are perfectly reliable and reference can be made to Citizens Bank at West Branch. If goods are not as represented and satisfactory, money will be refunded on return of the roofing.

GEO. KARCHNER BUYS GOOD BOAR.

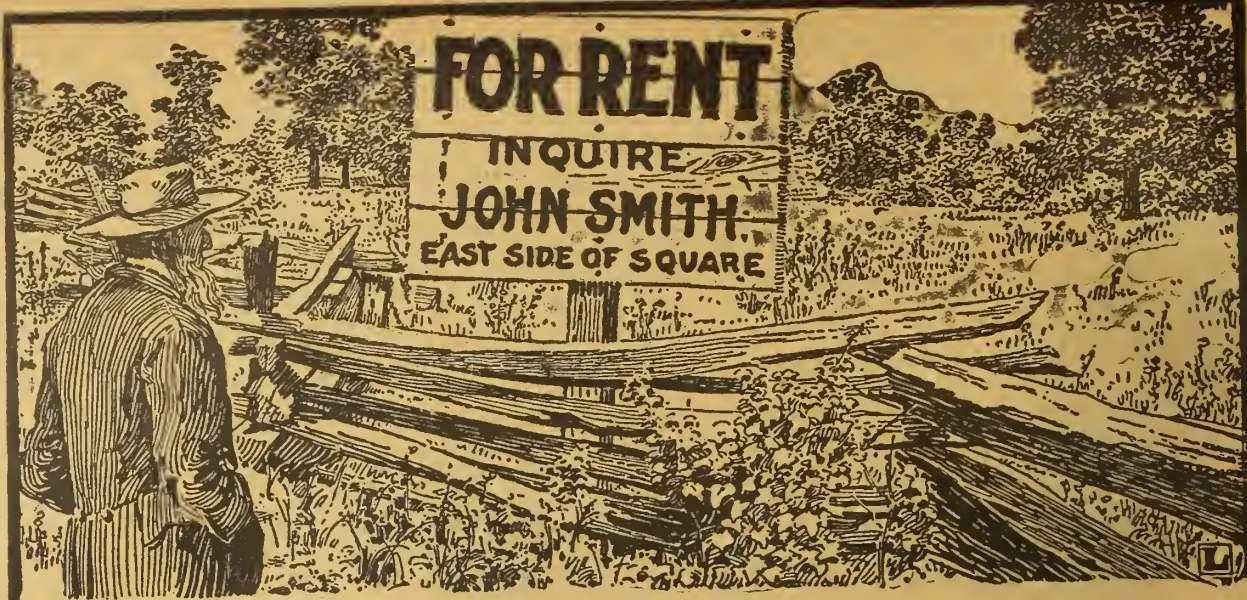

In looking over the many good herds of Duroc Jersey hogs in southwestern Nebraska, we find that these men are making rapid advancement in improving their good herds. Upon calling on Mr. Geo. Karchner, at Wilcox, Neb., we find that he has recently bought the first-prize male pig at the Topeka fair, 1905. Journal II. 39127, as he is called, is, we consider, one of the coming hogs of the business. He is a good pig in every respect and was purchased by Mr. Karchner to assist in making his coming brood sow sale an attractive one. The sire of this hog is Duroc Jim 22829, by Liberty Perfection 11195. Mr. Karchner will hold his annual brood sow sale February 28th and will have an extra good bunch of gilts bred to this hog to offer the buyers.

PERCHERON STALLIONS AND MARES.

On page 29 of this week's Homestead will be found the advertisement of Mr. Jesse S. Golder, of Scribner, Neb., who offers to sell ten head of young Percheron stallions, ranging in age from two to four years. He also offers to sell a few choice Percheron mares at living prices. Mr. Golder is one of the best draft horse men in Nebraska and is a natural born horseman. His father was one of the pioneer Percheron draft horsemen in that state and his reputation for square dealing was above reproach. Mr. Jesse Golder, the son, and the present owner of this stud, was brought up under this strict school, and there is not a better horseman in the West among the younger generation. He will be pleased to hear from anyone wanting stallions or mares.

LAST CALL FOR THE LENTZ CLOSING OUT DUROC JERSEY SALE.

On Tuesday, November 27th, at his farm near Earlham, Iowa, Mr. W. J. Lentz will close out his entire herd of Duroc Jerseys. He is offering about forty-five head in all, including herd boars, brood sows and young gilts. He also has a few good young boars for sale. In his announcement Mr. Lentz says: "Having sold my farm with the intention of moving to town, I am forced to dispose of my entire herd of Duroc Jerseys. In this herd will be found some well bred hogs having the blood of Orion, Top Notcher, Golden Rule and others of equal merit. They come of prolific families and their sires and dams have been well selected. They are of good build, good back and bone. My herd has not been overfed, but is in excellent condition. Some of the stuff that goes in will be sired by Lentz Red 16903, a son of old Red Lad out of Colma by Modoc Chief. Most of the young stuff will be sired by Gold Bud 43791. This is a Watt & Poust bred hog, and traces back to Orion. Kan't Be Beat, and old Top Notcher. He is a big-boned, lengthy boar, and all his pigs are growthy and well developed for their age. There will also be some good things in this sale sired by Addy's Top Notcher. There will be a choice lot of gilts in this

You can buy a farm in the Southwest for what you are now paying in rent

Do you realize that you are paying each year in rent the cost of a whole farm in the Southwest? When your present lease is up, take the money you would pay for rent next year and *buy* a farm in the Southwest. Good land in the Southwest costs only a fraction of what similar land costs in your state and you can raise big crops on it—probably bigger than you have been raising on the farm you are renting. At the end of your first year in the Southwest you will likely find your farm all paid for and the profits from the crop *all yours*.

The Southwest is a wonderful country

it will not be many years until it will be one of the richest agricultural sections of the United States. All it needs is men to cultivate its rich lands to make it the garden spot of America. It is only because there is so much unoccupied land that it sells for so little. Five or ten years hence the Southwest will be so well settled that good land will command as high prices as that in the best of our Northern and Eastern States.

The farmer in the Southwest has all the best of his brother farmer in the North and East. He is sure of big crops—he gets better prices for what he raises—he has good markets, splendid schools and churches and a better climate, especially in winter. He is happy, healthy and prosperous and he could not be induced to go back to his native state.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines
1413 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

sale, and some of these will do to go into brood sow sales in the spring. Breeders can well afford to attend this sale and pick up some of these, as there is money in them. Remember that everything goes, from herd boars and brood sows to sows with litters. Send for catalog and be sure to attend this sale. Kindly mention The Homestead when writing for it.

MONTEZUMA, IOWA, POLAND SALE.

At one o'clock, December 4, 1906, at the above place Messrs. F. E. Terrell & Son and E. F. Saunders will offer for sale fifty head of Poland China males and females. Both gentlemen have some splendid stock to

offer. Mr. Terrell is well known as a breeder of first class Polands as an inspection of the herd proves. A number of the young boars and gilts are sired by Jones Wonder 108223, a half brother to the hog that won second at Des Moines this year. This boar has proved his ability as a sire as his pigs have been in great demand by nearby breeders. A young vigorous boar in the sale won first at New Sharon fair in strong competition. There are also a few sired by On Exhibition 105171, thrifty, stylish pigs. The collection by Black Chief 93297 contains what many a breeder is looking for. They have good bone, are up on the toes and in good condition. This sire is one of sons of Da-

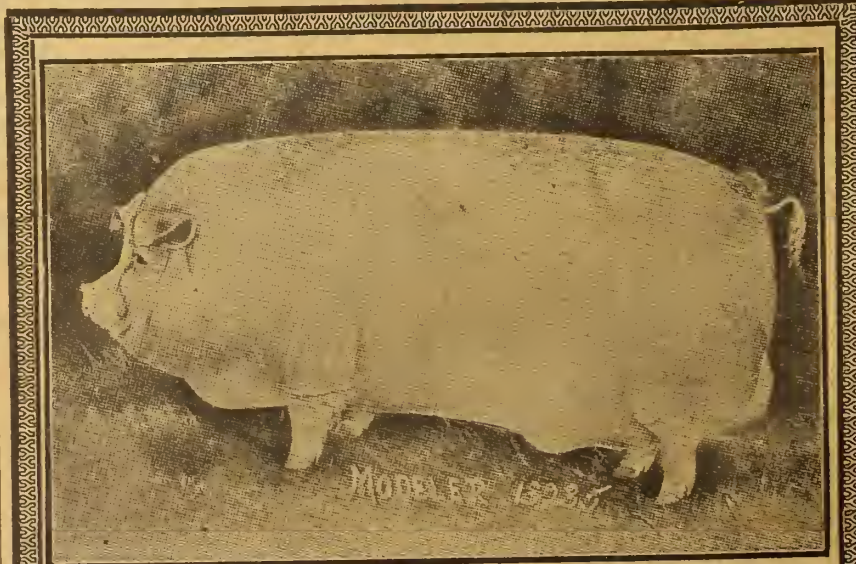

kota Chief 16581. Parties from a distance will be entertained. Here will be a chance to secure well bred hogs at your own prices. Good connections on the railroad, and a minute's walk to the sale ring. More about the breeding of these hogs next week. They are worth your attention.

GOOD ANGUS BULLS FOR SALE.

On page 29 of this week's Homestead will be found the advertisement of Frank B. Paup, of Kirkman, Iowa, who offers seven good young Aberdeen Angus bulls for sale. He says regarding these: "Rosene Favorite 64833 is a three-year-old, and is a son of Hale Lad 30645. He is a Queen Mother, and I have used him in my herd. I am saving all of his heifers, therefore must let him go. I am also offering a richly bred K. Pride, two Duchess, a Heatherbloom and a Carnation. These bulls are in nice condition and are ready for service. I will make a special price on the bunch, should one man want them all, or I will sell them separately." If any of our readers want an Angus bull they will help themselves by getting in touch with Mr. Paup at once.

SHORT-HORNS AT AUCTION.

Few sales are of greater importance to Short-horn breeders than the one to be had Wednesday, December 5th, during the International. A few cattle each from a large number of herds comprise the sale. They are of such excellent breeding and rare individual merit as will tempt the most discriminating buyers. The offering of cows and heifers has not been surpassed by any former sale conducted by the American Short-horn Breeders' Association, while the lot of bulls is without question the best that has ever been offered, and will afford a most excellent opportunity to get choice herd bulls. Prominent in the offering is Superbus 224710, a Cruickshank Secret, a prize winner of rare merit, got by Imp. Scottish Pride 128543, and having Golden Knight, Imp. Craven Knight and Roan Gauntlet among his ancestors. Another Cruickshank Secret is found in Royal Commander 267242, a son of Victoria's Count 141842, and one of the best young bulls produced in the Village Parke herd in recent years. Robin Hood, a son of Imp. Cock Robin, is also a choice bull. Nonpareil Star, a grandson of that remarkable sire, Nonpareil Victor, is a young bull of unusual merit. Then come Straight Goods, an excellent son of Choice Goods, Golden Cross, Fearless Sultan, a Marr-Besie, Gay Emperor, Merry Robin, Higblander, Fairbanks, Morning Star, a son of the \$1,840 Star of the North, and any notice of this sale would be very incomplete that failed

Modeler 13235, Vol. 12, breeders' champion at the Iowa State Fair, and first in class at the following state fairs: Iowa, Minnesota, Wisconsin, Kentucky and Illinois, 1906; headed young herds that won first, and several specials to his credit. Modeler was one year old September 5th, and weighed 500 pounds. We have a very choice bunch of gilts and fall yearlings to be bred to this great hog to be shipped when wanted. Address W. F. Hemmerling, Dike, Iowa.

to mention Bapton Hero and Bapton Ensign Jr., two excellent sons of the great sire, imp. Bapton Ensign. Write for catalog. Sale begins at 1 p. m., Wednesday, December 5th.

SEND FOR HULBERT'S CATALOG.

One of the most up-to-date Poland China catalogs that has been issued this year is that of Mr. Charles M. Hulbert, of Oakland, Neb. It is profusely illustrated with reproductions of all of his herd boars and brood sows and each litter is given in detail. Mr. Hulbert owns the great boar, Oakland's Prospect, the second-prize aged boar at Nebraska State Fair this year, and one of the best breeding boars in the West. This boar has great size, combined with quality, and he has the happy faculty of transmitting it to his get. If you are on the market for a Poland China boar to put at the head of your herd, a son of Oakland Prospect will be the thing. His splendid catalog will be mailed to all who mention this paper. Write for it at once.

KARCHNER'S DUROCS.

Mr. A. A. Karchner, of Wilcox, Neb., has just recently made a great addition to his herd of Durocs by buying the great boar, Lord Gold Finch 29263, by Gold Finch, the first-prize boar at the Chicago International show, and having for his dam Dotie 37472, the grand champion sow of the world at the St. Louis Fair. This grand old sire is a prize winner himself and Mr. Karchner expects great results from this hog when crossed on some of the good sows he now has in his herd. He will be assisted by Nebraska Wonder by old Crimmon Wonder, a hog that has already proven himself a great sire. Mr. Karchner will hold his annual brood sow sale March 2d and in this sale you will be able to buy a Nebraska Wonder sow bred to Lord Gold Finch. Remember the date and arrange to attend this sale.

SANSTEAD'S DUROCS.

Mr. Wm. Sanstead, of Holdrege, Neb., is one of the young Duroc breeders of Nebraska that deserves much credit for the showing he has made in the business in so short a time. He will hold his annual brood sow sale on February 25th, which is the first day of the southwestern Nebraska Duroc Jersey brood sow circuit. In this sale will be daughters of his herd boar, Munger's Ideal, by Ideal Perfection; dam Myrtle by Sensation Jr. This hog is an extra good one in every respect, having won four firsts and one second prize in the leading state and interstate fairs of the East in 1905. He was bred and shown with great success by Mr. A. A. Munger, of Janesville, Wis., and purchased by Mr. Sanstead at a long price. There will be several good sows in the sale bred to this hog and it will pay you to keep this sale in mind and get a sow bred to Munger's Ideal.

MCLEAN'S SHORT-HORN SALE.

On December 11th, Mr. W. J. McLean, of Rock Valley, Iowa, one of the best-known breeders in northwestern Iowa, will sell fifty head of Short-horn cattle. There will be forty-three females and seven bulls in the sale, among which will be seven head of Scotch cows and heifers and four Scotch bulls. Golden Lass, a three-year-old daughter of Sittytown Hero, will have a calf at foot by Ceremonious Archer, and Queen Victoria 7th, a richly-bred two-year-old Victoria heifer will be bred to his Scotch herd bull, Valley Sovereign. He also sells Mysie Lady, a daughter of Ahiquil, and a richly-bred Mysie. She is in calf to Valley Sovereign. There will be some good young bulls in the sale, both Scotch and Scotch-topped. The catalog is now in print and will be mailed on application. Write for it today and kindly mention The Homestead when doing so.

PREMIUMS FOR MIDDLEMEN'S PROFITS.

A big book tells all about it. A postal will bring it. This big book shows over a thousand premiums which are given in place of middlemen's profits. These profits that are made on goods on their journey from producer to consumer are all saved. The plan is to sell direct to you from factory. Crofts & Reed, Austin Ave., Dept. 134, Chicago, are making some eye-opening bargains. They sell soaps, tea, coffee, baking powders, flavorings, perfumes, breakfast foods and the like. On page 3 will be seen one of their premiums. Take advantage of their offer. They send a nice cake of fine toilet soap free. The man who is most successful in business is careful about details. It may be that your yearly expense in these things is small. Even so, a dollar saved is a dollar earned. You can use the dollar as well as the other fellow. When you write this firm please mention The Homestead.

LAST CALL FOR W. W. BROWN'S DISPERSION SALE OF SHORT-HORNS.

The last announcement of Mr. W. W. Brown's dispersion sale of Short-horns will be found on page 31. Mr. Brown makes this sale in order to devote his time to other business. That the herd should be dispersed at this time is to be regretted, as Mr. Brown had within the past year made additions to the herd that took considerable money and had he realized that he would find it necessary to quit the breeding of this, his favorite breed, at so early a date these additions would probably not have been made. But be that as it may Mr. Brown will sell and there should be men who are willing to buy his cattle. Among these additions was the massive rich red roan bull, imp. Tillycain, whose pedigree will be found in the advertisement. Mr. Brown paid a long price for Tillycain. From the records of his ancestors the bull should be worth the price. His dam imp. Circe 3d has two sons that are in good herds, one being now in service in the herd of Messrs. T. K. Tomson & Sons, of Dover, Kan., the other in service in one of Missouri's good herds. He has also proven a good sire in the herds where he formerly did service. Today he is as active and sure as many a younger bull and will do service for years to come. The cows in Mr. Brown's herd are cows that have been selected and bred by Mr. Brown with the intention of maintaining a herd of useful workers. They are all well along in calf to imp. Tillycain. Eight heifers just ready to breed will be found good things to buy. They were got by Mr. Brown's former herd bull, Pride Victor, a Scotch Victoria bull that was used with much success. Mr. Brown does not expect to realize any fancy prices for his cattle. He has not indulged in a great amount of fitting and all will be sold in just useful breeding

condition. Remember the date is Wednesday, November 28th.

SELLERS & SON WILL HOLD BRED SOW SALE.

Messrs. M. A. Sellers & Son, of Huntley, Neb., will hold their annual brood sow sale on February 25th, and will have an offering that should attract the attention of the best buyers. Their herd is rich in the blood of the most noted strains, they having purchased nothing but the best when laying a foundation for their herd. At the head of the herd is the yearling boar, Sellers Duroc by Cole's Duroc, dam Pauline by Paul Finch by Gold Finch. He is an extra good yearling with good width and depth and a pig that will make a creditable showing if properly cared for from now on. He will be assisted in service by a son of Ohio Chief that we consider one of the best Ohio Chief pigs to be used this year. They also have a good male pig by Dandy Top Notcher by Tip Top Notcher that will be used on some of the best gilts. Don't forget this date, as it will be one of the good offerings of the spring.

ANTI-FRICTION BUR MILL.

The old reliable four-bur anti-friction mills are working a great change in feed grinding. Great claims are being made for the anti-friction feature. How these grinders are made with absolutely no gearing or friction is explained in a little catalog which will be sent free. Make your request to the Bovee Grinder & Furnace Works, Waterloo, Iowa. On page 26 you will see an illustration of the mill and the experience of one farmer who has used a mill for seven years. In that time 30,000 bushels of corn have been ground. The hurs show practically no wear. The anti-friction feature should especially appeal to every farmer. The best grinder is the cheapest. Where there is much friction in the grinder there is more or less friction all around. The team works slow and the driver gets in a hurry. The pleasant relations between the team and driver are strained. More friction is created. No wonder some people have become disgusted. There is quality in grinders as in anything else. Look for it when buying. The anti-friction four-bur mills possess all the good features of grinding machines.

INTERNATIONAL SHORT-HORN SALE.

As the public appreciation of the great International Live Stock Shows has annually shown a commendable increase, so the interest in Short-horn sales that are held in connection with the International have made a corresponding growth. The cattle to be offered December 5th will maintain the high standard of merit established by former sales made by the American Short-horn Breeders' Association. Among the bulls offered are some, both imported and home-bred, that have such merit and proven excellence as sires that will strongly commend them to Short-horn breeders. The offering also contains cows and heifers of great merit in form and of the most desirable breeding. The cattle have been contributed by the following reliable breeders: J. F. Prather, I. M. Forbes & Son, Emory Cobb, Frank O. Lowden, C. E. Clarke, D. B. Searle, N. A. Lind, E. R. Stangland, F. W. Ayres, J. H. Miller, Arthur Meeker, Dr. W. H. Earles, Carpenter & Ross, Ardmore Stock Farm, Illinois Agricultural College, Mrs. Virginia C. Meredith, Samuel Fletcher, H. S. Bright, T. C. Robinson, Dr. J. D. Cole, O. S. Johnson, C. Hintz, E. C. Holland, J. D. Douglas & Son, H. G. Bowers, N. P. Ewing and M. M. Madden & Son. The sale will be held at 1 o'clock p. m. Wednesday, December 5th. For catalog write Mr. B. O. Cowan, assistant secretary, 17 Exchange avenue, Chicago.

SALE OF REGISTERED PERCHERON STALLIONS AND MARES FROM LAKEWOOD.

Announcement is made in this issue of the eighth annual sale of Percheron stallions and mares from that well-known breeding establishment, Lakewood Farm, owned by Mr. H. G. McMillan at Rock Rapids, Iowa. The time has dawned upon the American farmer and breeder of good horses that the American-bred stallion or mare is better adapted to his wants and conditions in many respects than the imported animal. Oftentimes with the imported animal considerable time elapses before a reasonable percentage of offspring can be expected, while with the home-grown one these conditions are largely overcome. A number of years ago Mr. McMillan conceived the idea that the American people would sooner or later awake to this fact, hence the great breeding establishment now established at Lakewood. A steady tendency in the direction of a preference for the home-bred horses has been made manifest throughout the length and breadth of the United States. Mr. McMillan enlarged his breeding plant until it is now the largest of its kind in America and is in position to offer stallions and mares in large numbers. In the offering at Sioux City on December 12th and 13th Mr. McMillan will place before the public more than ninety head, consisting of about thirty-two stallions from two to three years old, and sixty mares and fillies, each and every one recorded in the Percheron stud book of America. In order to produce stallions and mares of the high-class and character of those produced at Lakewood, the very best stallions in the universe must be used. Mr. McMillan secured among the earlier stallions used the champion World's Fair stallion of 1893, Seducteur, and later the international winner, Calypso. Calypso was winner of first prize as a three-year-old at the International in a strong ring of more than forty three-year-old stallions. He has since that time won first prize and championships at such fairs as Iowa, Minnesota and Sioux City, and more recently has been added the famous prize-winning stallion from Oaklawn, Olbert. Something of the winnings of these stallions in a condensed form awaits our readers in a future article. In this preliminary we would say that the object is to have every one that is interested in the purchase of a good Percheron stallion or high-class mares bred to such stallions as Calypso and Olbert, to apply at once for a catalog of this all-important sale. The catalogs can be secured from either Mr. Cash M. Dent at Rock Rapids, Iowa, or Mr. H. G. McMillan at Cedar Rapids, Iowa. The two days' offering of horses in one locality would indicate that prices for two days could not rule high. In fact, it is

POLAND CHINA SALE

TO BE HELD AT FEED SHEDS, MONTEZUMA, IOWA, DECEMBER 4, 1906.

at one o'clock. Sale consists of 40 sows and gilts and 10 boars. Sires principally represented are Jones' Wonder 108223, and Black Chief 93297. Breds in thrifty condition with both quality and bone. Parties from a distance entertained. Some prize winners at county fairs. Large litters; one of eleven out of Terrell's Wilkes 102111. Good treatment assured.

F. E. Terrell & Son, E. F. Saunders, Props., - - Montezuma, Iowa.

COLS. C. F. VANNATTA AND ROSS E. PORTER, AUCTIONEERS.

TOO LATE TO CLASSIFY.

CLOVER LEAF HERD OF DUROC JERSEY SWINE

A CHOICE lot of boars and gilts for sale, most of which are sired by Pine 37903 winner of 2d in class at Minnesota State Fair, 1905. Special price on 20 good boars to close them out. 1 ship no culls and guarantee everything as represented.

CLYDE H. SMITH, R. F. D. 1,

Riceville, Mitchell Co., Iowa

quite an experiment on the part of Mr. McMillan to make a two days' sale of so high a class of stock as will be put on the market at this time. More particulars will follow.

HIGH-CLASS ANGUS IN THE INTERNATIONAL AUCTION.

Breeders in search of bulls with which to head their herds or attractive females to add to them, will find them in the international auction to occur at Chicago, December 4th. Sixty head are cataloged, consisting of fifteen bulls and forty-five cows and heifers. Several show herds are included and quite a number are cataloged that will prove strong contestants for the championships of future shows, and that have now championship prizes to their credit. Mr. F. L. Sullivan, of Afton, Iowa, consigns three show animals, consisting of a son and two daughters of imp. Prince Ito, and one of the heifers being from an imported Trojan-Erica dam. They are certainly attractions. Mr. George Kitchen, Jr., of Gowar, Mo., consigns four animals with which he has been winning this year, and in Driftwood Rose a highly-bred Westertown Rose he is consigning one of the greatest females of the day. Mr. W. J. Miller, of Newton, Iowa, includes some of his show females and a double Blackbird bull that was bred by Mr. M. A. Judy, and a grandson on both sides of imp. Prince Ito. Blackbird bulls are also consigned by Mr. Judy, and Mr. N. G. Daughmer. All the most fashionable families and celebrated sires are represented, and individually the offering is believed to surpass any that has yet been made at an international sale of the breed. Mr. W. C. McGavock, sale manager, Springfield, Ill., should be addressed for catalog.

MESSRS. OLTMANNS BROS. GERMAN COACHERS, PERCHERONS AND BELGIANS.

One of the pioneer importing firms of this country is that of Messrs. Oltmanns Bros., of Watseka, Ill. Readers of this paper will remember that at the various important shows of the country the past few years Messrs. Oltmanns have been prominent prize winners. They have the advantage of many firms in that the senior member of the firm, Landschaftstrat O. N. Oltmanns, resides in the German Coach district and within four hours' ride of the Percheron and Belgian horse districts of France and Belgium and is ever on the lookout for the finest and best of the old countries produce. The German Coach stallions are strong impressing sires and crossed with the ordinary mares have proven especially valuable for growing of the carriage types which top the leading horse markets of the country. The Percheron and Belgian stallions, which Messrs. Oltmanns are offering to the public, are the best that money can buy. Their exhibit at the International this year will include a number of stallions of this breed. A cordial invitation is extended to readers of this paper to be at the stables of Messrs. Oltmanns Bros. at Watseka or the International Exposition. Watseka is only seventy-seven miles south of Chicago on the Chicago & Eastern Illinois and T. P. & W. Railways. Write for further information, kindly mentioning this paper.

HEALY'S OMAHA SALE.

On Tuesday, December 11th, at Omaha, Neb., Mr. O. M. Healy, of Bedford, Iowa, and Mr. O. E. Osborn, of Weston, Iowa, will sell forty-one head of Short-horn cattle. Mr. Healy will sell thirty-five head, all Bates cattle. He is one of the breeders that has never got away from the old reliable Bates cattle, the kind that will win out at the fair or when they are sold for beef. He is putting in fifteen head, all the get of his famous old herd bull, Airdrie Duke of Hazelhurst. Among these are a few good young bulls. He will also sell his present herd bull, Duke of Wapsie 229370. This animal will weigh 2,200 pounds; is three years old, and his sire is the noted Bates bull, 2d Duke of Oaks. He is a pure Duke bull, one of the most noted tribes known to the Bates cattle. He is an excellent breeder, and many of the young things in the sale will be sired by him. He will also be bred to most of the cows and heifers. About a dozen of his cows will have calf at foot. Mr. Osborn will put in six head—one bull and five females. The sale will be held at the sale pavilion at South Omaha, and these breeders who are looking for milking Short-horns will find them in this sale. Mr. O. E. Osborn, of Weston, Iowa, puts in seven head. He is closing out his Short-horns. He will sell one three-year-old Scotch-topped herd bull, Conqueror 221082, bred by Messrs. T. J. Wornall & Son, sired by imp. Conqueror 149048, out of Duchess of Crags 7th by 166th Duke of Wildwood 134671; two cows, two two-year-old heifers and two yearling heifers. Write Mr. A. M. Healy, of Bedford, Iowa, at once for catalog and mention this paper when doing so.

NEXT WEEK'S COMBINATION SALE AT CORYDON, IOWA.

At the above named place will be held November 30, 1906, the first annual sale of the Wayne County Short-horn Breeders' Association. Careful preparations are being made by a special committee to make the sale a suc-

cess. Covered quarters have been secured, a few minutes' walk from the depot. Railroad accommodations are ample and trains going through Allerton will be met by hack. Those who have not yet obtained a catalog should do so at once, making their request to Mr. J. E. Crosby, Secretary, Corydon, Iowa. The bulls are mostly yearlings and are a thrifty, breedly lot ready to do good service wherever placed. They represented some of the best blood of the breed as a glance at the advertisement on page 35 will indicate. About a dozen cows will be sold and are all tried breeders. Many of them will be represented by young stock in the sale. In good lines these matrons trace to The Lavenders, Orange Blossoms, Rosemary, Gloster 3d, White Rose and Fashion. The heifers comprise a good many individuals from these strains and present some good bargains for either the beginners or the experienced breeders. Choice Goods, Jr. will have several get in the sale, also Wild Wild Eyes 110645 of the Bates Wild Eyes tribe. Uno 170183, by Scottish Champion 123439, is another sire of the young stock, as also Fairview Viceroy 215075 of the noted Victoria family. This should be one of the good southern Iowa sales, and the Poland China offering in the forenoon by Mr. D. T. Harris, Mystic, Iowa, should prove an added attraction. Twenty-three head will be sold, comprising a number of young boars by Orange Longfellow 109307. He is also in the sale with four sows of known merit bred by Messrs. Winn & Mastin. Aim to take in this sale and supply yourself with good breeding stock.

The Homestead and The Homemaker \$1.25 per year.

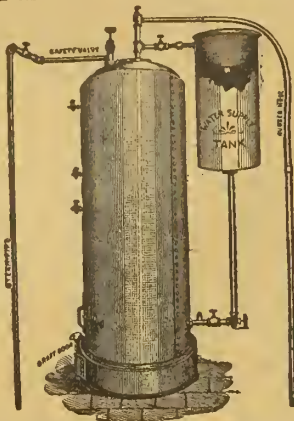

Last Call for the Delmar McCann Short-horn Sale.

The first annual sale of that enterprising young breeder, Mr. Delmar McCann, of Kennard, Neb., will be held at his farm near town on Tuesday, November 27th, when he will offer forty-two head of well bred Short-horns at public sale. Mr. McCann is putting some of his very best cattle into this sale, not because he wants to part with them, but because he desires to establish the reputation of offering the best for sale. Fifteen of the cows and heifers will have calf at foot by his former Cruickshank herd bull, Red Bud and many of these will be safe in calf again to his present Cruickshank bull Butterfly Duke 2d, a son of the Harris bred bull Godwin. As a special attraction in the female line he has consented to put in the imported cow Flora 50th. She is a seven-year-old, red in color, and was imported from Scotland by Cargill & Son. Her sire is the Princess Royal bull Director and her dam is a daughter of the Cruickshank bull Gravesend. She is now safe in calf to the Cruickshank bull Butterfly Duke 2d and she will be one of the most attractive things in the offering. He is putting in several Canadian bred cows and heifers. Among these are Roan Lady and Queenstown Maud. The latter cow will weigh 1800 pounds and is a daughter of the noted bull Blue Ribbon and her dam is a daughter of Royal Chief. She belongs to the Splendor tribe that has been noted for so many of Canada's best prize winners. She will have a bull calf at foot by Butterfly Duke 2d. There will be five of these Canadian cows and heifers in the sale and there are some very good ones among them. One of the very best two-year-old red heifers that will be offered is Caroline of Ploverdale. She is a daughter of the Cruickshank bull Baron Lavender and her dam is a daughter of the noted bull Imp. True Briton. She is safe in calf to the Scotch bull McDiamid, considered one of the most richly bred Mysie bulls in the state of Iowa. There will be twelve young bulls in the sale, among which is the young Scotch bull Brawith Lad 266794. He is a yearling in June, was sired by Golden Lad, a richly bred Brawith Bud bull, now at the head of the Messrs. Rolf Johnson & Son herd at Rolfe, Iowa. His dam is the splendid cow Imp. Rosemary 212th, considered the best cow in the herd of M. P. Hancher at Rolfe, Iowa. He is a Cruickshank Rosemary, a roan in color and will weigh 2500 when matured. Another good bull is Chuh 2d, a son of the Scotch bull Prince of Athene. He is a Scotch-topped Rose of Sharon and a good individual. He also sells two sons of the Mysie bull Aberdeen Prince and one by McDiamid, also a richly bred Mysie. Mr. McCann extends a hearty invitation to all western breeders to come to his sale and he will show them some good cattle. Kennard is on the C. & N. W., twenty-five miles northwest of Omaha and six miles west of Blair. Write for catalog at once and kindly mention Iowa Homestead.

The Wise Farmer is Cooking His Feed.

As the cold weather comes on, the long-headed farmer begins to cook his feed. He has found by experience, that costly, but true, teacher, that if he begins to feed cooked feed before it gets cold weather his stock puts on flesh and holds it. But if he does not begin to cook until the weather gets severe, his stock absorbs the cooked feed in heating qualities rather than fattening. In any event it has been proven by thousands of reliable farmers throughout the country that cooking feed through the winter months greatly increases its nutritive qualities. The cooking process gives heating and fattening properties to the feed and makes it go farther. The Crescent Furnace & Foundry Co., of Des Moines, Iowa, are making the Purinton Steam Feed Cooker, which for many years has been gaining in popularity because of its recognized merits as the simplest, strongest and safest agricultural boiler that has yet been put upon the market. This cooker has been manufac-

tured and used for several years and is the only practical boiler of its kind. It is made without flues or flanges, the heat from the fire box being applied at exactly the right point, which enables it to generate steam with marvelous rapidity. It is known as the Standard Agricultural Boiler of the country and the Crescent Furnace & Foundry Co. are preparing for the largest season in the feed cooker business that has yet been known. The Purinton Feed Cooker

has a great many uses besides cooking feed. It can be used, and with little or no expense, to heat water in a tank, barrel or tub by simply inserting the steam pipe. For scalding hogs, cleaning milk cans, etc., it is invaluable. There are a hundred and one things about a farm which can be done easier and quicker with steam or hot water than in any other way and the cost of operating the Purinton is so little as not to be noticed. It burns any fuel that happens to be about the place with equal facility. See advertisement on page 4 and write for catalog, mentioning The Homestead.

Saunders' Anniversary Short-horn Sale.

On December 19th, at his home farm near Manilla, Iowa, that well-known Short-horn breeder, Mr. C. A. Saunders, will sell seventy-one head of imported straight Scotch and Scotch-topped cattle. This being his tenth anniversary as a breeder of Short-horns, he has exerted every effort to make this sale the sale of his life and he has therefore drawn on many of the best cattle in his herd. There will be daughters of old Cumberland, the sire of the great show and breeding bull, Cumberland's Last, in the sale, and these will all have calf at foot or will be bred and safe in calf to King Champion, his present herd bull. There will be three or four of his very best imported cows in this sale and they are good ones. About thirty head will be straight Scotch cattle, making it one of the best offerings of Short-horns ever made in the West by one man. There will be some young Scotch bulls in the sale that are herd headers and there are bulls that the farmers can afford to buy. While there will be more Scotch cattle in this sale than is usually sold by one man, yet there will be plenty of cattle for the farmer and the ranchman and everybody is invited to attend. His catalog is a work of art, being illustrated from cover to cover and is printed on the finest kind of book paper. It is unique in many particulars, and the illustrations show what it is possible to do with a good herd of Short-horns in ten years. Among the many good things produced at the Greeley Stock Farm are the following: Cumberland's Last, the International junior champion, 1905; Cumberland's Chunk, first-prize Short-horn steer; Independence Lady, five times junior champion; Cumberland's Banner Bearer, second prize bull at International; Cumberland's Chunk 2d, second-prize yearling steer at International; Farmer's Friend, second-prize Short-horn steer at International; Countess Cumberland, three times first-prize winner, and the great In-

BATES BRED SHORT-HORNS

Sale Pavilion South Omaha
TUESDAY, DECEMBER 11, 1906.

41 HEAD--30 COWS AND HEIFERS AND 11 BULLS.

The sale includes 33 head of straight Bates breeding; about 15 of the celebrated Duchess tribe; the balance are Wild Eyes, Kirklevingtons, Oxford and Barringtons. 14 head in the sale the get of old Airdrie Duke of Hazelhurst 117846. Other cattle in the sale are of standard families with Scotch and Bates Tops. The bull offering will include two three-year-old herd bulls, one of them Duke of Wapsie 229370, weighing nearly 2,200 pounds, and other young bulls fit to head herds. The cows and heifers are a choice lot; several extra milkers among them. Broad backed cows with young calves at foot, an opportunity to lay a foundation or add some choice specimens to your herd. Send for a catalog. Address,

O. M. Healy, - - Bedford, Iowa.

COLS. F. M. WOODS AND T. C. WALKER, AUCTIONEERS.

ternational champion, Nonpareil King, was dropped on the Greeley Stock Farm and was partly developed by Mr. Saunders. Every breeder of Short-horn cattle should have a copy of this on hand. It will be sent free if you write for it at once and mention this paper.

Neff's Closing Out Short-horn Sale.

On Monday, November 26th, Mr. Charles Neff, of Walnut, Iowa, will make a closing out sale of his entire herd of Short-horn cattle, numbering about thirty head. The sale will be held at his farm, and will include his five-year-old Scotch bull, Captain Lovely 193514; also a yearling Scotch bull, Royal Rosamond 262140. Both of these bulls have been prize winners at the Cass and Pottawattamie county fairs, and they are both bulls of exceptional merit. Captain Love-

ly is a straight Scotch bull and was bred by Mr. George Andrew, of Elmville, Can. He was sired by Imp. Scotchman and out of a daughter of the great bull, New Year's Gift. He belongs to the Cruickshank Lovely family, one of the most highly-prized families today in the Bellows herd, and a family that made the name of Mr. Boh Scott noted in Nebraska. He is a uniform, thick-fleshed bull, with plenty of quality, and will tip the scales at about 2,200 pounds. Mr. Neff has won sweepstakes on his get at the Schibby, Pottawattamie and Cass county fairs every year that he has had him. He is an excellent breeding bull, and is entitled to go to the head of some good herd. Royal Rosamond is a two-year-old son of Imp. Craihstone, and out of Rosamond of Ashburn. This is a splendid young bull and has been a winner of first premiums at several fairs this fall. He is a good, dark red, and an individual that will please many of the most exacting breeders. His dam is Rosamond of Ashburn, a Canadian-bred Scotch cow that is one of the best ones in his herd, and she will also be sold in the sale. She is red, with plenty of size and an abundance of quality. Her dam is a daughter of the well-known Field Marshal, and is safe in calf to the herd bull Captain Lovely. No. 3 of the catalog is Tidy Girl 2d, a daughter of Imp. Gay Monarch, that for years headed the herd of Messrs. J. G. Robbins & Son, of Indiana. She is a 1,800-pound cow, a roan in color, and belongs to the Frantic family that produced so many of the Robbins show cattle. She is also safe in calf to Captain Lovely. Mr. Neff is selling two daughters of old Cumberland, the sire of Cumberland's Last, the great show bull. One of these is Esther Cumberland, a cow that will easily tip the scales at 1,800 pounds, and she has been a first-prize and sweepstakes cow at the Cass and Pottawattamie county fairs. She is a grand individual, and will be a valuable addition to any herd. The other is Cumberland's Pride out of a daughter of Lord Waterloo. There will be a splendid lot of Scotch-topped cows and heifers in the sale, and the offering is one of the most uniform that will be sold this season. Twelve of the cows will have calf at foot by the two herd bulls. There will be four bulls in the sale, including the herd bull. Write for catalog at once and then be sure to attend the sale. It is an absolute closing out sale and there will be some bargains sold.

Wassen Sells, March 1st.

Mr. C. C. Wassen, of Wilcox, Neb., announces March 1st as the date for his spring bred sow sale, and will offer a draft of about forty head, mostly fall sows. They are a large, growthy bunch of well-bred sows that are sure to do the man good that gets them. They will be bred to Jumbo's Wonder, a son of Jumbo's Perfection, and those sired by him will be bred to Cole's Duroc 11., a son of Cole's Duroc, having for his dam Pauline by Paul Finch by old Gold Finch. Some of the best and most popular blood lines are represented in this herd and we recommend you keeping this sale in mind and arrange to attend. It will be the next to the last day of the southwestern Nebraska circuit.

Faultless Perfection 2d 70889, the good boar at head of the well-known Poland China herd of Messrs. Bridgford & Nesbitt, of Aledo, Ill. See field notes.

The Gudgell & Simpson South Omaha Sale.

On next Tuesday, November 27th, at South Omaha, Neb., Messrs. Gudgell & Simpson, of Independence, Mo., will make their offering of fifty head of Herefords. Messrs. Gudgell & Simpson make this offer at Omaha in order to meet many of their customers half way and deliver the goods practically at their door. As in former years this firm have dug deep into their herd, selecting individuals that should be appreciated. High fitting has not been done, yet the cattle carry sufficient flesh to show their worth as breeding cattle. Every animal listed is young, thus insuring a life-time of usefulness to the purchaser. On glancing through the catalog we find that each and every animal carries a strong line of breeding, such as has made the Gudgell & Simpson Herefords popular wherever known. The bulls, twenty in number, are yearlings, ready for immediate service, and were got by sons of Beau Brummel and Lamplighter. In the Hereford world no bull has gained more distinction than has Beau Brummel. He is of Messrs. Gudgell & Simpson's breeding, and was picked as a calf to succeed Don Carlos, his sire. His get, as soon as old enough for show, at once attracted much attention by their winnings, and at the St. Louis World's Fair most of the prize winners were descendants of Beau Brummel. To recall all the splendid sons of this bull that are scattered throughout the country would be a task. Among the prominent ones are such bulls as Beau Donald, owned by Mr. Curtis, of Kentucky; Beaumont, the great sire in the Steward & Hutcheon herd; Beau Dandy, Beau Brummel Jr., Militant, Beau Brilliant, Beau Lamplighter, Percival, Beau Unonous, and many others. Like Beau Brummel, Lamplighter is a son of Don Carlos and out of a North Pole dam. He, too, has been a great sire, getting such bulls as the champion, Dandy Rex, and Banner Bearer, and the champion cow, Mischief Maker. It was his daughter that topped the Steward & McCutcheon sale recently. By the use of these bulls and their sons and daughters, Messrs. Gudgell & Simpson have developed the Anxiety type, which means, good cattle with a great amount of individual excellence. Few upturned horns are found in the Gudgell & Simpson herd. Their cattle are noted for their fine style, the easy-fleshing qualities so much sought after, the broad, level backs, the good, square hind quarters, the straight legs and the scale. The thirty heifers listed are all two-year-olds, sired by sons of Beau Brummel and Lamplighter, and are well along in calf to such bulls as Bright Donald, the second-prize aged bull at the St. Louis World's Fair in 1904, and other bulls in service in the Gudgell & Simpson herd. This will be one of the few opportunities to secure cattle that breed on wherever they go. That this is so is because the blood of the great bulls, Anxiety 4th, Don Carlos, North Pole and Beau Brummel, has been so carefully blended as to insure the improved character in their offspring. The breeders who need herd bulls should attend this sale and inspect the twenty bulls to be sold. If he be hunting some choice females to add to his herd or wishes foundation females, no mistake will be made in buying some of these Anxiety-bred heifers. The writer has seen every animal that goes in the sale, and we do not hesitate to say that they are an unusually good lot. The uniformity, as in previous offerings made by Messrs. Gudgell & Simpson, has been maintained to a degree seldom seen in sale offerings. The last announcement before the sale, will be found on page 39.

Last Call for E. S. Turner's Short-horn Sale.

As per previous announcement, Mr. E. S. Turner, of Colfax, Iowa, in connection with Messrs. H. D. Parsons and Andy Stewart, will sell forty-eight head of Short-horn cattle at Newton, Iowa, in the sale pavilion on November 28th, the day following the big sale of Messrs. Parsons and Stewart. The cattle offered by Mr. Turner are all the well-tried, standard American sorts, many of which have been bred on the farm for several generations. Mr. Turner's father having previously been a breeder of Short-horns for many years. In fact, he was one of the pioneer breeders of central Iowa. Hence the cattle to be offered on the above date are the produce of the best families that have demonstrated for Messrs. Turner their rights to be classed as the E. F. V.'s of the breed, so far as their individual experience was concerned. In buying the foundation for a herd of Short-horns, or in replenishing the herds already established, it is the part of wisdom to secure cattle from well-known families that have not only been prolific, good milkers and great beef producers, but also to make selections from families that were strikingly prepotent. Such is the case in this grand good offering made by Mr. Turner from his Hawthorne Farm. Mr. Turner feels that while his cattle are not Scotch cattle, they are at the same time as useful a lot of practical, honest breeding cattle as will pass through a sale ring this fall. They are in the best of breeding condition, thrifty and prolific. At least fifteen of the cows will sell with calves at foot, and most of them are rebred. Twenty choice heifers are listed and all of breeding age will be bred to the splendid Scotch bull, Red Victor 216682. Mr. Turner is also offering for sale his herd bull, Red Victor, which is a typical Short-horn in every sense, possessed of much Short-horn character and real merit. The only reason that he is being offered for sale is that Mr. Turner is keeping so much of his stock on the farm that a new bull is a necessity. In buying a piece of land a warranty deed is required by every well-informed purchaser. Mr. Turner has applied the same rule to all of the Short-horns that he will sell by furnishing a certified copy of registration, with the seal of the association and signature of the secretary, which is the warranty that these animals are recorded as represented. We seldom find a herd where more uniformity exists and never where the herd is more prolific than is the case with the Hawthorne offering. Individual mention of these animals is scarcely necessary, because of the fact that there is practically little differ-

Low Railway Rates. You can not overcrowd---Seats for all.

ence in breeding or individual merit in any of them. To the breeder who is in search of a good, well-tried Scotch herd bull, solid red in color, we can cheerfully recommend Red Victor to them. He was bred by Mr. H. D. Parsons, of Newton, Iowa, and was sired by Victor Baron, a choicely-bred Victoria bull, sired by Imp. Baron Cruickshank. He traces directly to Imp. Victoris by Royal Duke of Gloster. On the dam's side, Red Victor is out of that beautiful cow, Imp. Mabel, a daughter of Hydropathic, a Bruce-bred bull, got by Cap-a-pie out of Augusta 36th. She is a rich combination of Bruce, Cruickshank and Duthie breeding, with a few admixtures of Scotch bulls bred by other Scotch breeders than those above mentioned, furnishes an infusion of fresh blood. This in a measure doubtless accounts for the superb, robust qualities of Red Victor. We can do little more than now impress upon our readers for the last time the importance of attending this sale and securing some of the good bargains that in all probability await the wise buyer. The two days' sale certainly affords a golden opportunity for Short-horn breeders to make their selection from something like 100 head in the two days' sale.

Last Call for the Parsons, Stewart & Turner Sale of Scotch and Scotch-topped Short-horns.

This will be our last opportunity to direct attention to the very superior lot of Scotch Short-horn cattle, as well as some Scotch-topped sorts offered by Messrs. H. D. Parsons and Andrew Stewart, at Newton, Iowa, Tuesday, November 27th. As has been before stated, this sale is sufficiently attractive in the way of the splendid cattle to be sold as to attract attention from the leading Short-horn breeders of Iowa and else-

ter states. Aside from the Scotch females mentioned in our last issue, we would at this time call attention to catalog, Lot 7, Golden Rose, a splendid daughter of Imp. Golden Fame and out of Imp. Rose Alpine. Here is a heifer choicely-bred, possessing a rare combination of Campbell, Booth, Cruickshank and other Scotch blood, wherein is infused sufficient fresh blood to make the pedigree especially attractive. Lot 8 is Lady Fragrance 14th, a daughter of Imp. Matadore; her dam was Imp. Lady Fragrance 12th and was sired by Grand Old Turk, a well-known bull of the Inverquhomery Augusta family, a family that has furnished more Smithfield winners than any other in all Great Britain. Lot 9, Diamond 3d, is a beautiful daughter of Victor Baron and out of Diamond 32d, she out of Imp. Diamond 30th by the Cruickshank bull, Cold Stream. Lot 10, Lovely Sunbeam, is a beautiful heifer calf, sired by Scottish Champion, her dam being Imp. Sunbeam by the Duthie bull, Count Sunbeam. Lot 11 is Malaka Missie. This beautiful heifer is just a year old and was sired by Scottish Champion, but belongs to the most famous family of cattle ever grown at Upper Mill. We refer to the Missie family. Her dam being Missie 108 by Prince Gerald. The writer has been familiar with this entire family of females from Imp. Missie 9th in the hands of Mr. Robert Miller, of West Liberty, Iowa, who secured her of Mr. Luther Adams, her importer, and can say that the family as a whole have been exceptional producers of high-class Short-horns. Malaka's Choice is a daughter of the great \$4,000 show bull, Nonpareil King, her grand dam being Imp. Blythson 27th by Bapton Conqueror, a son of Red Robin; her dam was by Mr. J. Dean Willis' great bull, Spicy Robin. Lot 13 is a beautifully-bred Mysle yearling heifer by Scottish Champion, out of a daughter of Mr. Parsons' grand old bull, Duke of Oakland. Among the other Scotch females listed is Orange Maid, an Orange Blossom, Lenton Maid out of Imp. Mo-

lina, Susan Lady 3d, a great-granddaughter of Imp. Lady Susan, a branch of the Cruickshank Secret family, and numerous other Scotch cattle, both bulls and females that are sufficiently well bred to not only go into any herd in America, but, if exported to the best herds in Scotland, would doubtless prove valuable acquisitions there. Among the bulls to be sold are numerous good Scotch bulls as well as a goodly number of Scotch-topped ones that are deserving of attention. Inasmuch as the bull market has not been exceptionally strong this fall, it will doubtless be a good opportunity for buyers to keep this sale in mind, as bulls at this season of the year can usually be obtained at prices that will justify their being carried over for spring use. We have had considerable to say regarding the character of the two gentlemen making this sale. More encomiums or words of praise at this time (of which they are justly deserving), might be embarrassing. It is sufficient, however, to say that no one who attends this sale will be allowed to go away dissatisfied through any treatment on the part of either Mr. Parsons or Mr. Stewart. It does seem that when such men as Mr. Parsons, whose word is as good as a government bond, announces a sale, that nothing really need be said other than the fact that he has decided to hold a sale in order to secure a very large attendance of representative breeders from every quarter. This is equally true of Mr. Andrew Stewart, so far as his acquaintance with the breeders is extended, which is probably not as general nor as long standing as Mr. Parsons'. The catalogs are ready for distribution at this time and will be cheerfully mailed to all readers of this paper who make application for the same to either Mr. H. D. Parsons or Andrew Stewart, at Newton, Iowa. This sale will be held the day prior to Mr. E. S. Turner's big sale of Short-horns in the same pavilion on November 28th. Hence, buyers can attend both sales at the expense of one.

HORSES.

**S. J. MILLER, KIRKSVILLE, MO.**

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

My importation this year was composed of young stallions and mares that attracted the attention of all importers and lovers of fine horses. Prize winners in Paris are among the Percherons. Two coaches, one a two-time winner, are also in my barns. I have two-year-olds that weigh right at 1,900 pounds. No better strains are found in France. All are young, blacks, dark grays and bays. They are quartered at my barns at Kirksville, Mo., where I would be pleased to show them. If you need a stallion this year I am better prepared than ever before to sell you something extra and at a price that will save you money. By making my own selections in France, selling them myself and at the barn door enables me to do this. I can also sell you some fine mares. To the man wanting an absolutely first-class jack I will say that I have him well marked and big. Come to my barns and let me show you. I will treat you right every way. I can also sell you smooth-coated Fox Terriers, the rats' enemy. Priced at \$3 to \$7.50 each.

Kirksville is on the Wabash and Burlington railroads.

RED POLLED CATTLE.

50 Head of Red Polled Cattle 50 FOR SALE.

I WILL sell my entire herd of 50 registered Red Polled cattle, or any part thereof. These cattle have a large per cent of imported blood and include some imp. cows. Twenty head are now giving milk while the remainder is as follows: 4 three-year-olds, 6 two-year-olds, 13 yearlings and 10 calves. It is practically a female offering aside from the herd bull Forester 13265. Address for particulars, W. D. McTAVISH, Coggon, Linn Co., Ia.

Thoroughbred Red Polls for Sale.

OVER 100 head to select from. 25 bulls ranging from eighteen months down; also choice heifers, prices reasonable. Call or write, W. H. Seaman, Rural Route No. 5; Carl H. Van Eever, R. R. No. 1, or Gus C. Seaman, R. R. No. 5, all of Davenport, Ia. Telephone W. H. Seaman, 1935 M. 1.

HORSES.

FRANK IAMs

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all), and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMs \$1,000

Key, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your rouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.**THE Lafayette Stock Farm LAFAYETTE, IND.**

Largest importers in America of Oldenberg German Coach, Percheron and Belgian stallions and this no man can dispute. Our next importation of 1906 will arrive November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International will surprise the hundreds of thousands of visitors that will attend. We can and do sell our stallions as low as they can be sold at any place in America.

In addition we won the Percheron Society of America gold medals for champion stallion, champion mare, champion 3 mares and champion display of 5 American-bred Percherons.

At Iowa

We won sweepstakes on stallion and his get; grand display bred by exhibitor; Percheron Society of America Special for champion stallion any age; champion mare and champion group of 5 American-bred Percherons. In addition to the foregoing specially mentioned prizes the Lakewood Stud won twenty-two other class and special premiums at these two greatest state fairs ever held—more prizes than fell to the lot of all other Percheron exhibitors combined.

230 PERCHERONS ON HAND; 100 STALLIONS, many of them show horses. Special prices during the fall months. Every stallion fully guaranteed. Send for new handsomely illustrated catalog.

ANNUAL PERCHERON SALE AT SIOUX CITY, DECEMBER 12 and 13, 1906

80 HEAD of high-class Percherons at auction, consisting of young stallions ready for service, mares and fillies. The mares and fillies are nearly all bred to the great show stallions, CALYPSO and OLBERT, both first-prize winners at the International, Iowa and Minnesota State Fairs.

**CHAMPION STALLION ILLINOIS STATE FAIR.
 CHAMPION STALLION KANSAS STATE FAIR.
 CHAMPION AMERICAN ROYAL KANSAS CITY.**

SHIRE, PERCHERON, BELGIAN and HACKNEY STALLIONS

Good American Bred Stallions, \$800 to \$1000.

First Class Imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.

NOTICE

Having concluded to make a change in placing Stallions before the Public's account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stallions from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars. The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stallions, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered. Send for catalog.

Galbraith's Horses

The Horses That Made Janesville Famous

HAVE been in competition with those of others at all the large Exhibitions of the last 26 years and have come off with **Highest Honors**. We want you to compare our prices with the prices of the others. 47th importation of 49 head landed Aug. 21, 1906. Clydesdales, Shires and Hackneys.

Alex. Galbraith & Son,
 105 Sinclair St., Janesville, Wis.

TRUMANS' PIONEER STUD FARM
 BUSHNELL, ILLINOIS.

OLTMANN'S BROS.

LEER, GERMANY, - - - WATSEKA, ILLINOIS.

WE ARE THE PIONEER IMPORTERS OF THE German Coach Horse.

...We are also Extensive Importers and Dealers in...
Percheron and Belgian Stallions.

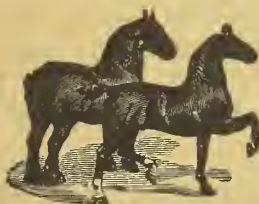

Our Buying Facilities Unsurpassed.

The senior member of our firm, Landschaftstrat O. V. Oltmanns, resides in the German Coach horse district and within four hours' ride of the Percheron and Belgian horse districts of France and Belgium and is ever on the lookout for the finest and best the Old Countries produce.

We buy better horses at less expenses than any other importer can possibly do and for that reason can give you a better horse for less money than you can buy elsewhere.

WRITE US FOR FULL PARTICULARS OR CALL AT OUR BARN.

OLTMANN'S BROS., - - - WATSEKA, ILLINOIS

TAYLOR & JONES,

WILLIAMSVILLE, ILLINOIS,

IMPORTERS AND BREEDERS OF

PERCHERON, SHIRE AND BELGIAN STALLIONS.

WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

PERCHERONS AND PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

When Writing to Advertisers Please Mention This Paper

HEREFORD CATTLE.

WILLOW GROVE
HEREFORDS

COLUMBUS 25th 100912, the greatest living son of old Columbus, at head of herd. The blood of Anxiety 4th, The Grove 3d, Hesiod and other great bulls predominates in my herd. Young stock for sale at all times. Write me and tell me what you want. Address, J. G. Von Seggeru, R. D. No. 2, Wisner, Nebraska.

HEREFORD BULLS

15 CHOICE Hereford bulls, ages 12 to 20 months. 15 choice Hereford heifers, ages 24 to 30 months, safe in calf. These are sired by St. Elmo of Shadeland, McKinley and Advancer. These are very choice and as good as I have ever raised.

6 DUROC Jersey Boars, sired by Corn Cracker 14205, dam by Luther Top Notch 3907. Price \$25. Write at once.

Z. T. KINSELL, Mt. Airy, Ia.

HAVING SOLD MY FARM

I WILL sell 25 head of registered Hereford cows and heifers and two herd bulls. One of them is an imported bull. All good stuff, and will be priced right to a quick buyer. Write me.

E. H. DANCER, Lamoni, Iowa

TABLE HACKED HEREFORDS.

IN order to make room, I offer for sale 100 females and 50 bulls, all recorded; 25 yearling heifers, 50 2-year old heifers and 25 cows, from 3 to 7 years old, heavy with calf, and 10 cows with calves at foot, 50 bulls from 6 to 36 months old; also Mastodon Poland China hogs for sale. W. W. Wheeler, Box H, Harlan, Ia.

BEAU BRUMMEL

4TH 194318. First prize Hereford bull of Iowa, 1906, at Iowa State Fair. Young stock for sale by this famous bull. Mention The Homestead when writing. G. W. Why & Son, New Sharon, Ia.

FIRST ANNUAL SALE

WAYNE COUNTY
SHORT-HORN
BREEDERS ASS'N.

CORYDON, IA., FRIDAY, NOVEMBER 30, 1906

HELD IN SALE BARN, 12:30 P. M.

15
MALES

45
FEMALES

This is the Association's first sale. It is to represent the best animals out of thirteen herds. The committee in charge of sale have allowed nothing but the best to be cataloged. All stock will be presented in just good breeding condition. The bulls are a good lot and have been grown under natural conditions. They are mostly Scotch-topped, with a few straight Scotch. All bulls are under two years with the exception of one herd bull Sanspareil King. The cows and heifers are of good breeding and offer a variety of blood lines. Those old enough will be bred or have calf at foot. Many of the aged cows will have produce in the sale. Some have pronounced milking qualities. The heifers are the largest part of the female offering and have been kept growing from birth. They will make good material for a foundation. The following sires are represented by get in the sale: Choice Goods, Junior, Sanspareil King, Victor of Evergreen Park, Imperial Victor, and Scarlet Prince, and others. All animals are registered and guaranteed to be as represented. The committee will assure you of good treatment. In the forenoon twenty-three head of Poland Chinas will be sold by Mr. D. T. Harris, Centerville, Iowa. Their breeding is representative of the best blood lines. The catalog includes both sales and may be obtained by writing

FIRST ANNUAL SALE

OF IMPORTED, STRAIGHT SCOTCH,
CANADIAN BRED & SCOTCH-TOPPED

SHORT-HORNS

AT MY FARM NEAR

42
HEAD

KENNARD, NEBRASKA,
TUESDAY, NOVEMBER
27, 1906.

42
HEAD

HERE will be 42 head in the sale, 30 females and 12 bulls. Fifteen cows will have calf at foot to my former Scotch bull Red Bud 145102. Imp. Flora 50th, a splendid red cow imported by Cargill & Son, will be included, also a number of Canadian-bred cows and heifers. There is a splendid bunch of Red Bud heifers in my sale, also a daughter of Baron Lavender, that is good enough for a show heifer, her dam being a daughter of Imp. True Briton. There will be an excellent lot of young bulls in the sale. One of these is Brawith Lad, a straight Scotch sired by Golden Lad, and is out of the great cow Imp. Rosemary 212th. This being my first annual sale, I am putting in some of my best cattle. I extend a cordial invitation to all breeders and farmers to attend my sale. Kennard is on the C. & N. W. R'y, six miles west of Blair, 25 miles northwest of Omaha, and 16 miles east of Fremont. Write for my catalog at once. Address,

DELMAR McCANN
KENNARD, NEB.

Please mention Iowa Homestead

THERE will be some splendid Scotch cattle in my sale, including my prize-winning Scotch bull, CAPTAIN LOVELY, a five-year-old son of Imp. Scotchman; also my prize-winning yearling bull, Royal Rosemond, a son of Imp. Craibstone. Fourteen cows will have calf at foot by Captain Lovely and Royal Rosemond, and others old enough will be well along in calf. Esther Cumberland one of the best daughters of Old Cumberland in the state and a first-prize winner wherever shown, also Cumberland's Pride, a three-year-old will be included. Also Tidy Girl, a daughter of old Imp. Gay Monarch. I am offering a grand lot of Scotch and Scotch-topped cattle, and everything must be sold. Write for catalog to

Duroc Jersey and Tamworth Boars

FOR SALE—We have a grand lot of Duroc and Tamworth boars for sale, every one of which is sired by a prize winner. Prices are always right. Address, Norrish & Bevington, Kingsley, Ia.

40 TOPPY DUROC JERSEY BOARS 40

Sired by Junior Jim, 2d prize winner at Des Moines, Glendale Critic, 2d prize boar at Nebraska state fair, and Long Alix, litter brother to the sweetestakes sow Alix II. Good ones.

AUSTIN RENSILAW, Blair, Neb.

BOARS! BOARS!

By Tip Top Notcher, Top Notcher Chief, Ambition, Hanley, Big I Am, and other noted sires at reduced prices. Write for descriptions.

H. B. GRIFFITHS, - Bowen, Ill.

Setting Sun Herd of Duroc Jerseys.

EXTRA big boars at living prices. Rhode Island Red Cockerels at \$1 each.

I. C. Welch, - Bedford, Iowa.

CARL HANSEN, HERMAN, NEB.

HAS a choice lot of Duroc Jersey boars for sale, all sired by prize winners or sons of prize winners. Reasonable prices.

FOR SALE. My Duroc Herd Boar Crimson Model 41275 (half brother to Iowa Banker). Also some of his pigs from sows by Gay Advance 28775, L. L. Woods, Grinnell, Iowa.

5000 BARGAINS IN SASH, DOORS Windows and Millwork of Guaranteed Quality

Shipped Direct from America's Biggest Mill to
Home Owners, Carpenters, Contractors

Don't think of doing any Repair Work, or Building, wherever you are or wherever you are, until you have sent for our Free Millwork Catalogue

Why Our Millwork is the Best
We will **SAVE** you **HALF** in **DOLLARS** of what your Local Dealer would charge you for Millwork, freight included. We guarantee this. We also guarantee that every article we sell to you direct is up to the Standard of High Quality Required by the Official Grade adopted by the Sash, Door & Blind Manufacturers' Association of the Northwest. Not all Millwork is. Remember that. You see here a few illustrations and prices taken from our catalogue. These are but Specimen Values. Ask yourself if it isn't worth while to see that catalogue. It illustrates the entire products of the Biggest Mill in America—the Only Manufacturers of Millwork who Sell Direct to Home Owners, and to Any Man who is repairing or building, to Carpenters and to Contractors or Builders.

Our Catalogue is an Authority on Millwork Styles. It will show you what you ought to use—show you how it will look—show you prices 50 per cent below your local dealer's prices—delivered to you safe and promptly, in the best of condition to use. These are all statements that we know are true. We are shipping our Millwork to men who are repairing and building every day in every state in the Union.

You Will SAVE HALF, whether You Order \$5.00 Worth or \$10,000 Worth

We are a reliable, responsible concern, and do just exactly as we say we will. Read here on the right what the Cashier of a large Davenport, Iowa, Bank says of us. This is our home. We were established here in 1865. This banker, or any other banker in the country, can tell you of our responsibility, if you enclose a stamped envelope for his reply.

The 5000 Bargains we offer you can be bought direct from our Free Catalogue, which shows everything plainly and explains under each article just how to order.

Keep this in Mind Your Money Immediately Returned for Any Goods Not Exactly as Represented

It won't cost you a cent if anything you order is not just what we say it is. You can send it right back to us and we will pay the freight BOTH ways and return your money without delay or argument.

If our Millwork was not of the high quality it is, we could not have built up this enormous business. We could not have interested the thousands of customers we have and kept them our regular customers if our Millwork was not better than they could buy of their local dealer who is right on the ground.

We can save you half because we have no expense for traveling salesmen—we do the largest Millwork business in the country—and when a man once buys Millwork of us he remains our customer, so it doesn't cost us a penny to sell him the Millwork he wants the next time. Our prices will astonish you.

Our Millwork is the best made because—we have the most skilled workmen—we operate the largest mill in the world—163,000 feet of floor space (four acres)—we own our own timber lands, sawmills and lumber yards. We carry a large stock and can therefore ship promptly. Our lumber is first air-dried and then, as an extra precaution, is put through a scientific drying process. Joints are made with heavy hardwood dowel pins, glued with imported glue, pressed together by heavy steam power press. Absolutely no "come-apart" to our Millwork.

Door Panels have a heavy raise on both sides. Panels are sandpapered on a special machine of our own invention before the door is put together, and the entire is then smoothed with fine-grained sandpaper. Every piece of Millwork we make is just as carefully finished as labor and expense can make it. Just write a postal for that Free Catalogue so you can see all of the 5000 Bargains we offer, and save yourself many a dollar in repair work, or in building the finest home.

WHAT A BANKER SAYS ABOUT US

SCOTT COUNTY SAVINGS BANK
Capital \$250,000.00 Surplus \$150,000.00
DAVENPORT, IOWA.

To Whom it May Concern:

It gives us great pleasure to testify to the reliability, business integrity and honesty of Gordon Van Tine & Co. Their financial responsibility is well over three hundred thousand dollars (\$300,000.00), and they enjoy the highest credit with Western Financial institutions.

We assure prospective customers that they are perfectly secure in sending the money with their orders, as we understand that if goods are not entirely satisfactory, they may be returned at shippers' expense, and the money will be promptly refunded.

The officers of this Company are well and favorably known to us, and may be relied upon to do exactly as they agree. Yours very truly,
J. H. HASS, Cashier

WHOLE NO. 2576

PURE-BLOODS FROM CROSS-BREDS.

P. H. S., Oketo, Kan., propounds the following:

If a Poland China sow be bred to a pedigreed Duroc Jersey boar will not the litter be half of the blood of each? If the females from this union be bred to a pure-blooded Duroc boar, will not this litter be three-fourths Duroc blood and one-fourth Poland? And will not a similar cross result in full-blooded Duroc Jerseys eligible to registry? Where must one send the pedigrees to have them recorded?

Our correspondent's reasoning is hardly correct after the cross which results in pigs of three-fourths Duroc and one-fourth Poland blood. In the next cross he has all the Poland blood disappearing, making the litter pure blood red hogs, where they should be seven-eighths red, and one-eighth black. Now the sows used in this last cross were as above given three-fourths red blood, or three parts of red out of four parts. Their offspring sired by a pure bred red hog would receive four parts of Duroc blood from the sire and from the dam's, three parts Duroc blood and one of Poland, making in all seven-eighths Duroc and one-eighth Poland. The next cross would result in fifteen-sixteenths Duroc blood, the next thirty-one thirty-seconds and so on, indefinitely. Never could the offspring be completely free from the blood of their original black dam.

On the face of it the scheme is not possible, since we could not imagine an animal that would not contain some of the characters of all of those represented in the dam's blood, regardless of their size or extent. Of course the Duroc with only one-sixty-fourth of Poland blood would be pure, practically speaking, yet if such a hog were produced the Poland character would be continually cropping out in the get or produce.

Furthermore, a plan of this kind to secure the desired end would not be practical. Think of the time and money involved and the unreliable result. There is only one way to produce pure blood animals and that is to start with pure blood.

There are two registry associations where one may have pure bred Duroc Jerseys recorded. The secretary of the National is H. C. Sheldon, Peoria, Ill., and of the American, T. B. Pearson, Thornton, Ind. These gentlemen will be glad to answer all inquiries regarding this breed of swine.

THE TWO-EAR CORN STALK.

In every county of the corn belt can be found men who desire to establish a strain or variety of corn characterized by the production of two ears to the stalk. No subject is referred to more frequently than this in the mail received by this paper.

We have no hesitation in going on record as opposing the two-ear theory. Our main reason for this is that up to the present time maximum results have not been obtained in the growing of varieties that produce only one ear. On average corn belt land the yield now is far below what it ought to be, and while there are several causes for this, yet the main one is that the land is not strong enough to produce a good ear on every stalk. You can choose almost any corn field and upon examination you will find a very large percentage of the ears are very much smaller than the standard of the variety. Supposing, for example, that the standard is ten inches in length and seven or seven and a half inches in circumference. You will find possibly 75 per cent of the ears that are less than nine inches long, indeed, less

than eight inches long, and the circumference proportionately less.

If you look further you will find that this decrease in size is generally accompanied by the taking on of a more or less flinty appearance, and in most cases this is brought about, in our opinion, by the lack of fertility supply in the soil. When the time comes that every field in the corn belt can be clovered or made to produce some legume every four of five years, and if, in addition, all of the roughage and much of the grain that is grown on the farm is fed and returned to it in the form of manure—if these conditions are ever brought about, we might then be willing to advocate the two-ear corn, but that day is so far in the future that we believe we are almost wasting time in discussing the subject. We realize that there are plenty of men who say that two small ears of corn will give you greater weight than one medium sized ear, and while this is true, at the same time the quality is not so good as a general thing and the type becomes very rapidly changed when the stalks are over-worked in this manner.

The thing that must be worked out first is to lessen the number of barren stalks that are found in the average field. This runs all the way from 2 to 15 per cent, we are told. We are also informed that by properly breeding corn, and especially by detasseling, that this percentage can be greatly lessened. We know from practical experience that if seed is chosen with great care, due emphasis being placed on a certain roughness of kernel, a certain length of ear and a certain circumference, that this in itself to a very large extent eliminates barrenness. By selecting from stalks that produce two ears it is impossible, under average circumstances, to get size, depth of kernel and roughness of kernel. In our opinion you lose in the constitutional powers or in the ability to reproduce what you gain in the increased weight of the two ears over one.

The stations ought to do a little work along this line, in order to satisfy with scientific data those who would like to have information on this subject. A few years' work in the growing of two-eared varieties on poor soils and on rich soils

would enable a station to give some definite advice on this subject. At present the best information is only based on conjecture, but the consensus of opinion among successful corn raisers is that it is better to select corn that will produce but one ear.

THE CHARACTER OF PROTEIN IN FEEDING STUFFS.

The following communication has been received from a Missouri subscriber:

I have never had the advantage of training along the lines of chemistry, and I apprehend that the great majority of your readers are in exactly the same fix as I am. We sometimes come across terms that confuse us a little and I would like to ask you to explain to your readers just what is meant by the term "protein," as it is used in connection with the analysis of feeds. I know from practical experience that foods rich in protein are costly. Why is this? What is the function of protein in the animal body?

Protein is employed as a group name for the nitrogenous ingredients, both of feeding stuffs and of the animal body. Mark the word "nitrogenous" because that is the secret of the whole matter. Protein is always high in price because nitrogen is scarce, no matter in what form you find it. The principal protein bodies in feeding stuffs contain about 16 per cent of nitrogen. Corn contains about 10 per cent of protein. A hundred pounds of corn, therefore, would only contain 1.6 pounds of nitrogen.

In the corn belt starchy foods are much more easily produced than those that are rich in protein, and consequently nitrogenous foods are high in price, as indicated by the present value of such feeding stuffs as bran, oil meal and tankage.

Protein is used in the animal economy to build up lean tissue, supply ingredients to the blood and to a certain extent keep up the heat and energy of the body. The fact that protein may be converted into heat and energy is the reason why all rations are compounded so as to reduce the content of protein to the lowest point, and, ther 'or, the aim is to keep up heat and energy with fattening foods that are not so expensive.

Corn is not a balanced ration for the reason that it does not contain enough

protein, or nitrogenous matter, to supply the needs of the body in the building up of new tissue or what is needed for blood-making material. It only lacks a very little of being a complete ration, but this lack is a very important matter to every stockman. Oats only contain about 2 per cent more protein, and yet this small percentage makes the difference between a balanced ration and one that is not balanced.

The principal difference between protein and the carbohydrate bodies is that the latter do not contain nitrogen and they alone can ever form flesh or make blood.

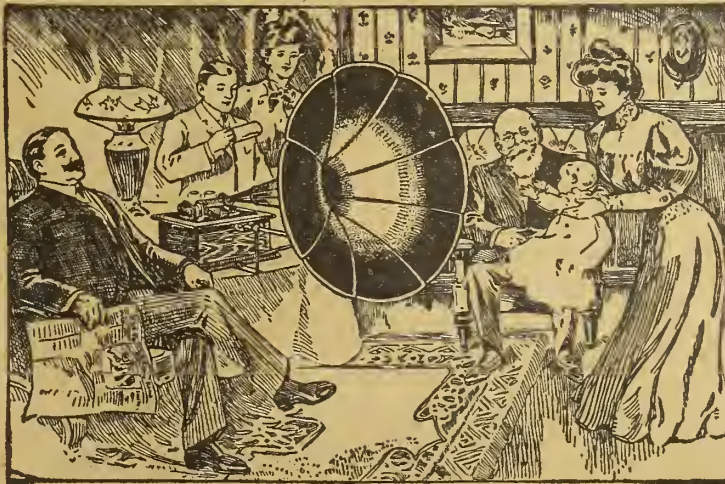

THE INSTITUTE SEASON AND WHAT IT MEANS.

Almost every county in the corn belt will hold one or more Farmers' Institute sessions during the next few months. This class of meetings has sprung up during comparatively recent times, and although no one has ever made a study of their effect on agriculture, yet it is assumed on every hand that they stand for progress. Apart from what one hears on an occasion of that kind, there is always value in meeting the other fellow when both of you have the one thing in mind, namely, to inform yourselves on some phase of your calling.

It must be acknowledged that there is a certain amount of what we call twaddle passed around at these institutes. We have heard men who themselves have never engaged in agricultural pursuits, who have never plowed a furrow in their lives, or husked an ear of corn, pour out volumes of advice about the necessity of doing "better." Such individuals are usually strong on giving advice about keeping the implements inside, keeping the farm fences in repair, and they wax warm about growing big crops, and yet keeping up the fertility. Fortunately, the day for this kind of advice has passed.

What farmers need, especially, is specific instruction on how to improve crops so that they will yield better; on some economical, certain plan of improving live stock, so that for a given amount of feed used one will have more to show for it. We need just such a change in the character of the instruction given us as has been made in our colleges in recent years. The laboratory system by which the boys and girls are compelled to "do things" has been substituted for the old practice of picking it all from text books or from the lips of a dominee.

We are unfortunate in this respect, that those as a rule who have made pronounced success in agricultural affairs take but little part in public meetings. The very ones who above all would be listened to intently are generally found in the audience and not on the rostrum. Our college and station men are doing well and imparting useful things to the people, but some of these need to lean more heavily to the practical. Many a thing sounds well when you hear it from the platform, but to simply hear it does not mean that you know it. Institute speakers in the future should appeal more to the sight than they have in the past. If they are talking on corn the corn itself must be there; if on live stock the real animals must be before the audience; if it is about spraying orchards the spraying mixtures should be on hand; if on butter making, let the cream be churned right there and then. This is modern institute work and, thanks to our colleges and stations, this kind is being rapidly introduced.

THE BEST FAMILY TIES.

The charm of the home is in the contented family and in a happy circle of friends. Amusement and entertainment are the surest ties with which to bind both family and friends. The Edison Phonograph is the king of entertainers. You must read the wonderful free trial offer made on last page.

A HOG CONDITIONER.

The following communication has been received from a subscriber at Leighton, Iowa:

Some time ago you gave a formula for a pig conditioner which consisted of charcoal, sulphur, hard wood ashes, etc., but I have lost the recipe and would like very much if you would give it again for my benefit and for the benefit of others.

This subscriber no doubt refers to the formula given by the department of agriculture at Washington and recommended for pigs as a cholera preventive. It is made of the following substances, in the quantities given: Wood charcoal, one part; sulphur, one part; salt, two parts; sodium bicarbonate two parts; sodium hyposulphite, two parts; sodium sulphate, one part, and antimony sulphid (or black antimony) one part. These ingredients should be completely pulverized and thoroughly mixed, and one tablespoonful once a day is considered sufficient for a 200-pound hog, or for every 200 pounds in live weight of hogs. It is generally advisable to mix it with the feed, especially when slops are being fed. Where hogs are too sick to eat, it is recommended that a certain amount of the mixture be dissolved in half a pint of water and the pigs drenched.

Where one handles a big bunch of hogs it is generally advisable to do a little doping, especially so if they are fed heavily on grain. Under natural conditions, a hog needs very little chemicals, but it should be born in mind that when an attempt is made to finish a nine-months barrow and make him weigh 300 pounds at that age conditions are more or less artificial. Heavy grain feeding tends to heat the system a little and lay a foundation for disease. A mixture like the above satisfies a craving, and this tends to keep the animal in good condition, because when in solution no doubt these ingredients enter first into the circulation and then are assimilated and appropriated by the organs of the body.

MANUFACTURING CEMENT POSTS.

Elsewhere in this issue will be found a communication from Mr. H. N. MacDonald, entitled "The Cement Post Proposition." We desire to call the special attention of our readers to this subject because Mr. MacDonald is a man who has had large experience in handling cement, and he has been especially successful in making substantial fence posts.

At first it may seem that this is a topic a little out of season, but as we desire to say a good deal on this subject during the winter, in order that our readers may be thoroughly instructed so that when they take up the work, of manufacturing in the spring, they will be in a position to go ahead with their work, we believe that the topic is after all timely.

One can easily do a little experimenting with sand and cement during the winter months. This is especially true where men have furnaces in their dwellings, thus giving them the opportunity to work in comfortable quarters where no frost is admitted. We refer of course to the furnace room. We have in mind one individual who made several hundred posts last winter at odd moments. He had half a dozen molds and he made a practice three days in a week of filling these molds with a cement sand mixture. By spring he had posts for several hundred rods of fence.

If any of our readers have difficult questions to ask us relating to the matter of cement posts, we shall be pleased to have them submitted because, as said before, it is our intention to give a good deal of attention to this matter during the next few months.

COST OF RAISING A BUSHEL OF CORN.

The annual year book published by the Iowa Department of Agriculture contains a number of contributions on this topic. Mr. Ernest Mueller, of Madison county, Iowa, gives the following itemized statement of the cost of raising an acre of corn:

Since labor is the chief factor in the cost of producing a bushel of corn it will be well to figure from that basis. From observation and experience it can be closely estimated what a team and man can do in a day and what the cost will be. Rent of land can be figured in the neighborhood of \$4 per acre.

To get close estimates it will be necessary to follow the routine of raising corn. If the land has been in corn the previous year the stalks must be disposed of. A man with a three-horse harrow can cover forty acres in a day, and going over it twice would cost twenty cents per acre. Raking twelve acres per day would cost thirty cents per acre. Disking before plowing, thirty-five cents per acre. Plowing, \$1.25 per acre. On

an average one-half of the plowed land must be disked before plowing, at a cost of fifteen cents per acre. A team can cultivate in the neighborhood of seven acres per day at a cost of \$3.25 or forty-five cents per acre. Three cultivations, \$1.35. Husking costs at least four cents per bushel.

Giving an acre of average corn land \$6 worth of labor, it should produce a larger yield than the average yield of the county. Under such conditions as mentioned a yield of forty-five bushels per acre should be obtained.

Not considering rent, the cost would be over fifteen cents per bushel. Since the average yield of Madison county is about thirty-five bushels per acre, with \$4.50 worth of labor it would still cost fifteen cents per bushel to produce, and with the rent added, twenty-eight cents per bushel.

SUMMARY

Rent	\$ 4.60
Breaking stalks20
Raking and burning30
Disking before plowing35
Plowing	1.25
Disking after plowing15
Harrowing25
Seed15
Planting25
Harrowing25
Cultivating	1.35
Husking 45 bu. at 4c	1.80

Total cost per acre

Per bushel

The above items will apply quite accurately to a very large part of the corn-belt area. They accord quite closely with some computations made a few years ago by the Illinois Experiment Station. Of course there is land in the corn belt that does not have as high rental value as \$4.60 per acre, while on the other hand we have land that rents as high as \$6 and \$7 per acre. One can do comparatively little to change the cost of raising an acre of corn, though there is a vast difference even on the farms of a single township in the corn belt in the cost of raising a bushel.

In the above instance, the yield was reckoned at forty-five bushels per acre, which of course is a good deal above the average, not only of the county cited in this case, but of the corn belt, or of any state in the corn belt. If this could be raised to sixty, a bushel of corn would cost to raise it about eighteen cents, and it is in that direction we must go. It is doubtful if ever again corn can be raised cheaper than just at present, because land will increase in value and it is doubtful if labor will cheapen much. By giving good attention to clovering the land, as well as manuring it, and by using good seed, it is not unreasonable to expect to find many cases where corn is being raised as low as fifteen cents per bushel. The man who is obtaining a yield of seventy-five bushels per acre raises his corn for about fifteen cents per bushel.

BETTER YEARLINGS.

The number of small and undersized yearling colts and calves over the country is surprising. The general lack of size and weight of stock of this age is about the first impression that the sale visitor or buyer experiences. Various reasons may be assigned for this condition.

There are still those who do not realize the great importance of keeping the young things growing. In other words, to preserve the baby flesh as it is often expressed. The young animal that is turned in with a herd of stock cattle soon after being weaned, where it must take its chances with older animals, is sure to make slow headway on the route to an eight or nine-hundred-pound weight at twelve months.

Then follows perhaps a period of inactivity so far as growth is concerned. Whether this period in the young animal's life comes in winter or summer, there are more or less unfavorable conditions to be encountered. It is either intense cold and hunger, or flies and heat. Just imagine how fit a foundation would be for the support of the superstructure, if, after being put down, building operations were discontinued for several years. Checking a young animal's growth is a parallel case. There is valuable time lost in getting the animal to the point where it will yield profit, and besides the thrift and vigor is impaired, which forever prevents a stunted calf or colt from attaining the best size that it is capable of reaching.

We know that a great many will say that it does not pay to feed a young animal enough grain in addition to what it gathers in the fields to keep it growing at its best rate for two or three years. Possibly there are conditions where in the production of stock for market, it is more profitable to extend the growing period along over three or four years. But in growing stock for breeding purposes, the idea of stinting the young things at the feed box does not bear weight with any sensible feeder. Were land as cheap as the cost of a

claim deed, our position would be different. But on grain-growing land, grain should be fed in such quantities as will produce a maximum growth, and thus hasten the returns.

It must not be imagined that good feeding will make every calf a good yearling. The proper foundation must first be secured, or in other words, the calf's sire and dam must be animals that show a tendency to make good use of food. It is a general rule that a bull vigorous and well-fed will produce better offspring than one rather under-fed. Insure the yearlings a good start, then, by using the best sire you can afford. Every man who has handled stock knows how easy some bulls keep in flesh, while others need constant pampering to do half as well. If there were any means of making an exact comparison, we venture to say that the ordinary sire would be a losing investment every time, even with the stock grower of moderate ambitions.

There are enough nine-hundred-pound, twelve-months-old calves in the country to show that this attainment is not an impossible one. There are a remarkable number at that age that miss that weight by several hundred pounds. There lies a great difference in results. The problem is one worthy of every stockman's best thought.

SHORT-HORN HERD BOOK.

Volume 66 of the American Short-horn Herd Book is now ready for distribution. It contains the pedigrees of bulls numbered from 252478 to 257708, both inclusive, also the pedigrees of 7057 cows. The price of this volume to non-members is \$3 at the office, or \$3.30 prepaid. Volume 67, containing about twelve thousand pedigrees, has gone to press, and Volume 68 has been filled, and the pedigrees received since October 23d have been filed for Volume 69. Address John W. Groves, Exchange Bldg., Union Stock Yards, Chicago.

Trespassing Bull—Damages.

To the Editor of The Homestead:

A subscriber in Kansas is anxious to know his legal rights upon a state of facts, the like of which is frequently found to exist among farmers and cattle growers in every state of the corn belt country. For this reason his inquiry and the law applicable to the subject of it, will doubtless be of great interest to a large number of our readers.

Our correspondent, whom we will call Mr. A, is engaged in raising pure-bred Short horn cattle. His neighbor, Mr. B, on the adjoining farm, raises grade cattle. These two herds of cattle run in adjoining pastures, separated by a partition fence. Mr. B allows a grade bull to run with his herd, and Mr. A is in constant fear that the grade bull will break through the partition fence and serve his pure-bred cows, which are worth three or four hundred dollars each. He desires, if it be possible, to compel Mr. B to restrain his grade bull, and keep him confined in a lot or yard away from the pasture. If this cannot be done, he wishes to know whether he can recover damages in case the grade bull should break into his pasture and get his cows with calf.

We have carefully examined the laws applicable to such a state of facts, in Illinois, Iowa, Missouri, Kansas, Nebraska, South Dakota, North Dakota, Minnesota, Wisconsin and the territory of Oklahoma, and we find that they are much the same as to the substantial rights and duties of persons, and do not greatly differ as to methods of procedure. Each of the states named, and the territory, has its own fence law, describing what shall be deemed a lawful fence within its own territory, and providing that owners of adjoining lands used for stock or farming purposes, shall equally bear the expense of constructing and keeping in good repair, a partition fence between their lands. Every farmer and stockraiser should know what constitutes a lawful fence in the state or territory where he lives, and he can readily ascertain this in the office of any justice of the peace or lawyer in his county.

The rights and duties of owners of adjoining lands and live stock, in reference to breachy and trespassing animals, depend almost entirely upon the kind of fences they have. As an illustration—upon the facts in the case of A and B, above mentioned. A cannot compel B to keep his bull in any particular yard, lot or place, or away from the pasture adjoining A's pasture. B has a legal right to keep his bull anywhere within the

WHAT DO YOU SAY?
Several hundred thousand farmers say that the best investment they ever made was when they bought an

Electric Handy Wagon

Low wheels, wide tires, easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money.

ELECTRIC WHEEL CO., Box 43, Quincy, Ill.

boundaries of his land, being only liable in case the bull escapes and runs at large, or trespasses upon the property of another by reason of B's negligence or carelessness. This is the law everywhere.

If the bull breaks through that part of the fence between the pastures, which it is B's duty to keep in repair, and it is not at the time a lawful fence, B thereby becomes liable for all damages done by the bull. Again, if the entire line of fence between the pastures is a lawful fence, and the bull breaks through it anywhere along the line, B is liable for all damages. If, however, the bull breaks through that part of the fence which it is A's duty to keep in repair, at a place which is not at the time a lawful fence, then B is not liable for damages which the bull may do in A's pasture. Keeping in mind these principles, when B is liable at all, he is liable for the amount of damages that A can prove in court. For instance, if a pure-bred cow gets with calf by a grade bull, the measure of damages would be the difference between the value of the cow being with calf by the grade bull, and her value if she had not been served by said bull. This difference would have to be proved by witnesses who are familiar with the values of pure-bred stock and grade stock. If in a case, such men would testify that a certain purebred cow with calf to a grade bull, is worth only \$200, whereas if she had not been so bred, she would have been worth \$300, then the damage would be \$100. Suppose, however, that A's cows break into B's pasture, and get with calf by B's grade bull. If they break through that part of the partition fence, which should be kept in repair by A at a place which is not at the time a lawful fence, then A cannot recover damages. If the entire line of fence is a lawful fence, and the cows break through it anywhere along the line, A cannot recover damages—but if they break through that part of the fence which B should keep in repair, at a place which is not at the time a lawful fence, we think B would be liable for damages.

In the states and territory mentioned, where animals break through a lawful fence and do damage, the person injured may bring suit against the owner of the animals and recover whatever amount of damages he can prove. Such a suit may be brought before a justice of the peace in Iowa, Kansas, South Dakota, Minnesota and Oklahoma, if the damages claimed do not exceed \$100. If they exceed that sum, the suit must be brought in a court of record. In Illinois, Nebraska, North Dakota and Wisconsin suit may be brought before a justice of the peace if the claim for damages does not exceed \$200. In Missouri a justice of the peace has jurisdiction of such a suit if the claim does not exceed \$250.

In nearly all of these states the law also gives to the person injured, the right to distrain or take up the trespassing animal, while on his premises and hold it until all damages and reasonable costs for the keeping and feeding, be paid; the details of this proceeding, however, are not uniform in the various states, and are somewhat complicated, so that a person desiring to distrain a trespassing animal, should become familiar with the law of the state where he lives, in relation to the matter, or consult some attorney or justice of the peace in his vicinity. It would require too much space in these columns to publish the procedure applicable to each state. If the owner of the trespassing animal is financially responsible, it is generally just as good a plan to simply sue him for damages as first indicated, as it is to take up and hold the animals, and will in most cases prove more satisfactory.

A. P. Rittenhouse.

Farm Furrows

Turned by a Practical Farmer.

The woman with a gasoline stove and the farmer with a gasoline engine have all of a sudden discovered that the demand for gasoline by automobiles has caused it to slide up a notch or two in price.

Country people believe that as soon as all the high-priced gowns have been made ready it will be time for the horse show to begin in Chicago. Cheap gowns will not make a horse show worth looking at.

When butter gets into bad company it has to go the way old dog Tray went. About a ton of butter in Milwaukee is said to have gotten in the class with limberger cheese and was consigned to the morgue.

A very good swine breeder told me recently that he either had to rear fall pigs in order to keep his sows in good breeding condition or pork them. If he did not rear fall litters his brood sows would get out of breeding condition.

A lady writing from Illinois tells the Furrows man that she usually cuts a piece of cloth or paper that will fit the nursery of her incubator and when the chicks begin to hatch she covers it with sand and since following this practice she has not had a crippled chick. I believe this to be a good plan.

City people ought to be charitable with rural people should they appear ignorant of some city ways when they visit the city. Not long since I was in a city office and I was asked by a city man, "What is a silo?" I told him it was a mammoth receptacle for canning green corn for stock, and he thought I was joking and would not accept it as a fact.

Humus is the organic matter in the soil. It varies in quantity and is easier kept in heavy than in light soils. The clay and sand remain about the same all the time. When soil has sufficient humus it is in a crumbly condition and will not "run together." A large amount of this constituency imparts a dark color to the soil, hence a dark soil is an indication of a good soil.

Now come the news that food adulteration is practiced in Germany just as extensively as in this country. That is awful after that country refusing our pork products. It is presumed that Germany wants to do its own adulterating. The number of prosecutions for adulterating food in Germany have increased from 1,400 to 6,000 in 1903. Who'd thought it?

A farm paper edited by a "real farmer" says to cure lampas in a horse's mouth "feed ear corn." It is barely possible that the writer meant to feed the corn in the ear. When a young man I was told that the lampas was caused by feeding ear corn to horses. The enlargement of the ridges in the roof of the mouth of a horse is caused by indigestion in old horses and by teething in young horses. The cure is plain.

For the past thirty years I have been trying to ascertain when is the right time to gather the turnips. I like to leave them in the ground until cold weather comes—just before the first hard freeze—and yet I have left them out too long many times. One will have to take his chances and gather them according to his own best judgment. If frozen too hard they become pethy and soft. I prefer to have them solid and crisp.

Doesn't the first snow of the season make everything seem disagreeable around the buildings? To go out in the morning and find your hog troughs full of snow and their drinking fountains frozen up; your milk cows humped up in one corner of the yard and the calves that never saw snow before, bawling; the chickens and turkeys stuck in a snow bank; the old pump frozen up, etc.—how happy it makes you feel. It don't take long, however, for the thrifty man to get things in shape and everything comfortable. There is nothing that helps to usher in the winter pleasantly so much as plenty of straw for sheds, pens

and stables. I think there is money in keeping everything bedded well.

Because a boy makes a mistake I never believe in telling him that he will never amount to anything, nor I never point out how smart a neighbor's boy is compared with him. My boys are just as good and just as bad as the other fellow's, and I have no fear but what they will be able to take care of themselves. It pays to encourage rather than discourage a boy.

At one time every boy in our neighborhood owned a fighting dog. For nearly a year dog fighting was a popular amusement. It was finally simmered down to just whose dog was boss, and a certain pug ugly was conceded the championship. The owner of this dog paid me a friendly visit one day and brought the dog along for company. At that time I owned a No. 10 tom cat. As soon as he caught sight of this warrior with so many scars and with many a pelt to his credit he sailed in, and for a few minutes things looked like a

miniature fur factory around there. Honor bright, the cat won against this great champion.

A writer in a magazine attributes the scarcity of hired help on farms to the fact that competition is confined alone to single men. If there were more accommodations for men with families there would be many men who do not have means enough to rent who would make the best of hired help on farms. Some of the best help I ever had on my farm have been men with families and for whom I furnished a house to live in.

An item is going the round of the press that in Wisconsin they are fattening fish on corn, by netting them off in fields in a stream and feeding them grain. I recently read that our European ancestors were wont to fatten them with bran balls and that the fish were enclosed in a bag of wet moss, kept in the water, to prevent the carp from getting in the mud and running off the fat. We may yet hear of some enterprising western farmer driving a lot of

carp in a pasture lot and fattening them on grass.

I have been trying to figure out a place to keep the sauerkraut and so far I have failed to come to a satisfactory solution of the problem. The porch comes the nearest being the ideal place until very cold weather comes. I have found a large stone jar to be better for making sauerkraut in than a barrel. It never leaks—a barrel sometimes does. Nothing fills a house with a more disagreeable odor than a barrel of sauerkraut, whether it be in pantry or cellar.

One of the greatest problems at present confronting the stockmen of the corn belt is that relating to balancing the corn ration. In the future more use must be made of the legumes and we must grow more grain rich in protein. I find that it costs a whole lot of money to buy shorts at \$20 a ton, oil meal at \$32 and takage at \$38 or \$40. Of the three I think the latter is the cheapest food for hogs, because it is so rich in flesh-forming material.

Why we make 50,000 miles of fence every month.

Every year since wire fence came into use, we have made and sold more wire fence than all other fence-makers combined. With the largest output at all times during the remarkable growth of the wire fence industry, we always "bid highest" for fence brains.

These master minds of steel-wire-making have never stopped working on wire-fence improvements.

And we make 50,000 miles of fence every month—enough to go twice around the world—because the discerning American farmer demands that much

AMERICAN FENCE

That's over 80% of all the wire fence sold, which means that four out of five farmers demand American Fence.

Now, four out of five American farmers are not *wrong* on this fence question.

They know that whenever they need fence, they can always be sure that American Fence is the best fence ever produced up to that hour and minute.

Recent improvements in galvanizing make American Fence longer lived, make it cost you less per rod per year's wear, though the price remains the same.

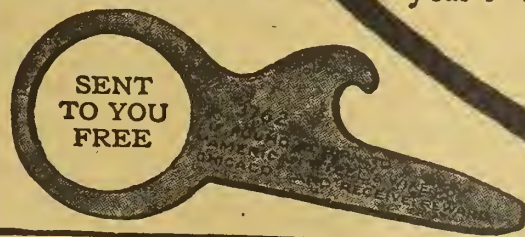

NOTE—I want to send you the combination key-ring, shown in the corner, with our compliments, as a continual reminder of American Fence. We register your name and number on our books, and return keys, without cost, if found and sent us.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

WORMS IN HOGS.

One of our subscribers sends the following communication:

My hogs are bothered a good deal, with worms. I have used santonin some, but so far it does not seem to do much good. On a bunch of ninety pigs I have used one and one-half ounces of santonin in two feeds; that is, three-quarters of an ounce at each feed, giving one meal between. I have followed this up with a good dose of glauuber salts, but the work has not been thoroughly done yet.

Worms are the cause of a great deal of trouble among hogs, and much of the unthriftiness that prevails among fattening hogs may be traced to the presence of worms. It is almost an impossibility to make wormy hogs gain, and it pays to take the matter up in dead earnest to get rid of the pest.

Regarding santonin, we will say that this is generally effective, though it might be used in rather larger quantities than was the case in this instance. On this subject we beg to quote from the work of Professor Craig, of the Indiana Experiment Station:

Turpentine, santonin and calomel are the drugs most used for destroying intestinal worms. In treating hogs, the best and easiest method of giving the remedy is in the feed. It is best to divide the herd into small bunches of five or ten, and dose each bunch separately. If this is not practiced, all will not receive the proper dose. Powdered preparations like santonin and calomel, that are insoluble, should be mixed with ground feed and fed in a trough. Drugs like turpentine and gasoline, that form an emulsion with milk, are best given in this manner.

Turpentine is a cheap and convenient remedy, especially for the thorn-headed worm. The dose is one teaspoonful for every eighty, or 100 pounds live weight. A very good time to administer it is in the morning after the pigs have been starved for at least twelve hours. Withholding all food for a short time before giving the remedy should be practiced. The dose of turpentine should be repeated daily until three doses are given.

Stockmen will find santonin and calomel very effective remedies for intestinal worms. Five grains of calomel and eight grains of santonin may be given for every 100 pounds live weight. The two drugs should be put up in powders large enough for the bunch of five or ten pigs, and fed in ground feed. A mixture of areca nut and worm seed in teaspoonful doses is also recommended. In special cases it is well to follow the above with a physic.

Where turpentine is used it is necessary to withhold feed, as suggested by Professor Craig, for a period of twelve hours before using it, for two reasons, namely, in order to get the intestines emptied of their contents and also to get the hogs hungry. Turpentine is not agreeable to a hog and you have to get him rather hungry if he will take a teaspoonful in half a pail of slop.

There are a few good worm remedies on the market all the time, and we have no hesitation in asking our readers to consult our advertising columns on matters of this kind. Some time ago, while visiting an experiment station, we noticed a large case of hog worm powders, manufactured by one of our regular advertisers. Upon inquiry, we learned that those in charge of the hogs at that station favored its use very strongly, claim-

ing for it that it would do the work without any danger to the hogs.

However, we are glad to give our readers the opportunity to choose between what might be called home remedies; that is, such ingredients as one can purchase at the drug store, and the commercial worm powder, prepared by those who have made a special study of the business.

FARMERS' SHORT COURSE IN STOCK JUDGING AT IOWA STATE COLLEGE.

The animal husbandry department, of the Iowa State College, will offer its seventh winter short course in stock judging, commencing Monday, December 31, 1906, and continuing until January 12, 1907. This course has been planned to meet the needs of the busy man on the farm. Special attention will be given to the study of live stock judging, pertaining to the various market classes of horses, cattle, sheep and swine. For this purpose the International prize-winning animals belonging to the college will be used. In addition, the best representatives of the various classes of live stock, owned by the leading breeders of the United States, have been secured. This will afford those present an opportunity to inspect the best collection of domestic animals ever brought together for teaching purposes.

Special work will also be given along the line of feeding animals for beef, milk, pork and mutton production. The breeding and management of animals will also be discussed. The division of veterinary science will give a complete set of lectures, pertaining to the methods of combatting the most prevalent diseases among horses, cattle, sheep and swine.

Courses in grain judging, horticulture, dairying and domestic science will be given at the same time.

An entrance fee of \$3 will be charged to residents of Iowa, and \$5 for those from other states, which entitles each person to take either the grain judging or the horticultural course in addition to the stock judging work. Special advanced classes will be held for those who have attended in previous years.

For further information address the Animal Husbandry Department, Iowa State College, Ames, Iowa.

THE BEST METHOD FOR TESTING SEED CORN.

More farmers make a practice of testing their seed corn today than ever before. This has been brought about by the fact that land is so rapidly increasing in value that men can no longer fool away their time tending a poor stand of corn. It has been hastened by some of our station workers who have had time and the ingenuity to make a thorough investigation of the subject and to give the results of their investigations to the farmer. Men like Professors Holden, Lyon, Shammell, Hume, Ten Eyck and Miller must share a good deal of the responsibility of introducing the plan of testing seed corn; that is, the testing of each individual ear.

The plan ordinarily recommended by our station officers simply involves the use of a shallow box and such material as sand or sawdust. It is generally recommended that a cloth be placed on the sawdust and that kernels of corn be put in squares that are plainly marked off on the cloth. Another cloth is placed over this and on top, in turn, some moist sand or sawdust is placed. If all materials are moist, it only requires the matter of a few days to sprout corn, after which the upper cloth is removed and you are all ready for the count.

The plan suggested above is simple in the extreme, but there are a good many who do not like it. They claim that it is too artificial—utterly unlike the conditions that are found in the field. Such persons propose to substitute the plan of testing the corn in actual soil; that is, by burying it to a depth of two or three inches in moist soil and thus giving the kernel an opportunity to show what it can do when conditions approach those found in the field. We have had a good deal of experience in using both methods, and we are free to say that the last one is preferred to the first one. In other words, we like the soil test.

The objection to the plan so commonly recommended by our stations is that when sprouts are two or three inches long it is not always possible to detect a slight lack of vitality in the case of one or possibly two kernels out of the six removed from each ear. In other words, there is so little opposition to

Rubber Roofing

SOLD DIRECT TO THE FARMER.

A PERFECT ROOFING requiring no COATING. Suitable for steep or flat surfaces. Will stand any climate. Is WATERPROOF. Put up in rolls containing 106 square feet. Packed in center of roll are directions for laying and sufficient nails, caps and cement to lay 100 square feet complete. 1-ply, weighs about thirty-six pounds, per square, \$1.50. Every roll guaranteed. Send for samples. Cash with order. If not satisfactory, it can be returned or money will be refunded. Reference, Citizens Bank.

LIVE STOCK WORLD'S STUDENTS' CONTEST.

In reply to many inquiries concerning the contest for \$300 cash, offered by The Live Stock World at the coming International, the following general statement is made: Graduate students will not be eligible. Rules of entry governing general students' contest will obtain, except that no entrance fee, subscription or charge of any kind will be necessary to compete for the Live Stock World cash prizes.

Students can enter individually, it not being necessary that a list be sent from each college participating.

Entries should be made, of course, before articles are submitted.

Articles are to be not more than 750 words.

A contestant can select his own subject—cattle, horses, sheep, or hogs.

For any additional particulars, consult the management of the International Live Stock Exposition, to whom articles must all be sent.

Entries can be made any time up to December 5th by applying to the exposition management.

LOW RATES TO THE SOUTHEAST

Commencing December 18th and on the first and third Tuesdays of each month thereafter until March, 1907, the Chicago Great Western Railway will sell one-way colonist tickets at nearly half fare to points in Alabama, Louisiana and Mississippi. For further information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

SEND US THREE NAMES and addresses of farmers who may move west, and we will send you book of OREGON views FREE.

OREGON DEVELOPMENT LEAGUE
DEPT. 19 PORTLAND, OREGON

On request we will furnish authentic information as to farming opportunities in Oregon

The Cement Post Proposition.

By H. N. MacDonald.

The manufacture of cement fence posts from cement, sand and crushed stone is a matter of more or less interest to farmers, and some are trying to make their own posts as a matter of economy. To such a few words relative to method of manufacture may not be out of place.

Common line posts are made in various sizes and shapes, and different kinds of re-enforcements are used, while various means of fastening the fence wire to the posts are in use. A line post four by four inches at the bottom, three by three inches at the top and six feet ten inches long, re-enforced with four-twisted No. 12 galvanized wires gives very good satisfaction, though a larger post might be preferable; yet this size carries a fifty-two-inch woven wire fence nicely with posts placed a rod apart.

Owing to the small cross-section of this post and the manner of mixing the cement and sand, it is not advisable to use any large gravel or broken stone, and what might be gained by adding these larger particles is more than lost in the labor of successfully handling them. Sand should be clean and coarse, free from clay or loam, as both retard the setting of cement and if present in large quantities, destroy its adhesive quality. A standard Portland cement manufacturing company tells us that there are three simple ways of telling whether sand is clean or not:

First, rub some between the hands, and if they are badly discolored do not use it.

Second, drop a handful into a pail of clean water; if the water is clear enough to see the sand at the bottom in two minutes, it is "clean."

Third, fill a bottle or glass fruit jar one-quarter full of sand, and add clean water until the bottle or jar is three-quarters full. Shake well and if a layer of mud settles over the sand, do not use it.

The third method is undoubtedly the best. Use the best Portland cement obtainable. Exercise the greatest care in measuring your sand, cement, and broken stone or gravel (if used) always by volume. Go slow and use small quantities until experience has taught you the proper procedure.

A corner post which has stood very severe tests and which on paper figures to withstand a pull of 5000 pounds is

made eight by eight inches at the bottom, six by six inches at the top and eight feet ten inches long, re-enforced with nine twisted No. 9 wires. This post properly made and seasoned, set four feet six inches in the ground, has withstood the pull of a Page woven wire stretcher with the power applied by a strong man until the jacks could not be pulled another notch, and the fence was as tight as anyone would care to have it and much tighter than the average. Corner posts being of comparatively large cross section may be made successfully with the addition of coarse gravel or crushed stone. A post this size will weigh nearly four hundred pounds.

Braces are made four by four inches square, about eight feet long, re-enforced with four twisted No. 9 wires. The brace posts are six by six inches square and six feet long. They are set about four feet in the ground and are not used as line posts.

Sand should be tested to ascertain the amount of cement necessary to fill the voids in the sand. This test may be made quite accurately by filling a vessel of known quantity full of dry sand, then pour in water until the measure is completely filled. The amount of water added (by volume) will be the amount of cement needed to fill the voids in the sand and cement enough to fill these voids must be used to secure the best results.

Molds for the manufacture of these posts will vary in cost, depending largely upon the method adopted for fastening the fence wire to the post, and the cost of the posts will vary greatly because of the difference in the cost of the material at different points. Some places sand, gravel and crushed stone are obtainable at very low cost, while in a district of eight or ten miles the cost of sand alone will vary from fifty cents per yard to \$1.80 per yard.

The posts can be manufactured by the farmer on the farm, yet if many are to be used it would be much better to let the job to some cement worker who could fit up with the necessary molds, etc., and allow him to do the work. This would secure a more uniform product, cheaper cost of re-enforcement because purchased in large quantities, and very likely greater satisfaction to all concerned.

JAMES J. HILL CONDEMNNS ELEVATOR MEN.

James J. Hill, of the Great Northern railway, was placed on the stand last week in Minneapolis by the Interstate Commerce Commission, the object of the commission being to ascertain the relation between railroad companies and grain companies in the northwest.

Mr. Hill in the course of his testimony said that elevators are continually threatening the farmers unfairly. When Mr. Hill was asked if his railroad extended equal privileges to all in the matter of erecting elevators, he said:

Yes, it is our rule to permit anyone to erect elevators at stations of our road on the right-of-way. We now make our contracts, however, not transferable, as we have found instances where such applications were not made in good faith and afterwards sold at a good figure. We have found trouble in keeping elevators from combining and sometimes in tracing down applications for elevator sites, have found different applicants to really represent one interest. When we have found objectionable elevator combines we have sometimes built elevators of our own and placed some man in charge. In such instances the combines have tried to freeze our man out. We have such an instance at Litchfield, but were able to help our man

out. But that, gentlemen, was before the passage of the interstate commerce law.

In regard to the Great Northern's terminal elevators at Duluth, Mr. Hill stated his company did operate them, but that because of the Wisconsin law requiring grain in that state to be inspected by Wisconsin inspectors, these elevators were now leased. They are located on Wisconsin ground.

I think it is a great detriment to business that we cannot control the unloading of grain. I think the best thing for a railroad is to have its own terminal elevators, unload into them and include the charge for so doing in the freight rate. By our building Duluth terminal elevators we have reduced for the shipping farmers the elevator charge from one cent to one-half cent a bushel. This included unloading into the elevator, a short storage and loading into boat for shipment through the lakes. We cleaned, but did not mix the grain.

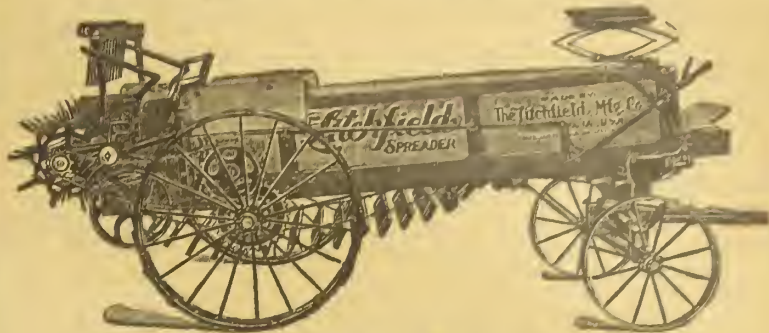

Mr. Hill thought the present legal method of handling grain is wrong, but the farmer is the victim of the speculator. He said every receiving elevator should devote itself to simply that business; that the operating in grain should be another separate business, and that the business of the grain mixer should be still another separate business. Mr. Hill thought the building of elevators of much greater capacity in Minneapolis would not relieve congestion of grain traffic, but he did think the action of the state grain commission in sending inspectors as far out as one hundred miles to inspect grain was a good move in this direction. He strongly criticized the state law which legalize sharp practice of grain mixers.

KILLING HOG LICE IN COLD WEATHER.

The following communication has been received from a subscriber, Mr. L. A. Peterson, of Boone county, Iowa:

You have had considerable to say in your columns during recent times on the subject of destroying hog lice. I have never read your advice for the reason that I have

Judge For Yourself.

THIS IS OUR MOTTO.

THE writer well remembers in early boyhood days of being floated into the land of dreams at evening time by the story about the sheep. The story was about a drove of sheep going through one of the old-fashioned, wooden, covered bridges and about one sheep jumping through a hole in the side of the bridge, and every other sheep, one at a time, following where the leader went, all being annihilated in a reckless, ceaseless, foolish rush to do what others have done before, without consideration and without judgment.

We see about us daily the wonderful propelling force of fashion. We see the shallow-brained girl dancing after the man's hat, his stand-up collar and tie and holed shirt-front, and following this comes the masculine dude rapidly gravitating towards the toothpick shoes, corset-waist overcoat, and hair parted in the middle.

What has this to do with Manure Spreaders? Just this, that we don't want you to buy a Litchfield Machine, simply because thousands of others are buying them, nor because it is rapidly becoming the fashion to own one of these Spreaders instead of some other make. On the other hand, we don't want any of our friends to be so closely tied to old, out-of-date, back-number, fossilized ideas as to not be broad enough to appreciate the "modernism" of the Litchfield Spreader.

When this machine was designed, the old, foggy notions that existed many years ago in the spreader manufacturing business seemed to be entirely out-of-date, and something better, something more in keeping with this modern age and the general march of humanity was sought for.

As an example and comparing the modern Litchfield Spreader with the ancient machines, we sight our readers to the present perfect working, endless conveyor that takes the place of those old style affairs that were part of the first machine ever invented. We call attention to the single, and only, lever on our spreader, which takes the place of from six to a dozen levers that are now in use on the old-style machines, and which were considered absolutely necessary twenty-five years ago.

We wish also that our steel wheels shall be noted and compared with the old-style, narrow-tired, wood-spoked and castiron hubs of ancient make which have been so religiously adhered to by other manufacturers.

These and a dozen other modern improvements not found on any other make of spreader today indicate the way the Litchfield Manufacturing Company have stepped out of the old rut and are giving their customers a modern machine of individual merit. Continued next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

never had any lice until lately. I find now that my hogs are considerably infested and would like if you would give me some directions how to proceed to destroy them.

We have been untiring in our efforts to propagate sound doctrine concerning the destruction of hog lice during the summer and early fall months, for the reason that it is always a very difficult matter to handle in cold weather. It pays, and pays exceedingly well, to make a practice of dipping or spraying hogs at least once a month during the summer and fall months. We have found from experience that the coal tar products are exceedingly effective in the destruction of lice, and all the experiment stations are recommending their use to farmers. They are non-poisonous, non-irritating to the skin, though exceedingly deadly to lice.

Cold weather or no cold weather, if one has lice in his hogs now he must get after them. We have known men who have been exceedingly successful in using kerosene, and on the other hand we have known instances where the use of kerosene has resulted in taking all the hair off hogs. By thoroughly cleaning out the sleeping quarters and disinfecting with a good coal-tar product we believe that the hogs will naturally free themselves. If the quarters are lousy no amount of spraying or dipping will eradicate the nuisance.

This is a subject that we would like to have discussed by our readers. Those who have made a practice of using such substances as lard or kerosene on their hogs in cold weather are invited to give the result of their experience through these columns. Those who have made a practice of disinfecting the quarters during the cold weather and have succeeded in stamping out this pest by such a plan are also invited to give their experience. As said before, it is not a difficult matter to destroy lice when the weather is warm, but it is more or less of a complex problem when the weather is cold, as one has to be very careful about spraying or dipping hogs when the temperature is low.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for 25 years.

CHICAGO EXCURSION.

Daily from December 1st to 5th the Chicago Great Western Railway will sell round-trip tickets from all stations to Chicago and return at rate of one fare plus \$2 for the round trip, with limit to return of December 10th. Impossible to get better service. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Cownie Fur Coats

Are the only Fur Coats made that have a two year written Guarantee.

NOT one skin is used in a Cownie coat that is not taken off in Dec. or Jan. when the fur is the best. Not one drop of strong acid or chemicals is used in the tanning of these hides. That's why we can guarantee a Cownie Coat twice as long as any other fur coat made. If your dealer cannot supply you write us.

J. H. COWNIE GLOVE CO.,
DES MOINES, IOWA.

Every Farmer and Stockman

Should have a good fur coat and robe. Send us your horse and cattle hides and we will make you a coat or robe that will always be soft, pliable, wind, water and moth proof. Quality of work considered our prices are the lowest. We guarantee satisfaction. FREE booklet on hides, also shipping tags and prices. Write today.

CORN IMPROVEMENT.

BY VICTOR FELTER, WASHTA, IOWA.

At the present time farmers of the corn belt are growing corn at a cost of from eighteen to twenty cents per bushel. If they could double the yield, or rather produce as much on one acre as is now grown on two, the cost per bushel would be almost cut in two. An average yield of about thirty-five bushels is almost a humiliating record in a corn belt state, because the soil of this locality is capable of practically doubling this yield.

If we contemplate increasing our yield we must look first to the quality of our seed, and then prepare a better seed bed and employ more improved methods of cultivation. But the one factor above all others that I would emphasize as having to do with the increase in the yield of our corn is the selection of better seed. It is not uncommon to find what we call our improved corn yielding almost twice as much as the common varieties, and bear in mind that up to date such improvement as has been made in our corn has largely been brought about by selecting seed to conform to certain standards. The best results can only be obtained when each stalk of corn is grown from a good kernel, which in turn must have come from a good ear. Most of us fail to realize to what extent the good or poor quality of an ear of corn is transmitted to the resulting crop. This is shown very plainly by planting several ears equally good in outward appearance, in separate rows side by side, and watching their growth and development. Some stalks will grow very tall, others will have very broad leaves, while in the matter of yield one may give twice as much as the other.

We have started the plan of growing a few rows, using the seed of but one ear in a row. We have found that the yield this year varies from forty to

ninety-six bushels per acre. Of course, all corn from the low-yielding rows is discarded and we keep only seed from those that give a good yield.

The score card in recent years has come in for a good deal of discussion. It is simply a means of directing the attention of the unskilled to each particular part of the ear. The score card, the corn show and the seed corn train should be given credit for at least a part of the increase in yield in the central West during the last few years. All this has simply called attention to putting skill into the work of selecting seed without giving much attention to the character of the stalk on which the ear was grown. The time is coming, however, and is not far off, when the most progressive corn growers will give more attention to the selection of the seed ears in the field. Barren stalks and suckers must not be allowed to pollinate the plants from which seed is to be taken.

In selecting seed from its outward appearance success is largely due to one's ability to keep the same type in mind from year to year. The leading qualities to be recommended in a variety suited to general purposes are: High percentage of shelled corn, soundness of ear and kernel, large germ and well-shaped kernels, as well as uniformity in size and shape of ear, and the color of course, should be pure. We must give the score card considerable credit for raising the standard in the quality of the seed supply selected by a very large number of farmers in the corn belt, but let us give increased attention to breeding methods by which such results are produced. There are always plenty of hard problems for the man behind the plow to solve, and it is this necessity for high thinking that gives dignity to agriculture as an occupation.

Spreading Sound Live Stock Doctrine.

The following communication has been received from a Nebraska subscriber:

I am very much interested in the work that is being done by Professor Holden and others along the line of corn improvement. The idea has occurred to me that it might be practicable to inaugurate a similar campaign in behalf of live stock improvement. If experts could travel about from place to place and appear before farmers' meetings with creditable specimens of horses, cattle and hogs it would accomplish more in the course of a few months than would otherwise be brought about in years. The experience along the line of seed corn indicates that farmers are eager to pick up information of this kind. I feel sure that if applied to live stock, good sound teaching with the specimens before the farmers would be just as interesting and the teaching would be just as effective as it has been in the case of corn.

This appeals to us as being an entirely practicable proposition. Practically all of the railroads of the corn belt have been covered by the so-called "corn special" trains, and it is acknowledged on every hand that these have resulted in increasing the yield of corn. There need be no difficulty whatever connected with the proposition of taking improved pure-bred animals from one point to another for purposes of demonstration. If two or three hours could be spent at each town along a given line of railroad, examining good pure-bred hogs, horses and cattle, it would leave such an impression on the minds of farmers that much good would certainly result. It would above all things emphasize the need of using pure-bred males. At the same time, it would equally discourage the practice of using inferior pure-breds, as well as grades. Not but what farmers realize at the present time the virtue that is found in pure-bred blood, but rather that it would emphasize this matter and thereby encourage the use of more of it.

It has been claimed that the work in corn has already resulted in increasing the yield in one or two states to the extent of five bushels per acre. If a 5-per-

PILES NO MONEY TILL CURED.

that the farmer who in the future raises improved stock will be remunerated for his labor and for the special knowledge he puts into his business.

This is a matter that could no doubt be taken up by our experiment stations. Most of these institutions have already inaugurated what they call extension courses, the object being to teach farmers the scientific principles underlying crop production. Let us also have a few experts to take up the live-stock end. Railroads would no doubt gladly co-operate in a matter of this kind.

The Week in Kansas.

The price of being able to report something different has been paid in a snow storm, the like of which is unusual for sunny Kansas. This storm was undoubtedly "primed" by the stiff wind of last Friday. On this day the wind fairly "raised things." Tops of hay stacks were lifted bodily and dumped to the northeast of the stacks. Aside from this it did no damage. The next two days, Saturday and Sunday, the wind did stunts of getting slowly from the southwest to the northeast, going around by the northwest. Sunday was a raw, chilly day, but towards evening the temperature moderated, and the early onlooker was greeted with a whitened landscape, Monday morning.

All day Monday it would snow a little, then stop for a while. Monday night, also, more or less fell, and the greater part of Tuesday was devoted to snowing and not snowing. Wednesday morning witnessed the breaking away of the storm. The sun shone out clear and bright in a very few moments after a squall of thick snow had blown past, and since then sunny Kansas has been living up to its name.

In all probability six to seven inches of snow fell. For two nights the weather has been unusually cold for this sea-

son of the year. Ice has frozen on the ponds hard enough to hold up stock, something wholly out of the ordinary for Kansas. The daily papers have made a great blow about "the blizzard in Kansas," and northern folks are probably congratulating themselves that they do not live in the sunflower state, after reading these exaggerated reports. It does seem strange that this state cannot have a gentle fall of snow without the newspapers calling it a blizzard.

When the storm was more of a rain and sleet than snow, freezing on as it fell, it was tough on stock not sheltered under a roof, but since the sun has shone it has been weather such as only creates a fine appetite. Perhaps the daily papers will even tell of "stock dying," but we know nothing of it. If any have, it has probably been through the butcher knife route, to furnish a fitting return for the "prodigal son," on Thanksgiving day.

Much corn remains to be husked. The moisture from the snow, which shows signs of disappearing entirely today and tomorrow, will make the fields nasty, and the corn frosty during the forenoons, but the wheat-raiser reasons that the snow is worth all it cost, and that there will be plenty of good weather yet in which to husk the remaining corn.

Henry Hatch.

Coffey Co., Kan., Nov. 23, 1906.

CITY TICKET OFFICE, 512 WALNUT ST.
When you think about traveling call at City Ticket Office of the Minneapolis & St. Louis R. R. (in with the Wabash), at 512 Walnut St., where you will secure the best and latest information. Don't forget the M. & St. L. sells through tickets via St. Paul, over the Northern Pacific, Great Northern, Soo Line, as well as all northern routes. Trains leave Union Station, Des Moines, 8:15 a. m. except Sunday, and 9:05 p. m. daily. Solid through trains to Twin Cities. We are the SHORT Line to Minneapolis. Cafe car on morning train, serves dinner and supper. Night train has new electric lighted sleepers. All cars nice and comfortable. W. K. Adams, D. P. A., D. B. Ransburg, C. P. A., Des Moines, Iowa.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

WRITTEN CONTRACTS.

All contracts for the sale or conveyance of real estate or any interest therein except leases for one year or less, must be in writing and signed by the parties, otherwise they cannot be enforced by law, and damages cannot be recovered for the violation of them.

Contracts which are by their terms not to be performed within one year must be in writing and signed by the parties in order to be binding upon them. The limitation of one year in such contracts, means one year from the time the contract is made, and not one year from the time performance of it is to begin; for instance, suppose a contract be made on the first day of December, 1906, between A and B by which A agrees to work for B for one year beginning on the tenth day of December, 1906. This contract would have to be in writing and signed by the parties, because by its own terms it could not be performed within one year from the time the bargain was made. If A and B agree on December 1, 1906, that A is to work for B one year beginning on that day, such agreement need not be in writing.

LAW QUESTIONS CONSIDERED.

DEAD SHOATS—LOSS.

A Subscriber, Wichita, Kan.—A and B had a contract by which A furnished shoats for B to feed and B was to have what he put on the shoats in weight for his compensation. The shoats when weighed to B averaged fifty-six pounds and when fattened by B's feeding they averaged 200 pounds. Some time during the feeding period two of the shoats died. Who should lose the original weight of these two?

Answer—If the death of the two shoats was caused by the fault of B he should lose the weight, but if not caused by his fault, A should lose it.

LIFE ESTATE—ESTATE TAIL.

Mr. J. S. Frazier, Mo.—(1) A raised three children and was divorced from his wife. He made settlement with her in full. He now has property of considerable value. Suppose he wills this property to the three children and their body heirs, can said children allow it to be sold for taxes and buy it in, and so get title which will enable them to sell the property free from claim of the body heirs? (2) Suppose A's children should all die, leaving no body heirs, who would inherit property willed to them and their body heirs?

Answer—(1) If the supposed body heirs be living at the time when the tax proceedings are taken, and are duly served with summons therein, and the tax proceedings are regular, then if the children buy the property at the tax sale, and convey it afterwards to a third party, such third party will have good title which cannot be defeated by the body heirs of A's children. If, however, the body heirs of A's children be not duly served with summons in the tax proceedings, or if they are born after the tax sale, in either such case we think they could bring an equitable ac-

tion for redemption against the person who holds the land by title derived from such tax sale and recover it, by paying all back taxes, interest and costs. (2) In such case, the property would go to A's heirs—that is to say, his next of kin.

MECHANICS' LIENS—KANSAS.

A Reader, Harveyville, Kan.—Within what time, after a building is completed, must a carpenter file a mechanic's lien?

Answer.—If the carpenter was the contractor or sub-contractor for the construction of the building, he must file his lien within four months from the date of the last item of labor performed under the contract. If the carpenter was merely an artisan or laborer on the job, he must file his lien within sixty days from the last item of labor he performed.

NATURE OF DOWER INTEREST.

A Subscriber, Bushnell, Ill.—A man married a woman, and she died, having no children. Her mother has a dower right in eighty acres of land. When the mother dies, will the surviving husband of her daughter become heir to part of the mother's share?

Answer.—The man could never become an heir to anything the mother of his dead wife possesses; besides the dower interest of the mother in the eighty acres of land will cease when she dies. A dower interest is only a life estate. When the person who has it dies, the interest ceases to exist.

GRANT OF EASEMENT.

A Subscriber, Castana, Iowa.—A and B own land jointly. B wants to sell his interest in it to A, except a narrow strip, which both of them want for a private road. How should the papers be drawn to effect such an arrangement?

Answer.—B should convey his undivided interest in the land to A by an ordinary warranty deed, and thereupon A should execute a grant deed conveying to B, his heirs and assigns, a perpetual easement in the strip of land, that is to say, the right to use it in common with A and his successors in the title as a private way. It will be advisable to have a lawyer prepare the papers—the two deeds.

ORAL CONTRACT NOT GOOD.

A Subscriber, Elwood, Neb.—I have been renting a piece of land from my neighbor for three years, having a lease each year. In July, last, I asked the owner of the land if I could rent it for the season of 1907. He said I could have it. There was nothing said about making a written lease, and about three weeks afterward he sold the land and notified me I could not have it. He acknowledges renting it to me and I also have a witness to it. At the time of our talk in July, I could have gotten other land for 1907, but now I cannot get the other land, and it means considerable loss to me. Have I any remedy at law?

Answer.—You have not. You cannot compel the land owner to rent you the land for the season of 1907; neither can you recover damages from him because he now refuses to let you have it. The reason of this is that such a renting contract as you mention must be in writing in order to be binding and valid.

OUTLAWED NOTE.

A Subscriber, Keota, Iowa.—A gave his promissory note to B in Missouri, and then A left the state and went to Iowa. (1) What proceedings must B take to collect the note from A? (2) In case A has been out of Missouri for ten years, is the note outlawed so B cannot collect it?

Answer.—(1) If the note is not outlawed B can have suit brought on it in the county in Iowa where A lives and recover judgment against him and collect it if A is financially responsible. B would have to employ some lawyer in

IOWA STOCK FOOD

TRADE MARK

FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing.

Zearing, Iowa, July 13, 1906.

Gentlemen:—I purchased some of the Iowa Worm Powder last February and I don't think I ever made a better investment. The Iowa Worm Powder can be depended upon. I had some of it left that I fed to my spring pigs and it surely done the business.

I gave your Mr. Deal an order today for some more of the Worm Powder, as I want it on hand. An occasional feed of it keeps the worms from accumulating in my pigs. Feeding to prevent sickness beats curing after pigs are sick. Most of the pig losses are due to worms and the Iowa Worm Powder is sure death to worms.

Truly yours,

Alex. Norman.

Address Department A.

IOWA STOCK FOOD CO.
Jefferson, Iowa.

Iowa to conduct the proceedings. (2) A note becomes outlawed in Missouri in ten years after it is due but the time during which the maker of it is out of the state, is not counted in his favor, if he comes back and is sued in the state—but if A has been in Iowa ten years after the note becomes due, it is outlawed in Iowa, and suit on it there could be defeated by the statute of limitations.

HUSBAND AND WIFE.

An Illinois Homemaker—A woman worked two years as housekeeper for a man and his child in Illinois for wages, which the man has not paid. After this period of service she married the man. Before the marriage she loaned the man a sum of money and took his note therefor, which he has never paid. (1) Can the woman recover by law the wages she earned before marriage? (2) Can she collect the note by law?

Answer—(1) She can recover a judgment against the husband for the wages she earned by working for him before marriage. (2) If the husband has property sufficient, not exempt from execution, she can collect the note by law.

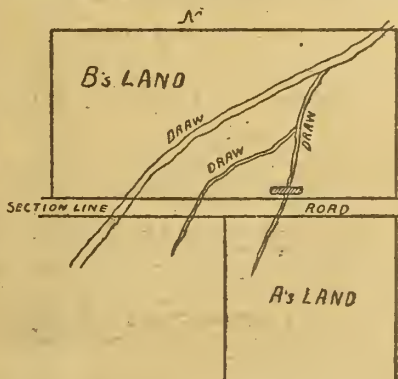

FIXTURES IN HOUSE AND BARN.

Mr. Edwin Jones, Troy, Kan.—A sold his farm to B. There was in the house at the time of sale a mutual telephone instrument, and in the barn, ropes and hay fixtures. Nothing was said at the time the bargain was made about any of these things. Can A take away the phone and the ropes and hay fixtures?

Answer.—We think the phone instrument is not a fixture and that A can lawfully remove it when he gives possession of the place to B. As to the ropes and hay fixtures there is some doubt. If they are firmly attached to the barn as a permanent improvement thereto, they would belong to B; if not so attached, they can be lawfully taken away by A.

SURFACE DRAINAGE—WATER COURSE.

A Subscriber, Central City, Neb.—A and B own adjoining lands, both being in cultivation. Several draws run through B's land, one of which heads in A's land, as shown in the accompanying diagram. These draws carry water during heavy rains. A section line runs between these tracts of land, on which is a graded public road with a ditch on each side of it. In flood times

water runs along the road ditch from the west draw to the east one. B has built a dam across the easterly draw, which heads in A's land, and carries but little surface water during rains. This dam is constructed wholly on B's land, just north of the road, and it has the effect of backing water through the culvert at that point, upon A's land, which injures his crop. (1) Can A compel B by law to remove the dam? (2) Has A a good case for damages against

B? (3) What constitutes a water course in law?

Answer—(1) We think not. The common law rule in reference to surface water prevails in Nebraska. Under this rule surface water is regarded as a common enemy, and every land owner has a right to take any measures necessary to the protection of his own property against it, even if in so doing, he throws it back upon an adjoining owner. (2) For the same reason, we do not think that A has a good case for damages against B. (3) To constitute a water course the size of the stream is immaterial. It must be a stream in fact, as distinguished from mere surface drainage, occasioned by freshets or other extraordinary causes, but the flow of water need not be constant.

Best by Test.

TOOLS IN THE HOME.

Everyone knows in a general way the usefulness of tools, but few seem to realize how much expense and inconvenience can be saved by having a tool cabinet in the house. Repairs can be made at once, shelves put up, screens made with but little practice or experience, and the price of the cabinet can be saved dozens of times over.

The main requirement for good work is that the tools be good tools.

Keen Kutter Tool Cabinets are made to fill adequately the needs of the householder. They contain various assortments of tools, every one belonging to the famous Keen Kutter brand.

These cabinets are beautifully finished, and are fitted with racks and hooks for every tool, keeping them from knocking against and damaging one another. They are well supplied with drawers, which contain numberless little helps that you would rarely find in the ordinary home kit.

Keen Kutter Cabinets come in different sizes and prices from \$7.50 to \$100, according to the number of tools in the set, and may be found at the leading hardware stores. The smallest contains just the tools that are absolutely indispensable, and the largest a complete set, sufficient for any kind of work.

They all contain, however, in varying numbers and varieties, saws, brace, bits, chisels, drills, gimlets, brad awls, scratch awls, planes, hammers, hatchet, files, pliers, drawing-knife, screw-drivers, wrenches, nail sets, reamers, rules, squares, tape, level and many accessories.

The Keen Kutter Tool Cabinet Booklet will be sent free to anyone writing for it to Simmons Hardware Company, St. Louis and New York, U. S. A.

A Knox Big Grinder

Will Make \$6.00 a Day for You

THERE'S nothing like it for a neighborhood feed grinding proposition.

You know lots and lots of your neighbors grind their feed—rather they take it to the custom mill and have it ground.

If you have a fast grinding mill like the Big Knox you can get nearly all that trade that passes your place.

No trick at all to get it if you go after it, and can take care of it. They pay the town miller 3c to 5c a bushel. You might as well have that.

Mr. B. C. Bennett, Ashawa, Iowa, writes: "I can grind 50 bushels shelled corn per hour with my Knox Big Grinder. Made \$6.00 in 5 hours grinding for my neighbors."

You or anybody else can grind your 50 bushels an hour—easily.

Just figure a little. Suppose you charge the lowest price, 3c a bushel. That's \$1.50 an hour. Grind 4 hours, and you've made your \$6.00.

The neighbors will easily keep you busy that much of the time. And the four hours don't break into your day so very badly either.

Western Harness and Supply Co., Box 53, Waterloo, Iowa.

And then think what it means to always have the Big Knox ready for all your own grinding. Remember, it's a mill, not a toy. Weighs 800 pounds. No limit to the work it will do.

You can buy a Knox Big Grinder direct from us for \$23.25. Such a mill, bought of a local dealer, costs \$40.

Will it pay to own one? Don't you see you can make it pay and pay big?

10 Days Free Trial

You are welcome. See for yourself its strength, its light draft, simplicity, its cup oil bearings, why it can't wear out. Just one set of burrs has ground 10,000 bushels.

You ought to have it. Write for free catalog today.

Echoes From a Kansas Farm

By Henry Hatch

Having but a day and a half left of corn husking, we "took a day off" today and went to a neighborhood sale. It does no one harm to attend a sale once in a while, whether he wishes to buy anything or not.

The public sale is no longer a place where bargains hunt for takers. Everything put up today brought every cent it was worth, and many things sold for more than we would give; thereby, no doubt, showing our poor judgment.

These are prosperous times. Anyway, the people have money, and most everything they buy is paid for in cash. Times have been when hardly one-fourth of a sale would be taken in cash. Now we have records of many sales in this county where every cent of a three or four-thousand-dollar sale was paid in cash. This spells prosperity.

This is November 14th, and the question heard most at the sale was: "Got through huskin' yet?" The answer was invariably the same, "No." In the seven miles of road traveled to get to the sale we did not see one-half of the corn husked. One or two farmers had not yet started cribbing. There are folks who seem to dread husking to the extent of putting it off as long as possible.

We did not pass a field of corn today, a part of which was listed and a part not, but what that listed was the poorest by from five to ten bushels to the acre. We saw fields of listed corn that were better than fields of top-planted, but they were on different farms where different farmers lived. Given a fair test, side by side, and for our eastern Kansas soil, plowing and top planting will raise the best corn in almost any year.

Never have we had a better fall for feeding cattle than this one. The weather has been dry and fine. Every pound of grain has done the maximum of good, gone right to the right spot, as the saying is. We hardly realize what a wet, nasty, rainy spell of weather loses us at this season of the year, until we do some feeding under conditions that are ideal, and see how much more is gained with the same amount of feed.

We have heard of no one losing money full-feeding either cattle or hogs this fall. No one is complaining. People have even forgotten "the beef investigation business." As a rule, farmers are not the class of people to squeal without just cause. There are some folks who are not satisfied, even with a fair profit, but give the majority of the farmers a fair, square deal, and you hear no complaining.

We would like to say to all readers of this paper that if they write to us and expect a personal reply, they would find no one more ready and willing to give it if time permitted, but anyone who has tried it knows that farming a considerable acreage of land in these times of scarcity of help, and with other work to do on the side, does not give a fellow

much time for answering personal letters. If questions are asked that may be answered through the paper, all well and good, but if otherwise, please do not blame us. A thick pile of unanswered letters lying on our desk now, furnished the inspiration for this paragraph.

We often get letters from folks who have a few hundred dollars they wish to put into a home, preferably, so they say, in Kansas. In almost all cases they want to buy bigger than they should, considering the amount of cash they have. We believe in a man getting a home just as soon as he is able to make a fair payment on forty acres of land, but we do not believe in using the money that should be used in buying just forty to make a payment on 160 acres.

It is better to own even twenty acres of land, with a small house on it and a few other necessary buildings, than to rent the land and a home of another. The sooner the majority of the people now renting farms understand this, the better it will be for them. The best advice anyone can get now is to buy a home, but don't put a little money into a lot of land. It is best to buy no more than can be half paid for at the beginning. It is better to buy forty acres with what money you have, and pay out on the farm in a very few years, than to put the same amount of money into 160 acres and eventually lose it all.

We have all got to get used to farming fewer acres and farming them better. It is what we have been practicing for the past five years. In this length of time we have cut down our acreage of corn each year, but the total number of bushels raised from each crop does not grow much less. There is more profit in raising 1,600 bushels of corn from forty acres than 1,600 from eighty acres. "Hog farming" won't win much longer.

MEETING OF THE IOWA STATE BOARD OF AGRICULTURE.

The annual Iowa State Farmers' Institute meeting and agricultural convention will be held this year in the rooms of the Department of Agriculture, Capitol building, Des Moines, on Tuesday and Wednesday, December 11th and 12th. For these dates the following program has been prepared:

Tuesday, December 11th, 9:30 a. m.—Address of welcome, Hon. Lafayette Young; response, Hon. B. W. Newberry; "Farmers' Co-operative Associations," C. G. Meserole, secretary Iowa Farmers' Co-operative Association; "Development of Eastern Agriculture," H. W. Collingwood; "What the Farmers' Institute is Doing for the Farmer," Don L. Berry. 2:00 p. m.—"The Draft Horse; Will it Pay the Average Farmer to Keep Pure Bred Draft Mares?" W. J. Kennedy; address, "Railway Freight Rates," Hon. A. B. Stickney, president C. G. W. Ry. Co.; "What the Iowa State College is Doing for the Boys and Girls," C. F. Curtiss; "Poultry on the Farm," Mrs. Harriet W. Ashton; address, "The Chicago Live Stock Market," (an address will be given, or a paper read, by a member of the firm of the Chicago National Live Stock Association of Chicago).

Wednesday, December 12th, 9:30 a. m.—Meeting of state agricultural convention; appointment of committees—resolution, credential and special; address by president of the state board of agriculture, W. W. Morrow; report of treasurer, G. D. Ellyson; report of secretary, J. C. Simpson; address, Gov. A. B. Cummins; "The Up-to-date County Fair; How it Can be Useful to the Community," E. A. Larson, secretary Montgomery County Fair; "Does it Pay to Show Hogs at the

Iowa State Fair?" W. Z. Swallow, for forty years an exhibitor at the state fair.

In connection with the Institute, the usual corn exhibit will be made. There will be four classes for each of the three districts of the state; that is, the northern, southern and central districts. In each district there will be five prizes offered for the best ten ears of large yellow corn, best ten ears of small yellow corn, best ten ears of large white dent and best ten ears of small white dent. The prizes are: \$12, \$10, \$5, \$3 and \$2. There will also be a sweepstakes prize of \$20 and medal, competition limited to the first-prize corn entered in the separate lots, and there will be a \$10 prize and medal for the best ear of corn, any variety, from any part of the state. All corn must be in place by 12 o'clock, noon, Tuesday, December 11th. Entries should be made to John Simpson, State Capitol, Des Moines, Iowa.

Railroad rates will be adjusted according to the certificate plan, so that all parties who contemplate being in Des Moines during the week of the Institute, should secure a railroad certificate when ticket is purchased. If more than one line of railway is used, obtain a certificate from each line you travel on.

John Blain Makes Good Sale.

The sale of Poland China hogs made by Mr. John Blain, of Pawnee City, Neb., was certainly a great success. A large crowd of buyers from five different states were present to see one of the best offerings of the season. Mr. John R. Triggs, of Dawson, Neb., topped the sale at \$190 for No. 26, a fine young boar that much is expected from later on by good breeders. Of the fifty-five head cataloged every animal was sold and sold at satisfactory figures. The average on the whole consignment was \$53.80, which we consider one of the best averages made on a like number of young pigs in a long time. We regret very much to state that the report of this sale was mislaid and therefore was not reported in proper time. The list of buyers at this sale is as follows:

No.	Price.
1 Boar, Frank Davis, Holbrook, Neb.	\$66.00
5 Boar, John Mosier, Berwick, Kan.	46.00
10 Boar, Elija Story, Kewanee, Kan.	170.00

Send Us Your Subscription Today.

Five excellent newspapers and magazines for \$1.25 a year—supplying your home with news, literature, agricultural information, market reports, entertainment and general instruction all the year round. If already a subscriber for one or all, your time will be extended for one year. All these for \$1.25:

The Chicago Weekly Inter Ocean, a grand general newspaper for the family—all the week's news, reliable market reports, a wealth of prose and poetical miscellany, departments for women and children, something for each member of the household.

The Kansas City Weekly Star, an able, fearless, independent newspaper, filled with information and entertainment, containing much that you cannot find in any other paper.

The Homestead, the greatest farm paper in the world, reaching more than double the number of paid subscribers taking any other weekly agricultural paper in its field, having departments covering every interest of the farm; edited by actual farmers and numbering among its contributors a larger number of successful farmers, breeders and experiment station workers than any other farm paper.

The Homemaker, a delightful monthly of entertainment and instruction for the women folk of the farm; something to brighten the lives of your wife and children.

The Farm Gazette, the most beautiful farm magazine in the world; elegant illustrations, printed on fine paper; cover in five colors; reading matter both helpful and entertaining.

Send us \$1.25 today, stating whether your subscription is a new one or a renewal. Address, The Homestead Co., Des Moines, Iowa.

Buying a Cream Separator

A little thought before buying a cream separator will save you a lot of hard work later on. Don't be talked into buying a machine with a high milk supply can—it's like pitching hay to pour milk into one. Besides it does n't cost any more to get an easy running

U.S. Cream Separator

with a low milk tank that a child can reach, a simple bowl that's easily washed, and a set of entirely enclosed gears, protected from dirt and danger. The U. S. holds the World's Record for clean skimming—it is the most profitable machine for you to buy, and will last a life time. Our handsome new catalogue describes in detail the operation and construction of the United States Separator. Many fine and accurate illustrations aid in making perfectly clear to you the advantages the U. S. has over all others. If you're keeping cows for profit, ask for our catalogue No. 81. It points the way to the biggest profits.

Because You Need The Money

It's your business and if you don't attend to it, who will? You cannot afford to keep cows for fun. That isn't business, and, furthermore, it isn't necessary. There is money in cow keeping if you go at it right, and besides there is more fun in going at it right than there is in staying wrong.

You need a Tubular Cream Separator because it will make money for you; because it saves labor; because it saves time; because it means all the difference between cow profits and cow losses.

Look into this matter; see what a Tubular will do for you and buy one because you need it.

How would you like our book "Business Dairying" and our catalog B. 121 both free. Write for them.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

Prevention and Treatment of Contagious Abortion.

So far as this differs from the treatment of sporadic abortion, it consists in separation and the free use of germicides or disinfectants.

(1) Separate all aborting cows in isolated building, yards and pasture, allowing no other cows to have access even to their manure, liquid or solid. Not even breeding ewes, goats, sows, rabbits or mares should be allowed to go from the isolated to the non-infected premises. Separate attendants and utensils are desirable.

(2) Scrape and wash the back part of the stall and gutter and water it with a solution of five ounces of sulphate of copper (bluestone) in one gallon of pure water. Repeat this cleaning and watering at least once a week. This should in all cases be applied to every stall where an aborting cow has stood and to those adjacent. To treat the whole in the same way would be even better, as it is impossible to say how many of the cows harbor the germ. This is the more needful as that in one to three years, if the aborting cow is kept on, she becomes insusceptible and carries her calf to full term. A cow may therefore be infecting to others, though she herself no longer aborts.

(3) Dissolve one dram corrosive sublimate, one ounce each of alcohol and glycerine, and shake this up in a gallon of water, to use as an injection into the vagina and a wash for the parts about the vulva and root of the tail. Being very poisonous, it should be kept in a wooden barrel out of the way of animals and children. Every morning the vulva, anus, back of the hips, and root of the tail, should be sponged with this liquid, and this is best applied to the whole herd. A 1-per-cent solution of carbolic acid is a good substitute.

(4) When any case of abortion has occurred, the fetal membranes must be removed by the hand without delay, and, together with the fetus, destroyed by burning or boiling, or buried deeply, and the stall should be cleansed and watered freely with the copper solution. Then the womb should be washed out with one and a half gallons of the corrosive sublimate solution injected through a rubber tube introduced to the depth of the womb and with a funnel in its outer elevated end. This should be repeated daily for a week. In the case of the other non-pregnant cows of the herd, one injection of the same kind should be made into the vagina, after which they need only have their external and tail washed with the solution daily.

(5) Do not breed aborting cows for two or three months, then use a separate bull, injecting his sheath and washing his belly before and after each service with the carbolic-acid solution. Exclude all outside cows from service by the regular herd sire and, in purchasing breeding animals, subject them to quarantine and treatment before placing them in the sound herd.

As a certain number of the cows will harbor the germ in the womb when treatment is started, it is not to be expected that abortions will cease at once, but by keeping up the treatment, the trouble may be got rid of in the following year.

Every Farmer Knows That The DE LAVAL CREAM SEPARATORS

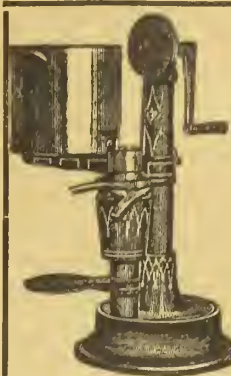

are in a class by themselves as the best separators. But many have the mistaken idea, which competitors help to magnify, that they are "expensive" and that something "cheaper" will do as well.

The Facts Are That The DE LAVAL CREAM SEPARATORS

are not only the best, but at the same time by far the cheapest—in proportion to the actual capacity and the actual life of the machine.

These are simple facts easily capable of proof to any buyer who will take the trouble to get at them and who need only apply to the nearest DE LAVAL agent or send for a catalogue to do so.

100-110 WEST WABASH ST. CHICAGO, ILL.

THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or
DAIRY QUEEN MFG. CO., FLORA, IND.

As an aborting cow is usually of little use for the dairy, it is best to separate and fatten her and apply treatment to those that remain. In this, as in other delicate manipulations, the stock owner will consult his own interests by employing an accomplished veterinarian and avoiding such as have not had the privileges of a thorough professional education. In addition to the above, the removal of all manure and contaminated litter and the sprinkling of the surface with the sulphate of copper solution is called for. Drains should no less be thoroughly rinsed and disinfected. Milking stools and other implements may be treated in the same way, or with carbolic acid or boiling water. Great care should be taken to guard against bull or cows from an aborting herd or district; streams even may be suspected if there is an aborting herd nearby and higher up on that stream. Cows sent to bull from an aborting herd are to be positively denied, and workmen that have attended on such a herd should be required to wash and disinfect their clothes and persons.—[Department of Agriculture Bulletin.]

Signs of Excellence in the Cow.

To the Editor of The Homestead:

There are really few farmers who know to the pound what their cows are producing in milk or butter during the year. It is probably one of the first things a buyer desires to know. It is necessary knowledge for the breeder who practices rigid selection of his producers at the pail.

Since the value of a large part of the cows of the land depends on their ability to do well in the dairy, it is not a very satisfactory plan to measure a cow's worth by the supposition that she gave so many "buckets a day" when fresh.

With no more exact data at hand than this, one must look to other means as a measure of ability. Nearly every careful dairy man places more or less importance on certain general characters.

We take it for granted that the dairy matron should be in the minds of all, a cheery-dispositioned, vigorous, thrifty-appearing animal. Throwing aside many other points of conformation commonly associated with good dairy individuals, we shall consider only those points which are generally conceded to be a pretty sure indication of quality and amount of the milk yield.

For example, some dairy experts are pleased to find the inside of the ear a very golden yellow color, also the skin of a similar nature in the root of the tail, inside the thighs and about the udder. The body skin should be oily to the touch, and yellowish, giving the impression that butter might be squeezed out. The explanation is that the cow that is a good milker has a strong constitution. For this possession her blood circulation will be strong and the skin and parts most distant from the center of the circulatory system will be well-nourished, consequently the skin secretions will be active, producing the rich yellow color.

The escutcheon, that part of the skin back of and above the udder and between the thighs, on which the hair runs in the opposite direction to that to which it inclines on other parts of the body, has been considered by some to be one of the most valuable points in determining the worth of a cow. On the best producers it is found to be wide, high and spreading, and satiny to the touch. It is undoubtedly an index to a degree of the quantity of blood received by the udder, as this region is under-traversed with blood vessels leading to the four quarters.

The udder will be merely referred to. Suffice it to say that when empty it should nearly lose its form and appear to consist of pliable elastic skin. Teats

You Want All The Cream

Therefore You Want the

Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time. A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

A Davis.

Cream Separator direct from factory at factory

prices, costs half as much as most others. No agents' fees to double prices. Investigate our liberal selling plan and the simple three-piece bowl machine. Gets every drop of cream. Tank 3 feet 7 inches high. Write for money saving catalog No. 118.

Davis Cream Separator Co.,
54 L North Clinton St., Chicago, Ill.

of the proper size will avoid many unpleasant relations between the cow and the milker. Short teats allow much of the milk to be contaminated by dripping from the hand to the pail. The milk veins do not carry milk, but blood away from the udder. They should be prominent and well-branched.

The best indication of the worth of a cow is the record of her yield and test. In the absence of such information, the above points can be relied on to some degree. Their value is based on the fact that the best milk-producing cows have as a rule possessed them in the highest perfection. Apply the test to your herd and see if you can find a striking exception.

L. E. Troeger.

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route; one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HAVANA, CUBA.

On December 18th to 20th the Chicago Great Western Railway will sell round-trip tickets to Havana at one fare for the round trip, with limit to return of January 9th. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

IN AND AROUND WISCONSIN.

There will be 8,000 deer and 200 moose killed in northern Minnesota this month. That is the estimate of Samuel F. Fulton, of Minneapolis, executive agent of the state game and fish commission. As the period for hunting big game is only from November 10th to November 30th, twenty days, it means that 400 deer are being killed each day.

A statement just issued from the Minneapolis Chamber of Commerce states that the market there, on the crop movement to date, is behind about 12, 113,000 bushels of wheat, as compared with the receipts a year ago. In the arrivals of all grains, the market shows a deficiency of 21,286,000 bushels. The accumulations of wheat are mainly in North Dakota and northern Minnesota. In South Dakota and southern Minnesota, the production was moderate, and the pressure has not been so heavy.

The firm of Seeboth Bros., of Milwaukee, Wis., has purchased a lot of about 500 tons of iron from a Hartford, Wis., rag dealer, and it is to be shipped to Milwaukee at the rate of a carload a day. Twenty cars will be required to transport the iron, which will be unloaded at the company's yard and sorted before being sold to the foundries for melting down. The pile had been accumulating for four years, and was gathered in Hartford and the vicinity. The pile was a source of curiosity to neighbors. The price paid was \$11.65 per ton f. o. b. Milwaukee, making the total for the 500 tons almost \$6,000.

Land and immigration agents must pay their fare on Wisconsin railroads hereafter. A formal decision by the interstate commerce commission quotes federal law prohibiting free transportation, and the railroads have annulled all pass privileges. Only bona fide employees of roads are to have free carriage. The decision is a bad blow to the land settlement business, railroad officials say. Two-thirds of Wisconsin, it is claimed, yet remains to be opened up, and any impediment to free travel of land agents, it is considered, will be a drawback to immigration.

In explaining the reason for refunds from the railroads received by the Northern Grain Company at Manitowoc, Wis., the local manager claims that they were merely rebates on damaged shipments. He intimated that political interests had made reports damaging to the local concern. Manitowoc has become a central shipping point for grain going east.

A new swindling game is now being worked on farmers and sight-seers in large cities. The victim is approached

and a guide offers himself for service. If accepted, the visitor is persuaded to deposit his valuables for safe-keeping in some office. On the trip the "guide" becomes separated from his charge, who learns that he is duped.

There is a movement now on foot by a firm to manufacture a peat fuel from garbage of large Wisconsin cities. The plan should be worthy of consideration.

Cabbage growers have had a large crop this fall in the large kraut-growing districts. More sauer-kraut is being made in Milwaukee this season than in years. Garbage wagons loaded with cabbage leaves and refuse are a common sight in the large city.

The annual report of the trustees of the Sheboygan County Insane Asylum shows that there are 124 inmates in the asylum and that there were only six deaths during the year. The receipts of the institution consisted of a balance of \$3,536 from last year, the state donation of \$8,442, the tax levy of \$5,000, and the profits on the farm, amounting to \$19,045. The disbursements, consisting of additions, alterations and repairs, and the cost of running the hospital, amounted to \$15,820, leaving a balance of \$3,225 on hand. The county board is anxious to solve the tramp problem and a resolution was introduced asking that a workhouse be built.

In the recent storms on the lakes, seventeen large boats were wrecked or damaged and two score of lives lost.

Geladon Bassett, of Janesville, the wealthy wholesale saddle dealer who died lately, leaves a portion of his fortune to the three negro institutions, as follows: The Booker Washington school in Alabama, the Beloit school at Beloit, Ala., and the Utica Normal and Industrial school at Utica, N. Y.

Farmers in the central part of Illinois are complaining seriously of the condition of their corn this year. The yield was good, but after husking it has been discovered that a large percentage of the corn is rotten. The best corn experts in the country have been called to diagnose the case, but thus far they are unable to say whether it is a new corn disease or simply a condition resulting from the elements. Much of this corn is not fit to feed.

Bulletin No. 141 of the Wisconsin Experiment Station, entitled "The Horse Breeding Industry of Wisconsin," is now ready for distribution, free of charge, to residents of the state. This bulletin, which is profusely illustrated, comprises some 160 pages, and contains, in addition to much important reading matter, a complete directory of owners of licensed pure-bred, grades and cross-bred stallions. It discusses fully and impartially the results of the enforcement of the stallion service law enacted by the last state legislature, points out good and poor features of the law, and suggests amended or new legislation required for further progress in the same direction. As one of the chief objects of this bulletin is to stimulate general discussion of horse-breeding matters throughout the state, and thus continue the good work begun by Bulletin No. 127, which dealt with the principles and practice of horse breeding, it is hoped that every man interested in the improvement of Wisconsin horses will at once send postal card addressed to Agricultural Experiment Station, Madison, Wis., calling for Bulletin No. 141.

New manufacturing establishments to the number of 717 started in Wisconsin during the five years following 1900. The capital for all concerns increased 44 per cent. The wage-earners increased 13,866 in number. The total number of factories shown by the twelfth census is 16,187, and 36 per cent of these are situated in urban districts. Using the value of products as a basis for rank, the following order results: First in importance, lumber interests; second, mill products; third, shops and foundries; fourth, dairy produce; fifth, leather and tanning; sixth, breweries; seventh, meat packing; eighth, paper and wood pulp; ninth, iron and steel. Agricultural implements rank twelfth, and boots and shoes sixteenth.

Wisconsin has been honored by the crew of the battleship Wisconsin. In view of the fact that the Wisconsin won first place in gun competition over all other ships in the United States navy,

Sell you direct at half what your local dealer will charge you for ordinary roofing—half what shingles will cost you, for we ship right from our factory to you. Send you a Free Roof Book on our roofing, telling why it's

Rustproof and Practically Fireproof If you'll only send us a postal, send us a sample so you can test it—try to tear it—pound it—smell it to see that there's no tar in it to burn or melt—try it with hot coals—try it with acid—try it any way to satisfy yourself.

All You Need is a Hammer to put it on your house, barn or outhouses. We send you with every order all the nails, metal caps and cement you need to put it on. Also 8 sq. ft. for laps. And it's the easiest roofing to put on made today, and will keep your buildings dry, warm and substantial in appearance. Won't rust out like eelot roofing. This isn't an ordinary roofing. We make it from a special process material with such heavy machinery that when it's finished there's absolutely no "wear-out" to it. We tell you in our Roof Book all about the process—the pressure it gets—the flintcoating—the acidproof soaking—the weatherproofing that we give it. It makes 25 per cent saving on insurance. It's

Sold Only Direct to the man who uses it, so you save 50 per cent, which on other roofing goes into your local dealer's, the jobber's and the wholesaler's profits. You'll see from what we tell you in our

Free Roofing Book just why it will pay you to use our roofing. We guarantee safe, prompt delivery everywhere in the United States. We save you 50 per cent, freight included. We ship to you from Kansas City, Minneapolis, Chicago or Davenport. This saves on freight. Write or send catalog requests only to Davenport and let us save you—dollar for dollar—HALF.

the crew has voted that the trophy, a silk flag, be presented to the state after which the battleship is named.

For the convenience of visitors to the International Live Stock Exposition, a board-and-room committee has been appointed, who will arrange for accommodations upon written request, advising day of arrival, number in party, whether you desire room only, or room and board, about rate you wish to pay, length of stay and part of city preferred. Address Board and Room Committee, 19 Exchange Avenue, U. S. Yards, Chicago.

The Iowa Mutual Tornado Insurance Association, the Largest, Cheapest and Best Mutual Insurance Association on Earth.

The above-named Association held its Annual Meeting in this City, Tuesday, November 20th, with a good attendance, thirty-one Counties being represented.

The report of Executive Committee, Secretary and Treasurer showed the business for the year to be as follows:

Total receipts \$137,162.56
Expenditures including losses 43,891.21

Cash Balance \$ 93,271.35
Net gain in risks, \$1,734,768; Insurance in force to date, \$114,681,977. \$81,000 of the cash on hand is in the banks, drawing 4% interest.

There will be no assessment this year, and should the losses not exceed \$75,000 next year, which is more than the average, there will be no assessment next year. In fact, there will be no assessment until the surplus is used up. By having a good surplus on hand, it enables the Association to pay its losses promptly, and the people who insure now receive the benefits of the amount of cash on hand.

The Association could now pay losses to the amount of \$90,000 without an assessment, and \$200,000 with only one mill assessment. For cheapness and reliability, and prompt and satisfactory adjustment of losses, the Association cannot be excelled. It does nearly three times as much business as any Company doing business in Iowa. In some Counties nearly every farmer is insured in it. The cost is so small, no one can afford to be without insurance in this grand Association. It has saved many from financial ruin when their entire set of buildings and contents have been destroyed. The Association has paid one-half million dollars in losses, and not a completed Proof of Loss ever laid in the office 48 hours without a check being sent for full amount of claim. The Association has had but one law suit, and in that case, the Court gave claimant less than was offered him in settlement before suit.

The Homestead has watched the growth and progress of this Association since organization, and have given it our best endorsement and have never had occasion to regret it. We believe it to be economically and properly managed. The cost of management, including cost of assessment, for the past year, was only 24 cents per \$1,000 insured, and if cost of assessment was deducted, only 17 cent per \$1,000. This, compared to the

cost, of other Companies, is remarkably cheap.

In view of all these facts, we see no reason why anyone desiring Tornado Insurance should not insure in this Association. The Secretary, J. B. Herriman, has been with the Association from its first organization, and has given the best years of his life to building up this and other Co-operative Associations.

Mr. Herriman was the organizer of the Town Dwelling Mutual Fire Insurance Association, that insures dwellings in cities and towns, and which has been a wonderful success, and saved thousands of dollars to its members. The existence of these two Associations has reduced the cost of this class of insurance so that people who are insured in Stock Companies, are receiving their insurance cheaper. Therefore, the people of Iowa should stand by co-operative insurance.

Saddler Bros. & Moore Sale.

The sale of Short-born cattle held at Hastings, Neb., November 21st, by Messrs. Saddler Bros. and C. N. Moore, was a very successful one. Everything was sold and at a very satisfactory price. The top price was \$157.50 for the pure Scotch heifer, Queen Bampton by Queen's Gladiol, she going to Mr. Rudolph Firme, of Hastings, Neb. Mr. Firme also bought a fine young bull by Choice King, a grandson of Imp. Choice Goods and out of Novina 2d, a straight Scotch cow and one of the best things in the offering. Messrs. Hill Bros., of Trumbull, Neb., and A. Farren, of Hastings, were also good buyers. Below is a list of those selling for over \$75: Lot. Price.

1. Samuel Martin, Hastings, Neb. \$ 82.00
3. Hill Bros., Trumbull, Neb. 112.50
4. L. H. Page, Friend, Neb. 110.00

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

FOOT ROT.

Will you please inform me whether or not in your opinion cattle running on pasture on which sheep had been recently pastured that were badly affected with foot rot would become affected in the same way?

If the pasture is low, wet and boggy so that hoofs become soft and irritated cattle as well as sheep would be apt to contract a condition commonly called foot rot, but which is not contagious. Otherwise there will be no fear of the disease affecting sheep also affecting the cattle.

INJECTION SOLUTIONS.

(1) When antiseptic injections have to be used in the womb of a cow after calving does the solution have to be drawn off with a catheter or will it come away of itself? (2) Does one have to have a veterinarian's syringe to inject the solution? (3) In severe cases could it harm the cow any to use it five or six times daily? (4) If I am told to use a "2 per cent" solution of any disinfectant, would it be two teaspoonfuls of the medicine to ten of water or would it have to be 100 of water? I don't quite understand this. (5) If a cow is not to calve for two months is there any harm in letting her run in a corn stalk field when she had trouble last time?

(1) If the disinfectant used is a poison such as corrosive sublimate (bichloride of mercury) it is best to draw off the fluid by means of a catheter or syphon hose or the hose of the veterinary force pump, which, by proper adjustment can be made to either pump in or draw off fluid. Simple coal tar disinfectant, if weak, need not be drawn off. (2) For injection any large syringe will suffice, or one can use a large funnel and a half-inch hose or a half-inch hose with nozzle attached and free end fitted to tin or wooden spout to be let into the rim at bottom of a large wooden pail to be hoisted above animal's back by means of small rope and pulley. (3) Not more than two injections a day should be given and then the solutions should be non-irritative. It is best to flush out with warm water and

A dollar's worth of Standard Stock Food

—contains more feeds,
—will go farther,
—last longer and
—produce more and better results,

than a dollar's worth of any other stock food made, whether it costs 5c or 15c a pound.

YOU can easily prove this to your own satisfaction, simply by examining various stock foods and their manufacturers' directions for feeding.

The Standard looks better, smells better, tastes better and is better—stronger, richer, more concentrated—and a much less quantity of it is required at each feed.

That's why it lasts longer and costs you less per animal per month.

It gives the best results at least cost.

Sold on our Square-deal, Money-back Guaranty. You run no risk.

We have more than 400,000 satisfied customers who have proved that "It Makes Stock Thrive." Ask your dealer to supply you; if he cannot, do not take a substitute but send to us direct. We will ship immediately and protect you with our Square Deal Guaranty.

Free to You Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep. Write today.

Standard Stock Food Co., 1516 Howard St., Omaha, Neb.

Eclipse Portable WAGON and STOCK Scale

ALL above ground. No pit. Steel frame eight inches high. Most accurate and durable. Write for catalog and price.

ECLIPSE HAY PRESS CO. 621 W. 7th St. Kansas City, Mo.

then use the disinfecting solution. (4) Two per cent means two parts to one hundred parts. Two in ten parts would be twenty per cent. Twenty teaspoonfuls of fluid mixed with a gallon of water would make a 2-per-cent solution. Injections for cows should be about two gallons of fluid each time. (5) The corn stalk is a decidedly dangerous place for any pregnant cow and on no account would we turn out the cow in question.

QUITTOR.

I have a twelve-year-old mare that was cut one year ago on the foot and above on wire. There is not much shape to it now and it is as big as a bucket. Pus and blood exude in places. Can you help me?

We cannot tell you how to treat a case of such severity without the assistance of a qualified veterinarian and we fear even such an expert would fail to effect a cure. The condition described indicates that the entire foot is permeated with sinuses (pipes) which connect with diseased tissue and discharge pus. Where such is the case the trouble is likely to prove incurable.

SPAVINS.

I have three colts coming two years old, a sorrel, a bay and a gray. They are in a pasture which has a lane where they come home to get water. Most of the time they run as hard as they can and when they get home they run up to the fence at the barn and stop suddenly. They have bunches which have come on the inside of both legs on lower joint of hock. The bunches on the sorrel and gray extend across most of the inside of the lower joint, while those on the bay are more on the front joint. These have been on about ten weeks. I have never seen them go lame. I did not like the looks of the bunches, for they seem to be of a bony nature, so I got absorbent about three weeks ago and gave them a ten days' treatment, but the bunches have become no smaller as yet that I can notice. The directions are for two to four times a day and then bandage them with cold water bandage, but they do not say how long to give treatment. I would like to know whether this is a case of spavin or whether the bunches might go away on their own account, or what would be advisable to do to remove them. The sorrel is of the Norman stock, the gray of the Morgan and the bay of the Wilkes stock. All have fair, straight legs and hocks and good flat and heavy bone.

You describe one of the most common causes of spavins and other unsoundness of the hock joints of growing colts and the first step should be to remove the cause by putting the colts where they can have water at any time without racing home to obtain it. There is a possibility that removal of the irritating cause may result in re-absorption of the spavins, whether they be hard or soft, but this should be encouraged by removing the hair and rubbing in iodine ointment each other day

until skin is irritated; then stop for a few days and repeat if necessary. If this does no good it might be well to apply a blister as so often prescribed in this department of the paper.

BABY'S TORTURING HUMOR.

Ears Looked as If They Would Drop Off —Face Mass of Sores—Cured by Cuticura in Two Weeks for 75c.

"I feel it my duty to parents of other poor suffering babies to tell you what Cuticura has done for my little daughter. She broke out all over her body with a humor, and we used everything recommended, but without results. I called in three doctors, they all claimed they could help her, but she continued to grow worse. Her body was a mass of sores, and her little face was being eaten away; her ears looked as if they would drop off. Neighbors advised me to get Cuticura Soap and Ointment, and before I had used half of the cake of Soap and box of Ointment the sores had all healed, and my little one's face and body was as clear as a new born babe's. I would not be without it again if it cost five dollars, instead of seventy-five cents. Mrs. George J. Steese, 701 Coburn St., Akron, Ohio."

HOMESEEKERS.

Every Tuesday, October and November, via M. & St. L. R. R. one fare plus \$2 for the round trip to points in Minnesota, Dakota, Canada, tickets good twenty-one days. Also first and third Tuesdays, October and November to Montana, Washington, Oregon.

A Whole Medicine Chest.

A bottle of DEAN'S KING CACTUS OIL in time of emergency saves many dollars.

PROF. DEAN'S KING CACTUS OIL

Will heal the worst barbed wire cut without leaving a scar if used in time. We have thousands of testimonials that prove this fact. Every owner of live stock should keep it on hand, for it is a positive cure for cuts, sprains, bruises, old sores, swellings, open wounds, harness and saddle galls, etc.

KING CACTUS OIL is equally valuable for ailments of the human race. It is magnetized and soothing, pleasant to apply and heals a wound from the bottom up.

Sold by druggists in 15c., 50c. and \$1 bottles, \$3 and \$5 decorated cans. Sent prepaid if your druggist cannot supply you by OLNEY & McDAID, Clinton, Iowa.

homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

The Homestead and The Homemaker \$1.25 per year.

The County Fair a Live Stock Educator.

To the Editor of The Homestead:

The county fairs, as we know them today, come far short of serving the agricultural educator, for which they were originally intended, and if this institution is to be redeemed from the hands of the faker and the side-show man it rests with the leading live stock men of the country to assume an active responsibility in its welfare. And it is the purpose of this article to call attention to a few ways in which the live stock exhibit should be of great educational value, both to the exhibitor and the public.

In order to have a successful live stock exhibition there must be a power behind the throne and that power should be the chief superintendent of the live stock department, or if such an officer does not exist, there should surely be one. The most successful fairs have a chief superintendent with a well-equipped corps of lieutenants whose duty it is to look after the various departments of live stock. The possibilities or opportunities of this one man for getting up a brilliant show of live stock are unlimited, and the success or failure of the exhibit rests largely with him.

He ought to begin to plan for the show at least a year ahead, and to continually remind his friends and neighbors that at such a time and at such a place there would occur the annual stock show and that there would be additional attractions at the next event. He should not fail to interview the breeders of his locality early in the spring and urge them to plan to contribute to the live stock exhibit. A monthly reminder and a personal call now and then from an influential superintendent will interest many a farmer and the number of exhibitors will be surprisingly increased. As the time for the exhibition approaches, he will know the exact number of animals to expect and plan accordingly. He should extend his hospitality to the exhibitors and be their servant. We know of one superintendent of live stock at a county fair this fall who had his headquarters in a large tent near the stock barns and besides tending to the wants of the exhibitors devoted most of his time to interesting the public in the live stock on exhibition.

Showing the animals for prizes should be the most interesting feature of the show, both to the exhibitors and the general farmer. Here again the ideal superintendent can please and attract the people, for nothing is more instructive than a large show well carried out. He should see to it that the program of events is well advertised and that the exhibitors are familiar with the order of events. Granting that many of the animals are only in good growing condition as we would naturally find them in the country, they may be made to make an excellent show if presented in a clean and healthy form. Such stock when well mannered and groomed will surely attract attention and a competent judge will always give them due consideration. The thoughtful superintendent can greatly improve the quality of the show by inspecting them before hand and advising parties as to the form and manner in which they should be presented.

In the show ring the center of attraction where the battle for supremacy is on, the farmer and exhibitor can both well afford to attend and observe closely the rating of the animals. They should feel perfectly free to question the judge as to the points on which he bases his decisions and try as far as possible to get in mind the correct type and characteristics of the animals under consideration. There is no better school than the show ring for studying the characteristics of each breed. Here are animals of the same breed brought together by different parties from different places and from different circum-

stances. And instead of giving the live stock and the show ring a mere passing glance, as the farmer generally does, he ought to give time and thought to studying the particular breeds in which he is interested.

Besides the live stock superintendent, the judge of the stock is one responsible party who should help materially to strengthen the educational value of the live stock show. May the day soon come when we shall have a sufficient number of live stock judges scattered throughout the country so that every county fair can have the services of a capable judge who has the ability to give the public what it needs in live stock instruction. The show ring is a live stock school and not simply a place where money prizes are given away. The capable judge should as far as time permits, give a short discussion of each class of stock on which he works, pointing out here and there the strong and weak points of the breed and explaining fully the breed characteristics. It is to be expected that there will be unsatisfied exhibitors, but the unprejudiced judge who works straight ahead will surely demand the respect and the attention of the public if he has had the proper training and experience.

A new feature of special interest in this connection was inaugurated at one of the Wisconsin fairs last fall. The fair association employed an expert judge and, besides the discussions that followed the rating of almost every class of animals, breeders conferences were held during the fair. At an appointed time all the beef cattle men, the live stock superintendents, the judge and every farmer, who was interested in beef cattle, held a meeting and discussed subjects of importance concerning their cattle, the welfare of the show, and how to promote the best interests of all parties concerned. At another appointed time the same officials met with the swine exhibitors, farmers interested in swine raising, and all others who cared to attend. Simply let the people know that such a meeting is to take place and be properly conducted, and the attendance is easily secured. Such conferences of breeders and men interested locally in the live stock business are sure to bring gratifying results and are only a beginning to some of the possibilities in live stock education which we may hope to enjoy in the future.

The man who shows an interest in live stock at the county fair derives benefits which oftentimes he fails to see. Whether an exhibitor or an interested visitor, he puts himself on record as a supporter and promoter of the industry, and he meets the other fellow. As breeders and farmers, men have too little opportunity to associate with one another and study the other man's methods. Divided effort never reached a goal, and as long as breeders fail to associate, legislate, and plan as one man to promote the interests and welfare of their breed, just so long will they be deprived of the fruits of success. There is a great future in breeding live stock for those communities in which the breeders will all combine and breed one breed of any class of useful animals instead of attempting to raise all the breeds in existence and keep up a menagerie. Combined effort and co-operation in breeding can be speedily promoted by our county fairs. And co-operation in breeding will make a certain locality famous and attract buyers from the farthest parts of our country.

Jas. G. Fuller.

Wisconsin Experiment Station.

Feeding Hogs on Sorghum.

Our experience in rearing hogs on sorghum has been very satisfactory, and has proved for this district the best way of handling them. We have a hog lot or corral of about four acres, including a good orchard, and keep about an average of one hundred hogs on hand the year round, selling a bunch say every two months, the little ones that come replacing those sold. The corral is situated on the bluffs of the river. The high part is perfectly drained and is never maddy, while the bluffs and trees afford excellent shelter in both summer and winter. In addition to this natural protection we also have warm, dry houses for the hogs in winter time.

A general outline of our method is as follows: About April 15th we plowed the corral and drilled it with Folger's Early sorghum, using a bushel or more of seed per acre. This variety grows very rapidly, and within three weeks the hogs were eating the young cane. They

rooted some up, of course, but not much, and the growth of the sorghum was such that it kept ahead all summer and afforded excellent feed. If convenient, it would be well to keep the hogs out of the pasture until the cane is a few inches high, at least. In the fall—September—we fenced off half the corral, where the orchard is, plowed it, and drilled in rye. When a few inches high, we let the hogs graze on the green rye, and it made good pasture until May. In the winter we fed fifty cows in corral outside of the orchard, on sorghum with all its seed on. This was Colman's, and had been listed in six pounds to the acre. It was very sweet and tender, and yielded at least thirty bushels of seed per acre. Hogs and cattle alike ate it with great relish. Up to April 1st we fed this, two-thirds cane forage to one-third good corn fodder with considerable of the corn left in it. Nothing was wasted except corn stalks, and the animals gained all the time. Then, as soon as the cows were moved from the two acres used as a feed lot, it was plowed up, and after a heavy rain was drilled very thickly with Folger's Early sorghum again. By the middle of May the hogs had deserted the rye patch almost entirely for the new cane. We have grain constantly accessible to all in a self-feeder, and it is surprising how little is used from it so long as the rye and cane afford a good pasture. Our self-feeder is generally supplied with corn, cane or kafir-corn seed, or chop—in fact, the least expensive mixture available. Salt and ashes also are kept in troughs nearby.

We have had on hand a good many barrels of sorghum molasses, and have fed it to the hogs, a few gallons at a time, all winter. They like it immensely, and I noticed many of the cows lick it up eagerly.

In our herd of hogs we let our sows and shoats run together, and probably the sows get rather fatter than desirable, but they will do well and rear excellent pigs; and then again leaving them all accessible to feed saves so much labor that we do not think it pays to bother with more painstaking methods. Nothing we have ever tried gives as large profits as hogs raised thus. Our sorghum crop is certain and heavy, and we use it every day in the year. In cut-

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS
OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25
A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date190..

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaker, as per your special offer to Homestead readers.

ting we always begin early, when the cane is juicy and the seed in the dough, and do not in any case let it get too ripe for fodder. Sorghum is our main reliance, but this year we intend adding artichokes and pumpkins as an experiment.

Have never had a case of hog cholera; never lost any hogs from sickness, except some that had eaten the carcasses of animals that had died of black-leg.

The water for the hogs is pumped from a well in the orchard by a windmill, and they have the river to wallow in.—[Mary Best, in Kansas Biennial Report.]

Don't follow fashion too strongly, especially out-of-date fashion. This is the advice given in the Litchfield story on page 5 this week.

The Homestead and The Homemaker \$1.25 per year.

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$20,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people, its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

POULTRY.

BIG MONEY IN POULTRY.

Our big Poultry Book with many new illustrations tells how to make it; also how to feed, breed, grow and market Poultry for best results. Plans for houses and a great mass of useful information. Tells how to start small and grow big. Illustrates and describes the largest pure bred Poultry Farm in the world; tells about our many varieties; quotes lowest prices on Fowls, Eggs, Incubators and Brooders. Mailed for 10c postage. **FRANK FOY, BOX D, - DES MOINES, IOWA.**

FOR SALE.

LIVE DEER, all ages, white swans, California quails, ferrets, Belgian hares, Jack rabbits, wild geese, brants, canary birds, goldfish, Homer pigeons, milk, hand-raised parrots, all kinds of wild ducks, fancy pheasants and Scotch collie puppies. We have no catalog. Write your wants. We buy all kinds of rare animals and birds or any of the above stock. **DEER LAKE PARK, Severy, Kan.**

White Wyandottes.

BIG cut on eggs for June and July, \$1.25 per sitting of 15. All classes, \$5 per hundred. **FOREST HOME POULTRY FARM, Audubon, Iowa. Box 253.**

FOR SALE.

HOUDAN cockerels, Toulouse geese, Rouen ducks and Belgian hares. Prize winners. Write me describing what you want and get prices. Satisfaction guaranteed. **C. N. GERARD, BRADFORD, ILLINOIS.**

30 CHOICE

Single Comb White Leghorn Cockerels
All good ones and from the very best of stock.

Address, **JNO. C. MILLER, - Harlan, Iowa**

B. Plymouth Rock Cockerels

PULLETS or pens mated for best results. Noted "Eclipse strain" winners at the great Chicago show. Cheap for quality. Circular free. Address **J. B. McAllister, - Palo, Iowa**

Barred Plymouth Rock Cockerels.

A GRAND lot for sale at \$1.00 each, of heavy bone and well barred in all sections. This is not half price for these birds, but they must go. Send us your order. **SAMUEL BONE, L. Box 85, Montezuma, In.**

SILVER LACED WYANDOTTES

Bronze Turkeys and Pekin Ducks.
MODERATE prices for high-scoring stock. Vigorous, thrifty birds. Write for prices and description. **J. D. SMITH, Route 3, Montezuma, Iowa**

WHITE LEGHORNS.

I HAVE for sale 100 White Leghorn cockerels. These are extra fine birds and are of my special "Bred-to-lay strain." Price on all sold before Jan. 1st, \$1.50 each. After Jan. 1st, \$2.50. **J. H. PIEPER, - Leigh, Neb.**

WHITE ROCKS—Fisher & Root strain. I have forty choice cockerels and sixty good pullets for sale at reasonable prices. These are March and April hatches and are pure white. Yours for business. **Bulus H. Flanagan, Pleasantville, Iowa.**

ROSE COMB AND SINGLE COMB BROWN Leghorns, White Plymouth Rocks, Silver Laced Hamburgs, Cornish Indian Game, 75 cents to \$1.00 each. Also White Pekin Ducks. Address **Ldw. Dooley, Selma, Iowa.**

WHITE Wyandotte cockerels for sale. Pure bred. Prices low for quick buyers. Address **Rose-lawn Farm, W. S. Gregory, Keota, Iowa.**

BUFF ORPINGTONS and Buff Rock cockerels. Large, even colored birds, \$1.00 to \$1.50 this month. **Mrs. G. R. Fuller, Jolite, Iowa.**

400 BARRED Plymouth Rocks and White Wyandottes, \$1.50 to \$5.00 each. **W. C. Frazier, Atlantic, Cuss Co., Iowa.**

WHITE Wyandotte hens, scoring from 94 to 96, all yearlings, \$1.50 to \$3 each. **Mrs. L. M. Estes, Audubon, Ia. Route 2.**

FINE, LARGE MAMMOTH BRONZE Turkeys and Rouen Ducks. **J. H. Howarth, Moulton, Iowa.**

S. C. WHITE LEGHORNS—Either sex. Prize-winners. Prices right. **Walter Small, Wapello, Iowa.**

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

THE NUMBER OF CHICKENS FOR A FARM.

Perhaps no other question is asked oftener than how many chickens can be kept on a given territory or on farms of a certain size. Likewise there is probably no question that is more difficult to answer.

The number of chickens to be kept on the average farm of 160 acres depends on the nature of the buildings and the habits of the care-taker. We have observed that on many farms there is practically no change made in the buildings from year to year. It is a common thing to see a house accommodate 100 fowls this season that housed only fifty the year before, and whatever happens to get through the brooding season is what the houses have to accommodate, whether that number be many or few. It is a great mistake to crowd into a house intended for only fifty, double that number.

Every farmer should know about how much space it will require for a flock of hens. We have seen it stated that each hen should have at least ten square feet of floor space, but we know of houses that will provide each hen one-half that amount of floor space where the fowls are better cared for than where more space has been given them but where the care has been of an indifferent nature. Our plan has been to give about five square feet to each fowl. When the flock increases, we add onto the regular house and give them more room.

On many farms the wife or mother is the care-taker and in such cases they should be the ones to decide the number of chickens to be kept.

LAMENESS.

A subscriber writing from Fredericksburg, Iowa, says: "What is the cause and preventive of the following disorder? Lameness in leg a day or two and later lameness in both legs, and the fowls are unable to walk, but lie as if paralyzed. Those affected do not lose their appetites, but there is a gradual wasting away, also some bowel trouble; head and eyes have a dull and lifeless look. Young fowls seem to be more subject to the disorder than older ones. The fowls are not troubled with lice, nor are they over-fed."

Usually lameness is attributed to an accident or rheumatism. A disorder known as leg-weakness often affects young fowls that have grown very rapidly, which is exhibited by a trembling of the legs at first and later affects the legs so that the fowls will stand with difficulty and when they walk it is with a labored effort.

The treatment we would suggest would be along the line of ascertaining the cause and a removal of the same. If it is leg weakness the lame birds should be taken away from rich food such as corn, potatoes and pepper, and put on a diet less rich. Feed bone meal, boiled beans or peas, and if it is necessary to give medicine no better can be found than quinin.

DISPOSE OF SURPLUS COCKERELS.

All cockerels not wanted for breeding purposes, for home use or for sale, should be disposed of as soon as they can be made marketable. As a rule they will not be in as good a condition for market when allowed to run with the flock as they could be should they be penned up and given extra feed and care for ten days or two weeks. There is seldom anything gained by holding cockerels at this season of the year beyond the number necessary for breeding purposes. In most cases it is advisable to sell all the cockerels and buy new blood for breeding purposes. Cockerels at this season of the year have a ravenous appetite due to the fact that they are still growing, which has a tendency to take away from the weaker pullets what they should have and thus they do not come to that state of maturity they otherwise would.

The best time to market cockerels has past, for that was when they were at the frying stage, but we are approaching Thanksgiving time when another opportunity will be presented. At any

rate they should be sold before the flock is put in winter quarters.

DISEASE.

As a rule poultry generally suffers from preventable ills. It is almost useless and rarely if ever worth while to treat sick poultry. In most cases a chicken is hardly worth the trouble required to treat, and as a rule nine out of ten treated die in spite of all that can be done for them. If kept clean and not overfed, not cooped up in close quarters, kept from foul odors, putrid food, supplied with clean water and fresh air, they live and thrive without much call for medical treatment. Most of the fatal disorders come through neglect or from ill-treatment and cannot be cured by medicine. The reason is that it is then too late. The mischief has been done when the first symptoms appear.

Nearly all the disease incident to poultry comes from filthy and unsanitary quarters. Disease germs lurk wherever there is filthy and unsanitary quarters. It is not enough to clean the droppings from under the roost once or twice a week. This is a cleaning up that does not clean up. Disinfectants should be employed freely or there is liable to be trouble. If disinfectants of a most approved kind are not at hand dry road dust will do a great deal towards correcting the trouble by absorption. Ashes and lime also are useful.

BOX FOR SHELLS.

Mr. C. C. Merriman, of Iowa, sends a sketch showing how he feeds oyster shells without having it get lost in the litter or becoming fouled by droppings when fed in the accustomed manner. He says he has found some difficulty in feeding shells in rainy weather, but since making a box like the one illustrated he has had no trouble. The box is attached to the wall at a convenient height so the fowls can partake of shell whenever they desire. This device will be found a decided improvement over the old plan.

At one time it was generally believed that so long as a hen was fed plenty of sound grain nothing better could be supplied and that she ought to go on day after day without any change of diet. But in those times it was considered a great achievement if a hen laid 120 or 130 eggs in the course of a year. It was, however, discovered gradually that hens could, by scientific management, be made to lay 180, 200, or even more eggs by feeding a greater variety of foods, and including in the diet such articles as green food and animal food. Then it was that such things as meat, milk, fresh cut bone and green food, in all forms, began to be largely used in making up an egg-producing ration.

As a rule, it seldom pays to keep a hen after she has passed her second birthday. Sometimes a valuable breeder may be kept a little longer. With the average farmer, eggs seem to be the desired and coveted article, and for that reason it will pay to keep those that will do the work.

It is essential that the males used in the pens be obtained early so that they may become "acquainted" with the other members of the pen before the breeding season. A great deal of infertility in eggs is traceable to too late matings.

Breeding from immature fowls is dangerous and is often disappointing. Continued early breeding is one thing that causes a lack of hardihood, and a lack of hardihood often lays the foundation of disease.

As a rule, liberal feeding means liberal profits, provided the right kind of feed is used. A variety will be found beneficial in making up the ration for hens.

The dark nest will be found better for the habitual egg-eater. Another good plan to prevent this bad habit is found in a nest made of a nail keg set on end with the entrance at the top. By so doing the hen has to jump down in the narrow confines of the nest and owing

to the cramped room she cannot get at the egg. Open nests on a level with the floor or near a perch is where such hens prefer to carry on their nefarious practice.

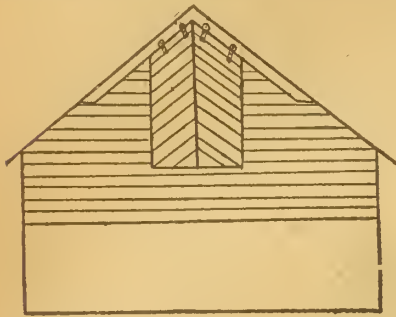

If you're going to fix that chicken house,
Go do it right, away,
For a hen that's in cold storage
Is a hen that doesn't pay.

A chicken can get in the garden without assistance, but it requires the whole family and the dog to get her out.

Habit is sometimes stronger than the best of judgment, but it should not be allowed to control our actions entirely. This is a question analyzed quite thoroughly in the Litchfield continued story on page 5 this week.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

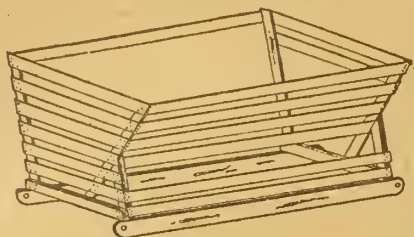

There is always more or less trouble in finding a suitable method of hanging doors for unloading hay from the outside of buildings with slings. A. C., of Palmyra, N. Y., describes a good plan

in an eastern journal. Each door is hung on a track parallel to the roof. The doors, of course, are a little difficult to close, but no more so than a door hinged at the bottom in which there is often danger in handling.

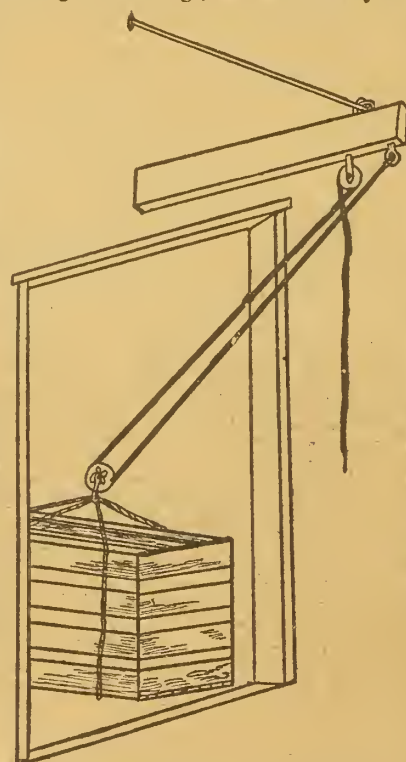

Plans for a feeding rack that combines many new and desirable features come from Mr. J. B. Honan, Harrison county, Mo. After using these racks for six years, Mr. Honan writes that "they are invaluable for outside feeding, as they can be used in so many different ways. They may be made all sizes and for all kinds of stock. Being mounted

on skids, they may be moved from time to time, as it becomes muddy about them. Placed beside the barn or shed, or even a fence, the fourth side is saved in construction. Two may be put open sides together if a larger rack is desired, or a stack of hay may be enclosed by four racks. In fact, one may invent a number of advantageous positions with

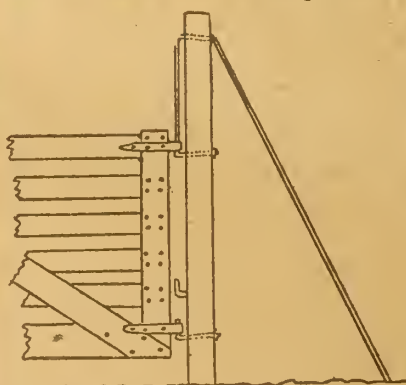

such feed racks." They are simply made and, if one wishes, a considerable part can be made of poles and small hewn timber. A very handy length is sixteen feet, in which case there will need to be three braces for the sides not shown in the illustration, which for simplicity leaves them out.

Sometimes a few hours spent in making some device will save much hard lifting that falls to the lot of every farmer. Such a device is found on the farm of Mr. G. G. Koenig, Plymouth, Iowa. It is a contrivance for loading and unloading crated hogs, or other heavy ob-

jects, as barrels of salt, molasses, etc. The illustration shows a crate about to be raised from the hog-house door. As soon as it is high enough, the wagon is backed under and the work is done. The beam overhead is braced with a rod and on the inside of house. It should be a two-by-six. For heavy lifting, a small windlass may be used which will make it still easier to elevate the load.

Those who open many gates during the winter know what a nuisance it is to dig out such places after every snow storm. A very good remedy for such cases is seen in our drawing from a

sketch sent in by Mr. B. Rastall, Richland county, Wis. The gate proper is made like any other one, but the hinge at the top of the post is made to slide up and down on a rod. The lower hinge has the choice of two positions. When there is a foot of snow on the ground, the gate is raised, placing this hinge on the upper position, which allows the gate to swing free of the ground and the snow.

Mr. E. C. Hanks, Story county, Iowa,

Peerless Pitless Scale

on 30 Days Free Trial

Direct From Factory

No Money In Advance
We Pay the Freight.

Don't Pay Two Prices: If the Peerless was sold through dealers you would have to pay from \$65 to \$80 for it.

If it had a steel frame you would pay from \$60 to \$100 for it anywhere.

Peerless Frames Are Of Wood:—the others, costing 33½ to 100% more, are steel; all inside working parts are practically the same.

We can sell this high grade U. S. Standard Scale at \$46.50 because we pay no profits to Salesmen, Agents, Jobbers or Dealers.

We can offer you a genuine free trial because the Peerless will stand the test.

The Peerless will do the work as well as any high priced Pitless Scale and better than the best old style pit scales, because more convenient to operate and saves you the big expense of digging and walling a pit.

A Peerless Scale is portable, too. You can move it to any point on your place, wherever it is most convenient for you to do your weighing.

Is it good business for you to take chances on the other fellow's weights

\$46.50

being right when you can absolutely protect yourself from loss at an outlay of \$46.50?

You might lose that much on one or two transactions!

If you weigh your grain, stock or anything else on a Peerless you know you're right and no one can contradict you.

The Peerless is Standard.

It's not a "cheap" scale at a "cheap" price. It's a high quality scale at a low factory price.

Send For The Catalog and you will be convinced. It describes every feature and every part of the Peerless in detail. You will make a big mistake to buy a high priced scale of any kind before investigating.

Remember our free trial is a real genuine free trial. No deposit, no notes to sign, no freight to pay, no red tape—

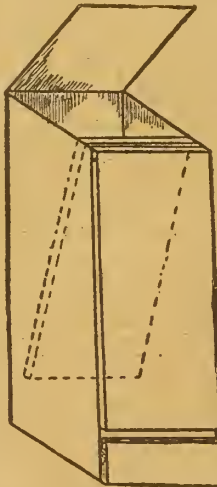

Absolutely no expense or no obligation until you are satisfied.

Let us send you a set on these terms for you to use a month.

Just put this paper down and write for the catalog now, before you forget.

PEERLESS SCALE CO., Dept. G, Wyandotte St. & Milwaukee Ave., Kansas City, Mo.

uses a salt box that he has found very convenient and satisfactory in saving loss of salt from waste or rain. The box is made from a ten-inch board fourteen feet long. Fourteen inches is taken for a lid and ten for a bottom. The remainder of the board is cut up into five equal parts. The box is then put together, leaving front side out. One of the pieces is put in diagonally as shown by dotted lines, leaving a space of two inches between the lower end and the back of the box where the salt will feed through to the bottom of the box. The front is hung at the top so as to swing in, allowing stock to lick salt. This swinging door leaves about four inches of the front of the box open, over which is nailed a strip, making the bottom four inches deep. This prevents salt from being nosed out. The box is filled from the top, which is hinged. The salt feeds down to the bottom as used. A coat of paint prevents warping and extends life and usefulness of the contrivance indefinitely.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Another Good Post.

To the Editor of The Homestead:

Some time ago I noticed in your paper a communication from Mr. Chamberlain of Iowa City in which attention was called to the fact that an oak post is now standing that was planted sixty-four years ago. As you requested communications on this subject, I will say that I have in mind an authentic case of a split sand burr oak post that was planted in 1865 and yet it is standing today and doing as good service for a fence as ever. It is my experience that posts will last longer in wet or clay ground than in sandy land. I do not know what time of year this post was cut, but I think that a thorough discussion of this subject might throw a good deal of light on the matter. I understand that the experiment stations are trying to find out how to preserve posts. This is a good line of investigation and I hope they will make some good discoveries. A Subscriber.

Raising and Storing Sweet Potatoes.

To the Editor of The Homestead:

The following inquiry comes from a subscriber at Lawler, Iowa:

If you could give me some information how to raise sweet potatoes, how to keep them for plants, what kind of soil, etc., I should be very thankful to you.

The storing of sweet potatoes, either for table use or for seed, has always proved a serious problem to northern people. In the South, one would scarcely know a sweet potato could decay. The difference is merely one of temperature; in the North the potatoes spoil because they are kept too cool. The most favorable temperature for Irish potatoes would cause sweet potatoes to decay very rapidly. Sweet potatoes should be kept warm and dry. Where one is not engaged in the business on a large scale, the furnace room in a modern residence is as nearly an ideal place as can be found for storing them. Behind the kitchen stove in a farm house is also a good place. But a cool cellar or cave will not do, for they will not keep in such a place. All seedsmen and most grocers handle sweet potato plants. The seed potatoes are planted in sand in a hot-bed. The smaller ones are not cut, the larger ones are split lengthwise. They are laid as close together as possible without touching each other, and covered with half an inch of sand. When the plants begin to show through, a little more sand is added. This is continued until the plants have grown through about three inches of sand, when they are allowed to leaf out. They are then ready to pull up and plant. Two or more crops of plants may be taken from one bed of seed potatoes. The sweet potato is primarily a hot-weather plant. The plants should not be set until the soil has thoroughly warmed up in the spring, usually not before June 10th in central Iowa. A sandy soil is by all means preferable and a high elevation is always to be selected in preference to low ground, unless the low ground is in an old creek bottom and consists of sand deposit which is well drained. Such a location as this is the best that can be secured. The soil should be well manured and plowed quite deep. The rows should be three and a half to four feet apart and should be made by throwing up ridges six or eight inches high by back furrowing with a stubble plow. A potato planter with the shoe removed also does this work very nicely and in half the time. The plants are set about eighteen inches apart on the top of these ridges. Sweet potatoes should be given thorough, clean culture especially early, so that by the time the vines cover the ground they will

be able to prevent weeds from gaining headway, and keep the soil mellow. The vines if unrestrained will take root at many points. Many advocate preventing this on the ground that the strength is thereby drawn from the main root or hill. Our observation is to the effect that these roots on the runners do no good and very little, if any, harm. It is doubtful if it will pay to go over a field to cut them off.

Great care should be exercised to protect the potatoes from frost. If the vines become frost-bitten, they should be cut off at the surface of the ground immediately. The reason for this is that the juices which are set free by freezing of the leaves run back into the potatoes and damage them by both injuring the flavor and causing them to rot quickly. This fact is of greatest importance in sweet-potato growing. A few hours of sunshine on frost-bitten vines will surely ruin the entire crop of potatoes.

Sweet potatoes are usually dug with a five-tined fork or a potato fork. Great care should be exercised that the potatoes are not broken or bruised, as their flavor and keeping qualities are thereby impaired. The digging should be done on a warm, sunshiny dry day if possible, and the potatoes allowed to lie until they become quite dry, so that the soil may be rubbed off, leaving them clean and bright. They may then be picked up and packed in boxes for storage.

By observing these precautions, anyone should be able to successfully raise and keep sweet potatoes.

Franklin Brown.

Polk County, Iowa.

The Best Time to Cut Post Timber.

To the Editor of The Homestead:

I will give you a bit of my personal experience with post timber. In September, 1885, I cut and hauled up a load of nice white hickory poles, four to six inches through at butt, and unloaded

We grow our Hardy "Blizzard" Evergreen.

Mailing expense 5 cts which send or not as you please. A postal will bring them. Our Catalogue containing 64 colored plates of our Hardy "Blizzard" Evergreens, Ornamentals, etc., with a mine of valuable information for fruit growers, free for the asking. Write to-day.

THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.

them in a pile on the ground, intending to work them into a corral. For some reason the corral was not built and the next winter I bought a pair of cart runners and built a bobsled, making every part of the woodwork out of those white hickory poles, except the fenders. I kept the sled a few years and sold it, and it has only been two or three years, I think, since I saw a man using the same old sled, seemingly as sound as when new.

The rest of the poles were left lying where I first put them, and were used for different purposes during the next two to four years, and I don't believe I ever saw a worm hole in them. Will say further that at one time I noticed that stumps of trees cut for post timber, in February, did not sprout when those around them sprouted badly.

I am not a follower of signs and moons; in fact, I pay no attention to anything of the kind, either in planting or building, but there is certainly a difference in the time timber is cut, about its lasting. J. M. Watkins.

Marion County, Iowa.

Frank Iams' Bismuth 51863, wt. 2140 lbs.; the black Percheron stallion that won 2d prize at Ill. State Fair, '06. He made all the big guns sit up and take notice. One of Iams' wide as a wagon "black boys."

Frank Iams' of "Peaches and Cream" fame, not a "dreamer of dreams," but a man who "does things."

Mr. Johnsing, "give my regards to Broadway," tell all the stallion buyers of Frank Iams, of St. Paul, Neb., the largest individual owner and importer of Percherons, Belgians and coach stallions. "The Home of the Winners" is a "nut cracker." Iams is showing all competitors the "race of their life." He is doing the business—selling the stallions while his competitors are "knocking." Iams is not a "dreamer of dreams," but a man that "does things." He has the goods "you read about." He makes every statement good. His 163 stallions from his "special train" load are all "top notchers." They must all be sold. These are Iams' famous "Peaches and Cream" stallions that he is selling at \$1,000 to \$1,500 (few higher), guaranteed better than any stallions sold to "farmers' companies" at from \$2,500 to \$4,000, or Iams pays you that \$500 he hangs up. Iams' "barrel of pluck and push" makes him a "mascot" to buyers. He is saving thousands of dollars to buyers. He hypnotizes you with lusty "black boys" at "let live prices." If you will visit him and do not say this is true you get this \$500, cheerfully. Iams gives a breeding guarantee of 60 per cent, pays freight of horse, and buyer's fare. You say: "Why can Iams sell these state prize winners and 'sons of winners' so cheap?" Iams is an up-to-date business man of twenty-five years' practical experience in importing and breeding horses at St. Paul, Neb. He buys stallions by "special train load." He uses his own money, owns his farms, barns and horses; has no two to ten men as partners to divide profits with. Iams speaks the languages; this saves 20 per cent on each stallion. Iams is not in the great "stallion trust" (runs his own business and has all competitors fighting him), because he sells all of his stallions at his home barns; employs no "buyer" or "con salesman" to sell you a \$1,200 stallion for \$3,000. Iams saves you all commissions and "middlemen's profits," and sells stallions that are so good that they do not need to be peddled to be sold. Here is the milk in the cocoanut. Its State Fair, 1906. He put all the competitors up in the air. He is Iams' kind. He is a big, massive, wide-as-a-wagon drafter, with a leg under each corner. A smooth, even-proportioned "black boy" with plenty of scale and finish. He stands on the best of feet and has four-teen-inch bone. He is a real "cholly boy" on dress parade. He makes all the "tony girls" wink their eyes and say, "That is one of Iams' 'Peaches and Cream' black boys' that we read about." "He has the goods" and "makes good" his advertisement and gives his customers a "square deal." Write for greatest horse catalog on earth. It will tell you how to save \$1,000 and buy a first-class stallion. It's a business fetcher. Iams is the man behind the gun and is saving thousands of dollars to stallion buyers. Don't wait to buy a stallion; do it today. You can buy them \$200 cheaper now and get the pick of Iams' "town of barns" "filled to the roof" with top notchers at bargain prices.

The Iowa Gate - FOR THE FARM -

A small child
can open or close it

IOWA gates are more than a convenience if women or children ever use them for being so simple they are very light and can easily be swung either way.

The Rolled Steel Tubing Frame makes them strong; not gas pipe or common steel but an extra hard steel tubing that will not bend out of shape.

The IOWA gate is made to last—no castings to break—no wearing parts—even the wires have galvanized stretchers to tighten them. Will raise over the snow in winter—will not blow down, burn or rot out.

Made any length and any kind of wire. Cheaper Than Wood. So write today for our low prices.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

For some time past I have been thinking that a series of talks to the young men and women of the Home would make a pleasant change in the routine of affairs. And then a few weeks ago came the letter of inquiry published here With the Editor last week, a letter furnishing a concise text for two or three of the proposed talks. As it is desired to make these talks practical, I shall be glad of letters from anyone desiring counsel on any subject likely to be of interest to the Home.

In this country young people are given a great deal of liberty. They work together and play together without chaperonage and almost without restriction except among the Four Hundred. To their credit be it said they are usually loyal to themselves and the trust reposed in them. The standard of morality among our young people is very high. At the same time, there is scarcely a neighborhood where at some time or other some home has not been disgraced, old lives saddened, and young lives marred, through abuse of the liberty granted lovers. Moreover, there is in every community a certain element which loves gossip, which has no regard for a woman's good name, which eagerly seizes upon anything in any degree suspicious and starts a whispering which gathers volume as it travels, and frequently culminates in a scandal, which ruins the reputation of a girl whose only fault was lack of discretion, the avoidance of "the very appearance of evil."

A young man and a young woman of full marriageable age are engaged, but for some reason defer marriage. Presumably the girl is employed away from home, for once a week the young man drives her home and remains four or five hours. He asks if, when she has seen her friends between times, he should be content with one hour of her society after the retirement of the family for the night.

It is natural that lovers should wish to be alone sometimes. It is right that they should be alone sometimes. Circumstances should decide how often, how much. If an engagement is likely to be long, prudence demands that lovers practice a good deal of restraint. Situations which stimulate emotion or furnish food for gossip should be carefully avoided. Lovers float on a sea, the magic of whose waves tempts them to loose the rudder and drop the oars; they drift with the tide and for a time the calm is delicious; by and by their boat moves more swiftly; it is being sucked into a maelstrom whose undertow is cruel as death and almost as irresistible.

The girl who gives her lover few privileges until after marriage errs, if err she does, on the right side. It is horrible, but it is a fact, that so-thought decent men are not always above jesting among themselves of their triumphs with women. A broken engagement has been known to unloose a man's tongue to the intense mortification of the girl who once honored him with her love and trust. Moreover, in addition to the parties more immediately concerned, there is the cold, watchful, suspicious, sometimes malicious world to be considered, the gossips who enjoy scandal as does a gourmet a sweet morsel, with the difference that they generously share their tid-bits.

And now let us back to our problem. It is a very delicate matter, this of young couples sitting up courting after the family have retired for the night. Young women do not usually understand themselves—much less do they understand their lovers; this ignorance—mistakenly termed innocence—is in many cases a real peril to their lovers, no less than to themselves. Not knowing that in a certain direction danger lies, a girl is often imprudent, heedless of advice, and restive under control. Young men understand better, but an honest young man is apt to be indignant at the mere suggestion that he could harm his promised wife. And yet he knows that other men, inflamed by passion, have done things which, in cold blood, they would repudiate with all the strength of honorable manhood—and that history is continually repeating itself.

Considered in the light of the foregoing, is it not apparent that a girl should sedulously avoid putting herself in a po-

Mayer Work Shoes

sition where harm may come either to her or her good name, and that her promised husband should guard her honor no less carefully? "Love seeketh not her own." Instead of asking anything which might compromise his sweetheart, a young man should feel called upon to guard her from the peril of her sweet ignorance, from the peril latent in the love of man for woman, and last, but not least, from the peril of any situation which might cause the breath of scandal to tarnish her good name.

HOME AND HOME MAKING.
THANKSGIVING DAY THOUGHTS.
Thanksgiving comes with chilling winds And hint of snowflakes in the air; The streams in icy fetters sleep; The forest trees are brown and bare. And yet our hearts are warm and glad; Our hearthstones glow with hearty cheer; We open wide the welcome door, For lo! Thanksgiving time is here.

Let us thank God, then, first of all, for seed time and harvest and the boundless wealth and blessing for which they stand. At the foundation lies the bread question,

PATENT YOUR IDEAS
\$100,000 offered for one invention; \$8,500 for another. Book "How to Obtain a Patent" and "What to Invent" sent free. Send rough sketch for free report as to patentability. We advertise your patent for sale at our expense.
Chandice & Chandice, Patent Attorneys,
956 F. Street, Washington, D. C.

and the farmer and his toil, and the fruitage of that toil, underlie all the rest. In cities we overlook this too easily, and commerce, and manufacturers, and organized labor, rearing mighty structures, make us too easily to forget the sowing and plowing, the rain and the sunshine—God's benediction upon all our broad acres, in one word—as the foundation of the whole.—Bishop Potter.

COUNTING THE BLESSINGS.
Because our griefs and cares loom large upon the horizon of our life they are apt to overload our sky and cover our pathway with darkness. It is a good time, then, to count our blessings. Even the griefs may be blessings in disguise. There are many sunshiny, beautiful and glad experiences in our days which we cannot but enumerate, if with fair and candid minds we think of the good hand of our God. There are the blessings of health, of home,

of opportunity, of children around us, of the church, of the fellowship of kindred minds.

The dominant note in our life should be that of rejoicing. We should take time to be thankful and happy.

AT DINNER—A TOAST.

Here's to the great American birds! May we have them where we love them—The turkeys on our tables, and the Eagles in our pockets.

THANKSGIVING EVENING WITH THE YOUNG FOLKS.

The dinner should not be the chief attraction on Thanksgiving Day. There should be church-going in the morning and merry-making in the evening. For the latter here are a few hints.

General amusement may be provided by setting the family or the guests at work shelling corn, cracking nuts and guessing the number of seeds in a pumpkin, the most correct guesser, the quickest sheller and the one whose nuts were the least broken to receive prizes.

Later, guessing contests might be engaged in. Here is a good one. Give to each of the party a paper on which are written without replies the following ones:

Number one—never ate alone. (Duplicate.)
Number two never ate with his superiors. (Subordinate.)

Number three ate very daintily. (Delicate.)
Number four ate in the most lusty way. (Invigorate.)

Number five ate like somebody else. (Imitate.)

Number six ate so he constantly grew worse. (Deteriorate.)

Number seven ate in high places. (Elevate.)

Number eight ate in a way that compelled attention. (Fascinate.)

Number nine ate with other representatives. (Delegate.)

Number ten ate with the politicians. (Candidate.)

Number eleven never ate today what he could put off till tomorrow. (Procrastinate.)

Number twelve ate so his food was well chewed. (Masticate.)

Number thirteen ate more than was good for him. (Inordinate.)

Number fourteen ate with the cows and sheep. (Ruminate.)

Number fifteen ate with the last of all. (Ultimate.)

For the supper take small pumpkins, cut

covers with stem in the middle for handle, scrape out the seeds, etc., fill the space with sandwiches, turnovers, cookies, etc., wrapped in paraffin paper. Have a pumpkin for each person or one for two. After the food is disposed of pass around knives and let each pumpkin be carved into a Jack-o'-Lantern. A pumpkin pie should be awarded as a prize for the best lantern.

Another novel supper is to serve small cakes and sandwiches, progressively. The last table to be brought in should have an enormous pumpkin upon it from which hang tiny green or yellow ribbons. Each guest pulls and draws a little souvenir or an envelop with a character, or a fortune.

Still another way is, where the guests have eaten a hearty dinner, to serve a mock banquet or Barmecide feast. The kitchen table or bare boards upon trestles is used with a glass of water and a small cracker at each place. A literary salad comes first. It consists of lettuce leaves of green tissue paper and walnuts minus the meats, which have been replaced by a slip of paper upon which some quotation is written. Nut crackers are used to open the shells, which have been glued together after removing the walnut meats. Formal toasts should be assigned for this mock banquet, which may be followed by a simple supper appropriate to the day.

AMONG OURSELVES.

Early in my editorship of this circle I began to depend upon the helpful, cordial letters of Mrs. Sara Henton; from then on she has never failed to bring us from time to time leaves from her life book rich in womanly, housewifely lore. She has made us her debtor many and many a time and in doing so has woven bonds which make the news of her passing on seem a personal bereavement. We shall sadly miss her kindly cheer as the days go by, but it is not of ourselves we should think of at this time but of the husband who mourns a dear companion. To him we offer our heartiest, tenderest sympathy, for him we pray that he may be comforted by the God of all comfort.

It is sometime since our good friend Mrs. Vanderhoef has been with us; life is pressing a little heavily upon her these days. She writes she is not equal to doing all the things she would, and so has not been able to take part Among Ourselves until now. Her usual welcome, a warm and cordial one it is, awaits her:

"Dessie" wished to have a debate and took for her question, "Resolved, that farmers as a rule are very liberal-hearted people." She then says that nearly all the farmers she knows are stingy. Speaking of contributing to the church: I have always found that farmers who belonged to a church were obliged to pay their share towards supporting their church and its pastor. I supposed they all did so willingly. They do more than this, for in getting up suppers, socials, etc., the societies are generally out among the farmers soliciting, "a gallon of cream" (of course, you won't miss it with so many cows), "a few dozen eggs" (you have so many hens), and, "oh, a jar of those lovely pickles," and the farmer's wife swallows the sugar-coated pill of flattery and gives liberally. I know that I, for one, do not take my Christmas, Thanksgiving, or New Year's dinner to the poor in town. There is always some deserving family or families right in the country who are needing those dinners, and are sure to get them. Probably most of the people are alike in one thing—they don't do good just for the sake of being praised. Perhaps you did not know how much kindness was being done. I know when I start out to do a charitable deed I do not wear a tag on my arm that all who run may read, "Here I go to give Mrs. D., who is old and poor, a Christmas dinner, or a glass of jelly, a tin of nice biscuits, or some beautiful flowers to poor Mrs. Jones, who has no one but a young daughter to care for and the tiny baby at her side." And as for traveling beggars, I have no time for them. If they are deserving they will be cared for at home by some society friends or the county, and they are generally far more able to work than I am. Every farmer is not so situated that it is convenient to keep people over night. The traveler almost always kicks if asked to pay half what it road running north from Madison, Wis., and were always keeping some strangers. Let me tell you the traveling public is like all other people—some are good as gold, some just medium, and some mean as dirt. But as for machine agents, peddlers, stump speakers, etc., I say let them go to town or any other place. Farmers' wives have enough to do without cooking and making and washing extra beds for them. Yes, I have almost always boarded the schoolmarm. Sometimes three at a time. If they were fair, honorable people they expected to pay for their board and washing. Some women and their daughters may talk about a teacher, but not often. I cannot think that it is the rule that a mother with girls of her own would try to hurt the character of one who was a member of her own household. In all my life as a teacher and from life-long observation I have almost always found people kind, loving and willing to help "the schoolmarm" all they could. I consider it a terrible thing to say that "the menfolks" are such mean, stingy rascals. I don't know what you call dedicating money to the Lord's service, but I call it such when men educate their children and give them all possible advantages; when they pay their honest debts; when they help support the public schools and libraries; when a little neighborhood helps some poor widow and her little children through the winter; when the poor young fellow who was maimed in a thrashing machine found as a present from his fellow-workers money enough to pay his hospital bills, and when they help each other to care for the sick. Surely, "Dessie," the majority of farmers, the same as town peo-

THE BIGGLE POULTRY BOOK

Farm Journal

is the leading farm paper in America, with more subscribers than any other farm paper in the world. It is a monthly, thirty years young, taken and appreciated everywhere, from Maine to California. Thousands in your state already take it. Your neighbor knows all about it. It is full of sunshine and gumption, is edited by practical farmers who know whereof they write. It has no ax to grind, prints no long-winded articles by theoretical specialists, but aims to give in season, and just when wanted, advice and timely help such as you, a busy farmer, need. **Farm Journal** has departments for the stockraiser, the orchardist, the dairyman, the trucker, the general farmer, the poultryman and the women folks, with many short cuts, recipes and hints, many of which, our readers often write, are worth the cost of the paper. **Farm Journal** is 75 cents for five years, sixty numbers.

Biggle Poultry Book

More copies of Biggle Poultry Book have been sold than any similar book ever published. We have no hesitation in saying it is the most up-to-date, helpful poultry book ever written. It is concise, practical and to the point. Tells the whole story from the egg to the roasting pan. Seventeen chapters, sixteen colored plates, each printed in ten colors, showing birds true to life. Over one hundred other illustrations. Printed on enamel paper, bound in cloth. A novice can take Biggle Poultry Book and succeed in the business, and an expert will find lots in it that will be helpful to him. Price, by mail, 50 cents.

There are eight other Biggle Books, one each on the Horse, Cow, Hog, Sheep, Health, Pets, Orchard and Berries. All built on the same plan as the Poultry Book, and bound uniformly with it. Price of each, 50 cents. So popular are the Biggle Books that over 175,000 have already been sold. Nothing nicer for a Christmas gift.

The Roosevelt Family Calendar

is a high art calendar for the year 1907, showing a family group of President and Mrs. Roosevelt and their six children. It contains no advertising matter whatever, but it is a beautiful and artistic production, such as anyone will be glad to hang in parlor, sittingroom or office, and preserve forever as a historic souvenir. Or it will make a valued, attractive Christmas gift for some relative or friend.

For \$1 **Farm Journal** for 5 years, (60 issues) and Biggle Poultry Book and include the Roosevelt Family Calendar, if your order is received before Jan. 1st. (Any other of the Biggle Books may be substituted for the Poultry Book.) Safe delivery of Book and calendar guaranteed.

For \$1 **Farm Journal** to one address for 10 years, or to two addresses for 5 years each, provided at least one of these subscriptions is a new one; if both are new so much the better. A Roosevelt Family Calendar as a free gift for promptness to each subscriber if subscriptions are received by Jan. 1st.

For 25 cents **Farm Journal** on trial two full years, and a copy of the Roosevelt Family Calendar. This offer for new subscribers. Calendar offer is good only to Jan. 1st. Send coin or stamps at once; your money back gladly if not satisfied with any of these offers. Agents wanted on salary.

FARM JOURNAL, 1036 Race Street, Philadelphia, Pa.

1856—Sandwich—1906

Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country. The **Sandwich** is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the **Sandwich** so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the **Sandwich** because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

Genasco Ready Roofing makes the only roof without an "if."

"If" shingles never rotted, cracked or caught fire—shingles would do.

"If" you didn't mind painting your roof all over every year to keep it from rusting—tin would do.

"If" slate weren't so brittle, so heavy, and so expensive, slate would do.

"If" coal-tar didn't melt and run in July, and stiffen, crack and crumble in January, coal-tar would do.

Genasco, made of Trinidad Lake Asphalt, is the only roofing that will "do," and always "does."

Enduring, resisting life under rain, heat, cold, snow and fire—and so easy to lay that you can roof your buildings with it yourself.

Smooth and mineral surface in several weights.

Ask your dealer. Write for Book N and samples.

ple, are trying to "do the duty that lieth nearest."

Mrs. Vanderhoef defends her side with all her old time vigor. It is good to hear her able plea. "Dessie" is convinced surely—if she needed convincing—which I much doubt.

The other day the postman brought me a letter which I wrote away back in August in reply to an inquiry regarding work for a proposed club. Why Mrs.

Hoag did not receive my letter I do not know. I fear it is too late to serve her now, but as it may serve others I shall give it here:

Fifteen bright women ought to be able to have a fine club, even if they cannot give much time to study. Have you thought of traveling—by means of books? That study brings in geography, history, social conditions, etc., in an interesting way. I know of nothing better in its way. A literature club, taking some classic novel or drama, offers opportunity for fine work, also if you have not read Shakespeare you can have no idea how interesting and helpful it can

be made. Try one play, assigning the parts and reading aloud the best parts of an act and then discussing it. You should purchase the play you study in handy form—Rolf and the Booklover's editions have very fine notes, and Dowden's little primer, "Shakespeare," is a veritable treasure-house of suggestive information. There are so many directions in which a club may work that without knowing more of your personnel I cannot advise you definitely. Hoping these few hints may be of some help I am, cordially yours,

Jessie Mackenzie Walker.

Next week we shall have a letter about Chautauqua work which has been hidden among my papers for several weeks. Apropos of these club hints I hope for club reports after the Christmas rush. Speaking of the Christmas rush we shall have hints connected with holiday preparations every week from now on. Mrs. A. B. Cornelius brings us an admirable little suggestion along this line which makes a good beginning for the series of letters arranged for coming meetings:

Send a copy of this circular to your friends accompanied by a "Santa Claus Order Book" with a page or two for each member of the family to make known his wants and perhaps it will help make a happy Christmas:

CHRISTMAS HEADQUARTERS.

North Pole, Nov. 1, 1906.

My Friends and Patrons:

To facilitate my ever-growing business I am this year adopting a new plan. The children—bless their hearts!—are always ready to write to me. I don't know why

grown-ups should be so shy of me. I am sure I always try to treat them well, unless I know they positively dislike my methods of business.

I enclose a booklet which I hope you will use and keep hanging in plain view. Please have your lists completed by December 1st, after which date my agents make their first visits. I am sure they will find every child's list "chock full," and at this season I want all my friends to be children together. Since the past 500 years I begin to feel grown up myself, especially when I am tired, and I know even grown people want things which they do not get for themselves. Don't be afraid of making your lists too long—the longer the better for me to select from, as even my stock sometimes runs short in some lines. There is much said now-a-days about "appreciating the love which prompts the gift," which is all right. Yet, I prefer to send you things you can use and enjoy. You are at liberty to use my name in sending copies of this. Yours for a Merry Xmas, Santa Claus.

This letter should have appeared earlier but it is still in time to help solve the yearly recurring problem, "What shall I give—for Christmas?"

M. L. Farmer is stirred to speech by the recent utterance of Mr. R. S.:

I am wondering if Mr. R. S. is really the man his letter tells us he is, or did he write the letter in that tone just to see what the women would have to say? Mrs. Streeter's question, "Why do men have contempt for women?" is rather an unusual question, perhaps, but she may have had good reasons for asking the question. I never knew that men had contempt for women. Some men may have contempt for some women, but I don't believe men have contempt for women just because they are women. Mrs. Streeter may know of some man or men who are domineering, mean, and ugly, and who are forever nagging and growling, and take woman for their victim just for spite, and especially if he knows it hurts. The next question, "Why do men hate to go to church?" Perhaps it is because they do not believe in religion, or perhaps it is because they do not like the minister, or some of the people who attend church, or are prejudiced against all of them. Maybe it is because they are not asked to sing in the choir, and maybe just because they don't want to go. They would rather stay at home and read the newspapers and magazines. "Why do men complain because they are asked to clean their shoes before coming into the house?" I suppose it is because it is easier to carry the mud into the house, and they think it is a terrible thing to try to be clean and neat. Mr. R. S. says the men growl because the women growl first. It is enough to make a woman growl if she has to ask a man every time he comes to the house with muddy shoes, to clean them. But, then, a woman should not growl; she should ask him pleasantly. If that does no good, reason gently. If that does no good, why what can she do? Nothing, but just feel bad because she has a dirty, don't-care husband.

It will be noticed that "With The Editor" this week is not, as usual, a Thanksgiving editorial. I thought I would confine Thanksgiving to Home and Homemaking, for once, but I cannot resist saying here that I trust it is indeed Thanksgiving time in the hearts of all who meet Among Ourselves.

Dressmaking and Millinery—No. 545.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Yokes and yoke effects are seen on all our garments this season, whether waists, skirts, or outer garments. Not, of course, to the exclusion of other designs, but to be used when fancied, with the assurance that they are among the "latest." Perhaps quite as often the effect is given by the

[5516 Fancy Yoke Blouse, 32 to 40 bust.]

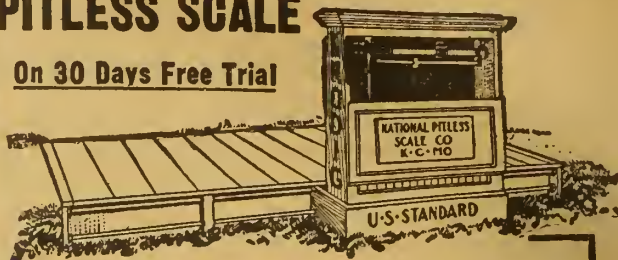

application of trimming, as it is made by any variation in the cut of the garment. With the foregoing in view I have selected two designs, a skirt and a waist, that may be used together in making a costume, or either may be used separately. You will understand, of course, that in no case

H. C. Gumbel

LET ME SEND YOU A "KNODIG" PITLESS SCALE

On 30 Days Free Trial

Is \$30. to \$50. Worth Saving?

If you think it is don't do a thing about getting a scale until you have heard from me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings. Ready for instant use when you want them. No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be.

Absolutely accurate, because tested according to U. S. Standard of weights.

My plan saves you all middlemen's profits. Deal direct with me. No Agents, Salesmen,

Jobbers or Dealers between you and factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer?

Does it make the scale any better? Does it add one single penny to its value?

Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you are satisfied,—no deposit,—no notes to sign,—nothing to do but give the Knodig a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover.

Free. Write for it to-day, sure, to

HIGHLAND PARK COLLEGE, 3768 2nd Street, DES MOINES, IOWA.

extending to the neck. This is easily done by pinning the yoke front on the lining front at the line of perforations that indicate the depth of the yoke. The yoke is in a fancy shape that shows tab extensions, these being a very popular mode of decoration this season. This yoke may be

of the waist material or of silk or any of the yokings now favored. If of the material it may be piped or finished with braid in any of the fashionable kinds. (these have been mentioned at some length in recent papers) or stitching and buttons may form the only trimming. When medium large buttons are used but one is needed, but if the smaller variety is selected three or five arranged in a group or in a lengthwise row is most effective. The jet heads mentioned heretofore are also very appropriate for the purpose. The girdle is a feature of the pattern and it may be of the waist material, or if the yoke, etc., are of different material it may be made to correspond. It may be trimmed or left plain in finish, but when the buttons are used it is a pretty touch to add them to the girdle also. The shaped cuffs that finish the three-quarter sleeve have the tab effect, and this should be treated to correspond with those on the waist. The waist closes invisibly at the center back. Pattern No. 5516 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure. Give size when ordering pattern.

No. 5517 is designed to correspond with

the waist design just described, having the yoke with the same fancy outline. The skirt is cut in nine gores, each of these being laid in a box pleat. The front and sides of the skirt are adjusted to a yoke outline, the outside yoke being arranged over this with the tabs dropping down on the pleats when finished. The two box pleats at each side of the center back extend to the waist line. Whatever has been said about the finish of the waist applies as well to the finish of the skirt yoke, and if these two patterns are used together the same mode of finish should be adopted. One may elaborate on either or both of these by applying braid in a design or pattern on both yokes. For a finish on the tab extensions there are motifs of braid or passementerie with or without jet spangles, and also with or without pendants. These pendants, or "drops," are again revived in favor. Pattern No. 5517 is cut in sizes for a 22, 24, 26, 28 and 30-inch waist measure. Give size when ordering pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

The International Sunday-School Lesson.

Fourth Quarter. Lesson IX. Luke XXIII, 13-25, December 2, 1906.

Jesus Before Pilate.

Pilate was a misfit as procurator of Judea. The javelin-man (as his name may signify) kept hurling his darts at hierarchy and people. He brought the Roman eagles into Jerusalem, hung shields dedicated to Tiberius there, took money out of the temple treasury to build an aqueduct, all in defiance of the religious scruples of the populace. He mingled the blood of the Galileans with that of their sacrifices. The Jews had already appealed to Caesar, and not unsuccessfully, against this tyranny.

Under circumstances like these, Pilate had come up to keep the peace during Passover-week. Imagine, then, his feelings when, the feast being at its height and the city crammed to its utmost capacity with a heterogeneous throng from every quarter, there appeared at the portal of his palace a mob headed by the high priest, and all worked to the highest pitch of religious frenzy. It was aggravating to the last degree. Yet fear of another appeal to Rome, whose fixed policy was the conciliation of the provinces, required at this juncture that these imperious petitioners should not be driven unheard from the judgment-seat.

Pilate makes, with ill-grace, his first concession. The Jews will not enter the judgment hall for fear of ceremonial defilement. So the procurator places his curule outside. Before him, with hands bound, stands the object of this religious fury. The accusation is demanded. Pilate's answer is "Take Him and punish Him according to your law." This brings the confession that power to inflict capital punishment is no longer theirs. The charge is that Jesus is a deceiver, encourages the withholding of tribute, and calls Himself king.

Pilate beckons Jesus, and both retire into the comparative quiet of the judgment hall. He asks him: "Art Thou, poor, lone peasant, king of the Jews?" Jesus puts the counter question: "Do you ask Me whether I am king in the Roman or Jewish sense of that word?" Pilate retorts: "Am I a Jew?" Jesus replies: "In the Roman sense I am no king. In the mistaken Hebrew sense, too, I am no king. My kingdom is unlike any earthly or political sovereignty. If it were, I would have trained My followers to arms." "Are you a king in any sense?" asks the judge. The answer is: "I am. My realm is truth. My subjects the lovers of truth." "Truth! What

transcendentalism is this!" Pilate announces the innocence of Jesus. Accusations fill the air like flying arrows. The ruse of transferring the jurisdiction to Herod Antipas fails. "What shall I do with Jesus?" asks the jaded governor. "Crucify Him!" is the answer. One more protest. "Why crucify an innocent man? Let me scourge Him only." Like a wild sea, the vociferation breaks about the Gabbatha. Pilate washes his hands. The Jews accept the onus.

Direct from the scourging, decked with mock insignia, his life-blood giving new tint to the mottled pavement, Pilate, as a last appeal, cries: "Behold the man! Is not this suffering and humiliation enough?" "Crucify!" is the only answer. "Then crucify Him if you will; but He is innocent of offense against any law of which I am cognizant." The priests answer: "He has violated a Jewish law, the penalty of which is death. He affirms Himself the Son of God." Pilate takes Jesus aside to ask Him the meaning of the term. The meaning is beyond his comprehension. Jesus is silent. Pilate marvels, exclaiming: "I have power to crucify or acquit you." Jesus answers: "You have power only because God permits you to use it. You are guilty because you condemn Me, knowing Me to be innocent; but those are more guilty who delivered Me to you, as they sin against greater light."

"Will they not prefer Jesus to Barabbas as the object of clemency to grace their festival according to custom?" With the collapse of this last shift comes the ominous warning of Pilate's wife. He is on the point, even so late, of acquitting the accused, when the prosecutor lets fly the last arrow in his quiver: "Let this man go and you are not Caesar's friend!" "Behold your king!" says Pilate. "We have no king but Caesar!" they retort. "Crucify!" "Shall I crucify your king?" "We have no king but Caesar!" resounds once more. So ends the long-drawn battle in which the life of Jesus is at stake. Pilate orders Him to the cross.

Analysis and Key.

1. Pilate: His character, personal and official. His presence in Jerusalem; object of it. Policy of empire as to its provinces.
2. Appeal of Jews in case of Jesus. Confession that case transcends their jurisdiction.
3. Pilate demands formal accusation.
4. The charge of sedition: Specifications—(1) Advice to withhold tribute. (2) Proclaiming Himself king.
5. Private examination. Pilate proclaims Jesus' innocence.
6. Incident of sending Jesus to Herod. Significance and result.
7. Tumultuous cry for Jesus' crucifixion.
8. Pilate washes his hands.
9. Jesus scourged.
10. Barabbas preferred.
11. Jesus ordered to the cross.

The Teacher's Lantern.

Pilate is a conspicuous type of the time-server. His ruling motive was to keep his place. To do this he was willing to condemn the innocent, if necessary.

Time-serving brought him small reward. He eked out his official life a few years; but on complaint of the Jews, was deposed and exiled.

WATCH US, ..Boys and Girls..

We're WATCHING lots of your Boy and Girl Friends.
Why not You? With an INITIAL WATCH at that.

YOUR OWN INITIAL ON YOUR OWN WATCH.

No live boy or wide-awake girl will be without one. For an Initial Watch is your very own. No other boy or girl will want to borrow, swap, or steal. It is yours to keep, and

IT COSTS YOU NOT A CENT.

That's the beauty of it. You can get this watch for nothing. Just write us and we'll tell you all about it. But say, we're not guying you. It's a real watch we are talking about, not just a toy—a regular time keeper, and a beauty, too. It comes in two sizes the "Mite" or lady's watch and the regular 16 size boy's or men's time piece.

You've heard of the three kinds of pie the landlady had—"open-face, criss-cross and kivered top, all filled with dried apples"—Well, this is the open-face kind; but it is not filled with dried apples. It has a regular American lever movement, fully guaranteed, with solid nickel back, your own initial on the case, stem wind and stem set, with porcelaine dial, polished steel hands, heavy beveled crystal; in fact everything that goes to the making of a first class time piece.

Do you want one? Just say the word and it's yours! Drop us a line, say you want to earn a watch, and send us your full name and address. You'll get a letter by return mail with full particulars and it's a sure thing you'll earn the watch the same day you get that letter. Address,

APPLETON MANUFACTURING CO.
39 Fargo Street Batavia, Ill., U. S. A.

Pilate's name will go down to the end of time in deepest infamy as it is repeated in every language in the Apostles' Creed—"Crucified under Pontius Pilate."

Yet to some degree he showed a Roman's proverbial regard for law and justice. He demanded the accusation and evidence.

Cloud-hooded Pilatus may not have been the actual scene of Pilate's suicide, but seems a fitting memorial of him.

Take from the galleries of the old world the pictures, the themes of which are suggested by the life of Jesus, and art would be impoverished. The gospels still yield inspiration, as Mun-

kecy's "Christ Before Pilate" shows. Art Thou king? How unlikely! Yet Jesus was the real ruler. Pilate's power, then on the wane, lasted a scant six years longer. Jesus' dominion has lasted twenty centuries.

Destiny of Hebrew nation trembled in the balance that day.

Once to every man and nation comes the moment to decide. In the strife of truth with falsehood, for the good or evil side.

The choice was evil.

Jesus is the touchstone of individual as well as national character. Destiny is fixed by attitude assumed toward Him. Choice is pressed. "Which will ye?"

The Best Time for Sows to Farrow.

To the Editor of The Homestead:

Concerning the mortality among March and April pigs, I can only say what I learned long ago as an ardent full-blood Poland China breeder during the years from 1858 to 1886. During the first few of these years it paid well to take good care of the pigs and save as many as possible, for it meant \$20 to \$25 for each male pig at weaning time.

As I am nearing my seventy-seventh birthday, I must say that perhaps I am somewhat out of date, for I know nothing about these new-fangled or modern diseases among young pigs. From experience I have learned that it was best for me to have my brood sows farrow in the early fall or during the month of May, or no earlier than the last week of April, I should have said. I had part of my sows farrow in the fall and the rest as above stated.

It is a well-known fact that the two months in question are generally damp and chilly, more so than during the regular winter months; and in my opinion there is nothing that hurts newly-born pigs so much as to become chilled through and through. If they are not properly handled and taken care of just at the very moment they are dropped, a considerable percentage of them will die in a very short time, or, if they pull through, their constitutions are very apt to be weakened to such an extent that they hardly ever grow ahead or keep pace with May, or the fore part of June, pigs.

Damp and chilly weather at farrowing time also has an ill effect on the mother. Though she may be in good flesh and otherwise healthy, she will become more restless than she would be if the weather were warmer, and all hogmen know what a restless brood sow means at pigging time.

I can already hear some of you swine breeders say that you have a No. 1 hog house, in which are comfortable breeding pens, consequently damp weather and chilly atmosphere without cannot have any perceptible effect within its walls. Should you think so, I fear you are somewhat mistaken. It would, even under such favorable conditions, require a heating stove, well warmed up, to make the house sufficiently comfortable for the farrowing sow and her freshly-dropped young.

During my experience of raising pigs I learned that from 20 to 25 degrees below zero in winter—that is, dry, cold weather—would not be so apt to chill them as zero weather or above. My advice to swine breeders is to sacrifice the preferred time for having pigs come and give the month of May the preference.

In conclusion, I would say just ask your wife or daughter, who is living in a well-built house and as comfortable

as possible, and she will tell you that there are times, if no fire is made, when a damp, unpleasant atmosphere exists all through the house and even bedding and clothing will become damp. A change in the weather or a little fire would soon drive this dampness away.

Oregon Co., Mo. Samuel Kaufman.

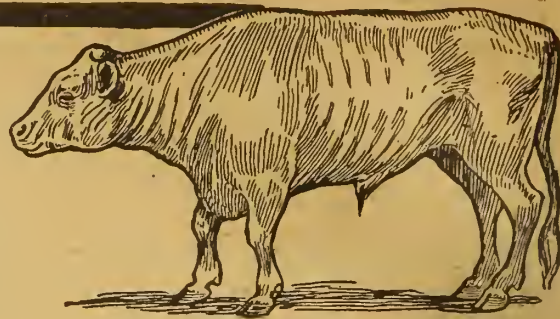

I contend that the loss of March pigs in the spring of 1906 was due to the condition of the weather at that time. Young pigs must have some sunshine to drive the dampness out and purify the air in their quarters. There is no young animal that needs more sunshine than young pigs in the spring. Young pigs farrowed in February or March will stand considerable cold if the beds are kept dry, provided they can have sunshine in the daytime.

If I am not mistaken, the spring of 1904 was just the reverse of 1906. March was favored with sunshine and April was cloudy and rainy. The mortality

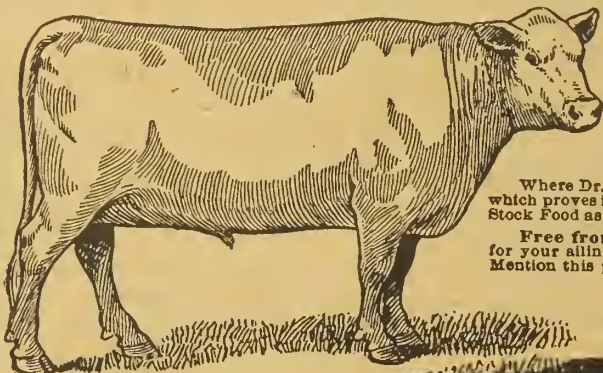

From Scrawn to Brawn

The difference between the scrawny animal and the thrifty one is not usually due to the amount of food consumed but the amount digested. In fact, the scrawny animal frequently consumes more. It is a vital point to see that there is a gain in weight each succeeding day sufficient to cover cost of feed and labor, otherwise, you are feeding at a loss. Such a condition can be brought about, and the scrawny animal converted into a brawny, thrifty, profitable one, by adding

DR HESS STOCK FOOD

the prescription of Dr. Hess (M.D., D.V.S.) to the regular ration twice a day. It compels the rapid development of bone, muscle, milk fat, etc. and insures perfect health and condition. It produces this extra profit by supplying the animal with bitter tonics, which improve the digestion, strengthening every function of assimilation; by increasing the flow of intestinal juices; by stimulating the parastaltic action of the bowels (that churning motion that brings the contents of the bowels in constant contact with the minute cells which absorb the nutrition); by supplying iron for the blood, nitrates to assist nature in expelling waste material from the system; and by supplying laxatives to regulate the bowels. Professors Quitman, Winslow, Dun, and all the noted medical writers indorse these ingredients for producing the results above mentioned. Besides, Dr. Hess Stock Food is sold on a Written Guarantee.

100 lbs. \$5.00; 25-lb. pail \$1.60

Smaller quantities at a slight advance.

Except in Canada and Extreme West and South.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee.

Free from the 1st to the 10th of each month—Dr. Hess (M.D., D.V.S.) will prescribe for your ailing animals. You can have his 96 page Veterinary Book any time for the asking. Mention this paper.

DR. HESS & CLARK, Ashland, Ohio.

Also manufacturers of Dr. Hess Poultry Pan-a-c-e-a and Instant Louse Killer. Instant Louse Killer Kills Lice

"Better Than Gas," SAYS THIS NEW YORKER.

"I have used The Angle Lamp far beyond the time set for trial and find that one cannot be too enthusiastic over it," writes Mr. Granville Barham, of Cold Springs, N. Y. "It certainly gives the brightest and at the same time the softest illumination one could desire."

"We lived in New York City for some years and used all the latest and most improved appliances, devices, etc. in connection with gas or electricity and yet I most sincerely urge the superiority of this simple yet wonderful method of illumination. One can hardly say too much in its praise."

THE Angle Lamp

makes common kerosene the best, the cheapest and most satisfactory of all lighting methods. Safer and more reliable than gasoline or acetylene, yet as convenient to operate as gas or electricity. The Angle Lamp is lighted and extinguished like gas. May be turned high or low without odor. No smoke, no danger. Filled while lighted and without moving. Requires filling but once or twice a week. It floods a room with its beautiful, soft, mellow light that has no equal. Write for Our Catalog "33" and our proposition for a

30 DAYS' FREE TRIAL.

among April hogs was about 50 per cent greater than in March.

If I were raising hogs for the market alone I would have them farrowed in April and May, using nothing but young sows for breeders. Geo. D. Robertson. Wapello County, Iowa.

I desire to say a word on the best time for sows to farrow. As I got caught in the freeze-up last March and saved but fourteen pigs out of about forty, I have a few ideas on the subject. My March pigs are no larger than my early April pigs and the loss among my April sows did not amount to 2 per cent. I have noticed March pigs from other herds this year that are little, if any, larger than April pigs.

Size in any kind of stock is a very desirable quality to have, but when it is attended by a loss of 50 per cent in numbers we think it has cost too much. A litter of eight pigs farrowed April 10th, and all raised, will weigh more per litter and cost less per pound than a litter of eight farrowed March 10th and four raised.

I think the greatest mistake in hog breeding is using breeding stock from immature parents and trying to make up in size by having them come in the middle of March. A good old sow farrowing in April will usually raise a good, thrifty litter of eight or twelve pigs, with less danger of loss and less time and attention from her owner.

Right here let me tell you a secret that may be a surprise to many of your readers. It is this: Rats are very destructive to young pigs, especially early ones, as it is harder to keep them away from rats. They took about ten for me last March before I found out what was taking them.

In my experience I have learned that sows farrowing in April and May will raise a larger per cent of pigs with a great deal less trouble to me, and in the fall I can notice very little difference in the size. W. J. Borrett. Clayton County, Iowa.

Regarding the above subject I will say that in my opinion conditions vary so much and the different objects or ends sought are so much at variance that a very wide latitude must be allowed in discussing this very important question.

The best time for sows to farrow in my experience (and that is our best teacher and often a very expensive one) is from May 1st to June 1st. About the first of May we are apt to have some good, warm weather, and I know of no animal that at birth needs warm weather, not merely a warm place but warm weather, more than a

little pig. Think of six or ten little shivering pigs hunting some warm corner and not able to find it. The mother shivers around and in doing so pinches one of the little pigs and loss results.

Let those same pigs come on a warm day and it will do your eyes good to see the tussle and fight for the good warm milk that is ready for them.

You speak in the paper about the fellow who raises stock for breeding purposes. Well, we need him, but for my part I think we need more bone and frame. By this I mean a good, long body and a good, big leg at each corner, such as we find mighty hard to get, instead of the short, stubby things that you find in most of the pedigreed pens. When I fed my pigs tonight (November 5th), I looked them over and am satisfied that the one hundred in the bunch will average 125 pounds, and not one of them was farrowed before May 10th, and plenty of them will weigh 150 to 175 pounds, and, mind you, these pigs have not been fed to hurry them.

I am a firm believer that a good bluegrass pasture is one of the best places to summer pigs, and they do not need to be very old to eat the grass, provided they can get it. I often think of the times I attempted to raise pigs farrowed in March and April, and since I have skipped those two months I find it so much easier, and save my pigs every time. B. F. Bash. Bureau County, Ill.

Pure-bred Versus Grades

To the Editor of The Homestead:

The time has come again when the mass of the farmers throughout the corn belt are selecting their breeding hogs for next season. The first question that comes to mind is, how may I determine how many sows should be bred? I believe that will depend on how many pigs can be cared for to produce the most economical gains with the feed at hand on the farm.

The second question is, what breed shall I choose and shall they be pure-bred? Select the breed that represents your ideal and have the male pure-bred at all events. Most farmers think the cost is too great. Now, let us see: Suppose I want to breed five sows. Good pure-bred ones can be bought for \$20 each; that is, gilts at 150 pounds in weight. The five will thus cost me \$100. They ought to raise at least five good pigs each or thirty pigs. The five stock gilts at six cents per pound will cost \$45, the difference of \$55 on the investment. This figured at 6 per cent would give me \$3.30, the extra cost of the thirty pure-bred pigs, or eleven cents each. And now, Mr. Farmer, the question is up to you to settle which is the better, stock hog or pure-bred? Roy Stacy. Ogle county, Ill.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

WINTER CARE OF BREEDING EWES.

The further one can get away from artificial methods and the closer we can come to the natural in handling breeding ewes the greater will be the success, other things being equal. It is nature's way among all animals that have to depend on natural products for their living, to have the young drop in the spring when all vegetation is young, tender and full of nutrition.

In nature's way as the winter comes on and as temperatures get low it is a part of the pregnant animal's work to do a good deal of searching for her food. Food is scarce and the time occupied in getting a "square meal" requires the greater part of the day. In doing this there is that exercise so necessary in the management of the pregnant ewe which is forced by nature and seldom provided in domesticity. As spring approaches and the warm weather with new grass comes, there is a change and the time for parturition approaches, and the question is: "Is the ewe prepared for the ordeal, or has she been pampered and unfitted for her yearning?" In

short it is necessary for the ewe to be fitted for all three of the important periods of procreation. She should be in good condition at the time of copulation. By giving healthful exercise, pregnancy is advanced in the most healthful manner, and when yearning time comes there will be fewer troubles for the shepherd to endure, and fewer disappointments to the owner.

During the winter months of pregnancy the feed should be largely of nutritious grains, such as oats, with an occasional change to something palatable, like bran. Roots are also good. Clover hay is essential for best results, and alfalfa, where obtainable, will make a most excellent substitute for clover. If the flock of breeding ewes should be kept in barns, it will be necessary that they be not crowded for room while eating at hay racks, and there should be no narrow doorways or sills for them to pass through and jump over. All these are likely to cause abortion. Give plenty of trough and rack space, so ewes will not be required to crowd in order to get enough to eat. Wide doors and gates are very essential.

Corn fodder is a most excellent food for ewes. The fodder can be hauled out and scattered on the meadow, thus making exercise compulsory.

SOME RESULTS OF ORGANIZATION.

At the Denver meeting of the National Wool Growers' Association a few years ago a committee was appointed to go to Washington and ask for an extension of the twenty-eight-hour law and another to offer a protest to the increase of commissions charged for selling sheep. The twenty-eight-hour extension to thirty-six was provided by congress. When committees waited upon commission men in Kansas City, Chicago and Omaha, asking them not to increase the charges from \$10 commission per car to \$12, they refused to comply and the result was that independent commission houses in these markets were arranged for, some of which opened for business last September. The commission house combination has been broken by this move.

Four years ago at the annual meeting of the national association, the United States government was asked to place

mutton on the list of meats to be furnished soldiers and Indian agencies, and not long after that mutton, for the first time, was placed on the list of meats in advertisements for bids to supply meat for the government.

This much has been done by the national association and there are many things mapped out for it yet to do. There can be a better adjustment of charges for pasturage of sheep on the government reserves. There can be a great improvement in the runs of sheep from the far West to the best markets. There is need of an adjustment of freight weights per carload on lambs. There are many things that can be adjusted only by co-operation of sheep breeders. The next annual meeting of the National Wool Growers' Association will take place in Salt Lake City, Utah, January 17 to 19, 1907.

Brown's Dispersion Sale.

The dispersion sale of Short-horn cattle made by Mr. John Brown, of Doniphan, Neb., November 19th, was a success, considering the conditions in every way. The weather was exceedingly cold, and but a very few buyers were present. The sale was held at his farm near Doniphan, where every convenience was found for those who came. The cattle were in only fair breeding condition and the crowd seemed slow to take hold of the cattle that were a little thin. Bidding was very slow, yet a fair average was made on the whole consignment. Mr. H. E. Johnson, of Doniphan, being the principal buyer, purchased nearly all of the good females in the sale, also the herd bull, Golden Dale. The top price was \$92, paid by Mr. Carl Happold, of Doniphan, Neb., for Lot 6, a fine two-year-old heifer got by Commodore Taylor. Mr. Brown had not put any special work on his cattle, selling them right off the pasture.

WINTER VISITORS. WEEK END RATES.

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 5th to March 31st THE CHICAGO, GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Oneida and south as far as Blockton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

EVERY DAY

This winter the Chicago Great Western Railway will sell tourist round-trip tickets to points in Alabama, Central America, Colorado, Cuba, Florida, Georgia, Louisiana, Mexico, Mississippi, New Mexico, North Carolina, Porto Rico, South America, South Car-

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy ram and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs., champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

GOTSWOLD RAMS FOR SALE!

REMEMBER I am still selling your choice of my imported Percherons, English Shires and Belgians stallions at \$1,000 each.

A. LATIMER WILSON, CRESTON, IA.

NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred. Also Feb. ram lambs. Wish to make room for new importation.

D. M. NORTON, Sanborn, Iowa.
Registered Shropshire Rams and Ewes
OF the best breeding. Willard Miller, I. F. D.
No. 2, Anita, Iowa.

REGISTERED SHROPSHIRE, EWES AND RAMS. Address, W. C. FRAZIER, Atlantic Cass County, Iowa.

olina, Tennessee and Texas at very low rates. Tickets have limit of June 1st, to return and allow some stopovers. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa, for full information.

SPECIAL COLONIST RATES SOUTHWEST.

On the first and third Tuesdays of each month until March, 1907, inclusive, The Chicago Great Western Railway will sell one way colonist tickets to points in states of Arkansas, Colorado, Indian Territory, Kansas, Louisiana, Mexico, Missouri, Nebraska, New Mexico, Oklahoma, Texas and Wyoming at rate of one-half of regular first-class one way rate plus two dollars. For full information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

NOTICE.

When you write your friends in North Dakota advise them about the low-rate tickets on sale now for home visitors to Iowa points—one and one-third for the round trip. Don't forget to tell them that the Chicago Great Western Railway is the only line which has three trains every day in the year between St. Paul and Minneapolis and Iowa points. Complete information from E. J. Sawyer, 514 Walnut St., Des Moines, Iowa.

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeders today know that grain should be mixed with roughness. The cob is the best mixture for calves and steers. "The Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2/3 inch slices and cuts from 30 to 40 bushels an hour. Calves thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

Soon Pays for Itself

Enterprise Wind Mill Co., 24 Main St., Sandwich, Ill.

ADVERTISING NOTES.

Mr. and Mrs. S. A. Barton, of Chamberlain, S. D., have a good South Dakota farm consisting of 320 acres which they wish to sell. See advertisement on page 25.

A well-improved forty-acre farm, located in Howard county, Iowa, near town, is offered cheap if taken soon, by Mr. Albert Haupt, of Cresco, Iowa, in his advertisement on page 25 of this issue.

The Adams Realty Company, of Moline, Kan., announce in an advertisement that appears on page 25 of this issue of The Homestead, that they have a large list of good land bargains scattered over Kansas and Oklahoma and that they can sell them right. Write them for description and terms, which will be sent on request.

Record number 148751: Case of fistula of long standing; had been operated upon seven different times at a cost of \$35. Owner cured the horse with one bottle of Fleming's Fistula and Poll Evil Cure. For free copy of Fleming's Vest-pocket Veterinary Adviser write Fleming Bros., 210 Union Stock Yards, Chicago.

An alfalfa ranch, containing 4,590 acres, located on the Loup river, about forty miles northwest of Kearney, Neb., is offered for sale by its owner, Mr. G. L. Crookham, of Kearney, Neb., as per advertisement, which will be found on page 25 of this issue. If interested, write Mr. Crookham for further particulars after reading the advertisement.

Located ten miles south of Topeka, Kan., is a 143-acre farm of good bottom land, 100 of which are under cultivation, forty acres of pasture and wood land, which is offered for sale in an advertisement that appears on page 25 of this issue, the address of which is Box 62, Wakarusa, Kan. Read the advertisement for further particulars, and write for terms.

One Peerless sixteen-horse engine, one Peerless separator, self feeder and wind stacker, also one Joliet No. 2 corn sheller are offered for sale by Mr. W. R. Hainline, of Blandville, Ill., in an advertisement on page 27 of this issue of The Homestead. Mr. Hainline states that this machinery is as good as new, and that he will sell it at half its original cost. He will sell for cash, or he wishes those who have anything to trade for it to write him stating what they have.

Located within seven miles of Cottonwood Falls, the county seat of Chase county, Kansas, is the Crawford ranch, considered one of the best stock farms in eastern Kansas. It consists of 1,920 acres and is made up of rolling prairie and creek bottom land. It is all in one body and is offered for sale by Mr. Calvin Brewer, of Topeka, Kan. The advertisement appears on page 25 of this issue from which further information can be obtained. Mr. Brewer announces that he can sell this property at a bargain.

A choice 280-acre farm, located three miles northeast of Johnstown, Lamb county, Neb., is placed on the market in an advertisement on page 25 of this issue, by Mr. E. J. A. Rice, of Harvard, Neb. One hundred and fifty acres of this farm is of a black loam soil and in cultivation, and on which 6,000 bushels of grain were raised in 1906. There is a good house and all necessary farm buildings, good well and windmill. The farm is nearly all fenced, including 130 acres in pasture. It is only one-half mile from school. The price is named in the advertisement, and a warranty deed will be given. Address the owner, Mr. Rice, as above.

The advertisement of the Iowa Tanning Company will be found on page 5 of this issue. This is the season of the year when our readers will wish to send their horse and cattle hides to be made up into fur coats and robes. And we can recommend this firm as being one of the strongest and most reliable firms in the country doing this class of work. Send them your horse and cattle hides. They will tan them for you and make them up into a beautiful fur coat or robe. This certainly is an excellent way to get a good fur coat or robe, for when tanned by their process they will last from fifteen to twenty years. And a good fur coat and robe is something every farmer or stockman should have. And when you have an opportunity to secure one of these by simply sending one of your own horse or cattle hides you know just what hide is in your coat. All hides tanned by their process are wind, water and moth proof and never get hard by being wet. They issue a very neat little booklet giving full information regarding caring for hides, how to ship them and the cost for having them tanned and made up into coats and robes. They will be pleased

to send this booklet to our readers if you will simply write them, addressing the Iowa Tanning Company, Des Moines, Iowa.

There has recently come to our desk a book of 550 pages, the title of which is "One Thousand Pointers for Stock Raisers." This book includes a digest of government and private feeding trials held during the past two decades, and it is also an exhaustive treatise on the diseases of all live stock. It is well illustrated, and nearly all of the illustrations are made from natural photographs and not from those that are "fixed up." It will be very difficult to find a disease of horses, cattle, sheep, swine or poultry that is not treated in this book. It sells for fifty cents and may be obtained at this price from the Davis Stock Food Company, Chicago, Ill.

We wish to call the attention of our readers to the advertisement of the Cownie fur coat which appears on page 5 of this issue. We know this is the time of year when our readers are interested in the purchase of a good fur coat. The Cownie coat is one of the best coats to be had and it is made of only the most carefully selected hides tanned by the oil process, which always leaves the hide soft and pliable and will never get hard when it is wet. Every one of their coats is covered with a two-year written guarantee, they being the only manufacturers in the country putting this liberal guarantee on their coat. And this in itself speaks for the confidence they have in the superior wearing qualities of their garments. There is the greatest comfort and satisfaction in wearing a good fur coat. And considering the long time one of these coats lasts, they are by far the cheapest coat that a farmer or stockman can buy. This firm make a specialty of the Galloway coat. This coat is made from the natural black hides of the Galloway cattle. And when tanned by their process it leaves the hide soft, pliable and wind and water proof, and makes a coat that is light, durable and will give the best wear and satisfaction of any coat that can be had. The Cownie fur coats are sold by the best merchants throughout the country. If your dealer cannot supply you, write the J. H. Cownie Glove Company, Des Moines, Iowa.

DON'T FAIL TO READ

the advertisement of Dr. Auld on this page. Every word of his statement is true.

AN IMPORTANT OFFERING OF MINNESOTA LANDS.

The Duluth & Iron Range Railroad Co., through their land commissioner at Duluth, are putting on the market thousands of acres of choice lands in north central Minnesota at low prices and on easy terms. Look for their advertisement on page 25 and write to their Duluth office for full particulars. There are few chances remaining to get Minnesota lands of this quality at such low prices, and on terms where everybody can afford to get himself a home.

THE GREATEST LAND BARGAIN

ever offered is what you will say when you read the advertisement of the W. F. Shelton Land Agency, of Kansas City, Mo., which appears on page 5. They offer for sale a large tract of land near Cheyenne, Wyoming, for only \$3 per acre, but purchaser must buy entire tract. This is a fine opportunity for investors, as you can make a fortune selling this land out in small farms or ranches. Don't fail to read their advertisement and if you are at all interested, wire or write the above named firm for full information regarding this land, at the same time mentioning The Homestead.

AN EXTRA GOOD HUSKING PEG.

Many of our readers are already familiar with the Clark husking peg, manufactured by Mr. R. F. Clark, of 100 Lake street, Chicago. This firm have been placing on the market for some time more than a dozen different designs for husking pegs. Their No. A plate has been improved and they have on hand records from good huskers indicating this book peg will husk out from fifteen to twenty-five bushels per day more than a common peg, and do it without increasing the labor. The average man after he practices a little can also husk cleaner with the book peg than with the old-fashioned pin. Send for catalog or circular to the firm of R. F. Clark, 100 Lake St., Chicago, and mention The Homestead when you write.

THE AMERICAN AUCTION SCHOOL.

The American Auction School opens at Chillicothe, Mo., on December 17th. Col. Harry W. Graham, president of this school, announces a special rate for this term. Those who contemplate a course at an auction school would do well to write today for a catalog which gives all the particulars. Competent instructors have charge of each branch of instruction and a thorough course will benefit any two contemplate taking up auctioneering as a profession. Students who finished the summer term report flattering success since leaving the school and advise all who can to improve the opportunity and take the winter term, which starts December 17th. See page 42 for advertisement and when writing kindly mention this paper.

A GOOD GAME TRAP.

The experienced trapper will have only the best of traps. He has learned by experience that the best trap is the cheapest. Because a mink or a fox in a trap is worth a woodful out of a trap. Because bothering to set a poor trap is a waste of time. Because an animal once caught and lost is that much harder to trap again. Because, to be frank, it is more enjoyable business all around. When men experienced in the art of trapping and hunting embody their ideas in the making of a trap, the article produced should be worth investigation. When further their goods have been used and tried in every possible manner and proved to be as good as claimed, they should bear close investigation. Possibly it will be worth while to go to a little effort in order to become acquainted with such a firm and their business methods. There's the Newhouse trap, probably the best in the world. At least it has stood the test of time. One was found lately that had been set for thirty years. On being released the spring was found to be as good as ever. A good test wasn't it? Another is the Victor, a trap selling as low as good quality will allow. The trapper is generally well-informed along these lines. Many a coop of chickens could have been saved on the farm by a timely use of one of these traps. The watch dog may fail, but a good trap is always and everlastingly on duty. These traps are made

THE OLD RELIABLE
..Anti-Friction Four Burr Mills..
Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog, Bovee Grinder & Furnace Works, Waterloo, Ia.

PILES, FISTULA AND OTHER RECTAL, BOWEL AND STOMACH TROUBLES ARE DANGEROUS IF NEGLECTED

BEWARE OF TREATMENTS BY MAIL. IF YOU ARE AFFLICTED, WRITE AND I WILL TELL YOU HOW TO OBTAIN SUCCESSFUL TREATMENT WITHOUT PAIN. BOOKLET FREE

J. M. AULD, M. D., 80 DEARBORN ST., Dept. 11, CHICAGO, ILL.

by the Oneida Community, Ltd., Oneida, New York. They are the product of skilful workmen and tested materials. More about these people and their goods on page 18. When writing them, kindly mention this paper.

WANT A POCKETBOOK?—YOU CAN GET ONE FREE WITH YOUR NAME PRINTED ON IT.

Mr. Charles E. Ellis, publisher of the Metropolitan and Rural Home, offers to give away 5,000 pocketbooks as explained in his advertisement on page 25 of The Homestead in its issue of October 4th. His offer is to send on receipt of a small amount, stated in his announcement, one of the pocketbooks and a year's subscription to his publication. After the three months have expired, if you order the "Metropolitan and Rural Home" discontinued to your address, Mr. Ellis will return the money paid him; if you like the publication and ask him to continue it, the amount you have paid will pay for a year's subscription, the pocketbook will be yours and you will enjoy a high-class monthly magazine. The pocketbook is a very attractive, substantial article that looks like a bargain in connection with a year's subscription to the paper. Mr. Ellis explains his proposition in a straightforward talk. It is worth investigating. When writing him, be sure to mention The Homestead.

THE HOWE FARM SCALE.

No argument should be required at this day on the wagon or stock scale question for farmers. It is a necessary part of an up-to-date equipment. With a scale you can deal exactly. You know exactly the number of pounds you haul to town to sell. In buying, you know exactly the number of pounds you get for your money. Is there any reason why the farmer should take somebody else's weight for it at both ends. Is it not a certainty that if not always, still in many, many cases you get the short end of a deal if you have no means of your own of checking up weights? Then there's almost daily use for it on the farm itself to show yields of grain, hay, etc., improvement in feeders, amount of feed consumed or weight of animals. These considerations make the Howe scale advertisement in this paper interesting. It's a standard scale, especially adapted to farm use. For over fifty years it has been a popular thing. No one need have any fears of not getting a good, reliable scale if he buys it. If you want a scale look up the Howe Scale Company advertisement on page 35 and write for prices and particulars, addressing them at 50-52 Lake St., Chicago, Ill.

MISSOURI AUCTION SCHOOL OPENS JANUARY 1ST.

Pres. W. B. Carpenter, of Trenton, Mo., announces that the second term of the Missouri Auction School will open on January 1st. The course in auctioneering this term as in the last covers all branches of auctioneering and special attention is given to the farm sales, as there is where the beginner gets the most of his business. In our big sale yard students will have an opportunity to sell every kind of property which he would come in contact with at a farm sale. No other school is offering this opportunity. In fine stock sales you will be fully instructed as to the opening and conducting of sales, also in ring work, which is becoming an important factor, both in general and fine stock sales. Merchandise and real estate sales will be dealt on at length. The sale of real estate at auction is becoming more popular each year, hence we dwell to some extent on this branch of selling. Write today for our forty-page illustrated catalog, which gives complete information. The advertisement of the Missouri Auction School will be found on page 33. When writing for the catalog, kindly mention this paper.

A SPLENDID IOWA FARM FOR SALE.

One of the very best farms in the state of Iowa is offered for sale by Mr. Z. T. Lindsey, of Omaha, Neb. It contains 300 acres located in Kennebec township, Monona county, Iowa. It is five miles from Onawa, county seat, and two miles from Turin, both good railroad towns. The price is \$75 per acre, if taken soon; part cash and part time, at reasonable rate of interest. The house is a good 6-room structure with brick foundation, cemented cellar, etc.; barn is large, with brick foundation, almost new; has large lean-to 12x32 feet. There are ample cribs, bins, etc., hay scales, good well and windmills. The farm is well fenced and will divide into two farms easily. All buildings are well painted and in good condition. About 225 acres under plow this season. The rest good hay land, with the exception of fifteen acres of excellent timber. This farm has no superior for a stock or grain farm. The soil is a rich dark loam. No rocks and no sand. A perfect title given, and the farm should be seen to be appreciated. Mr. Lindsey, the owner, is engaged

in other business and wants to sell. The man that wants a good low farm should write Mr. Z. T. Lindsey, Omaha, Neb., at once. Kindly mention The Homestead when doing so.

THE HORSE WITH HEAVES.

A heavy horse is generally considered about worthless. You have him on your hands to cure or kill. Some people consider a heavy horse and a dead horse the same thing. However, it is not as bad as that. There are only a few diseases that will not yield to proper treatment. There is nothing fatal about heaves, but the trouble is stubborn. You are offered in this issue a chance to try a noted heave remedy. It may not appear again. If you are a skeptic have a little faith. The Chambers Manufacturing Company, of Rochester, N. Y., are the makers of the English Heave Remedy. They will send you a trial package for ten cents. Now, this is fair. They feel so confident in the results of that small package that they know you will want more. Sounds like business, does it not? For you as well as them. Just consider, turn to page 23, invest a dime, cure your horse and be a philanthropist. Kindly mention this paper when writing.

FARMERS MAKE MONEY IN THE GULF COAST COUNTRY.

On November 6th there was a party of twenty-two homeseekers went to Fairfurlas in the Gulf Coast country of Texas, and every one of the party bought land there. This is so unusual that it certainly deserves notice. The Fairfurlas country must be fine and the farmers making money there or some of these homeseekers would have come home without buying. These people were from Iowa, Missouri, Indiana and Kansas. However, this is nothing unusual for Fairfurlas. Only a few days ago a northern man went down there to look the country over and when he came back he reported that the conditions and the lands were better than had been represented. The following are examples from owners of land near Fairfurlas, Texas, as told by themselves. On July 10, 1906, Mr. G. E. Compton writes: "My string beans have netted me this spring \$40 per acre, and my watermelons will net me at least \$45. The corn on the melon ground will pay all the costs of cultivating both crops. Beans were planted in February and shipped in April. On my bean ground I now have a crop of peanuts which I am confident will turn out thirty-five bushels to the acre. There is no better crop for hogs, and the peanuts themselves and a ready market at good prices. The lines make fine hay, and when plowed under fertilize the ground. On this same bean ground that is now planted in peanuts, I shall have either beans or egg plant this fall. The figs I set out this spring are bearing well. My strawberries had fruit on them exactly thirty days from the day they were set out. Blackberries and dewberries are a success. I am confident from this winter's experience that oats will make from thirty to forty bushels to the acre. I rented some ground to the onion growers. Off three acres, at one-quarter rent I got \$175, or \$58.33 per acre. On five acres, from which I have already gotten onions, Irish potatoes and beans, I expect to get 1,200 bushels of sweet potatoes. While this will be a good yield, it is not nearly as large as some I have gotten. My experience here has been entirely satisfactory." This is only one of the many instances showing the wonderful profits that are being made by the farmers in the Gulf Coast country at Fairfurlas. The Artesian wells there furnish an abundant supply of excellent water. The climate is the finest in the United States and the land is cheap as yet. The building of railroads into that section only recently is causing the land to develop very rapidly, however, and land is advancing. Eventually these lands will sell for more than the land in southern California, which everyone knows brings enormous prices. The lands at Fairfurlas are hundreds of miles nearer market, which is a great advantage. The facts are that this land is doubling in value so rapidly now that it seems incredible to those who have not investigated. The crops are so profitable that it is hard to believe the truth about it. But those who doubt will find the statements true if they will visit Fairfurlas. For instance, the above statement of Mr. Compton seems big to the northern farmer, nevertheless it is a fact. There are great opportunities at Fairfurlas. It is a great country for cotton, corn, alfalfa and many other crops. If any of our readers are interested in the Gulf Coast country they should look up the advertisement of the Fairfurlas Immigration Company, of Kansas City, Mo., in the Lands and Homes department of this paper, and write them. The company are reliable and will gladly furnish full information, latest map of Texas, etc., free to anyone who will ask for same. Write at once.

Direct from the Mills to You

BEACON-ITE ROOFING

We Pay the Freight

When you buy roofing you expect it to last, don't you? You don't want to be incessantly patching little leaks after every rain. Isn't this just what you are doing now? You have had some experience with tin and shingle roofing. Are you satisfied with their lasting qualities? BEACON-ITE is a long wool fibre thoroughly saturated with a secret preparation that makes it absolutely water-tight.

It will not rot or rust. By buying direct from the mills and putting it on yourself (we furnish all necessary nails and cement free), Beacon-ite is the most inexpensive roofing you can buy. If you want a roofing that will last and need no patching, write to-day for FREE samples of BEACON-ITE.

BEACON-ITE MILLS, 1105 N. 2nd Street, St. Louis.

IN THE GREAT SOUTHWEST.

The Shawnee county, Kansas, apple crop which is to be put in cold storage at Topeka will be, in round numbers, 60,000 barrels. While this is a lot of apples, it is not as many as it was supposed there would be, along in the summer. The loss from dropping was greater than in recent years, but there seems to be plenty left yet.

More than twenty sections of land in Shackelford and Stephens counties, Texas, have been burned over by a prairie fire, which is still burning. The fire destroyed a number of buildings and many miles of fences.

The recent snows have made the rabbits keep to shelter. In one day seventy-five hunter's licenses were issued by the clerk of Wyandotte county, Kan.

The Ladies' Aid Society, of Anadarko, Okla., earned \$16 with which to help finish their church by husking corn. They husked forty-two bushels in less than four hours. They then sold the corn at auction, receiving ten cents a bushel more than the market value.

In unison with the general advancement of the South, the state of Louisiana successfully arranged and held its first state fair, at Shreveport. Col. Charles Schuler, the commissioner of agriculture and immigration, has been most active and deeply interested in its promotion, and the result is a source of much gratification to the people of the state.

The storm disturbances of the last few days have caused much damage throughout the South. In the region of Memphis, Tenn., there are many claimed to be homeless, as the river has broken out, flooding rural and railroad property.

The board of regents of the Southwest Missouri State Normal has employed a firm of architects to draft the plans for the new normal building and have charge of the construction. The new normal is to be of concrete construction faced with stone. It is to be fireproof throughout and will be heated and ventilated by the fan system.

An estimate of Indian Territory's school population places the total number of Indians at 10,498, whites 42,820, negroes 6,800. This leaves about one-half of the children of school age without school facilities.

There are twenty-two county high schools in the sunflower state. Montgomery county has one of the costliest buildings of this kind. It was built at an expense of twenty thousand dollars. Seven teachers are employed and the annual expense account is seven thousand dollars.

Oklahoma has taken the initiative in arranging for a national drainage convention, to be held in Oklahoma City, December 5th to 7th. It is generally admitted that there are more acres of land to be reclaimed by drainage than there are acres of semi-arid land that may be made productive by irrigation.

The Missouri State Corn Show will be held in Columbia, Mo., January 7 to 12, 1907. In addition to the corn show, meetings of the Corn Growers' Association, the Missouri Improved Live Stock Breeders' Association, the State Board of Agriculture and the State Dairymen's Association will be held during the same week.

The season for corn growing in Indian Territory has been especially favorable this year. The acreage was about 25 per cent greater than in any former year and the yield was correspondingly large. Railroads, as usual, have been unable to furnish enough cars to move the crop.

Oklahoma City is rapidly growing in importance as a cotton center. Nine hundred bales have been ginned this year, which is twice as much as was ginned last year. Cotton is constantly arriving and indications are that a great deal more will be ginned before the end of

the year. It is expected that there will be 100,000 bales of cotton handled through Oklahoma City this season. The compress has already handled about 25,000 bales, and it is estimated that fully 25,000 more will arrive before the end of this month.

Railroads claim not to be opposed to the development of the Missouri river for commercial transportation. The belief that the railroad will bring business to the boats and vice versa seems quite plausible.

David Rankin, the noted stock feeder of Tarkio, Mo., is not feeding as many cattle this season as last. High-priced materials is the reason.

Kansas has fifteen railroads and 11,038 miles of track. The Santa Fe system has the most mileage; including branches and main lines, they own 2,415 miles.

Cotton pickers in the vicinity of Chickasha, I. T., picked with two inches of snow on the ground. The season there was late; however, the crop will be harvested without loss.

Under the auspices of the State Board of Agriculture of Missouri, a series of very interesting meetings was held in the town hall at Greenwood, Saturday, November 17th. The lectures were by Professor C. H. Eckles, of the department of dairying at the state university, and Dairy Commissioner R. M. Washburn. The attendance was remarkably good, and a great deal of interest was manifested in the addresses, which covered the entire range of dairy farming—selection of cows, methods of feeding, care of milk and profitable market for the output. Remarks were made by Dr. Cutler, pure food commissioner, and Mr. Ambrose Wright, Milk Inspector, of the Kansas City Health Department, on "The Necessity of Better Sanitation in the Dairy." Mr. Wesley P. Lummis, of Pleasant Hill, gave an interesting report on some yearly milk records that he has been keeping. George C. Mosher, president of the Missouri State Dairy Association, gave an address on "The Commercial Advantages of Dairy Farming over General Crop Raising on High-Priced Land Situated So Near to a Large City as Greenwood is to Kansas City."

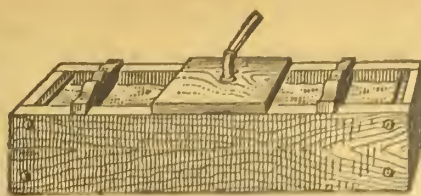

Uncle Sam's Agricultural wealth.

Economic revolution in the science of agriculture, which became noticeable in this country half a dozen years ago, has continued during 1906, with tremendous effect upon the nation's prosperity.

The farmer has become aware of the importance of the place that he occupies in the Republic, and in the pride of his occupation he is ready to offer this yearly account of himself to the people.

The value of the farm products of 1906 was 8 per cent greater than that of 1905, 10 per cent over 1904, 15 per cent over 1903, and 44 per cent over 1899.

The value of farm products on a commercial basis, estimated for every detail, is over six and a half billion of dollars. The amount is beyond comprehension. Only by representing the vast figure in

another form can one comprehend its immensity. Were that sum of money to be invested in shelled corn at twenty-five cents a bushel it would represent a pile of corn a quarter of a mile-deep over an area of one mile square.

Farm products continue to be so far beyond the national requirements that the farm still overshadows the mill, the factory, and the workshop in providing exports. With his surplus beyond the nation's need, the farmer has loaded the fleets of oceans. The products were exported to the value of \$976,000,000 during the fiscal year ending June 30, 1906—enough to build a high-class railroad halfway around the earth. This is the largest amount ever reached by agricultural exports for this or any other country, and exceeded by \$24,000,000 the extraordinary value of 1901, which had previously been the record year.

Principal among the items that make the increase over the fiscal year 1905 are grain and its products, chiefly wheat and flour, for which the gain was \$79,000,000; packing-house products, for which the gain was over \$37,000,000; cotton, \$19,600,000; various seeds, \$6,355,000; dairy products, \$3,900,000; and live animals,

These are the buildings of the J. Stevens Arms & Tool Co., of Chicopee Falls, Mass. Every man who has ever used a firearm of any kind knows something about the character of the goods made by the Stevens firm. Their rifles are standard throughout this country, and abroad as well. This reputation has been made and maintained on account of the fact that the very best material and workmanship is put into every article manufactured by this firm, and at the same time their prices are reasonable. Take, for instance, their little Krag rifle, No. 65. It is very simple in construction, containing only a few parts and can be easily taken apart. It is cocked by drawing back the hammer, which is made with a large knurled head. It has a round 20-inch barrel of blued steel, and this rifle sells for \$5. The advertisement of the Stevens firm will be found on page 8 of this issue. Send for catalog and mention this paper when you write.

tion of cows, methods of feeding, care of milk and profitable market for the output. Remarks were made by Dr. Cutler, pure food commissioner, and Mr. Ambrose Wright, Milk Inspector, of the Kansas City Health Department, on "The Necessity of Better Sanitation in the Dairy." Mr. Wesley P. Lummis, of Pleasant Hill, gave an interesting report on some yearly milk records that he has been keeping. George C. Mosher, president of the Missouri State Dairy Association, gave an address on "The Commercial Advantages of Dairy Farming over General Crop Raising on High-Priced Land Situated So Near to a Large City as Greenwood is to Kansas City."

\$2,400,000. Products exhibiting a decrease were mostly inconsiderable. In hops, the decline was \$1,355,000; tobacco, \$992,000; vegetable oils, \$726,000; fruits, \$440,000.

While the value of all cereals dropped about forty million below 1905 totals, the number of bushels above last year's yield is one hundred and twenty million. Corn remains by far the most valuable crop and the figure is right next to three billion bushels—a trifle under last season's crop. The cotton crop, fiber and seed combined, follows corn in order of importance although it is only three-fifths of the value of that crop. In Texas alone the cotton crop is greater than that of British India and three times that of Egypt. Hay is a crop that receives small popular attention, yet it is third in value. Though short by about eight million tons it is valued at six hundred million of dollars.

The fourth crop in order of value is wheat. It is only eight million bushels short of the largest crop ever grown, that of 1901.

On account of unfavorable weather the oat crop has fallen below the usual amount. It is, however, but little below the best crop on record, that of 1901, and will be valued at three hundred million.

Potatoes beat out barley in the race for rank and will make a probable crop next to the highest production which was in 1904. Three hundred million bushels at an average price of fifty cents is the estimate.

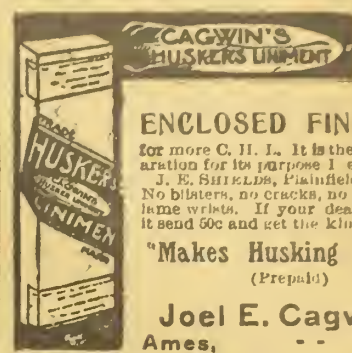

Barley has gained 21 per cent in pro-

CHAMBERS MFG. CO., BOX 315, Rochester, N. Y.

duction during the last seven years. This year's yield is the highest yet, and will bring growers around sixty-five million of dollars. The tobacco crop will be worth nearly as much, while beet sugar has made a rapid stride. Five times as much beet sugar was produced this year as was made seven years ago. Flaxseed totals a value of twenty-five million which marks its highest point. Rye is a minor crop and is on a par with rice.

On the whole, crop values have been neither notably high nor low in comparison with recent years, but the crops are so many in number that losses meet gains. Crops have been on such a high price level in the general average that they have raised the total crop value somewhat above 1905 and the high preceding years. To reach a still higher point in this extraordinary series of high annual values than had been touched before is an achievement that deserves attention.

Those Dangerous Stable Doorways.

To the Editor of The Homestead:

A much larger number of farm animals than is necessary are injured every season. If it could be accurately known just what number are bruised and lamed in passing through stable doors and passages, the result would be a surprise to many. One thing that farmers are very careless about is the condition of the approaches to stable doors. The doors themselves are often so narrow that an animal is sure to bruise a hip, while it is sometimes necessary to mount a stone wall a foot or two in entering, or jump into a mudhole when going out.

I know it is a difficult matter to keep up an approach when earth or manure is used, and especially with a vigorous lot of hogs to unearth every bit of grain or ashes it may contain. Lumber is expensive and does not last long in such a position. Nevertheless, the fact remains that a faulty entrance is a constant menace to sound limbs and bodies. Everyone knows how to construct a safe approach to suit their means. If earth is used, then be sure that winter does not come on before that ugly hole at the cow stable or the horse entrance is filled.

A number of times I have heard my neighbor complain that their horses got sweeney when doing the lightest kind of work. In such cases, one could usually find the entrances to stables in the conditions already described. Again, one frequently sees animals, especially horses, with a fractured hip, hip-shot as it is called. A jam against the side of the door causes one of the hips to drop, giving an ungainly appearance to the gait. Then there are other minor accidents, such as bruised knees and hocks, and sprained joints, that may lead to serious consequences. A few hours' work in fixing up such sources of trouble will be about the best insurance against accidents to stock that one can invest in.

CUT ICE

With the Dorsch Double Row Ice Plow. We guarantee it will cut more than 20 men sawing by hand. Cakes are cut uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy man can use. You can cut for others and make the price of our plow in two days' use. Ask for catalogue and introductory prices. JOHN DORSCH & SONS 216 WELLS ST., MILWAUKEE, WIS.

MADE IN THREE SIZES

Experiment With Hand-fed Cattle.

With the advent of creameries, skimming stations, and hand separators, the question of successful and economical raising of calves on skimmed milk is one of growing importance and vital concern to every creamery patron and private dairyman. As land increase in value, we can no longer afford to keep a cow the entire year for raising one calf to be used as a feeding steer.

For the last four years the Kansas Experiment Station has almost continuously been conducting experiments in rearing and feeding calves on skimmed milk or substitutes for skimmed milk. The material given in this bulletin is the result of our experience.

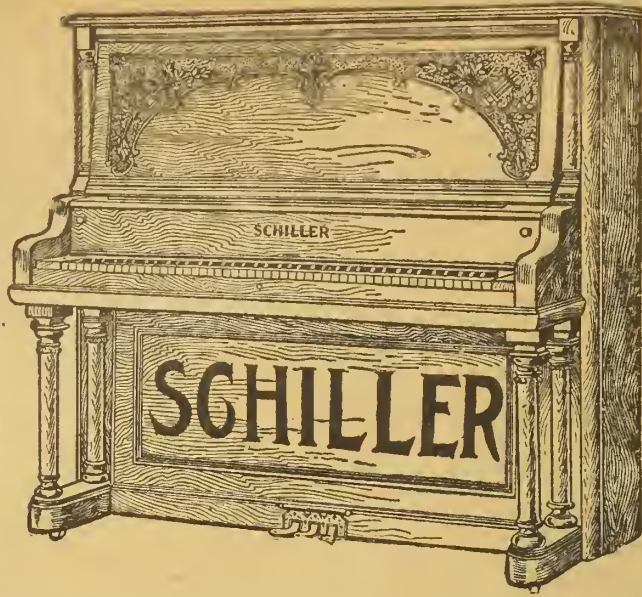

Strong, thrifty calves cannot be expected from cows that have received poor feed and poor care previous to calving time. The cow must be supplied with wholesome and nutritious feed, containing the elements that are necessary to the proper development of bone and muscle in the fetus. It is better for the cow, and we believe better for her record in the production of milk and butter-fat, if she can go dry for six or eight weeks previous to calving. If it is impossible to dry her up without injuring the udder, continuous milking should be practiced.

Where the cow has access to good pasture with plenty of spring water she needs little or no attention until two or three days before calving. If she has secluded, shady and otherwise comfortable quarters separate from the other cattle, and is carefully watched by an attendant she may need no other attention until after the calf is dropped. Sometimes luxuriant pastures will stimulate heavy milkers to produce too much milk prior to calving, in which case the supply of feed should be reduced, and in extreme cases the milk removed before calving.

When kept on dry feed care should be taken to provide plenty of succulence. Ensilage and roots serve an excellent purpose, the object being to keep the bowels loose. When alfalfa or clover hay is used for roughage very little grain is necessary. With less nitrogenous rough feeds, a grain mixture of two-thirds bran and one-third oil meal is excellent. Soy beans may be used as a substitute for oil meal.

In cool or cold weather the cow should be placed in a box stall well lighted, with plenty of ventilation. When the calf is dropped it is well to blanket the cow until she regains her normal condition. In the absence of anything better, gunny sacks sewed together will do very well. Light-loosening feeds, water from which the chill has been taken off, should be given. Cold water is liable to cause contraction of the womb and detention of the afterbirth. If the latter is not discharged in from twenty-four to forty-eight hours it should be removed. If the udder is heated and caked it is advisable to milk the cow frequently, though not quite dry, and the udder should be steamed by rubbing with a flannel cloth dipped in as hot water as the hand will bear, after which the udder should be rubbed dry, and treated with camphor, olive oil, or camphorated vaseline. If there are any signs of constipation, it is well to administer from one and a half to two pounds of Epsom salts dissolved in water. All these points will aid materially in keeping the cow in good, healthy condition, and consequently give the calf a good, healthy start.

As soon as the calf is licked by its mother, it should have strength enough to rise and suck; if it has not, it should be assisted. The calf may be taken away from its mother after its first meal, or, if preferred, can be left with the cow until the milk is good. It is easier to teach the calf to drink if it is taken away early. Our experience is that if the calf is taken away at once, or when four or five days old it will make good gains the first week, but if

SHIPPED SAME DAY TO WINNER and party advised by telegraph that it is coming. In case of tie a prize of equal value will be given those tied. Every club raiser will positively get an elegant Christmas present free.

DON'T DELAY. HERE'S HOPING YOU GET THE PIANO. ADDRESS, SUCCESSFUL FARMING, DES MOINES, IOWA.

This Piano Absolutely Free

This elegant, upright mahogany Schiller Piano will be given absolutely free to the man or woman, boy or girl in the state of Iowa who sends Successful Farming the largest club of subscribers between now and December 22d.

This is a SPECIAL CHRISTMAS PRESENT to Iowa people. No person living in Des Moines is allowed to compete. This is a very handsome \$375.00 Piano, and one worth many times the value of the largest club we will likely receive, but we want Iowa people to know about our paper. The Piano is a beauty, fancy figured mahogany, 7 1-3 octaves, positively and fully warranted in every shape and manner by E. H. Jones & Son, Des Moines, the largest piano house in Iowa. The Schiller is absolutely first-class. Ask your local piano dealer.

Our paper is the handsomest agricultural paper published elsewhere. The price is only 25 cents per year and any person will give so small an amount for such a good paper. It is only a question of doing a little work. If you want this piano it can be yours.

Earn This Piano as a Christmas Present To Your Wife, Daughter, Mother or Friend. You Can Do It Easy If You Go To Work.

We also publish the LADIES' FAVORITE MAGAZINE, a handsome monthly story paper at only 25c per year. Subscriptions to this paper count the same as to Successful Farming. Send for samples of both papers. WRITE QUICK. Remember this is not a long drawn out contest. Every letter must be mailed by Dec. 22d. Piano will be awarded Monday, December 24th and every club raiser will positively get an elegant Christmas present free.

left two or three weeks, the first seven days after weaning will be a losing period. If the cow's udder is caked it is desirable to leave the calf with her, as the rubbing of the calf tends to alleviate the inflammation.—Kansas Bulletin.

This Progressive Agricultural Age.

To the Editor of The Homestead:

Being a farmer by occupation and a subscriber to this paper, I am always interested in perusing its columns. Among the vast number of subscribers there are a few who, by their communications to the paper, render valuable information to those interested in the various subjects discussed.

The farmer as a rule has not had the training which enables him to write articles for publication. Under the directions of skilled workers in our agricultural colleges methods of farming have been scrutinized and improvements have been suggested. Many of our young farmers are seeking an agricultural education at these institutions, and no doubt we will hear from them in due time.

This has been a prosperous season for the farmer. The good old summer time was followed by a pleasant fall. Corn husking is about finished in this section and soon it will be in the crib. It is to be expected that in due time winter with its usual discomforts will be here. The average farmer of today is well prepared for it. How different is the situation now to what it was forty years ago. Then, straw sheds and rail fences were the principal protection for our live stock. Water was obtained mostly from slough wells, drawn up in pails by means of a forked stick. Large and convenient barns now stand where once the straw sheds stood, and a system of water works is installed that supplies not only the dwelling house, but the surrounding buildings as well. Telephones reaching in all directions, the daily mail delivered at the gate, interurban roads, some constructed and others being constructed, and even the automobile are luxuries that many of our farmers and their families enjoy at the present time.

With the children at school and the old folks at home enjoying the fruits of their past labors, it is well to give heed in many ways to the future. The older ones whose looks are tinged with gray no longer care to toil and battle with life's active duties. They are ready to step down and out and let the younger generation take their places. It is said that the young man ought to commence where the old man left off. Conditions are different now from what they were in the past; hence it might not be good policy to follow the above advice in all respects. In this age of progression it behooves the young man of today to get a hustle on himself, it matters not what vocation in life he chooses. I have great faith in the future of our country, especially the agricultural part of it, and have no fears as to the fu-

You can run it alone, because the tools operate through center of platform, while the horse walks around it. Bore easily through frozen ground; 100 ft. in 10 hrs. Mounted on wheels, and easily moved from place to place. Write for Catalog. Lisle Mfg. Co., Box 26, Clarinda, Iowa.

LANDS AND HOMES FOR SALE

The CANADIAN West Is The Best WEST

160 ACRES
FARMS IN
WESTERN
CANADA
FREE

THE testimony of tens of thousands during the past year is that the Canadian West is the best West. Year by year the agricultural returns have increased in volume and value and still the Canadian Government offers 160 acres free to every bona fide settler.

GREAT ADVANTAGES

The phenomenal increase in railway mileage—main lines and branches—has put almost every portion of the country within easy reach of churches, schools, markets, cheap fuel and every modern convenience. The ninety million bushels of wheat crop of this year means \$1,000,000 to the farmers of Western Canada, apart from the results of other grains as well as from cattle.

For literature and information address

Superintendent of Immigration
Ottawa, Canada,

or the authorized Canadian Government Agent,

Investors Agent and Colonizers. Large Tracts for Investors.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$80 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS,
KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. This is no experiment, as the country has been thoroughly tested. Special inducements to parties buying this fall. Railroad fare refunded to purchasers. Write for pamphlet to

If you want to buy a good farm of 320 acres in Lyman Co., S. D., write to the homesteaders. Mr. and Mrs. S. A. Barton, Chamberlain, S. D.

DAY BY DAY

Agricola

Back in sterile New England Agricola became acquainted with the stone fence. Durable? Well, no. The stones were durable, but let the "bell wether" jump over and all the flock scud after and that fence would disintegrate. And it had to be well-laid to stand the storms and buffeting of adverse weather. And so it was that when he saw stone fence posts out in "sunny Kansas," with barb wires stretched from post to post, it looked as if there was a durable fence.

But in his travels he found a broken gate post, and it was a stone post. Then he realized that although stone does not rot, it may be comparatively brittle, and these posts were heavy and bungling and limited in supply to a peculiar geological formation. The rock strata would split into passably good paving stones, and would split with less regularity in the other direction, making posts of rather irregular shape.

Up in northern Iowa he saw a fence made by a farmer with rock bases to the posts, and an iron rod set in a drilled hole in the top of the rock. The iron rod was the post—the base was a boulder, of which there are many in that region. They came down from the north in the glacial period, and where a glacier was stalled by the conformation of the land it thawed and dropped the boulders. They are granite, and of course very durable for building purposes, but not convenient for fencing. A large church was built of one of these boulders, or practically of one. For artistic effect some fragments of another rock of another color were used, but enough of the "big boulder" was left to have completed the church.

And since natural stone is not easily made into good fence material, attention has been called to artificial stone—cement and sand. I have seen different kinds of cement posts. They need reinforcing with iron rods or wire to insure against breakage.

A combination post bids fair to be durable and satisfactory, unless the cost be an objection. It has a cement base and an angle iron post above ground. The angle iron is set in a mold and rich cement poured in. There is a patent on this post, and the royalty adds to the expense. But why not make the hole for the post, fill it with cement and stick in the iron part while the cement is green? This is what Agricola will try to know next spring, and a correspondent of this paper lately said some of the railroads in Kansas are now fenced with that kind of post, using common gas pipe for the iron part.

Farmers have learned to cover their stock water tanks, leaving a hole in the cover through which cattle drink. This helps keep in the heat, but when the water gets low, the surface is exposed to air and the heat passes off by radiation. Agricola adds to this method a "well" in the tank just the size of the hole in the cover. This well is made of matched boards or shiplap, so as to be tight. It reaches to within two inches of the bottom of the tank. Result: No air can get to the surface of the water except in this small well; consequently, radiation is arrested. As cattle drink, fresh water enters at the bottom and takes the place of that used by the stock. This well is a great help in protecting from freezing.

There is one rule which determines whether hogs have a suitable sleeping place. There are others, but this always applies. If the smoke or steam when they leave their bed and come out for

breakfast, then conditions are bad. The hog is a semi-torrid animal. He can stand much cold when he has a thick lard blanket for cover, but he chills readily in sudden exposures to cold wind when warm with sweat, and congestion and disease follow.

These cotton husking mittens are a great blessing. When Agricola was young and innocent he had to husk bare-handed, and the suffering from chilled and sore hands still lingers in memory. Then the leather husking glove was invented, but it was so stiff that nimble husking was out of the question. The thumbs of husking mittens wear out first, and so they are now made with two thumbs. You stick one inside and when the first thumb is worn through, turn them and use the whole thumb.

The forefathers used to husk five rows at once, and the fathers did the same, letting the horses straddle the middle row. The boy, if there was one, took this "down row;" if not, a man had to stoop and gather the ears. It was a poor method. It was slow, and it wasted corn. The three hands, one on each side and one behind the wagon, husked no more corn in a day than will one good man now with the wide "bang-board" on one side, and the horses kept from the unhusked rows. It is related that when Secretary Wilson lived on his Iowa farm he husked the "down row" and had Roberts' "Rules of Order" fastened to the hind endgate. He husked his row and learned parliamentary tactics at the same time; went to the legislature, to congress, was agricultural professor at Ames, and finally became the greatest secretary of agriculture in history, which only shows that he is an exception.

I firmly believe in a house for farm machinery. It looks so wasteful to see fence corners and groves filled with machinery going to decay. But on the other hand, it does not always pay to use an old machine, even if it is as good as new. Who would take an old Marsh harvester as a gift and use it? And the old self-binders were horse-killers; the old corn-binders wore out regardless of shelter when not in use, as the oiling facilities were bad, and dust and grit gained easy access to the bearings. Still, poor machinery should be knocked to pieces and the pieces sold or burned, and good machinery should be kept under shelter when idle.

I have never seen one of the corn-huskers in use. I mean the kind which husks standing corn from the hill. A neighbor took one on trial, but he did not like it well enough to buy it. In their present form they will husk, but they are clumsy affairs, and the men and horses necessary to run a machine and the wagons to catch one corn can get along faster and with less waste without a machine. If constructed so as to husk two rows at once, and that does not look impossible, then the machine might expedite work, but the delays of a machine stop the work of a whole gang, while men husking separately have no such delays.

Two ways to waste corn fed to hogs are to feed in the mud or in an unprotected, wind-swept spot, and the other is to feed under even good conditions, but make the hogs sleep on a stone or cement floor.

We must study to grow the stock feed almost exclusively. This buying by-products for balancing the rations has increased the demand and the increased demand has increased the price beyond reason. By planning to grow more protein, we shall need to buy less, and the lessened demand will level down the price of what we do need to buy.

About the only practicable rust preventive for oats is to sow them early

HEAT YOUR HOUSE STORE, CHURCH or SCHOOL HOUSE WITH
Bovee's Compound Horizontal Furnace Radiator 11 YEARS on the MARKET.
THOUSANDS IN USE. BURNS ANY KIND OF FUEL.
Having BOVEE'S Improved Hot Blast Ventilating System and Return Circulating Radiator, which gives perfectly pure air and saves One-Third of the Fuel. Any handy man can properly install one of these furnaces with all connections in a short time. These furnaces absolutely make the best and most durable heating plant in use. Everything guaranteed to be first-class. We can save you 40 per cent on the cost of your heating plant, our price being but little more than good stoves. Send for catalog. We have the largest and best line of furnaces in use, including our celebrated WATERLOO Furnace, complete for \$43.
Manufactured and Sold by the
BOVEE GRINDER & FURNACE WORKS, WATERLOO, IOWA

and use heavy, vigorous seed. The heavy seed can be selected by running the seed oats through a fanning mill and blowing out the lighter grain.

The danger of overfeeding cows is chiefly in feeding too much concentrated feed. They will not overeat of roughage, and if the right proportion of the ration is roughage, they cannot overeat.

Tree peddlers have been both a blessing and a curse. It is better to buy of your local nurseryman, but many a man will not buy unless beguiled into it, and so his farm would have been unplanted to trees but for the wiles of the tree peddler.

The Boar and How to Manage Him.

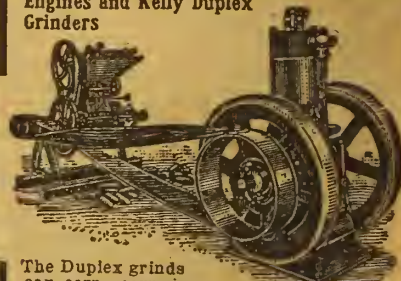

It is frequently said that the bull is half the dairy herd. With equal truthfulness it can be said that the boar is half the swine herd. We may select a sow, and she may prove to be a disappointment. Often it is so when a farmer begins to go in for a system of breeding and selection, not knowing the heredity of former ancestors. You must have good stock to begin with. Unless you have a good sow, there will always be trouble. The evil results of an inferior boar can be seen in the first litter, and at once this class of animal should be gotten rid of. Much of the success of a boar depends, in addition to his breeding, upon the feed and care that have been given to him while young.

The great bulk of farmers, however, are not so situated as to be able to make a personal selection from the herds of good breeders. In many instances this is perhaps a good thing, as the number of pure-bred pigs of great beauty and form lead farmers astray from intelligent selection, and in the end it is best to leave the choice to the integrity of the breeder. I have always found it a good plan to wait until about the end of the autumn before purchasing, as it is not advisable to have a boar very long before you intend to use him. Every pig breeder should know the points of a good pig, or at all events have an ideal which he will be aiming at. The marks of different breeding are always plainly visible. Watch for a narrow back, a drop behind the shoulders, a short girth around the heart, walking on the dew-claws, or needlessly long, coarse, bony legs, large long, coarse head and ears, narrow over shoulders and loin, tucked-up ham and flank; in fact, any indication of an unprofitable feeder. The buyer should know exactly what he requires, and write to the breeder of pure-bred pigs, stating the objectionable and the desired points. He will see that you understand your business, and this will cause him to take a pride in his reputation, and fill your order to the best of his ability with a type of boar that for a series of years will lead to a steady improvement. Do not have an ideal color, and sacrifice everything else for color. Remember that the slaughter man erases color and spots. It is a good pig he asks for, and not a fancy-colored animal. Never confine yourself to a particular color when ordering a boar. So long as he is not just the opposite color from that which purity of type demands, you are all right.

Where shall we keep this boar? is often a perplexing question to farmers. If

THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

The O. S. KELLY WESTERN MFG. CO.
DEPT. H, IOWA CITY, IOWA.

When writing to advertisers please mention this paper.

pig breeding is to be carried on at a profit, this is a question that has to be dealt with. As an important industry on a farm, it should be established on a proper basis. There are many different ways to manage the boar. I have tried and seen many ways, and have long since arrived at the conclusion that it is safest, and entails the least work and vexation, to have a permanent yard or small paddock for the boar. The fence, of course, must be pig-proof. For protection from the weather, erect a shanty-like pen, eight feet by eight feet, and high enough to permit of entrance when cleaning it. In order to guard against waste of food, there should be a feeding floor, at least ten feet in length, and wide enough to permit of the boar standing on it in front of his trough. It is best to have the feeding trough and floor at one corner of the yard, so as to be more secure from being rooted up. If natural drainage can be secured all the better, but if not, bedding must be provided to keep the yard healthy and clean. If one or two trees are growing in the yard, to give shade in summer, this will be a great advantage. Pigs like comfort, and unless it is provided, do not thrive well.

By having the boar confined to his enclosure, a farmer will never be disappointed in having some sows in pig when not wanted, as is often the case when the boar is permitted to run at large, and, perhaps, travel of his own free will from farm to farm, for miles around. In a pen he is not teased and fretted by sows, which is detrimental to his development.

The boar should have full rations of food calculated in its nature to grow and develop him, yet not to fatten him. As long as the season will permit, he should never suffer for want of green and succulent food. It always adds materially to his growth and health. Neither should he ever know the want of a regular supply of salt, ashes or chareol. Everything, in fact, that will add to his comfort, vigor, growth and health will be found a paying investment in his future offspring.

Selection, food and care are more powerful in developing possible characteristics than most of us, perhaps, realize. Our own management must go hand in hand with the improvement of the herd. In conclusion, above all, farmers should not forget to keep the boar thoroughly under subjection, because if he proves a worthy sire, he, too, like the sow, will add improvement to the herd, that too often fails in immature breeding.

Recollect, also, that the service of the boar must be restricted. It is often the excessive service of the boar that shows its detrimental effects in the offspring, no matter how well he is bred or cared for.—[Writer in Kansas Board of Agriculture Report.]

CHRISTMAS HINTS.

BY WINNIE FAIRFAX.

May be in His more human weariness
Came little things to minister and bless;
To touch Him in an humble way, to please.
Perhaps came little earthly memories;
The simple stir of Nazareth's sun-washed
street;
The busy sound of Mary's housewife feet;
A pattern of leaf shadows at the door;
The scene of fresh curled shavings on the
floor.
—S. H. Kemper, in McClure's Magazine.

Behold I bring you glad tidings of
great joy, for unto you is born this
day in the city of David a Savior which
is Christ the Lord.—Bible.

We have a suggestion to make this
Christmas to the readers of The
Homestead. If you are blessed with
plenty of this world's goods and
your children are liberally supplied with
toys and books, why not leave the
Christmas tree until New Year's day,
then trim it anew with small bags of
candy, nuts and any kind of sweetmeats
that children love, put on all the toys that
your children are willing to spare, and
then invite in those children whom you
suspect have had rather a cheerless
Christmas and give them the time of
their lives? It will do your soul good to
see how happy they will be over this be-
lated Christmas, and your own children,
if they are the right kind will be quite
as happy in the giving as the others are
in the receiving. We do not mean that
the children should be forgotten at
Christmas time, but the New Year's tree
will not only be a happy surprise for
them, but will serve to bring the lesson
home to our own children that it is more
blessed to give than to receive.

If ever the capable housewife is ex-
cusable for wishing that her board
be well and generously spread it is at
the holiday season. Then it is that the
absent ones return to partake of Christ-
mas cheer and friends and neighbors
most heartily respond to the invitation
to make merry with each other. It is
no mean gift to be a good cook. It is
an art and a science to be able to pro-
vide food that is at once delicious and
wholesome and any woman that has this
gift may well be proud of her accom-
plishment. But to be a good cook pre-
supposes good and reliable recipes to
work from, and these we are now giv-
ing are both reliable and delicious. We
also give a very satisfactory menu for
the Christmas dinner. This of course
with the understanding that it may be
varied to suit the tastes of the different
members of the family.

mace, two teaspoonfuls each of ginger,
allspice, cloves, cinnamon, one pound cit-
ron, two pounds seedless raisins, two
pounds large raisins, seeded, two pounds
currants, a glass of grape jelly. Chop
the meat into pieces the size of French
peas and chop the suet as fine as pos-
sible. The apples should be chopped into
pieces as large as navy beans, the rais-
ins left whole and the citron in thin
slices as large as half a silver quarter.
Use real New Orleans molasses, and final-
ly, if the mince meat is too thick, thin
with cider.

Stuffed Ham—Soak and scrub a ham,
and remove the bone with the aid of a
sharp, small knife. It is a tedious pro-

cess, but not very difficult. If possible,
get your butcher to do it for you. Into
the space left pack a stuffing of bread
crumbs seasoned with onion, pepper and
Worcestershire sauce or mushroom cat-
sup, and moistened with butter. Sew the
ham in shape in a piece of cheese-cloth,
and boil in water enough to cover it,
adding two tablespoonfuls of vinegar to
the water. Boil twenty minutes to the
pound. Let it get cold in the liquor,
then take it out and put under a heavy
weight. Remove the cloth and the skin,
ornament the top of the ham with dots
of paprika and black pepper, and serve
for the Christmas night supper.

Jellied Chicken—Boil a fowl or large
roasting-chicken until tender, putting it
over in cold water and letting it cook
very slowly. Remove the skin, and cut
the meat into neat pieces of nearly uni-
form size. Strain and clear the liquor in
which the chicken was boiled, season it
well, and add to it gelatine in the pro-
portion of one tablespoonful of this to
one pint of the liquor. The gelatin must
first be soaked in cold water. Put a
layer of chicken into the mold, arrang-
ing between the pieces of chicken slices
of hard-boiled egg, stoned olives and
capers. Pour a little of the partially
formed jelly you have made from the
liquor over this, put in another layer of
chicken, more jelly, and continue until
the mold is filled. Set on ice until cold
and hard, then turn out on a flat dish.

Boston Brown Bread—One cup corn-
meal, one cup rye flour, one cup sifted
graham, one teaspoonful salt, one cup
New Orleans molasses, one cup sour milk,
with one even teaspoonful soda dissolved
in it, one cup sweet milk. Mix well in
the order given, pour into a well-buttered
five-pound lard can, cover tight; put into
a pot half full of boiling water, boil
five hours, without stopping.—Mrs. I. A.
Baldwin, Oakland.

Pumpkin Pie—Select a ripe pumpkin,
cook down till as dry as potatoes. Of
this, take two cups (teacups) rub through
a sieve or colander, add one-half tea-
cup sorghum molasses and the same of
sugar and flour, five eggs, one table-
spoonful each of ginger and cinnamon, one
teaspoonful of vanilla and salt and a lit-
tle pinch of soda. Beat thoroughly, then
add seven teacups of new milk.

Mashed Sweet Potatoes—Bake the po-
tatoes, cut in halves lengthwise and
carefully scoop out the potato. Mash
well, add a little butter, pepper and
salt and a little cream or milk; beat
until creamy; return to the shells, heap-
ing lightly, and place in the oven to
reheat.

Cranberry Sauce, 2—One quart of
cranberries, one pint of water, one pint
of granulated sugar. Boil thirty min-
utes.

Cranberry Sauce, 3—Stew one quart of
cranberries in one pint of water until the
skins all burst, and the quantity is re-
duced to one pint. Put through a col-
ander to remove the skins and when
nearly cold add one cupful of sugar.—
M. F. S.

ONE DAY AT A TIME.

We carry too often the burden that ne'er
Was meant for this day, nor the next to bear;
How often we borrow the ills we deplore,
And shrink from the woes that ne'er darken
our door!
Such worry's a sin; let's be done with the
crime,
By living one day, just one day at a time.
Then let the tomorrow's stand waiting, I say,
And deal with each one when its name is
today.
The best preparation the future can ask
Is doing one's best with today and its task.
Life's highest and best, that's the peak we
must climb
By faithful footsteps one day at a time.
—Selected.

Home-Made Christmas Candies.

Home-made candies are so whole-
some and delicious and so easily pre-
pared that we should always make the
making of them a part of the Christ-
mas week festivities. It will delight the
children to help make them and give
them valuable lessons in a profession
that may be profitable to them in later
years. It is an accomplishment to be
able to make fine candies and a good
many women make a neat sum for pin
money by making candy at holiday
time.

Uncooked Fondant.

Break into a bowl the whites of two

eggs, do not beat, but add the sugar
gradually, alternating with the strained
juice of two oranges. The quantity
takes about two pounds of confectioners'
XXX sugar or pulverized. When stiff
enough to mold into shape with the
fingers, separate it into different batch-
es, color with pale shades of fruit or
vegetable colorings, chocolate and coffee
—form into balls, into which place the
kernels of English walnuts, almonds,
hickory nuts, citron and unserved cher-
ries, also roll into grated cocoanut, melt-
ed chocolate and ground cinnamon, then
into pulverized sugar; place on oiled pa-
per to harden.

Cooked Fondant.

Two pounds granulated sugar; one tea-
cupful of hot water and half teaspoon-
ful of cream of tartar, cook together un-
til it threads between thumb and finger;
when done pour into buttered dish, stir
till creamy: when cool enough to handle
work with the hands, form into shapes
desired, flavor and color to suit taste.

Chocolate Creams—Roll fondant fla-
vored with vanilla, strawberry, orange or
violet, into small balls and let them
stand a few hours to harden. Melt an
ounce of unsweetened chocolate, add to
it two tablespoonfuls of milk, two ta-
blespoonfuls of sugar and a quarter tea-
spoonful of butter. Stir until smooth;
drop the balls into it and remove with a
fork or candy wire. If the chocolate
becomes too stiff, add a few drops of
sirup and heat again.

Cream Fruit Bonbons—Press out a lay-
er of fondant on the board, press halves
of dates or figs into the center of the
layer, fold over, and roll until smooth.
This makes a long roll of fondant with
fruit in the center, and may be cut into
round bonbons.

Cocoanut Creams—Grate cocatnut fine,
mix with as much liquid fondant as will
bind well, and flavor with vanilla. Spread
it in a layer one inch thick and cut into
one inch squares, or roll it into balls. Dip
the balls into melted chocolate, the same
as for chocolate creams. Variety can be
secured by forming different sizes, and
on some, just after dipping, place nut
meats.

Peanut Crisp—Three cupfuls of brown
sugar, one cupful New Orleans molasses,
one-half teaspoonful cream of tartar, one
pint of peanuts, one-fourth pound but-
ter, two teaspoonfuls soda, one cupful
water; boil all the ingredients except the
last three, till it will harden in cold
water; add the peanuts and boil until
a little dropped into cold water will
crack easily; then add the butter and
when this is thoroughly mixed with the
other ingredients add the soda, dissolved
in a tablespoonful of water and stir vig-
orously. When the mixture begins to
rise, pour upon a marble slab or platter
and spread thin. When cold break in
pieces.

Brown Sugar Cream Candy—One
pound light brown sugar, one-half cup
water, one tablespoonful sharp vinegar;
boil together until it spins a thread
when dropped from a spoon; then add
one tablespoonful vanilla; pour into
greased pan; cool; pull until it becomes
light, then cut into small squares.

Hickory Nut Creams—Boil together
without stirring, until it threads, two
cups of granulated sugar, half cupful of
water and one-third teaspoonful of
cream of tartar, flavor with teaspoonful
of vanilla or orange extract. Remove from
fire and beat until white, add teacupful
of nut meats, pour into buttered nuts
and when cool cut into squares.

No one is too poor to keep Christmas.
Let us bear this in mind. Real Christ-
mas keeping depends upon the heart, not
upon the purse. We may not be able to
give rich gifts, or to make a feast, but
we can all give of ourselves and so make
this season a happy one for ourselves
and others.

Have a supply of Chinese lilies started
in time for Christmas. These can be de-
pendent upon. If you want large clusters
of flowers, keep in a dark place the first
two weeks.

Would we know that the major chords were
sweet,
If there were no minor key?
Would the painter's work be fair to our eyes,
Without shade on land or sea?
Should we know the meaning of happiness,
Should we feel that the day was bright,
If we'd never known what it was to grieve,
Nor gazed on the dark of night?

If it happens just at Christmas time
that some new kittens or dogs come to

It's not fair to your lamp to
dwarf its light with a poor
chimney. I manufacture
lamp-chimneys that get the
most out of lamp-light, and
that won't break from heat.

I put MACBETH on every
one, because it tells you how
to get the best in lamp-
chimneys.

My Index tells about these facts, and tells
how to get the right size chimney for your
lamp. It's free—let me send it to you.

Address, MACBETH, Pittsburgh.

play in your yard, one or two of them
can easily be spared for some one else,
can they not? Please don't drown them,
but find out where such pets will be wel-
come, and send them on Christmas morn-
ing with ribbons around their necks bear-
ing cards with their names on.

Bonbon-Holders—Candy can be easily
made at home in so many attractive
ways that pretty receptacles for it are
more than ever appreciated. The little
Japanese splint-baskets that can be pur-
chased by the dozen for a trifling sum
may be easily transformed into the dain-
tiest bonbon-holders imaginable. Simply
give two coats of ivory-white or other
delicate tint of enamel, and when dry
touch up the edges and high-lights with
gold paint. Filled with holly, mistletoe
or laurel they are a very charming lit-
tle reminder of one's good will.

Pen Wipers—Cut of paper a good pat-
tern of a willow or an elm leaf without
the stem. Have three or four colors of
felt or other heavy tightly woven ma-
terial and cut leaves by the pattern.
With heavy silk thread, vein the leaf
which is to be on top, then tack three
or four leaves together at the broad
end. These pen wipers are useful and
they are so easily made that a child
could make them.

A busy woman whom I knew, found
her Christmas planning very much sim-
plified by limiting herself to the same
kind of article for everyone. That is,
one year she bought books, another year
handkerchiefs and this year I believe it
will be pictures. There is such a wide
variety in these things that a careful
selection will reach the individual tastes
of every recipient and it is so easy. She
believes in putting thought into gifts,
but not in making it an intolerable bur-
den, as many do in these days of elab-
orate gift giving.

A white tablecloth will keep clean
much longer if doilies of plain white
oilcloth are placed at each plate. These
doilies may be neatly pinked and look
very neat and homey, and they do save
a deal of washing. And let me urge you
not to keep all the pretty pieces of china
and glass put away in the china closet.
For whom are you keeping them? Is
there any one that deserved to be treat-
ed better than your own family, or is
there any one who would more appreci-
ate pretty and dainty things on the
table? Even if you have to wash and
care for them yourself for fear they may
be broken by careless hands it will pay
you to have a few pretty pieces on the
table to make it attractive for the home
folks.

With very little care or trouble we
may always have a small blooming
plant for our dining table. An Aspara-
gus fern is always pretty, but it lacks
the cheery brightness of blooming plants.
It is easy to plant a few bulbs of Jon-
quil, Narcissus, Freesia or some other
favorite flower and when in bloom set
the small pot in an ornamental bowl or
jardinier on an embroidered centerpiece
or a small mirror in the center of the
table. A geranium potted in a small pot
so that it will soon become potbound
and bloom freely makes a very pretty
ornament for the table. It can be pinch-
ed back into comely shape and the pinch-
ing will only make it put forth more
blossom stalks and if it is occasionally
treated to a drink of fertilizer it will be
a thing of beauty all winter.

FOR SALE.

One Peerless 6-Horse Engine, one Peer-
less Separator, Self-feeder and Wind
Stacker, also one Joliet No. 2 Cornsheller.

THIS machinery is good as new. Will sell for
half its cost when new. Will sell for cash, or
trade what you have to trade.

W. R. HAINLINE,
Blandinsville, Illinois.

ADDITIONAL VETERINARY.

COUGH.

I have a large bay horse that has his wind affected. I think he has the heaves, as he has a dry, hacking cough. He seems all right when standing, but when pulling up he will strangle and throw his head and will cough up blood. Think he is about fourteen years old. Don't know how long he has been affected. Can I do anything that will help him?

There may be a polypus (tumor) which drops back into the throat and causes choking and coughing. A chronic disease of the lining of the nostrils and throat also might give rise to the bleeding and other symptoms, but the case is not one that we can treat intelligently through the paper. An expert examination would be absolutely necessary to an understanding of the case and it should be made by a qualified veterinarian who also will be able to prescribe suitable treatment. We do not think the trouble is due to heaves.

GROWTH.

I recently purchased a black two-year-old driving colt which has a lump on front leg just a little above the knee joint, about the size of a hen's egg. It seems to be somewhat hard and feels as if it might be attached to the bone or cord. It does not cause any lameness. I was told the colt had this since last spring; cause unknown, but supposed to come from distemper. It was once slightly blistered with caustic balsam. Would you advise further treatment with caustic balsam or can I do anything else for it? Can the horse be used during treatment?

Without examination we cannot advise as to the probable nature of the tumor referred to, but would consider it perfectly safe to repeat the blistering and after washing off the blister to exercise the colt daily and repeat the treatment as often as required. It may be that the parts will soften, so that it can be opened for removal of pus or it may be absorbed by the blistering.

STOCKED LEG—WORMS.

I have a five-year-old gelding that stocks up badly in right hind leg whenever he stands in barn over night. As soon as he is worked or driven a few hours it all goes down. Does not seem to be lame, only a little stiff when first taken out. He has good life and good appetite, but is hard to keep in good flesh and usually has considerable of a scaly substance like dandruff around anus and under tail. I feed oats and sometimes corn and good timothy hay when not on pasture. Please give cause and remedy.

Bandage leg from foot to hock each time horse comes into stable and change bandage twice daily after thorough hand rubbing if he stands in a whole day, which is not best for him. He should occupy a box stall. He is troubled with worms, as indicated by the scaly material around anus. In his feed night and morning mix a dram of dried sulphate of iron. Continue for ten days, then skip ten days and repeat. Also allow free access to rock salt.

EPIZOOTIC.

I have a horse coming five years old in the spring. Last Wednesday both eyes swelled shut and are mattering terribly. The eye balls are covered with a thick, yellowish matter and swelled very badly. He cannot see anything and his nose matters freely. He eats well and seems all right except his eyes. I called in a veterinarian and he called it simple ophthalmia. Can you tell me what it is and what to do for it?

This may be the disease known as "epizootic" (catarrhal influenza), which comes on with fever, and while affecting the eyes as described, also causes the limbs to swell greatly. On the contrary, it may be periodic ophthalmia, but in that case the attack is unusually severe. It would be well to treat the case by covering the eyes with a soft cloth to be kept wet with a solution of forty drops of creolin or eol tar disinfectant to the quart of water. Also sponge out eyes twice daily with a saturated solution of boracic acid. Dissolve a tablespoonful of salt peter in each bucket of drinking water and allow horse to drink all he wants. Your veterinarian will be able to give any other treatment needed as the case proceeds, but if it is periodic ophthalmia, it will prove incurable.

POLL EVIL.

I have a horse that is swelled on the poll. It has not broken yet. Can I do anything with it to keep him from having poll evil. Please answer through your valuable paper.

Remove hair and blister repeatedly with a mixture of one dram of biniod of mercury and two ounces of eucate or cantharides. Rub the blister in for fifteen minutes each time; wash it off

in forty-eight hours; then apply lard daily. Also give one dram of iodid of potash in water night and morning for ten days, but stop a day or two if eyes commence to run.

SCURFY SKIN.

I have about eighty-five head of pigs that were farrowed in June; about the latter part of August I noticed one or two of them beginning to get scurfy. It has now spread until quite a lot of them are affected. They get dirty looking after they get that way and their skin seems to get thick and rough. Sometimes I can see some blood. After they rub the skin seems to crack open a little. They are all white and very thrifty; out of Poland China sows sired by a Chester White boar. They have a large range to run over. What is the matter with them and what is the best remedy for them? I have a dipping tank. If I am to dip them I want to do it before it gets cold.

White colored pigs are prone to sun scald, which is induced by pasturing rank growths of rape, clover or other green food, and when wet from this cause, being exposed to the hot sun. They also are more liable to eczema than black pigs or the disease, perhaps, is more readily noticed on a white pig. We would dip the pigs at once and afterward rub in flowers of sulphur and lard ointment as required. Physic each pig with epsom salts in slop and if trouble proves obstinate give twice daily one dram of hyposulphite of soda in food. See that all pens and living places are kept clean, disinfected and whitewashed.

Looking Ahead in the Swine Business.

To the Editor of The Homestead:

Can we have larger litters of pigs and stronger ones next spring than we had last? I answer yes, if we wish to. In my experience as a breeder of mongrels and thoroughbred hogs I am convinced that our success with pigs depends largely upon the care and feed the parent hogs have from now until farrowing time. There is no stock that will adapt itself to circumstances like the hog, and I believe there is no stock that will adapt itself to circumstances like the hog, and I believe there is no stock that will respond to kind treatment better than the hog. A hog will exist on very little feed and water, and I am afraid too many of us are content with "root hog or die." We then wonder why our hogs do not thrive better.

Corn is too handy with those in the corn belt. We scoop out the corn, see the nice pure (?) water before them and say: "Eat, drink and grow fat." But how about the feet and the frame to carry that fat? We find that corn does not contain the ingredient to produce bone and muscle, and that is what we must have. When we know how to produce bone and muscle, we have found the secret of our success. So I say give your boar and sows as near the same care as possible. By all means, keep them separate and keep them in as large a pasture as you can. The more they run, the better. This gives them action and muscle. Provide for them a dry, cool, but not cold, place to sleep in, with a nest of bright straw so they can rest well.

Now as to the feed. We feed very little corn outside of the feeding yard. My boar and sows get mostly what we call Red Dog shorts, corn meal and digester tankage, with enough stock food to keep a keen appetite. We never practice turning the boar out with the sows. One boar serves two hogs a day and if not crowded serves each sow twice. The sows are then shut up by themselves for two days where nothing can disturb them, and given all they can eat and drink, with a good bed so they will lie down and keep as quiet as possible until they are out of heat. In this way we seldom fail to get large litters. We usually use matured stock for breeding. They get stronger offspring. My boar got one litter of twenty-three pigs last year and another litter of seventeen, the rest running from eight to twelve. C. N. Gerard.

Stark County, Ill.

Starting an Osage Orange Hedge.

To the Editor of The Homestead:

You submit to me the following inquiry received from one of your subscribers living at Kellogg, Iowa:

Will you kindly publish an article on how to handle Osage hedge apples in order to get them to grow for seed; or, in other words, how would a person get the seed out of them to plant? Would I dare freeze them, or must I cover them to keep from freezing? Would it do to cover so they will not freeze and in the spring prepare the ground and mark it like I would for corn, then plant two feet in the row and one apple in a hill?

The Osage Orange is usually trans-

planted and the year-old trees can be bought from any of the large nurseries, or the seed may be bought from seed dealers generally. On account of the difficulty of separating the seeds from the fruit, either of the above methods, preferably the former, is better than for one to try to save the seeds himself.

Where it is desired to save the seeds, the fruit is gathered as it falls and placed in piles until it becomes quite ripe. It is then crushed and allowed to decay or ferment, after which the seeds are separated by washing. They are then stored in a dry, cool place until spring. Freezing will not injure the seed. It will probably aid in separating them from the pulp.

The seeds are drilled from one to two inches apart, in rows of any desired width. Like all other seedlings, the seeds need careful, clean cultivation. In the fall they are dug and trimmed and stored in a cool cellar with the roots buried in sand. The roots are numerous and long and should be trimmed back to four or five inches, and the handling may also be made easier by trimming the tops back to six inches. They are then ready to transplant as soon as spring opens up.

The rows for transplanting are made by running a furrow in which the plants are set about six inches apart. The young hedge should be given careful cultivation the first year. This may be made easier by cultivation the year before the hedge is planted out. After the first year, no cultivation is necessary, but the pruning must be given attention, and this is quite an item.

Another method for starting a hedge is to secure strong two-year-old trees and cut back to two and a half feet before setting out. These are then set slanting so as to form a lattice work. The new branches, of course, grow upright, and the hedge thus formed is very strong and close.

The method which this correspondent suggests would not be very satisfactory, as the trees would be crowded in the hill, making them weak and spindling. The distance between the hills would not

fill up with strong trunks, but with branches instead, and hence would not be very strong or make a good hedge.

It is more satisfactory to drill the seeds and transplant as suggested, than to plant the seeds six inches apart where the hedge is to stand. A better stand will be secured by transplanting; moreover, the transplanted trees will be much more stocky than those grown from seed where they are to remain.

Osage Orange hedges require a great deal of trimming and if neglected become very unsightly, and the writer would hesitate before planting one.

Franklin Brown.

Polk County, Iowa.

William Ellery Channing says this is his symphony: "To live content with small means; to seek elegance rather than luxury; to seek refinement rather than fashion; to be worthy, not respectable and wealthy, not rich; to study hard, think quietly, talk gently, act frankly; to listen to stars and birds, babes and sages, with open heart; to bear all cheerfully and do all bravely, await occasions, and never hurry; to let the spiritual, unbidden and unconscious, grow up through the common."

If a woman can make preserves, pickles or pound cake, and secure purchasers; if she can knit shawls, sweaters and slumbershoes, if she can raise poultry or Angora cats; if she can, in brief, send out from her home any product whatever that people want and will pay for she need not be worried. She will lie down at night tired and complacent, and while retaining her grasp on the home in its essentials, she will not feel that she is a pensioner on her husband's bounty. No wife should ever acknowledge that she feels herself this; no wife ever is this in any true sense. A wife is neither mendicant nor pensioner, but, unfortunately, many wives actually feel, and silently resent, the blundering attitude of otherwise good husbands in this commonplace particular.

BOWSER SWEEP MILLS

Different from all others. 4 or 2 horses. Geared into 10 or 7 to 1. Grind down with shucks or without. And all small grains including Oats and Wheat. (Also make 7 disc bolt mills.)

E. N. P. Bowser Co., South Bend, Ind.

**Don't Let This Be Another
Lost Opportunity.**

Mr. Investor:

IMPORTANT—If you have delayed investing in this stock, you must act quickly if you want it at the present price. It will advance in price in a few days, as the allotment to be sold at 25c per share will soon be gone.

**Read This Carefully. It May
Be Just What You Want.**

REMEMBER, THIS IS NO MINING OR OIL SCHEME, BUT A SAFE, CONSERVATIVE, MANUFACTURING INDUSTRY

MAMMOTH KANSAS CITY STEEL & IRON FOUNDRIES

We are Already Assured of More
Orders Than We Can Possibly
Fill Next Year.

Our Crude Oil Burner Solves the
Fuel Problem for Steaming and
Domestic Uses.

WILL CONTROL GREAT SOUTHWEST TRADE

**The Only Steel and Malleable Iron Casting Plants in the
Entire Southwest**

No Stock Jobbing Mining
Scheme. A Safe, Conservative
Manufacturing Enterprise.

The Crude Oil Power Company

Strongly Endorsed by the Manu-
facturers and Merchants' Asso-
ciation of Kansas City, U. S. A.

A MANUFACTURING INDUSTRY THAT CANNOT BE SURPASSED AS A DIVIDEND EARNER.

The Crude Oil Power Co. is incorporated under the laws of the District of Columbia, under Federal Supervision for \$1,000,000, divided into 1,000,000 NONASSESSABLE shares, par value of \$1 each.

The Company is now building two great factories, one in Kansas City, Mo., and the other in Sour Lake, Texas. The Kansas City plant alone covers 5½ acres of ground. These factories will be in operation by January 1st. They represent today an outlay and value of \$235,000. There is not a cent of incumbrance on the property.

This mammoth steel and iron casting foundry will be the only one for the manufacture of iron and steel in the Southwest. All orders for steel and iron castings have to be placed in the East. The factories there are about nine months behind with their orders. The Crude Oil Power Co., turning out at the very start 30,000 pounds of steel and malleable iron castings per day will be without competition in the entire Southwest.

This Company controls, furthermore, all rights to manufacture the new Crude Oil Engine and Portable Refiner and Generator. This engine will be manufactured at a very minimum cost and will be sold at a very large profit. As it can be operated from the crude oil it will absolutely displace the gasoline engine.

The Portable Refiner will refine crude oil at the wells. This will effect a revolution in the oil business, as the independent producers can cut down 50 per cent of the cost of refining.

The profits from the casting foundries alone will reach \$200,000 a year. With no freight to pay and with no fuel bills, as ample natural gas is developed at the Company's own plant, this Company can drive the eastern producer out of the Southwest. It has the field to itself. The demand for steel and malleable iron castings is limitless. Now, look; sit up and take notice that the Crude Oil Power Co., WITH ITS FACTORIES ALMOST COMPLETED, makes the following remarkable offer:

To procure additional funds for the development of the company's properties, and to complete its work, the company is now offering an issue of 100,000 shares of stock.

THIS ISSUE IS OFFERED AT 25 CENTS PER SHARE, PAR VALUE \$1.00. The subscriptions of careful investors is invited to this issue. The stock will earn at least 15 per cent from the foundry department alone, making at present prices a profit of 60 per cent on the investment.

In this estimate no account is made of the profits accrued by the sale of the crude oil engine and portable refiner. This department alone will add vastly to the financial possibilities of the company.

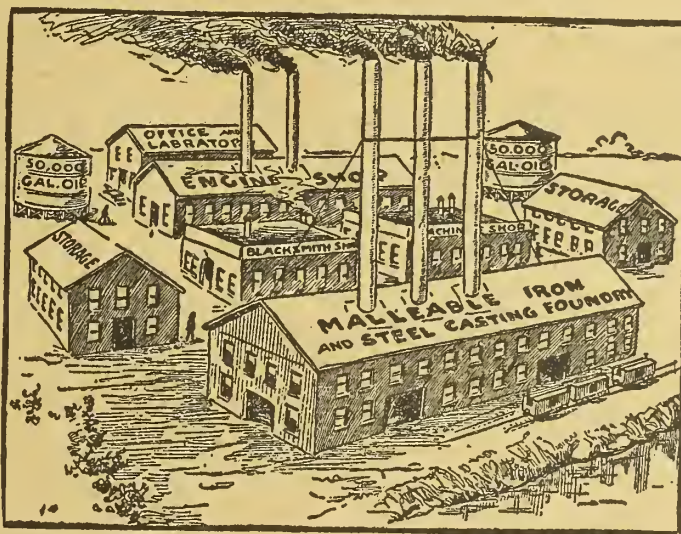

The high character, business ability and integrity of the personnel of the officers and directors of the CRUDE OIL POWER CO. could not be excelled. They are as follows:

President, G. W. Fitzpatrick, M. D., physician and capitalist; vice-president, E. E. Richardson; secretary-treasurer, K. C. Stock Yards Company; treasurer, W. C. Howe, president S. W. Oil & Mineral Co.; secretary, A. A. Osborn, inventor and constructing engineer, all of Kansas City, Mo. The Company most cheerfully invites and urges full inquiry as to the character and standing of the above-named gentlemen.

We refer you by permission to the Interstate National Bank, Kansas City, Kan., and State Bank of Kansas City, Kan.

IMPORTANT NOTICE.

As our 25c allotment of stock is almost subscribed for, it is important that I should have your subscription immediately if you want stock before the price advances. This stock advances in price December 10, 1906. Everybody who has investigated this Company has either bought stock or reserved same. Another opportunity equaling this will probably never be offered you. I earnestly advise you to let me hear from you by return mail or by telegram. F. C. VINCENT, Fiscal Agt., 425 Gibraltar Bldg., Kansas City, Mo.

\$235,000 ALREADY EXPENDED ON THE COMPANY'S PLANTS

A Practical Illustration of the Two Mammoth Plants of the Crude Oil Power Co. at Kansas City and Sour Lake, Texas, as They Will Probably Appear When Completed. Invest in a Sure Thing.

Substantial Investment

We are building an enterprise the demand for whose product is as STABLE, PERMANENT, AND SUSTAINED AS THE DEMAND FOR BREAD AND BUTTER. Investment in this industry carries with it NONE OF THE SPECULATIVE RISKS incurred by an investment in mining stocks or a gambling flyer in the wheat market. We are offering you stocks whose values are, and will be, as safe as a real estate purchase, or an investment in Government bonds, with infinitely GREATER PROFIT to you. Every dollar derived from the sale of the treasury stocks will be used for further development of the Company's interests. Investment in an industrial enterprise, manufacturing a staple commodity, having no competition and for whose products there is heavy demand, carries with it no risk.

The Metropolitan Street Railway Company, the twenty-three railroads entering Kansas City (the second largest railway center in the world), the fifty odd automobile repair shops, the Kansas City Automobile Company, the many great Portland cement plants in and around Kansas City, the packing houses, and a hundred other important industries contiguous to Kansas City each use thousands of dollars' worth of new steel and iron castings each year.

Kansas City has entered upon the era of steel and iron buildings. If the CRUDE OIL POWER CO. were in operation today the chances are that no Des Moines or other outsider would have supplied the iron for the magnificent R. A. Long building. No other foreign firm would be erecting and supplying the iron frame work of the great Scarritt Building.

This Company proposes to be in the market when the new Bank and Commerce building, the new Victoria hotel, the new Y. M. C. A. building, the new Armory, and the new Union Depot are ready for construction. Kansas City has, for many years, felt the dire need of a factory of this character. We are supplying this need and WE PROPOSE TO GET THE BUSINESS.

Millions of tons of malleable iron and steel castings are used every year in Kansas City and the southwest states. Every pound of this material has come out of the eastern factories, which are now from six to nine months behind with their orders. Our foundries, machinery buildings, blacksmith shops, offices, and laboratories will cover upward of five (5) acres of land, advantageously situated on the Missouri Pacific and Orient Belt Line Railways. WE HAVE DEVELOPED OUR OWN NATURAL GAS ON OUR OWN GAS AND OIL LAND. Thus there will be no fuel cost. We are in Kansas City, so there will be NO TRANSPORTATION to the great Kansas City market, which in itself can take our entire product. With NO FUEL AND NO FREIGHT TO PAY, eastern producers can not compete with us. We have the field to ourselves. Kansas City alone is using upward of 300,000 tons of steel and malleable iron castings annually. There will be no limit to our development.

Carnegie, Schwab, Frick, Nixon, Ellis, and a host of other multi-millionaires have accumulated IMMENSE FORTUNES FROM THE STEEL AND IRON INDUSTRY. They were the pioneers of this industry in Pittsburgh. WE ARE THE PIONEERS OF THIS INDUSTRY OF KANSAS CITY. If you are anxious to participate in our absolutely assured profits you will fill out the coupon below and mail it today. It costs you nothing to inquire.

The Crude Oil Power Co. will manufacture at the very start 30,000 pounds of steel and malleable iron castings daily at a net profit of at least \$600 per day. Our factories, in order to supply the demand, must run day and night. Thus our annual net profit on this department alone will exceed \$200,000. This Company will be compelled to constantly increase its output, so \$30,000 will be set aside each year for this purpose. This will leave a net dividend of 15 per cent on the entire capital stock the first year, and largely increased dividends each year thereafter.

**It Costs You Nothing To Inquire. Fill Out Coupon Below
and Mail Today.**

This Company

is building TWO GREAT FACTORIES, one at Kansas City, the other at Sour Lake, Texas. Both plants will have the same initial capacity, and both will have the advantage of natural gas for fuel and splendid transportation facilities. The Company's purpose in both plants will be

First—A Steel and Malleable Iron Casting Foundry—to manufacture Malleable Iron and Steel Castings at a larger net profit than by any other known process. THIS WILL BE THE ONLY PLANT OF THIS CHARACTER IN KANSAS CITY, and we are already assured of orders that will tax the full capacity of this department. This department alone will pay big returns on the total investment.

Second—A Portable Crude Oil Refiner and Burner—to manufacture Special Machinery for Refining Crude Oil at the wells. These machines can be manufactured at a nominal price for great profit, and they will REVOLUTIONIZE the Refining of Crude Oils. The use of this machine makes it possible to refine crude oil at 50 per cent less than by present methods. The Burner is the only satisfactory one invented.

Third—A Crude Oil Engine—to manufacture a Crude Oil Engine which is destined to SUPERSEDE the present gasoline engine, because the same initial horse power can be developed at one-half the present fuel cost. These engines can be used wherever the gasoline or steam engine is used. The special Crude Oil Burner manufactured by this Company can be affixed to any stove, furnace, or boiler at low cost and large profit. The use of this Burner will make it possible to heat, cook, and steam at less cost than by using natural gas, gasoline, kerosene, wood, or coal. Just think of an engine that will develop the same horse power at half the cost. No need to use gasoline, coal, or even denatured alcohol; just crude oil at less than 60c per barrel, instead of gasoline at \$6.30 per barrel.

Our Monthly Payment Plan

Gives everyone, rich or poor, an opportunity to become a stockholder in one of the big industries of the country. The proposition is up to you. If you neglect to investigate it and learn for yourself what an investment in this stock means to your future you have yourself to blame.

You can buy stock now at 25 cents per share and have several months' time to pay for it. It will pay you to buy all you can carry before the advance, as stock with such value behind it cannot remain long at such a low price.

\$10 buys 40 shares of stock, payable \$5 down and \$1 per month.
\$50 buys 200 shares of stock, payable \$15 down and \$5 per month.
\$100 buys 400 shares of stock, payable \$20 down and \$10 per month.
\$250 buys 1,000 shares of stock, payable \$50 down and \$25 per month.
\$500 buys 2,000 shares of stock, payable \$50 down and \$50 per month.
\$1,000 buys 4,000 shares of stock, payable \$100 down and \$100 a month.

F. C. Vincent, Fiscal Agt.

SWINE TALK.

Why feed lice and worms and then wonder why your hogs have the cholera? One ounce of prevention is worth more than a pound of cure.

If you expect large litters of strong pigs next spring, now is the time to feed for them.

Keep your sows thrifty but don't let them get too fat before breeding time.

A splendid food for the boar is oats, shorts, corn meal and about 5 per cent tankage.

Let the breeding and growing stock have plenty of range with access to grass and water, and note the results.

Be sure and keep those fall pigs from getting chilled. Give them a warm place to sleep and plenty of slop of shorts, corn meal and tankage, and there is money in them.

Be kind and gentle with your hogs. Try coaxing with feed instead of driving with a club, and see if they do not resemble yourself in this respect.

The 250 pounder is now the top hog on the market. It pays to produce that kind.

When a hog reaches 200 pounds, the theory of some is that it pays to feed no longer. How about it, with corn at thirty cents a bushel and hogs worth six cents?

One thing is absolutely sure, the man who hasn't the male hog now need not look far for the reason for late pigs next spring. We think most Homestead readers understand the value of thirty days in the spring on the age of shoats.

There have not been the usual number of complaints of "new corn cholera" this fall. Either our hogs are getting bred up to the point where they are immune, or the corn this fall had not the disease-giving germ that it sometimes has.

The automatic waterers will soon be put out of business by Jack Frost; but, then, it doesn't take the amount of water in cold weather that it does in warm. To get fattening hogs to drink enough is sometimes the trouble in real cold weather. They would rather lie in their nest than to come out and fill up on ice cold water.

At this season of the year the question of how many sows to each male is uppermost in the minds of Homestead hog raisers. We have found that it depends altogether on circumstances. One male kept in a pen by himself, the sows being turned in with him for only three or four hours, is worth two that are allowed to run with the herd. There may not be any such thing as luck, but it is just chance that large litters come from the practice of letting boar and sows run together.

Mixing breeds is not to be recommended, no matter what Mr. So-and-So says about it. We have tried it, so speak from experience. Several others nearby have tried it, too. A neighbor took off a bunch of fat hogs the other day, part of cross breeding and part thoroughbred. He says the thoroughbreds averaged twenty pounds heavier than those of cross breeding, all of same age and with the same care.

Southerners have much that is favorable to say of the mast fattened hog. We have eaten mast-fed ba-

con, and must confess that we fail to see its superiority over our corn belt bacon and hams. Readers of The Homestead living in the corn belt need not think they have lost a very great lot by not having mast to add "flavor" to the meat.

An Invoice of Agricultural America.

The worthy secretary of agriculture has been keeping close tab on the doings of American farmers, and the conclusions are soon forthcoming in the annual year book. The situation of the American farmer is very gratifying.

The mighty production of the farm for one-third of a century has come out of an agriculture having many faults. In a large degree there has been one-crop farming; crop rotation, as practiced, has often been too short and unwise; the grasses and leguminous forage crops have been neglected, domestic animals have not sufficiently entered into the farm economy, and many dairy cows have been kept at a loss. The fertilizers made on the farm have been regarded as a nuisance in some regions; they have been wasted and misapplied by many farmers; humus has not been plowed into the ground as generally as it should have been; and in many a place the unprotected soil has been washed into the streams.

Formerly there was an abundance of farm labor and a dearth of farming capital; now these conditions are reversed and labor is scarce and capital abundant. Notwithstanding the farmers' inability to do some things for want of labor, the new situation is a great improvement upon the old one. The farmer can now employ every labor-saving device and thus reduce both the labor and the cost of production; he can raise his land to a higher state of fertility than can be made by chemical fertilizers alone, because he can advance the needed capital for permanent soil improvement and is in a position to await results; he can produce such capital as is needed to distribute his products and thus co-operation is open to him to a greater extent than ever before; he can secure a better education for his children to the end, among other things, that they may do better with the old farm than he did.

In the middle West the prosperity of the farmers during the last half dozen years and over has advanced in such mass and with such speed that no parallel can be found in the economic history of agriculture. One of the great changes that have come over this region is the conversion of a million agricultural debtors, paying high rates of interest and finding great difficulty in procuring the wherewithal out of prices much too low, into financially independent farmers, debt-free, and begging the banks to receive their savings at as small a rate of interest as 2 per cent.

The farmer will not fail the nation if the nation does not fail the farmer. He will need education to know the powers of the soil which are now hidden from him. The prospective yearly expenditure of \$10,000,000 for educational and re-

search work by nation and states, with such increases as may come from time to time, must have enormous effects. There may be agricultural schools for the small children, and agricultural high schools for the larger ones, and their education will be continued in the colleges.

The farmer's standard of living is rising higher and higher. The common things of his farm go to the city to become luxuries. He is becoming a traveler; and he has his telephone and his daily mail and newspaper. His life is healthful to body and sane to mind, and the noise and fever of the city have not become the craving of his nerves, nor his ideal of the everyday pleasures of life. A new dignity has come to agriculture, along with its economic strength; and the farmer has a new horizon far back of his prairie and his mountains, which is more promising than the sky-line of the city.

Send Us Your Subscription Today.

Five excellent newspapers and magazines for \$1.25 a year—supplying your home with news, literature, agricultural information, market reports, entertainment and general instruction all the year round. If already a subscriber for one or all, your time will be extended for one year. All these for \$1.25:

The Chicago Weekly Inter Ocean, a grand general newspaper for the family—all the week's news, reliable market reports, a wealth of prose and poetical miscellany, departments for women and children, something for each member of the household.

The Kansas City Weekly Star, an able, fearless, independent newspaper, filled with information and entertainment, containing much that you cannot find in any other paper.

The Homestead, the greatest farm paper in the world, reaching more than double the number of paid subscribers taking any other weekly agricultural paper in its field, having departments covering every interest of the farm; edited by actual farmers and numbering among its contributors a larger number of successful farmers, breeders and experiment station workers than any other farm paper.

The Homemaker, a delightful monthly of entertainment and instruction for the women folk of the farm; something to brighten the lives of your wife and children.

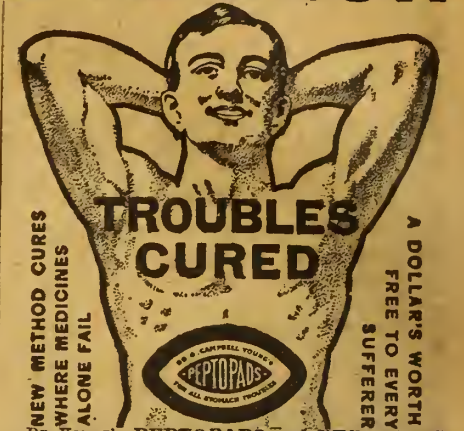

The Farm Gazette, the most beautiful farm magazine in the world; elegant illustrations, printed on fine paper; cover in five colors; reading matter both helpful and entertaining.

Send us \$1.25 today, stating whether your subscription is a new one or a renewal. Address, The Homestead Co., Des Moines, Iowa.

Hebbard Sale of Poland Chinas.

The initial sale of hogs at the new live stock pavilion at Wichita, Kan., took place Friday, November 16th. The consignors were Messrs. G. M. Hebbard, J. C. Larrimer, A. P. Wright and Martin Bros. Buyers from Kansas, Missouri, Iowa, Illinois and Oklahoma were in attendance. Fifty-six hogs were sold. The total sale amounted to \$3,389, an average of \$61 each. Breeders were heard to say that this sale was the best they had ever attended in this section of the country. The hogs were presented in elegant breeding condition and sold on their merits. Cols. James W. Sparks, of Marshall, Mo., and John D. Snyder, of Winfield, Kan., conducted the sale. Colonel Sparks opened the sale with a fine speech for the advancement of thoroughbred stock and was roundly applauded. On's Lady Mascot, a sow sired by the great Illinois champion,

STOMACH

Dr. Young's PEPTOPADS and PEPTOLETS cure where medicines alone fail. They regulate the bowels, relieve soreness, and strengthen the nerves and muscles of the stomach in either sex. You can soon eat what you want without fear of distress. The cures effected are marvelous. If you have Dyspepsia, Indigestion, Sour Stomach, Distress after Eating, Nervousness, Dizziness, Heart Kneading, Sick Headache, etc., send 10c to cover cost of packing and mailing, and I will send you a \$1.00 treatment absolutely free. It will relieve you immediately. Address, DR. G. C. YOUNG, 34 National Bank Bldg., Jackson, Michigan.

On and On, bred by Mr. J. R. Young, of Richards, Mo., and owned by Mr. G. M. Hebbard, of Peck, Kan., topped the sale. She was purchased for \$105 by the Goodrich Stock Farm, of Eldon, Mo. The sale generally was successful and arrangements are being made to hold sales at this elegant live stock pavilion at regular intervals. Below will be found a complete list of sales of \$25 and over:

H. E. Hayes Short-horn Sale.

Perhaps it was the weather conditions that had a tendency to curtail the attendance at Mr. H. E. Hayes' sale at Olathe, Kan., on November 24th, but whatever the cause this much is sure, buyers who were present reaped a harvest and bought Mr. Hayes' cattle at prices that are bound to make them money. The entire offering was desirable every animal showing its usefulness, and higher prices should have prevailed. Be this as it may, Mr. Hayes' sale may be classed a success, and he took the prices paid and wished each purchaser success with his purchase. Mr. C. S. Nevius, of Chiles, Kan., bought the two tops of the sale—Orange Blossom 2d, a Scotch heifer, and the roan cow, Elizabeth, with heifer calf at foot by Lord Bank 2d—paying \$195 for each lot. Mr. J. C. Lorimer, of Ottawa, Kan., secured the Scotch bull, Premier, at the bargain price of \$125. Colonel Bellows, Harriman and James handled the sale in their usual satisfactory manner. Following is a list of all sales of over \$100:

Lot.	Price.
1 Orange Blossom 2d, C. S. Nevius, Chiles, Kan.....	\$95.00
3 Village Maid 3d, O. O. Wolf, Ottawa, Kan.....	155.00
4 Lady Gloster C., C. S. Nevius.....	165.00
5 Bashful Beauty, W. O. Rule, Ottawa, Kan.....	100.00
6 Norwood Jennie Lind 4th, Ed Williams, Olathe, Kan.....	102.50
8 Fourth Duchess of Norwood, C. S. Nevius.....	125.00
10 Royal's Valentine, Ed Williams.....	100.00
29 Dorrit's Lavender, O. O. Wolf.....	112.50
2 Premier, J. C. Lorimer, Olathe, Kan.....	125.00
9 Elizabeth, and c. c., C. S. Nevius.....	195.00

SUMMARY.
29 cows sold for ... \$2,637.50; average...\$90.94
6 bulls sold for ... 492.50; average... 82.08
35 head sold for ... 3,130.00; average... 89.43

Don't follow fashion too strongly, especially out-of-date fashion. This is the advice given in the Litchfield story on page 5 this week.

THE CAMPBELL SYSTEM OF SOIL CULTURE.

As practiced on the Demonstration Farms of The Scientific Farming Association in New Mexico and Colorado is now printed. This, including a year's subscription to the Scientific Farmer, which is devoted entirely to the Campbell System, and everything that is published on what is called Dry Farming, can be had by remitting \$5.00 to the Denver office.

THE SCIENTIFIC FARMING ASSOCIATION,
1715 California St., - - - Denver, Colo.

WANTED---YOUNG MEN

IN the country to become interested in our business and furnish us names of residents in their districts; we work up the business, you share the profits with us; no experience necessary on your part. If you want a good thing and mean business, write us before your territory is taken. Chicago Standard Mercandise Co., 52 & Dearborn St., Chicago, Ill.

It is with pleasure that we herewith reproduce an illustration of the comfortable home of Mr. C. J. Woods, of Chiles, Miami county, Kansas, where Double Standard Polled Durhams are given full sway. Mr. Woods not only has a comfortable home in which to entertain his friends, but any lover of good stock can easily spend a day among the cattle and when night comes feel that he has spent the time to good advantage. The lover of the short-legged, thick, meaty kind would do well to visit Mr. Woods and see his cattle.

MY FREE OFFER TO DRINK VICTIMS

You Can Now Reclaim Anyone Who is Addicted to the Drink Habit by a Home Cure Which You Can Give Secretly

I SEND IT FREE—FREE FOR THE ASKING—FREE TO YOU

IF you want to help a man who drinks back to self-respect and decency, health and prosperity, write me today and I will send you free a test package of Alcola, the safe, tasteless secret HOME remedy which conquers the drink demon.

I will do this free. Simply write me today and I will send the free test package to you at once, postpaid, in a plain wrapper, and free of all cost, charge or obligation of any kind whatever.

Here is the Man Who Has No Help -

What Wonders of Good Alcola Will Work for your Friend or Loved One is Best Told in the Words of the Thankful Ones to Whose Homes it Has Restored Peace, Happiness and Prosperity

and Here is the Man Who Has Help

"My husband drank hard—for about twenty-five years," writes Mrs. Osse A. Faux, Box 134, Cardington, Morrow Co., Ohio. "He had hardly been sober for the past eight months. I gave him the treatment secretly. I cannot say enough in praise of it, for Alcola has saved my husband."

Mrs. W. C. Walton, Greenville, Butler Co., Ala., R. F. D. No. 2, is not less thankful. "You cannot imagine how happy we are, for Alcola has cured my husband of drink. It is now over two years since he took the treatment and he has not drunk since. It is such a pleasure to have him come home sober, and besides we have saved so much money."

These are the words of happy wives. Now listen to the thanksgiving of a daughter, a little girl, to whom, perhaps, Alcola has proved the best of all friends. She says: "Alcola has done all you claim for it. My father, after taking one full treatment, has no desire for liquor at all, and it is now over two years since he took his last drink." Cora A. Magee, Zona, Washington Parish, La.

One more from a mother, this time a Mrs. S. A. Kelly, of Parmalee, Ariz. "Dear Friends," she writes, "just a few lines to let you know of the wonderful cure of my son, who was a total wreck from drink. Friends gave him up, a father pronounced him lost, brothers discarded him and a broken-hearted mother had sunk in despair when I received Alcola, and my boy has never touched a drop of liquor since. He is now a fine-looking man; no more staggering steps or wild-looking eyes. The neighbors say it is a mystery, but all the praise is due your blessed Alcola."

These letters prove that Alcola cures the drink habit to stay cured. For these women and hundreds of others it has proved an unmixed financial, physical, mental and spiritual blessing. It will surely prove no less a benefit to you and yours, and so I urge you not to delay, but write for the free sample package this very day.

Do this now, and with the package I send you a valuable book which tells you all about the drink craze and its cure by Alcola. Write in perfect, sacred confidence.

R. G. ROGERS 543 Monon Building CHICAGO

Killing and Dressing Cattle.

The first step in killing and dressing a beef is to secure the animal so that it cannot get away under any emergency. For this purpose, a rope three-fourths of an inch in diameter should be used. Put a slip-noose in one end, with a knot just far enough from the noose to prevent choking when drawn tight. It should at the same time allow the noose to draw tight enough so that there will be no danger of escape if the rope becomes slack. If the beast has horns, pass the noose over the head back of the ear and horn on the right side, but in front of the horn on the left side of the head. This leaves the face bare and does not draw tightly on the throat. Where a dehorned or polled beast is to be secured, the noose must be adjusted around the neck. Attach an ordinary hay-fork pulley to a post, close to the ground, or the barn floor or sill. Pass the rope through it, and draw the animal's head down as close as possible. Stun completely by a heavy blow in the center of the forehead at the point where lines drawn from the eye on either side to the base of the horn on the opposite side would intersect.

Shooting has the same effect as stunning, and where deemed best may be resorted to. Some danger attends the use of a rifle about farm buildings, however, and the use of an ax is advisable, where the animal can be caught.

Bleed by sticking the animal just in front of the sternum, or breast-bone. To do this properly requires practice and close observation. Stand in front of the neck of the animal, with the back toward the body. Place one foot against the jaw and with the other hold back the front legs. Reaching down between the feet, lay open the skin from breast-bone toward the chin for a distance of ten or twelve inches, using the ordinary skinning knife. Insert the knife with the back against the breast-bone and the tip pointed directly toward the spinal column at the top of the shoulders, cutting just under the windpipe, and about five to six inches in depth. The vein and artery cross just at this point, and if they are severed the blood will flow out very rapidly. When the vein has been cut below the windpipe, run the knife in on top of it and sever the blood-vessels on that side also. If stuck too deep the pleura will be punctured, and blood will flow into the chest cavity, causing a bloody carcass. This should be avoided.

While an animal will bleed out if only one side is cut, it will bleed more quickly and the blood will be more nearly siphoned out if both sides are opened. A little practice is needed to become expert in "sticking" a beef, but, once learned, the art is never forgotten. Not so much skill is required simply to cut the animal's throat back of the jaws, but it is at the expense of quick bleeding.

Begin skinning, as the carcass lies on its side, by splitting the skin through the face from poll to nose. Skin the face back over the eyes on both sides and down over the cheeks. Cut around the base of the horns, leaving the ears on the hide. Split the skin from the chin down to the throat to meet the incision made in bleeding. Start the skin in slightly on the sides of the neck and down to the jaws. Remove the head by cutting from just back of the jaws toward the depressions back of the poll. The atlas joint will be found at this point, and may easily be unjointed with the knife. The carcass should then be rolled on its back and held by a small stick three feet long, with a sharp spike in each end, one end being inserted in the brisket and the other in the floor. Split the skin over the back of the fore legs from between the dew-claws to a point three or four inches above the knee. Skin around the knee and shin, unjointing the knee at the lowest articulation, and skin clear down to the hoof. The brisket and forearms should not be skinned until the carcass is hung

up. Cut across the cord over the hind shin, to relax the foot. Split the skin from the dew-claws to the hock and up over the rear part of the thigh, to a point four to six inches back of the cod moving the leg at the lowest joint of or udder. Skin the hock and shin, re-the hock. In splitting the skin over the thigh the knife should be turned down flat, with the edge pointed outward, to avoid gashing the flesh. While the hind leg is stretched ahead it is well to skin down over the rear of the lower thigh, but no attempt should be made to skin the outside of the thigh until the hind quarters are raised. After the legs are all skinned split the skin over the mid-line from breast to rectum.

Begin at the flanks and skin along the mid-line until the side is nicely started. Then, with a sharp knife held nearly flat against the surface and the hide stretched tightly, remove the skin down over the sides with steady downward strokes of the knife. It is important that the skin be stretched tight, with no wrinkles in it. Care should be taken to leave the covering of muscles over the abdomen on the carcass. Its presence on the hide is not entirely objectionable, but a carcass looks much better and keeps better with it on. In "siding" a beef it is customary to go down nearly to the back-bone, leaving the skin attached at the thighs and at the shoulders; skin over the buttock and as far down on the rump as possible. Care should be taken at all times to avoid cutting into the flesh or tearing the membrane covering it. If the meat is to be kept fresh for any length of time, mold will form in such places and will be hard to clean off. A coarse cloth and a pail of hot water should be at hand while skinning, and all blood spots should be wiped from the surface. The cloth should be wrung nearly dry for this purpose, and the less water used the better.

Open the carcass at the belly with a knife and pull the small intestines out to one side. Open the brisket and pelvis with a saw or sharp ax. After raising the windpipe and gullet and cutting loose the pleura and diaphragm along the lower part of the cavity, the carcass is ready to raise.

When raised to a convenient height, remove the hide over the thighs, rump and hips. While in this position loosen the rectum and small intestines and allow them to drop down over the paunch. The "bed fat" lining the pelvis and the kidney fat should not be disturbed nor mutilated.

The intestines are attached to the

Can You Make 12 Words?

Now here is a puzzle that is a prize-winner. You do not have to sit up and work over a dictionary all night. Just a little ingenuity and skill. The puzzle is to get as many words as possible out of the letters herewith given. Use only the letters given and only as many times as they appear. For instance, the letter R appears four times, so in all your words you must not use R more than four times. If you use R twice in one word and twice in another, you cannot use R in another word, as you have already used it as many times as it appears. You do not have to use up all the letters. The puzzle looks simple, but if you can make as many as twelve words, send in your list at once, as the person winning first prize may not have more than that many words.

THE OFFER

We will give \$25 in cash to the person sending in the largest list of words, \$10 to the second largest, \$5 to the third, \$1 to the next five and 50 cents each to the next ten. Send in your list at once. There are no conditions to the contest for these prizes. If you only win one of the smallest prizes, 50 cents, you are that much ahead. It is certainly worth a little effort, and besides you will get several copies absolutely free of the best story paper published. Send your list of words at once. Address,

Why We Do It

We publish the best story paper in America, and we want to send you a sample copy. We can't send it to you unless we have your name and address, so we give these prizes to induce you to send us your name. We will then send you sample copies absolutely free. We will not ask you for one penny of your money—it is your name we want, not your money. Show this offer to your friends.

CONTEST EDITOR, 658 Ridge Bldg., Kansas City, Mo.

liver, from which they may be separated with a knife. The paunch is attached to the back at the left side and may be pressed down upon with sufficient force to tear it loose. Let it roll onto the ground, and cut off or draw out the gullet. Raise the carcass a little higher and take out the liver, first removing the gall-bladder. Remove the diaphragm, lungs and heart, and finish skinning over the shoulders, arms and neck. Sponge all blood and dirt off with the cloth. Split the carcass into halves with a saw, if one can be had; if not, use a sharp ax. Wash the inside of the chest cavity and wipe it dry. Trim off all bloody veins and scraggy pieces of the neck and leave the beef to cool before cutting into quarters.—Farmers' Bulletin.

The Chicago Poultry Show.

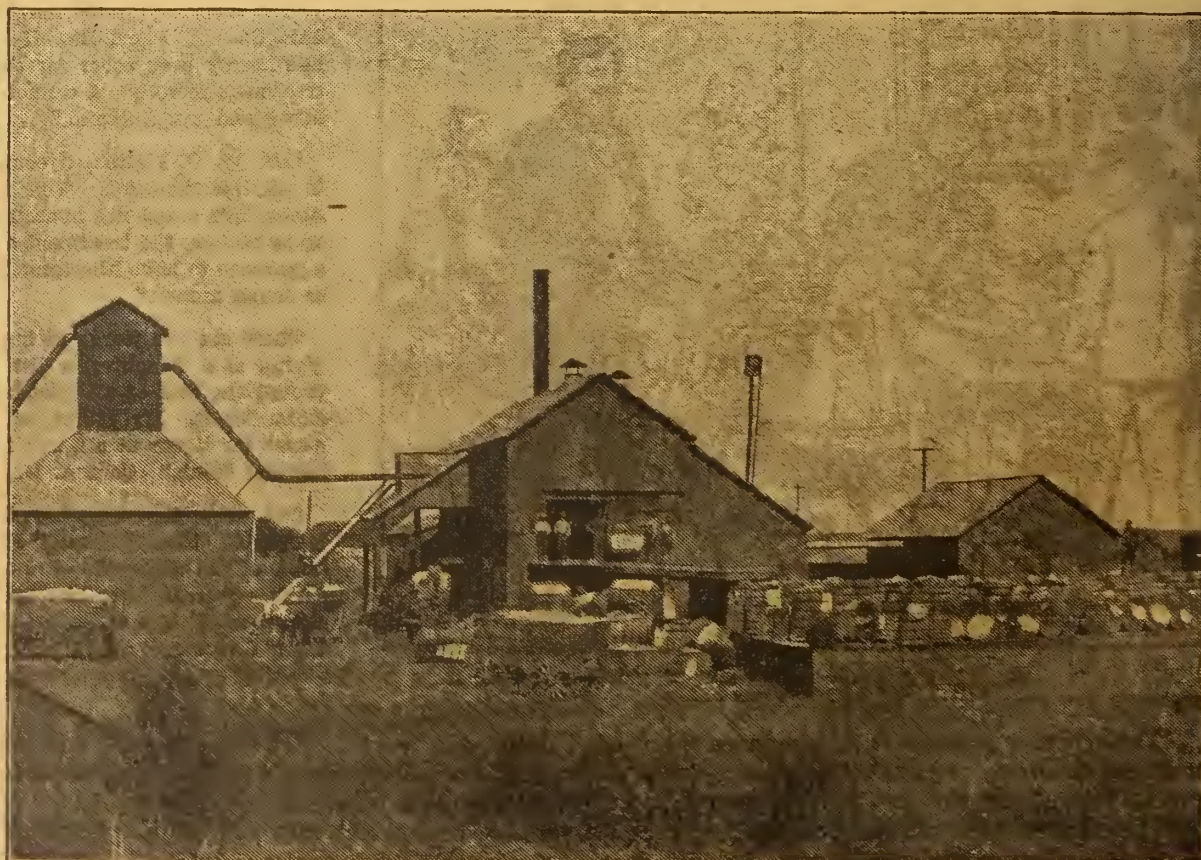

To the Editor of The Homestead:

The annual poultry, pigeon and pet stock show to be held in Chicago January 23d to 30th inclusive, 1907, will be an improvement on any of the series of high-class shows heretofore held under the management of the National Fanciers' and Breeders' Association. The exhibits of stock, incubators, brooders, appliances, foods, remedies and all things pertaining to the poultry, pigeon and pet stock industry have at all times taxed to the utmost the capacity of the largest hall obtainable. The attendance of visitors, always great, was phenom-

enally large last year. Plans are now being perfected to make the exhibition, whether from the standpoint of the exhibitor, the visitor or the management, better than ever before.

Premium lists, giving names of judges and the varieties to be passed upon by each of them, and all necessary information to intending patrons, will be issued about December 15, 1906. Twenty thousand will be mailed out, and it is the intention to have one sent to every interested person, but if for any reason it is not received, or additional copies are desired, write to the secretary, Fred L. Kimmey, 325 Deaborn St. Chicago, Ill.

One of the every-year falling-down places is in transferring the summer broods to winter quarters. Usually we have a nice lot of pullets roosting around here and there, and our first inclination, when the first frost comes, to gather them up and put them away snugly in their winter quarters is a mistake. Fowls are naturally outdoor creatures. Their feathers are for no other purpose than to protect them against cold. They do not suffer from the effects of cold as quickly as one might think. Don't be in a hurry to box them up. If they have been roosting in trees I venture to say they are healthy, and a little cool weather only serves to fit them for real winter. After winter has come and they occupy their winter quarters it is better to chill them a little than over-heat them.

COTTON GIN.

A familiar scene in central and southern Oklahoma. In this section of the new state cotton is extensively cultivated. Neither the yield per acre nor the quality is surpassed in this country.

A STEADY INCOME.

The Republic Mining and Milling Company owns five gold claims in California—fully equipped and ready for operation. Limited amount of treasury stock for purchase of cyanide mill, etc., now selling at 10 cents. Will advance 100% in 30 days. If you are interested in increasing your income, write for FREE Prospectus and full particulars to the Fiscal Agent—Samuel Koppstein, 826 Kansas City Life Bldg., Kansas City, Mo. REFERENCES—W. A. Rude, Cashier National Bank of Commerce, Kansas City, Mo. Northwestern Trust Co., Kansas City, Mo.

WE CAN CURE YOUR CATARRH

WE WILL PROVE IT FREE!

We deal direct with the sufferer, direct from our laboratory to you. We have the latest Nebulizer and the most perfect treatment mailed on ten days approval.

Do not neglect Catarrh. It is very Dangerous. Delay will decrease the possibility of a cure and increase the complications. Death, Ruin and Destruction follow neglected Catarrh.

Ninety-three per cent of the people of this country are suffering from some form of Catarrh.

They are acting as store-houses and distributing stations of germ life that breed diseases ranging from incipient catarrh to quick consumption. Air is the agency that brings these germs into the air passages, and it must be the agency to remove them.

WE CAN CURE YOUR CATARRH

Because We KNOW What our New and Wonderful Discovery Has Already Done for Hundreds ----Will do for YOU----We will Cheerfully and Willingly Send a Full Treatment to You Pre-paid, Absolutely Free, for TEN DAYS TRIAL.

We OFFER what is really a GODSEND to sufferers from Catarrh—Head, Bronchial and Throat troubles. A new and wonderful medical discovery that cures by striking at the root and cause of the disease—by KILLING THE GERMS.

A CURE for YOU, no matter in what bad shape you are. NOW WE DO NOT ASK YOU to take our word, nor that of the cured hundreds. Instead, we want you to try this treatment, entirely at our personal risk, at our expense. Just say the word, and we will send the treatment to you, without pay or promise on your part. If, at the end of 10 days trial, you do not feel like a new being, if you do not honestly bless the day that you answered this advertisement, simply return the Nebulizer to us. You are nothing out. Isn't that a fair and honorable offer? Your word decides it. We fully trust and believe you.

OUR AFFLICTED FRIEND, do not suffer longer from this cruel Catarrh. Don't drag out a miserable existence, a curse to yourself, a nuisance to those around you. Don't let down the bars to more dangerous disease. (CONSUMPTION MOST FREQUENTLY STARTS IN CATARRH.) OUR NEW TREATMENT is applied direct. No drugs to swallow; its application is a pleasure. As if by magic, it stops the hawking, spitting, sniffing and snuffing, relieves the maddening head noises, does away with the nauseating dropping of mucus into the mouth; the queer, stuffy and oppressed feeling of the head; the painful burning and smarting of the air passages. Soothes and heals the irritated membranes, and leaves the head CLEAR AS A BELL. IT IS FOLLY to take medicine into the stomach to kill the germs of Catarrh in the head.

OUR treatment cures Catarrh, Asthma, Head Colds, Pains and Roaring in the Head, Bronchitis, Sore Throat, Headache, Partial Deafness, La Grippe and all diseases of the air passages by a patented method of dry inhalation.

The treatment is easily carried with you; may be used anywhere, at any time.

Read what grateful persons write:

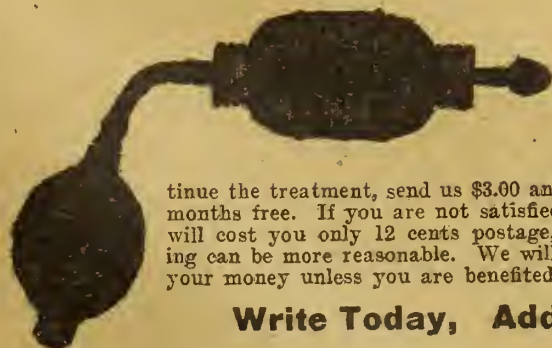

"Your treatment has done me more good in three days than all others I have used in a life time."—J. D. S. ATKINS, Durham, N. C.

"After using your treatment one week I have got my hearing back, which I thought was lost forever."—REV. ALBERT EGLI, Elgin, Ill.

"I have been using your medicator three weeks and would not take \$1,000 for it if I could not get another. I can sing again, something I have not done for two years."—MINNIE COLLINS, Hayner, Ala.

MY SPECIAL TRIAL OFFER

For a Short Time

If you will write us a postal card, we will mail you our new Universal Nebulizer that cannot leak, spill or evaporate with treatment of Vapor Medication with complete directions for a quick home cure. If it gives perfect satisfaction after ten days' trial, and if you are pleased in every way, and wish to continue the treatment, send us \$3.00 and we will mail further treatment for six months free. If you are not satisfied after trial, mail back the nebulizer, which will cost you only 12 cents postage, and you will still have your money. Nothing can be more reasonable. We will deal fairly with you, as we do not want your money unless you are benefited.

Write Today, Address,

UNIVERSAL NEBULIZER CO.

Lock Box 142

ASHLAND, OHIO.

Catarrh Sufferers

Should realize the fact that Catarrh is a very dangerous ailment. It is the beginning of nearly all diseases of the head, throat and larynx and is the forerunner of Consumption.

First a slight cold, acute in form, being neglected becomes worse, finally chronic, and leads to still worse conditions. How important it is that every person consider this matter seriously for himself!

Catarrh is constantly on the increase. There is more today than five years ago. Almost all people are subject to frequent colds. They are seemingly becoming more susceptible to this influence each year. Various causes lead to this condition. We are offering you our Universal Nebulizer and Vapor Medication to counteract these emergencies.

We offer you the opportunity to try it for 10 days free. What more could you ask? We are willing to give you the benefit of the doubt. We don't want your money unless you are pleased with the treatment. The only way you can find out whether it will suit you, is to send for it. Try it. If it does not prove all you expect, return it. It is all simple and easy: See our special trial offer.

Symptoms of Catarrh of the Head and Throat.

Have you any of the following symptoms? If so you have Catarrh in some form and should immediately send for a Nebulizer on trial free. See special trial offer.

Do you hawk and spit up matter? Do you have watery eyes? Is there huzzing and roaring in your ears? Is there a dropping in the back part of throat? Does your nose discharge? Does your nose feel full? Do you sneeze a good deal? Do crusts form in nose? Do you have pains across front part of head? Do you have pain across the eyes? Is your breath offensive? Is your hearing impaired? Are you losing your sense of smell? Do you hawk up phlegm in the morning?

Letters from Customers.

Chicago, Ill., 836 N. Ashland, Ave.

E. J. Worst, Ashland, Ohio.
Dear Sir:—Your treatment is satisfactory. It has altogether cured me of Catarrh in my head; have recommended it to others.

Yours respectfully,
Mrs. B. Maziba.

Fair Oaks, Pa.

E. J. Worst, Ashland, Ohio.
Dear Sir:—Received Nebulizer O. K. and am very well pleased with it. It is all that you claim for it and the few days that I have used it makes me feel like a new man.

Yours truly,
W. G. Davis.

Arcadia, Fla.

E. J. Worst, Ashland, Ohio.
Dear Sir:—I have used your treatment in my family with positive benefit and have recommended it to others who were pleased with results. I cheerfully recommend it to all sufferers of Catarrh.

Rev. Jas. P. DePass,
Pastor M. E. Church, South.

Wabash, Ind.

E. J. Worst, Ashland, Ohio.
Dear Sir:—I have been a great sufferer with pains in my head for 15 years. I tried different doctors, but none could help me. I began to use your treatment and from the first day I began, I have had no pains. I will recommend your treatment to every Catarrh sufferer I meet.

Yours truly,
Mrs. S. Ulshofer.

CAPITAL CITY COMMERCIAL COLLEGE,
 Des Moines, - - - Iowa.

FIELD NOTES.

Mr. Walter Teel, of Rushville, Ill., claims May 28th as a date for a Short-horn sale.

Messrs. Watson Bros., of Creston, Iowa, have a few choice Duroc Jersey boars for sale.

A few good Duroc Jersey boars are being offered for sale by Mr. M. M. Elmendorf, of Lacona, Iowa.

A few good Tamworth boars are offered for sale by Messrs. Norrish & Bevington, of Kingsley, Iowa.

A few Duroc Jersey boars sired by Proud Advance and Orion are offered for sale by Mr. F. E. Garrett, of Lohrville, Iowa.

Mr. Albert Bell, of Lake City, Iowa, is making special prices on Duroc Jersey boars. He has about thirty on hand and says they must go.

Some cracking good Duroc Jersey boars are offered for sale by Mr. Roy E. West, of Churdan, Iowa. These are good and the price is right.

The well-known breeders of Short-horn cattle, Mr. George Bonewell and Mr. Jas. Duffus, of Grinnell, Iowa, announce a public sale to take place on January 16th.

Mr. Wm. Malcolm, of Bigelow, Minn., owner of the sweepstakes herd, is offering a few choice Duroc Jersey boars for sale, sired by his Minnesota State Fair sweepstakes boar.

The administrator of the O. L. Kerr estate, of Independence, Mo., Mr. Llewellyn Jones, claims February 6th and 7th as the dates on which to hold a public sale of Chester White swine.

Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, have a few good American Royal boars for sale. This undefeated sweepstakes boar is the sire of a grand lot of pigs now on the farm.

Quotations on Mammoth Bronze turkey toms and hens are made in the advertisement of Mrs. Emma La Follette, of Blakesburg, Iowa, which appears on page 13 of this issue of The Homestead.

Mr. F. L. Marsh, of Irving, Iowa, has forty head of Chester White swine of April farrow, large growthy pigs of either sex, which he is offering for sale at right prices in an advertisement that appears on page 41 of this issue.

If you want Duroc Jersey boars, write Mr. Delmar McCann, of Kennard, Neb. He has them and if you have a reasonable amount of money to pay for one you can get one of him. He is pricing them so that anyone can afford to buy.

Mr. T. J. Congdon, of Pawnee City, Neb., the well-known breeder of Berkshire swine, writes: "My boars are nearly all gone, but I have the finest lot of bred sows and gilts for sale that can be found anywhere in the West." See Mr. Congdon's advertisement on page 45.

Mr. E. Z. Russell, of Blair, Neb., is now offering a few good Duroc Jersey boars for sale sired by Glendale Critic, his noted winner and sire of winners, and by Malcolm's Model, and Gold Dust Jim 2d. If you are wanting a boar, write Mr. Russell at once.

Read the new advertisement of Messrs. P. S. & S. Barr, of Davenport, Iowa, on page 45 of this issue of The Homestead. They announce that they have a choice lot of vigorous Poland China boars yet to sell and are pleasing customers. Their farm is located two miles northeast of Davenport.

Mr. W. C. Frazier, of Atlantic, Cass county, Iowa, announces that he has 400 Barred Plymouth Rocks and White Wyandottes for sale. The prices are named in the advertisement on page 13 of this issue. He writes that he has a splendid lot of poultry in proper shape, growthy and correctly marked.

Mr. Henry Dorr, of Remsen, Iowa, the well-known and popular Poland China breeder, is offering twelve good young boars for sale sired by Dorr's Tecumseh, Grossman's Choice and Empire Thickset. He is pricing these right and the man who wants one will have to go some with his order, because they won't last long.

An excellent bunch of young Aberdeen Angus bulls are offered for sale by Mr. Frank B. Paup, of Kirkman, Iowa. One is a Pride, another is a Queen Mother, a Heatherbloom, a Carnation and a Duchess. He is offering them at a very reasonable figure. Write him if you are on the market for an Angus bull.

Messrs. Arch Brown & Sons, of Waterloo, Neb., have a few good Duroc Jersey boars for sale sired by Royal Top Notcher and old Echo King. Messrs. Brown & Sons will treat you right if you send them an order. They generally have some pretty good things on the farm. Now is the time, however, to write them if you want one.

Mr. Roy E. West, of Churdan, Iowa, writes as follows in regard to the stock he is offering for sale on page 46 of this issue of The Homestead: "The Duroc Jersey pigs I am offering are well bred and have been fed for usefulness. There is not a poor one in the lot I offer. They have good heads and ears, are lengthy, well banded, good backs and feet. They are not show pigs, but big, strong, well-made, useful pigs that will take the eye of the farmer who wants plenty of size and vigor along with quality. They are

in breeding shape, and those of May farrow weigh around 200 pounds."

Messrs. Jesse Binford & Sons, breeders of Short-horn cattle, of Liscomb, Iowa, write: "We have a few good young bulls for sale which will be priced right; in the lot are two extra good bull calves seven months old, one is a Barrington, sired by our Scotch bull, Nokomis." See Messrs. Binford's advertisement on page 44 of this issue.

Mr. George H. Purdy, of Mason City, Iowa, a breeder of Duroc Jersey swine, writes: "My pigs are in fine condition and growing nicely, and sales have been very satisfactory through The Homestead advertisements. I still have a few of the Model Chief pigs from an Advance dam, that are cracker jacks and of prize-winning type."

In the date claim columns this week Mr. George Regennitter, of Bennett, Iowa, announces a public sale of Poland Chinas to be held on Tuesday, January 29th. He advises us that at that time he will sell forty-five sows, ranging in age from one to four years of age and about twenty gilts that will have as much size, bone and finish as any herd in the state can show.

Mr. E. C. Caverly, of Toulon, Ill., has a number of heavy-boned, lengthy Poland China boars for sale. His advertisement will be found on page 45 of this issue. Eleven of these boars are fall yearlings. They are good, large fellows, in moderate flesh and ready for active service, and will be sold at prices within the reach of all. He has had a large sale on spring pigs and still has a few nice ones left.

The Perfection Chief Stock Company, of Maryville, Mo., was organized when Messrs. Nash & Kimmons, of Pickering, Mo., and Mr. J. B. McMurray, of Maryville, Mo., bought the Duroc Jersey boar, Perfection Chief. These gentlemen will, on February 27th, make a sale of Duroc Jerseys at Maryville, Mo., at which time the get of Perfection Chief and sows bred to him will be the order of the day.

On December 20th Mr. D. J. Cronin, of O'Neill, Neb., will make a public sale of Short-horn cattle at Spencer, Neb., in the northern part of the state. Mr. Cronin is putting in a good lot of cows and heifers, and a good bunch of bulls. This is one of the first Short-horn sales ever held in that part of the state, and the farmers and breeders thereabouts will have an opportunity of buying cattle right at home.

Mr. B. W. Hale, of Laddonia, Mo., writes that everything pertaining to the Duroc Jersey sale circuit that starts with Messrs. Riggan & Rogers, of Petersburg, Ill., on February 12th; T. E. Laurie, of Jacksonville, Ill., on February 13th; B. W. Hale, Laddonia, Mo., on February 14th, and closes at Maupin & Applegate's, at Shelby, Mo., on February 15th, is coming on fine, that each of these breeding firms are breeding an extremely fine lot of stuff for their sales.

Mr. J. D. Vorhees, breeder of Poland China swine, of Charles City, Iowa, writes: "I still have twenty growthy, heavy-boned boars and gilts of March and April farrow, sired by F. J.'s Choice 106849. My recent sales have been a boar to Mr. W. R. Schlick, of Charles City, Iowa, and two bred gilts to Mr. E. L. Ditterman, of Mason City, Iowa. I guarantee satisfaction or will refund the money." See Mr. Vorhees' advertisement on page 45 of this issue.

"The young boars I am offering for sale," writes Mr. Aug. Sonneland, of Harlan, Iowa, "are sired by the world's grand champion at the St. Louis fair, Tip Top Notcher 20729, and are out of dams sired by him. They are of good color, broad, deep bodies, with plenty of style, and ought to go to the head of good herds. I will price them right to quick buyers." Mr. Sonneland's advertisement appears on page 45 of this issue. He also breeds Short-horn cattle and has some choice bulls for sale.

Mr. Henry Dorr, breeder of Poland China swine, of Remsen, Iowa, in furnishing copy for his new advertisement appearing on page 45 of this issue, writes: "The pigs are doing well and I still have a good number of boars left. My fall boars are all sold. The brood sows are coming along fine. I am starting to breed them for my sale. I will pick out the choicest fifty from seventy head and will have twenty-five fall and yearling sows, the balance spring gilts, for my sale, February 5th."

Mr. August Voge, of Portsmouth, Iowa, has just sold a splendid Duroc Jersey boar to Mr. E. C. Gwinner, of Holdrege, Neb., and Mr. S. G. Gwinner, of Sacramento, Neb., the price being \$150. He is a March 14th farrow, is a son of his Iowa State Fair prize winning boar, Crimson Wonder I Am 2d, and his dam is a prize winner sow. Mr. Voge says that this pig is the best he has ever raised on his Hillburst Farm, and the Messrs. Gwinner are to be congratulated on securing so good a prospect to head their herd.

The offering of Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, at the International Hereford sale at Chicago, December 6th, represents some show-yard material, as well as fine breeding character. The yearling bull, Sir Edward, was second in the Iowa special at Iowa State Fair, first in class and first at the head of young herd at the Interstate Fair, Sioux City. Passport prize was first in the Iowa special at Des Moines and first at the Interstate Fair, Sioux City. Lady Albany was first and champion

Iowa special at Des Moines, first in class and sweepstakes over all ages at Interstate Fair, Sioux City.

Messrs. L. H. Roberts & Son, of Paton, Iowa, breeders of Duroc Jersey swine, whose advertisement will be found on page 46 of this issue of The Homestead, write that they have several good boars for sale ready for service.

Mr. B. P. Whittington, of Earlham, Iowa, names March 13th, as a date on which to hold a public sale of Poland China bred sows. At that time he expects to sell about forty-five head, the sale to take place at Redfield, Iowa.

Mr. Robert Hunt, of Earlville, Iowa, has seventy-five Barred Plymouth Rocks for sale and a few very large boned Mammoth Bronze turkeys. He says: "These are of the best-marked birds I have ever raised." His advertisement appears on page 13 of this issue.

Mr. Robert Holm, of Paton, Iowa, starts an advertisement in this issue of The Homestead offering Single Comb White Leghorn and Barred Plymouth Rock cockerels for sale. This is Mr. Holm's third season in advertising pure-bred poultry and he states that his birds have grown better every year, and that his aim has always been to get them improved in quality each season.

Mr. John Schmieder, of Remsen, Iowa, breeder of Poland China hogs, writes: "I have some good, heavy-boned Poland China boars for sale sired by Winning Perfection, a half brother to the young boar that won first at the Sioux City show this fall. There are some grand good boars left yet of March and April farrow which I will sell right to make room for my sows. I also have a good fall yearling that I will dispose of at a low price, as I need the room." See Mr. Schmieder's advertisement on page 46.

Mr. J. H. Howarth, of Moulton, Iowa, makes the announcement in his advertisement on page 13 of this issue of The Homestead, that he has some fine large Mammoth Bronze turkeys and Rouen ducks for sale. In regard to his stock he writes: "Our turkeys are exceptionally fine, both in size, form and markings. We have a fine flock of about fifty early ones all well grown, having had plenty of range and hosts of grasshoppers. Our Rouen ducks are also large and well marked, and we are pleased to have such good ducks and turkeys to offer for sale."

Mr. F. A. Trumbauer, of Patterson, Iowa, has an advertisement on page 42 of this issue offering twenty-five large, growthy Chester white boars of March and April farrow, for sale. In furnishing copy Mr. Trumbauer writes: "The boars I am offering for sale are of the large, growthy, heavy-boned kind and are from pure-bred stock. These boars have had the run of clover pasture all summer and have had plenty of feed, so that they are strong and in nice shape for breeding purposes. I have been in the business for twelve years and my aim has been for size, bone and finish. I have some of the bluest blood in the state and have a bunch of boars that are the best I have ever raised."

Mr. T. A. Stevensen, proprietor of the Grand View Stock Farm, of Shannon City, Iowa, writes that The Homestead is doing good, as usual, and adds: "It always brings me buyers." Mr. Stevensen breeds Chester White hogs, Aberdeen Angus cattle and Barred Plymouth Rock chickens. He says: "I have a number of fine March and April Chesters of both sexes, sired by Dandy Boy 15269 (A.), he by the great sweepstakes boar, Prescott Boy 14239. The other pigs are sired by Prince I Am 15271, tracing to the great Chester White boar, Chester King 9007 (A.). If you want Angus bulls or females write me for prices. I propose to give a reduction in prices for the next thirty days. If I mistake not, no breeder can give better prices, and no breeder will treat you fairer. If in need of anything in my line don't fail to sit down and write for prices." See his advertisement on page 41.

Mr. J. B. McAllister, of Palo, Iowa, whose advertisements appear on pages 45 and 13 of this issue, writes: "Please state that inquiries and orders are coming in fast for my Poland China hogs and Barred Plymouth Rock cockerels which I am advertising for sale in your paper. As I expect to remove to South Dakota in the spring, I am offering the choicest of my fine gilts for sale, also a part of my fine brood sows, which will be bred to H's T. C.'s U. S. my great herd boar. His sire is the great T. C.'s U. S., bred by Mr. T. C. Robinson. His dam, Beauty, is bred by Mr. J. W. Williams, of Cisco, Ill. His grand sire, Bigger Lad, is bred by Mr. Jacob Grassman, of Lanark, Ill. He is a very broad-shouldered, deep-shouldered hog, great in length and depth of body, very large bone and as active as a pig, a sure breeder. Jet black in color, with white feet. As I will remove to South Dakota in the spring I am offering him for sale at the bargain price of \$40 and he is dirt cheap. He could be made to weigh 600 pounds if fitted for the show ring. I will ship this fellow subject to approval, and if not just as I say, he may be returned and money will be refunded. I have a few nice young boars sired by him that will weigh around 175 pounds each that I am offering at \$20. The Barred Plymouth Rocks I am offering are of the pure Eclipse strain which have been winners at the great Chicago and Milwaukee poultry shows for years. They are finely barred in all sections. I am prepared to mate up pairs and trios,

HOWE SCALE CO., OF ILL.
50-52 Lake Street, Chicago, Ill.

or pens, and my prices are very low for such fine stock. If in need of a fine gilt, tried brood sow or a nice young boar, or Barred Plymouth Rock of either sex, write me and I will treat you right."

Mr. V. C. Atwell, of Little Sioux, Iowa, has four registered Hereford bulls, ranging in age from thirteen to eighteen months, which he is offering for sale in his advertisement on page 37 of this issue of The Homestead. These bulls are sired by Hesiod 29th. Write Mr. Atwell for description and prices.

Mr. M. R. Hubbard, of Idana, Kan., is offering a stock farm of 321 acres for sale in an advertisement that appears on page 24 of this issue. There is an eight-room house, frame barn, cattle sheds, corn cribs, large grove, orchard, and the best of water. For prices and terms, read the advertisement and write Mr. Hubbard.

Mr. F. L. Morse, of Floyd, Iowa, in furnishing copy for his advertisement found on page 13 of this issue, writes: "The cockerels that I am offering for sale are of the choicest breeding and are all fine, well-marked fellows, but as I am crowded for room will make bargain prices on them for the next thirty days. Satisfaction guaranteed. No inferior birds shipped at any price."

Mr. Bert Fry, of Plainfield, Iowa, writes: "I have some extra good fall Poland China yearlings weighing 300 to 400 pounds, with from seven and one-half to ten-inch bone in smallest part of hind leg. They are sired by a son of old Chief Perfection 2d. I will also sell one of my herd boars after December 10th. He is as good a breeder and show hog as the best. He weighs 550 pounds and was two years old last spring. Any breeder looking for something good should come and see them. Free livery to the farm and a good square deal to all or money refunded. Everything is in good health and guaranteed." See advertisement on page 45.

Mr. J. T. Scarff, breeder of Chester White swine, of Salem, Iowa, whose advertisement will be found on page 42 of this issue, writes: "I must say that the sales of the past few weeks have been exceptionally good. During the last week I sold seven fine gilts to Mr. W. S. Thomas, of Mt. Pleasant, Iowa, who made his own selection; one male to Mr. W. S. Lindsley, of Pella, Iowa; one to Mr. G. T. Richie, of Barnes, Neb., and one to Mr. C. W. Ronberg, of Red Oak, Iowa, and the following letters show how well pleased Mr. Ronberg was: 'Mr. J. T. Scarff: I received the pig all O. K. yesterday afternoon. He came to Red Oak at 2 o'clock p. m. I am more than satisfied. He is just the kind of a pig I wanted. He was a little gaunt from his long ride, but he is over that today. I am well pleased. Many thanks for all your trouble.' I wish to announce that there are others left just as good, but they are going out very fast. I also have a few exceptionally fine gilts left."

ATTENTION!

Strict attention should be given to the advertisement of Dr. Auld, Dept. 11, 80 Dearborn St., Chicago.

RAY'S POLAND CHINA BOARS.

Messrs. Wm. Ray & Son, of Defiance, Iowa, are offering a bunch of twenty spring boars for sale, and in order to make room will make the low price of \$20 and \$25 for the pick of the bunch. These are sired by Dakota Chief 2d, a son of the famous old Dakota Chief, and Perfection Grand, a son of the sweepstakes boar, Grand Chief Tecumseh 2d. If you want one of these you will have to hurry your order. Write them at once.

JANSSEN'S CHESTER WHITES.

On page 37 of this week's Homestead will be found the advertisement of Mr. J. M. Janssen, of Sibley, Iowa, one of our old-time Chester White advertisers. Mr. Janssen says he has fifteen good boars ready for the trade and will now receive orders for gilts bred or open. He also offers a matured brood sow for sale, bred to farrow in March. If you want a boar or a sow, and in fact anything in the Chester White line, Mr. Janssen can furnish it. Write him at once and mention The Homestead.

FINE POLANDS, MEDIUM PRICES.

Those looking for first-class Poland China boars will do well to write to Mr. Harry R. Smith, Maynard, Iowa. An inspection of his herd will convince you that Mr. Smith has some of the finest. The blood lines are the best and the conditions under which the herd is kept insures all that is desirable in the pig that is to be a future sire. The advertisement is on page 45. It speaks for itself. You can be assured of the best kind of treatment, whether you write or call. Kindly bear this notice in mind and mention The Homestead when writing.

A GOOD YEARLING Duroc MALE.

Messrs. W. M. Sells & Sons, of Indianola, Iowa, are offering an extra good yearling son of Top Notcher Again out of Nell A., the sweepstakes sow at Iowa State Fair in 1904. It should be remembered that Top Notcher again was first prize boar at the Illinois and Indiana State Fairs in 1904, and fifth at the St. Louis Exposition. This yearling is of good size, has extra heavy bone, good on feet and has an extra good heart girth and strong back. He will do any man good and will be priced right. See advertisement on page 37.

SOME CHOICE POLAND CHINA BOARS FOR SALE.

Mr. Charles W. Phillips, of New Sharon, Iowa, whose announcement appears in The Homestead constantly, has now on hand fifteen April and May farrowed Poland China boars, among which are some most excellent ones, any and all of which he is pricing to the trade at attractive prices. They are mostly sired by that grand good boar, On Exhibition, a son of Exhibition, and he by G's Perfection. Mr. Phillips is one of the careful, painstaking breeders who usually have some good practical stock for sale. While his trade has been good this fall he still has the above number of Poland China boars ready for service that he would like to dispose of during the next thirty days in order that he may devote more time and attention to the forty sows and gilts he is breeding to put in his February brood sow sale. Mr. Phillips' announcement may be found on page 45 at all times. A trifle later in the season he will have something to say of the very superior lot of Black Langshan chickens that he has raised this

ATTENTION, BOYS!

Would you like to own a knife like that? It would make the other kids' eyes stand out, wouldn't it now? Well! you can have a knife just like it for nothing, no money, not a cent, just a few minutes' work—easy work at that. No woodpile business in this! It's just dead easy. Write us a post card, a letter, any old thing; but give us your full name and address and tell us you want to earn the PRESS BUTTON KNIFE. That's all you need say. We'll send you full particulars as soon as we receive it. It's a cinch you earn the knife the same day you get our letter. Address,

Boys' Department, THE HOMESTEAD, Des Moines, Iowa.

year from his prize-winning, high-scoring pens.

SOME GOOD POLAND CHINA BOARS.

We desire to call the attention of Homestead readers to the advertisement of Mr. John Schmieder, of Remsen, Iowa, who is offering a splendid bunch of Poland China boars for sale. These are sired by Winning Perfection and Keep On 3d. They have lots of size and plenty of bone, and he is selling the choice for \$30 and \$35. Mr. Schmieder is a good hog man and we will say to any of our readers who want a boar that they will get just what they order. Write him at once and you can depend on it that he will treat you right and will send you a good pig.

EDMONDS, SHADE & CO'S HEREFORDS AT THE INTERNATIONAL.

The offering of Herefords made by Messrs. Edmonds, Shade & Co. at the International, promises to be as good as there will be in that great sale, on December 6th. Some of their offering have been winners at the best fairs this year and go into the sale in prime condition. The yearling bull, Sir Edward, was second in the Iowa special at the Iowa State Fair, first in class and first at the head of young herd, Interstate Fair, Sioux City. Passport Prize was first in the Iowa special at Des Moines and first at the Interstate Fair, Sioux City. Lady Albany was first and champion Iowa special at Des Moines, first in class and sweepstakes over all ages at Interstate Fair, Sioux City.

MAMMOTH JACKS FOR SALE.

When good spans of mules are selling at from \$300 to \$700 per span, as is the case at present, farmers are beginning to pay more attention to the breeding of mules. To secure the right sort of jacks has been the perplexing problem. Mr. John Henry, of Fairfax, Iowa, has made this an easy proposition. He has returned from Missouri after visiting the best jack breeding establishments, with eleven splendid animals of the variety, doubtless, that Absalom rode, of which we read in the scripture. These jacks of Mr. Henry's are low-down, heavy-boned fellows, with very large feet and large, long ears, all of which indicate that they will breed large. He is pricing these jacks very reasonable for jacks of this character. His jacks are all prompt, quick servers on mares, having been reared with horses for companions. It insures keen and willing jacks when desired to produce mules with. Mr. Henry will demonstrate all of this to

prospective buyers. His jacks in 1905 were nearly all sold to our readers, who are well pleased. Fairfax is eight miles from Cedar Rapids, Iowa, on the C. & N. W. and Milwaukee railroads.

WELL BORING MACHINES.

We wish to introduce our readers to the Powers Boring Machine. There are a number of highly desirable features in the construction of this machine. The team walks around the platform, through which the tools and auger work. This lessens the waste of power, which makes boring easy. Being strongly constructed, it is possible to do rapid work. The hardest kind of soil may be cut through, making it very feasible to do drilling where frost is to be encountered. Being mounted, the machine is easily moved from place to place. On page 24 will be found an advertisement of this company. Write for a catalog to Lisle Manufacturing Company, Clarinda, Iowa. Acquaint yourself with this firm, as they are prepared to do you good. Kindly mention The Homestead when writing.

PEEK & PUTNAM'S DUROCS.

The sale of Duroc Jersey bred sows to be offered January 23d by Messrs. Peek & Putnam, of Tecumseh, Neb., will indeed attract the attention of the breeders of that class of hogs in Nebraska. They have been breeding hogs for quite a number of years and during that time have built up one of the best herds in that part of the state. In fact there are few places in the state that one could find a larger combination of good breeding than they could at this herd. These gentlemen have just shipped in from Illinois three very promising young boars of the choicest breeding that they were able to find. One of them is a Hanley boar pig out of Jessie Bartlett and he is a pig that is very good in every respect. They also bought the young boar, Beautiful Joe, by Big I Am, and a son of Tip Top Notcher. At the head of the herd is Crimson Jim by Crimson Jack by Crimson Wonder. He is a large, heavy-boned fellow for his age and a show boar in every respect. Mr. Putnam was the buyer of a fine pig at the A. A. Wilson sale at \$230. This pig is by Morrison's Bell Top and having for his dam D. Yerta, a granddaughter of Tip Top Notcher. In this sale will be two of the best Ohio Chief sows that we have had the pleasure of seeing this year and should be sought for by leading breeders. There will also be three daughters of Tip Top Notcher in this sale. With this great

combination of breeding to be offered we feel confident that whatever you are in search for in the Duroc hog line you will be able to find in this sale.

THE ONLY HOG WATERER.

On page 23 of this issue will be found the advertisement of the Only Hog Waterer. The notable thing about this hog waterer is that it solves the problem of watering hogs in winter. The manufacturers claim that it is not affected by cold, even at 40 degrees below zero. This being true, it must be apparent to all swine breeders that in this hog waterer a long-felt need will be supplied, because since the world began men have wrestled with the problem of watering hogs in cold weather. In an early issue of this paper we will illustrate just how it is that this waterer is just as useful in cold weather as in summer. It is made by the Only Manufacturing Company, of Hawarden, Iowa. Send for descriptive catalog and prices and mention The Homestead when you write.

THE ARDMORE SELLS SUPERBUS AT THE INTERNATIONAL.

The Ardmore Stock Company, of Holstein, Iowa, have decided to sell their great young bull, Superbus, in the International sale at Chicago on December 5th. This great two-year-old son of Imp. Scottish Pride is really one of the great young bulls of the year. He is a Cruickshank Secret, a low-down, wide-out fellow, with a wide, spreading rib and a deep-quartered fellow. He has been a winner at the International and the leading state fairs and is one of the decidedly good things in that Chicago sale. They also sell a good Scotch cow, Mina Lass, in the same sale and she will be safe in calf to this great young bull, Superbus. Prospective bull buyers at the International should look this bull over, also the cow, as they are both bred in the purple and are good enough to go into any herd.

SPECIAL POLAND CHINA OFFER.

Many of our readers will find what they are looking for in the herd of Mr. W. G. Arnold, Strawberry Point, Iowa, who starts an advertisement in this issue on page 37. Mr. Arnold believes in breeding the best and then giving them the best kind of care. He does not believe in pampering, but has great big, healthy, strong-boned boars that will make good wherever placed. Many of them have the making of show material. They develop into large forms, 800 and 1,000 pounds. The sows are very prolific and produce large litters regularly. The gilts that are offered have been raised from these sows. Among this number are some beautiful types and whether these pigs are taken up for a show or breeding herd they can be depended on. Mr. Arnold has had a large amount of building to do this fall and has not gotten around to place his herd before the public sooner than this. His home trade is strong and the best one's will go fast. Write for prices and descriptions, mentioning The Homestead when so doing. See the advertisement for breeding.

NORTON'S CRUICKSHANK BULLS.

We desire to call the attention of Short-horn breeders to the noted Cruickshank herd of Mr. C. E. Norton, of Corning, Iowa. There is not a herd in this country today that can boast of more of the blood of the famous sage of Sittytown than will be found in the Norton herd. He has some great herd heading propositions to offer now, and they are exceptional, both in point of breeding and individual merit. Possibly the best of these is the two-year-old bull, Sultan, by Imp. Bapton Admiral out of Souvenir by Imp. Salamis. He is a Cruickshank Secret and we want to go on record as saying that this bull is good enough to head any herd in America. He should be seen to be appreciated. Another good bull is the yearling called Cinch. He is a son of Banker's Victor and out of Sweet Charity 7th by Imp. Salamis. This is another low-down, wide-out fellow and he is indeed a good one. Both of these bulls are red in color and the man who is looking for a herd bull will go a long way before he will find their equal, both in breeding and individual worth. He also has a couple of good Duchesses of Gloster bulls that he would price, but he would rather that the man would come and see them in person. If you want a herd bull, you can't beat them. Write Mr. Norton or go and see them.

JONES' NATIONAL SCHOOL OF AUCTIONEERING AND ORATORY.

In this day and age of advancement where improved methods are necessary to compete with the keen competition that is extant, it behooves those who are contemplating a course of instruction in auctioneering to decide on the very best school of instruction. The pioneer school in this line and the one best equipped in all its branches, is Jones' National School at 231 Ashland Boulevard, Chicago. Col. Carey M. Jones, the president, is himself one of the leading live stock auctioneers of America. His business covers seventeen states and Canada and is constantly growing. The school has recently been removed from Davenport, Iowa, where it was originally located, on account of securing better equipment. The very best instructors that money will procure are employed by President Jones. The high class of this institution with its practical instructions and high moral character are some of the principal features to recommend to the thoughtful young man who contemplates a course in this line. The school is having a phenomenal growth since its change of location, and now since the instructors are all employed by the year, instead of on fixed dates as heretofore, students may enter at any time. However, the next regular term opens December 10th. We can heartily recommend this school to any and all as being high class in every respect, every instructor being a practical demonstrator in his or her particular line. The new arrangement for boarding and rooming the students at a nominal cost is one of the main features since moving to Chicago. The writer has from time to time conversed with students who have graduated at the Jones National School, and without exception finds them highly pleased with their course of instruction, and with the treatment of the management as well. They all commend the school very highly on the high moral character and high sense of manhood that is inculcated by the instructors. We cannot say too much in praise of the Jones National School. Being personally acquainted

with Colonel Jones since boyhood, we know whereof we speak when recommending this school to our readers. Many a young man has secured instruction with beneficial results by attending this school, that has enabled him to earn two or three times the salary that he could otherwise have earned had it not been for this judicious training. December 10th will be a good time for new students to enter at the commencement of the term, particularly farmers' boys, who will then be through corn husking and will have a few months' leisure. Don't put the matter off, but write today for a catalog to Jones' National School of Auctioneering and Oratory, 231 Ashland Boulevard, Chicago.

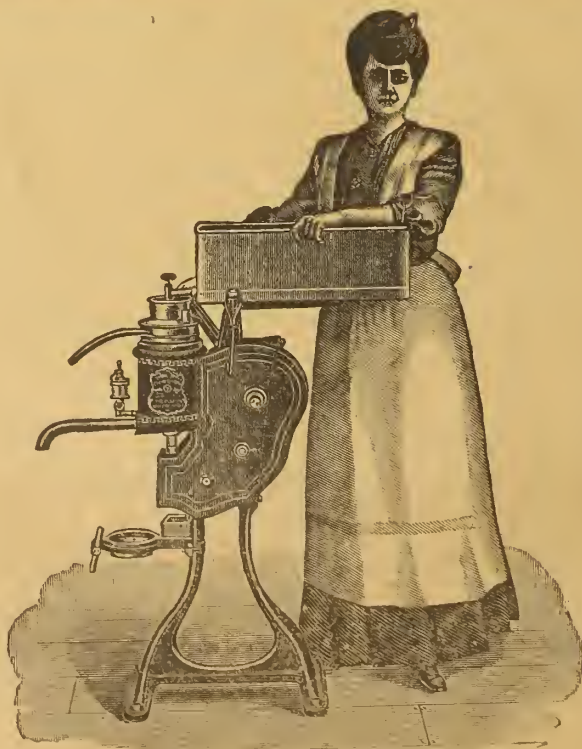

BRIGGS SELLS, FEBRUARY 20TH.

Mr. S. P. Briggs, of Seward, Neb., informs us that he will hold his annual brood sow sale February 20th and we can say after a careful inspection of this herd that Mr. Briggs has some good ones on hand for the boys in the spring. Mr. Briggs held his first annual sale of Duroc bred sows last February and made a neat little average of \$55, so you may know from this that the quality and breeding shown in this herd is among the very best. While not a veteran in the business, he has demonstrated very clearly that he has some knowledge of individually and how to mate this kind of a hog to produce the best results. At the head of this herd is Fashion's Improver, a son of old Improver II. and one of the very best boars that this grand old sire ever produced. He was good enough to win third prize in the yearling class at Nebraska State Fair in 1905, and was only in good breeding condition. He is assisted by Seward's Orion, a son of old Gold Dust Orion, which was certainly a good producer. This hog won second prize in senior yearling class at the Nebraska State Fair this year and was pronounced by many good judges to be a good one. There will be forty head of richly-bred sows in this sale and mostly hred to these two great boars. Remember his date and arrange to attend this sale, as he can surely suit you.

T. A. BALDWIN'S SHORT-HORN SALE.

On Thursday, December 13, 1906, Mr. T. A. Baldwin, of Emmetsburg, Iowa, will sell at his farm near town, about forty head of Short-horn cattle, including his imported Scotch bull, Grand View Chief 244020, his imported cow, Primrose 6th, and her daughter, Jasmine of Orchard Farm 5th. There will also be a splendid lot of well Scotch-topped cattle, including two daughters of that grand old show and breeding bull, St. Valentine, and this is one of the last chances breeders will have to secure some of his get. Imp. Primrose 6th is a six-year-old red cow, a good individual and a good breeder. She was bred by Mr. John Cran, of Keith, Scotland, was imported by Mr. Geo. Isaac, of Romanton, Ontario, and finally became the property of Mr. Baldwin. She is safe in calf to Morning View Lad, a richly-bred Cruickshank Victoria bull, and is one of the decided attractions of the sale. She will also have a two-year-old heifer in the sale, sired by his herd bull, Grand View Chief. Another very choice cow that will be included in the sale is Warden Dove, a daughter of the great St. Valentine. She was said to be one of the best helpers in the famous Chicago sale of Mr. Geo. Ward. She is a full sister to Warden Dove 2d, the show heifer that sold in the Geo. Ward closing out sale for \$600. Valentine Princess is another daughter of St. Valentine. She was the last thing ever sired by that famous old sire. She will be right at calving on sale day. There will also be several granddaughters of St. Valentine in the sale. There will

be ten cows with calves at foot and a great many will be right at calving at sale time. There is not a female going into the sale that has not had a calf within the last twelve months, so that buyers may rest assured that there will not be any worn out or barren animals in the sale. The cattle will be

The United States Cream Separators have been on the market for a long time. Truthful, independent, impartial and unprejudiced investigations have been conducted. A summary of the results are "a well constructed, convenient, durable machine," "a close skimmer; runs easily." "None skimmed closer than the United States." "Satisfactory in every respect." These are from widely separated places under a great variety of conditions. The same conclusions are duplicated again and again. The results are uniform. If one is satisfied, all must be. The substance of the whole matter is that the United States Separator is concentrated efficiency, simplicity and durability. They have distributing warehouses in all the large cities. Address all letters of inquiry to the Vermont Farm Machine Company, Bellows Falls, Vermont.

I CURE CANCER

My Mild Combination Treatment is not a NEW Remedy. It has the Experience of Years Back of it.

I have spent my entire professional life in the treatment of Cancer. I have so perfected my Mild Combination Treatment that it is free from pain. It quickly destroys the deadly Cancerous growth and at the same time eliminates it from the system, thus preventing a return of the disease.

My Mild Combination Treatment has removed Cancer from the list of deadly fatal diseases and placed it among the curable. This is especially gratifying when it is known that Cancer is increasing at an alarming rate, the disease having quadrupled itself in the last 40 years, statistics showing that it alone causes 100,000 deaths yearly in the United States.

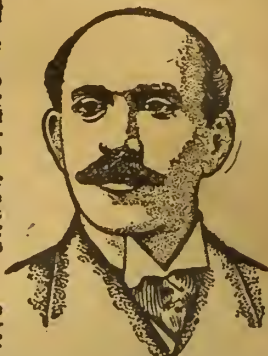

THE KNIFE DOES NOT CURE.

Any doctor who uses a surgeon's knife in an attempt to cure Cancer is performing an act little short of criminal. The patient suffers untold agony, and after a short time finds himself in worse condition than before the knife was used.

Operations are not only unnecessary in giving relief for Cancer, but they produce most serious after-results. It is utterly impossible to know when all the diseased cells have been removed for the reason that the blood flowing from the fresh wound prevents the surgeon from determining the result of the operation. If you value your life, avoid the knife.

PAINFUL TREATMENT UNNECESSARY

There is no necessity for the patient, already weak from suffering, enduring the intense pain caused by the application of caustics, burning plasters, fiery poultices, etc. I have cured many hundreds of the most advanced cases of Cancer by my Mild Combination Treatment without giving the patient pain or inconvenience.

CURED CANCER ON NOSE AND HEAD

I had a very bad Cancer on my nose, and nothing seemed to help me. X-Ray treatment only made me worse. Three weeks of your treatment cured me. My only regret is lack of words to express my heart-felt thanks. Skin is now soft and smooth. I hope all cancer sufferers will read this and apply to you. Mrs. Blenhor, of my town, whom you treated, is well. H. W. W. BELL, Crete, Neb.

CANCER OF STOMACH CURED

After four doctors had given up my wife, who had cancer of the stomach, I immediately sent for your treatment. You cured her, and now, after nine months, she is as well as a fish in water. I would advise all sufferers from cancer to write you. You can certainly cure this dreaded disease. O. K. KIND AND WIFE, Holstein, Iowa.

CANCER OF BREAST, FOUR YEARS STANDING, CURED IN A FEW WEEKS

I inform you, with great pleasure, that I am now cured of a very bad Cancer in the Breast of four years standing. Four doctors, two of them specialists, gave me no relief and I was badly disheartened. I tried your Mild Combination Treatment and it did what you claim. I know you can cure Cancer for you cured my mother also. Mrs. C. W. SMITH, Yates Center, Kan.

CANCER OF THE LOWER LIP CURED IN A FEW DAYS

I suffered two years from cancer of lower lip. Tried everything. You cured me. I was discouraged for a long time, but when you cured Mr. Donnell, our postmaster, I decided you could cure me. You undoubtedly know your business. My advice to sufferers is to not wait, but commence your treatment at once. J. M. RATHMEL, Waverly, Kans.

YOU CAN BE CURED AT HOME

I have so perfected my Mild Combination Treatment that patients may use it at their home with as good results as though it were applied at my offices. I will gladly furnish to every sufferer positive and indisputable proofs that my treatment does cure Cancer. I will furnish ample evidence of my integrity, honesty and financial and professional ability. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—write for my book, "Cancer and Its Cure." It will cost you nothing and will tell you how you can be cured at home. Address,

DR. O. A. JOHNSON, 1233 Grand Ave., Suite 822, Kansas City, Mo.

in good breeding condition, and are a useful and well-bred lot of Short-horns. There is not a better place in the state to buy Short-horns than in northern Iowa, and we do not hesitate to say to those who are looking for bargains to be sure to attend the Baldwin sale. Besides the herd bull, there will be about ten head of young bulls, all sired by Grand View Chief. Write for catalog at once and be kind enough to mention The Homestead.

S. J. MILLER'S PERCHERONS, COACHERS AND JACKS.

Mr. S. J. Miller, of Kirksville, Mo., the importer of Percherons and coachers, writes that he has never had an importation of horses do better than has the present importation that are now in his barns. Mr. Miller has had several visitors at the barns who have visited many importers and all have said that they have never seen such an array of coming threes and fours as he brought over this year. Mr. Miller paid particular attention to scale, yet quality was an all important factor in all his purchases. Good colors were also looked after and nearly all are blacks, with a few dark grays.

Mr. Miller has never asked high prices for his stallions, preferring to make quick sales and at a reasonable margin of profit. By this policy Mr. Miller has held his older customers, they in turn have recommended his horses to prospective purchasers and he again this year will continue to sell at live and let live prices. Mr. Miller, while not making a specialty of jacks and jennets, has on hand and for sale some first-class mammoth jacks that must be seen to be appreciated. Among these is one that is pronounced by competent jack men as one of the best jacks in Missouri. Mr. Miller's advertisement will be found on page 42. He requests that you write him, telling what you want. Pictures of the horses will also be sent on request.

LAST CALL FOR MONTEZUMA, IOWA, POLAND SALE.

Among the Poland China sales that will be worthy of the attention of good swine breeders is the joint sale of Messrs. E. F. Saunders and F. E. Terrell & Son, to be held next week, December 4th, at Montezuma. Sale begins promptly at 1 o'clock in the feed barn within a minute's walk from the depot. Those coming by train will find it possible to make good connections. Trains arrive from the north in the morning and from the south at noon. Buyers should find in this offering something to suit their tastes. The care and management has been good; health and vigor has been sought. A large part of the offering is sired by Jones' Wouder 105223, a half brother to the hog that won second at the state fair this fall. This hog is a big fellow, with good, dense bone and his pigs show it. The other sire responsible for a large part of the offering is Black Chief 93297, sired by Dakota Chief 42721, he by Chief Tecumseh 2d 14579. On the dam's side these pigs carry considerable Wilkes blood, tracing back to Hattie Wilkes 111164. The offering is what breeders are looking for. Boars and gilts are of nice length and up on their toes. Terms are liberal and parties from a distance will be cared for. Remember the date and place it on your lists. The forty sows and ten boars offered will insure you a choice. The advertisement will be found on page 41.

AUCTION OF HIGH-CLASS SHORT-HORNS AT HOLDREGE, NEB., DEC. 16TH.

Messrs. F. M. Marshall, of Blackwater, Mo., and G. C. & R. H. Wilkinson, of Edinburg, Ill., furnish the cattle for this auction, and about equal numbers from each herd. As is set forth in the advertisement, the bulls include both straight Scotch and pure Bates, but the females are largely pure Bates and Scotch topped. We will have something to say next week with reference to the Wilkinson consignment, and in regard to Mr. Marshall's cattle those who have seen them say that his offering is better than that which he sold publicly under adverse conditions last June at his farm in Missouri, for an average of \$170. Mr. Marshall writes: "I am consigning sixteen females and nine bulls in the Holdrege, Neb., sale, December 15th. The bulls are the best that have been offered from the Blackwater herd, either publicly or privately, and I feel that they are the best lot that have been offered in Nebraska this year. Among the Bates bulls it is quite likely that Grand Wild Eyes will be the favorite. He is a roan, descending from the celebrated Vaile Wild Eyes tribe, and is a bull of wonderful fleshing qualities standing on the shortest of legs with good top and bottom lines and extra good in the twist, with great loin, flank and shoulders and a better handler is rarely found. I believe he will make a strong show next year as to two-year-old. Wild Eyes Duke 7th, of same family, is a red of splendid character, having the best head and horn I ever saw on a yearling and is uniformly good throughout his conformation. Kirklevington Duke 4th, while much younger, is just right to show

TOO LATE TO CLASSIFY.

20 BOARS. POLANDS. 40 SOWS. CAREFULLY culled and well bred. Five March boars that will make herd heads, sired by High Looker, a World's Fair winner, and Justice by Corcorator. Large prolific litters. My pigs will make 800 to 1,000 lbs. at maturity. Write for prices or call. Special offer. M. G. Arnold, Strawberry Point, Iowa.

To Be Held at My Farm Six and One-half Miles Southwest of

Perry, Iowa, Wednesday, December 19, 1906

21 HEAD

8 very choice Stallions ranging in age from yearlings up.

12 head Mares and Colts. 1 Shetland Pony.

The mares range in age from yearlings up. Ten of them will be bred and safe in foal to the great prize winning stallion Narcisse, (42440) 21992.

There will Be Some Splendidly Matched Teams of Registered Percheron Mares in This Sale.

42 Head of Cattle: 2 registered Short-Horn Cows, 2 registered Short-Horn Bulls, 18 grade Steers, yearlings and two year-olds, 20 grade Cows & Heifers

Col. Griff Johnson, Auct.
Howard Rousch, Clerk.

J. R. Mills & Son, Perry, Iowa

next year as a junior yearling and I think is the making of the best bull of the offering, if he develops as he is starting. He is a full brother to Kirklevington Duke 3d that was sold at the Blackwater sale in June to Mr. E. N. Manly, of Lyons, Neb., for \$390. Filbert's Baron is just turning two years old. Bates breeders that need a good herd bull cannot afford to miss looking this one over. Along with his half brothers, all of these Bates bulls being sired by Barrington Duke of Blackwater that sold for \$600 in my last June sale. I also catalog Bates bulls by Grand Duke 195175, second-prize bull at the American Royal in 1905." We shall have more to say next week concerning the Scotch hells and the females from the herds of Mr. Marshall and Messrs. Wilkinson. Catalog can be obtained by addressing Mr. W. C. McGavock, of Springfield, Ill.

AUCTION OF SELECT SHORT-HORNS AT DAVID CITY, NEB.

In the auction which Sale Manager W. C. McGavock, of Springfield, Ill., will hold at David City, Neb., on Wednesday, December 12th, are included more tops than he has ever sold in one auction. The show cow, Mildred 12th, a thick, massive red six-year-old, possesses great style and finish, along with her scale and substance. It is likely that such a cow has not been auctioned in Nebraska. She is straight Scotch and her dam is a full sister to the dam of Pine Grove Mildred, the \$1,000 and highest priced cow sold in Col. F. O. Lowden's sale last June, where the highest average of the beef breeds within recent years was obtained. She will be sold with bull calf at foot by Rose King 248116 and rebred August 20th to Scottish Rohin, which latter bull was bred by Mr. I. M. Forbes from an imported Scotch dam, and sired by the famous hull, Imp. Cock Rohin. One of the plums of the sale is the two-year-old, Sybil of Riverdale. She is a show heifer and of the noted Scotch Secret family, and was sired by Scotch Robin, a hull of the same strain, that was bred by Mr. J. F. Prather and sired by Imp. Proud Robin. Her dam, Sihyl, was a winner in the C. C. Norton herd at the International Exposition in 1900, and her sire, and those of her first, second and third dams were respectively, Imp. Banker, Imp. Salamis, Imp. Prince Bishop and Imp. Lord Cardinal. It would be indeed difficult to find a better-bred one and it is the source from whence has come some great herd bulls. Another choice one from the Prather herd is Anoka Strathallan A., bred by Mr. Harding, and a granddaughter of the famous Whitehall Sultan. Scotch-topped females are also included, from the Riverdale herd and several of this offering are in calf to Imp. Highland Champion, one of the best sires of the breed. In the offering from the herd of Mr. Lewis A. Stookey, of Harristown, Ill., will be found a number of very symmetrical, grandly-finished cows, the major portion of which are Scotch topped and are in calf to or have calves at foot by Imp. Master Archer, an International Exposition prize winner and full brother to the F. O. Lowden stock bull, Ceremonious Archer, a champion and \$5,000 bull. Attractions in

the hull line are listed in the advertisement and herd headers are included that are good enough to head the best herds. The catalog will prove interesting and can be had on application to Mr. McGavock, and notes concerning the high-class hulls and other attractions will be given later.

A. H. BRETT SELLS SHORT-HORN CATTLE AND PERCHERON STALLIONS AND MARES.

On December 18th, at Mason City, Iowa, at the feed barns in the city, Mr. A. H. Brett, the well-known Short-horn breeder, will sell forty-eight head of select Short-horns from his Willow Lane herd, including sixteen straight Scotch females. The remainder are Scotch-topped. There are only two hulls in the offering, the remaining forty-six head being females largely of breeding age. About sixteen calves will be sold with cows. The offering is one of the best that Mr. Brett has made in recent years and will include the great cow, Imp. Likely, a half-sister to the \$12,000 Imp. Choice Goods, she being sired by Remus. Imp. Likely is listed as Lot 1 of the catalog. Lot 2 is a choicely-bred Mysie got by McDiarmid. This is one of the favorite families of Mr. Cruickshank and Mysie of Cloverdale 5th, cow in question, is a choice representative of the family. She was bred August 12th to the Scotch bull, Douglas. Lot 3, Serepta Lady, is a six-year-old cow of Cruickshank's famous Secret tribe. She was bred August 12th to Lord Champion. A choicely-bred Butterfly will be found in Lot 4, a six-year-old cow by Barmpton Prince. She is out of Butterfly of Wildwood by Golden Victor. She has a beautiful cow calf at foot by Hampton's Marshal, dropped September 23d. Lot 5, Rose of Ethel, is a choicely-bred Campbell Rosebud, or Rose of Aberdeen, family. She dropped a bull calf on September 23d by Baron Secret. Lot 6 is Miss Buckingham, a daughter of Lord Gloster. She traces to Imp. Airy Buckingham, bred by Mr. Amos Cruickshank himself. She was bred July 5th to the Mysie hull, McDiarmid. Lot 7 is Orange Bud 2d. This is a nicely-bred Orange Blossom five-year-old cow got by the Canada-bred bull, Victorious. She dropped a beautiful red cow calf April 23d by Golden King and was bred again May 25th to Gloster Baron. Lot 8, Gloster of Aberdeen, belongs to the famous Scotch family of Vain Maids, better known in American hands as Cherry of Aberdeen family. This is a nice Scotch cow, in calf to Hampton's Marshal. The catalog shows a nice line of breeding and while not all Scotch, there will be found a beautiful lot of Scotch-topped stuff that will doubtless go at prices that breeders can well afford to pay. Mr. Brett finds himself overwhelmed with stock for the winter and makes this sale to make room for the remaining stock on the farm. In addition to the Short-horn cattle to be sold, he will sell a choice line of Clydesdale and Percheron brood mares. There will be ten head of these mares, six Clydes, all in foal to an imported stallion; four Percheron mares in foal to an imported Percheron stallion; one splendid Percheron stud colt, also one select Clydes-

dale stud colt. For catalogs of this important sale address Mr. A. H. Brett, Mason City, Iowa.

H. S. DUNCAN & SONS' SHORT-HORN SALE.

At Clearfield, Iowa, Messrs. H. S. Duncan & Sons will hold one of the notable Short-horn sales of the season. Colonels Woods, Belows and Walker have been secured and they will begin operations at 1 o'clock on Friday, December 7th. It goes without saying that everyone of the 100 head offered will go under the auctioneer's hammer with no reservations. As long as people want stock it will be brought out. And there should be a ready demand for the offering. The breeding is good from first to last and there are about twenty head of pure Scotch cattle. The cows are a special attraction. A score of these have calves at their sides. Here is the place for the young breeder to pick up a pair that often goes for the price of one. A more satisfactory guarantee of a matron's breeding ability cannot be given. The young hulls are a sap-py, serviceable bunch and among such a number it should not be a difficult matter to make a selection to suit one's tastes. The splendid Cruickshank hull, Orange Gloster Baron 223327, has been used on this hard very successfully. The larger part of the young stuff is sired by this great hull. Many of the bred females are to his service. O. G. Baron is sired by King Gloster 155470 out of Nonpareil Orange Baroness by Nonpareil Prince 116882, tracing to Imp. Orange Blossom 18th. Clearfield is in the eastern part of Taylor county on the Burlington system. Write for a catalog and plan to get some of the bargains in this offering. Turn to page 38 for the advertisement and kindly mention The Homestead when writing.

SCOTCH SHORT-HORNS AT AUCTION.

On December 14th, at Mason City, Iowa, will occur the dispersion sale of Messrs. Marston Bros.' choice herd of Scotch and Scotch-topped Short-horn cattle. These cattle have been gathered together by Dr. Chas. L. Marston and his brother with the idea of perpetuating the herd of Short-horn cattle indefinitely; but conditions have arisen whereby the fine half section farm owned by these brothers near Mason City has been disposed of; hence this dispersion sale becomes a necessity. At dispersion sales there always occur opportunities to secure a class of cattle that the owners heretofore have refused to price; in fact, it is not the part of wisdom for any breeder to allow the choicer animals in his herd to be taken away under any circumstances while he proposes to continue the breeding of cattle. But when for any reason a dispersion sale is forced, then comes the opportunity for the choicest and best breeding matrons in the herd, as well as herd bulls, that would otherwise not be for sale, to go under the auctioneer's hammer at whatever price the public sees fit to place on them. It is the opinion of The Homestead that this sale will present one of the best opportunities presented in recent years to the farmers of northern Iowa and Minnesota to secure just the class of cattle above described. A goodly portion of the Marston cattle are Scotch of most royal breeding, including cows that have cost them from \$500 to \$600 and even more per head. These cows will not be dispersed along with the two herd bulls, both Scotch, whose breeding we shall give the particulars of in our next issue. In the meantime, catalogs are in the hands of the printer and will doubtless be ready for distribution by the time this article is read by Homestead readers. This catalog should be in the hands of every person interested in Short-horn cattle, whether they wish to purchase or not. They may be had by applying to Dr. Chas. L. Marston, Mason City, Iowa.

WEEK END RATES VIA M. & ST. L. R. R.

On Saturdays and Sundays the Minneapolis & St. Louis R. R. will sell round-trip excursion tickets, Des Moines to Waterville and Montgomery, Minn., at one fare plus \$2. Return limit seven days, including date of sale. Buy tickets at City Ticket Office, 512 Walnut St., or Union Station.

VERY LOW RATES TO INTERNATIONAL LIVE STOCK EXPOSITION, CHICAGO.

Via the North-Western Line. Excursion tickets will be sold December 1st to 5th, inclusive, with favorable return limits. Apply to agents Chicago & North-Western Ry.

A FARM WORTH INVESTIGATING.

Twelve miles from Kearney and five miles from two other stations in Buffalo county, Neb., is located one of the fine 480-acre farms of this region. Practically every foot of this land can be put under cultivation, as the surface is quite level and the soil is a rich deep black loam, with heavy clay subsoil. This fact, together with the climate, makes about ideal conditions for corn, alfalfa and wheat. Of this farm, three-fourths is under cultivation, the remainder in pasture. The improvements are all that could be desired. Fences enclose the different fields, while the farm building and house are modern in construction and substantial. In fact, Mr. W. H. Grassmeyer, the owner, whose address is Riverdale, Neb., had intended to make this farm a permanent home. However, his desire to educate the family of boys and girls made it necessary to seek a new location. The local school is a mile distant, while there are four churches of different denominations in the immediate neighborhood. Rural mail and telephone service is enjoyed. This farm is offered for \$60 per acre, on easy terms. For further information write to Mr. Grassmeyer for an illustrated booklet of the farm. Kindly refer to the advertisement on page 25 and mention this paper when writing.

Hughesdale Dual-Purpose Short-horns.

The name Hughesdale may not be familiar to Short-horn breeders in general, but many are aware of the fact that Mr. H. J. Hughes, of Trenton, Mo., who owns this beautiful breeding farm, is one of those breeders who has the interest of the Short-horn always uppermost in his mind. It was Mr. Hughes who entered the great cow, Rowena 2d, in the dual-purpose contest at the St. Louis World's Fair, and Hughesdale is today her home. The writer has on various occasions within the past two years visited at Hughesdale and we do not hesitate to say that great as Rowena 2d is, there are other cows here that compare favorably with her, are as great milkers and are cows of high individual merit. Mr. Hughes is known as one of the men who believes in the milking qualities of the Short-horn, believes in developing their milking qualities and is practicing what he preaches. Every cow which finds a permanent home at Hughesdale must demonstrate her ability to give a goodly amount of milk and at the same time she must be a cow of high individual excellence, a feeder and a producer. In order to carry out his plans to the fullest extent Mr. Hughes has established an up-to-date dairy, milks these Short-horn beauties, tests their milk both as to weight and as to the amount of butter fat. Each and every member of the herd has also been tested for tuberculosis by the state veterinarian and a certificate issued. This precaution was taken by Mr. Hughes that he might protect alike the people who buy the product of the herd, the milk, butter or the offspring therefrom. As to the breeding of this herd of dual-purpose Short-horns, much might be said, as Mr. Hughes realized from the start that he could only succeed in this corn and beef producing belt of America by breeding the kind that lay on a goodly amount of mellow flesh. As a result practically every member of the herd shows a goodly amount of Cruickshank blood, and some are pure Scotch, but in Mr. Hughes' herd, as in most every good herd in America, it is the combination of Cruickshank and Bates blood that produces the best individuals. At the head of the Hughesdale herd is found that grand show and breeding bull, Viscount of Anoka, that for three years was champion of America. He was got by a pure Cruickshank bull and was out of Viscountess of Anoka, said to be a cow that was a heavy milker, and she was a show cow in every sense of the word. She was got by Prince Victoria of Hickory Park and was out of Imp. Victoria 51st by Royal Duke of Gloster. Her next dam was Imp. Viscount, bred by Mr. A. Cruickshank and got by Lord Landsowne. Viscount of Anoka's bulls and heifers in Mr. Hughes' herd show his ability as a sire and they will be heard from in the future. Just now Mr. Hughes is offering some very desirable young bulls, one a yearling out of Rowena 2d, and got by Grand Lavender, a pure Scotch bull got by Grand Victor, the Cruickshank bull that sired so many of Mr. Geo. Bothwell's winners. The man who is looking for the dual-purpose sort should look to this youngster, as he comes from the greatest cow ever entered in a public contest for both milk and beef, and was got by a bull that sprung from ancestors that have great reputations both in America and Scotland. At thirteen months of age this young bull weighs 1,200 pounds and will make a 2,400-pound show bull. Clara 6th, a cow that has given over forty-one pounds of milk per day, is another of Mr. Hughes' good ones. She was got by Baron Bishop and out of a daughter of Imp. Chief Baron. Her young bull by Viscount of Anoka will be found desirable. Clara 7th, a daughter of Clara 6th, was got by the pure Scotch bull, Grand Lavender, that was got by Grand Victor and out of Imp. Sittytown Lavender. She has a six-months-old bull by the pure Scotch bull, Gloster Light, that was got by Lord Gloster. Another heavy-milking cow is Moonlight, a cow that produces forty pounds of milk per day. She was got by Spartan Chief and out of a daughter of Rosa's Prince 2d; dam a daughter of Master of the Mint. This is another of Mr. Hughes' 1,500-pound cows and a great producer. Her last calf, now past six months of age, is by Viscount of Anoka. Her bull calf before this one sold for \$300. A Young Mary cow got by Roan Champion is also one that Mr. Hughes classes among his heavy milkers. These are but a few of the many good things at Hughesdale and any of our readers who visit there will find that Mr. Hughes has paid particular attention to scale without losing sight of the quality. The young bulls from the herd are being priced worth the money and the man who is looking forward to the milking quality of his Short-horns will do well to get in touch with Mr. Hughes at once. The dairyman will also find here an opportunity to get bulls that will sire stock that he can put over the scales profitably or grow out for milking cows. The advertisement of the Hughesdale dual-purpose Short-horns will be found regularly in our Short-horn department, this week on page 45.

Healy's South Omaha Sale.

The "milking Short-horn," the cry that has been broadcast throughout the land the past few years, will rule the day at South Omaha, Neb., on Tuesday, December 11th, when Mr. O. M. Healy, Bedford, Iowa, and Mr. O. E. Osborn, Weston, Iowa, will sell forty-one head of Bates cattle. Mr. Healy is one of the pioneer breeders of Bates cattle, and notwithstanding the clamor for the Scotch of late years, he has nevertheless stuck to his first love, and he has on his farm today one of the best herds of the old reliable Bates that is to be found in the country. In this sale will be thirty-three head of straight Bates breeding. About fifteen of these belong to the celebrated Duncness tribe, the same family that made the record price for Short-horn cows, and it stands today and has never been beaten by any other family of Short-horns. The balance will be Wild Eyes, Kirklevingtons, Oxford and Barringtons. These tribes are among the most noted of the Bates families and some of the most noted show animals that ever lived belonged to these same tribes. Fourteen head in this sale are the get of Mr. Healy's former herd bull, Airdrie Duke of Hazelhurst. It is not out of place to call our readers attention to the fact that this same bull was the sire of Wild Eyes 61st, the cow that sold in the Bigler sale for \$3,040 and was the second highest priced

cow ever sold in the state. Breeders and farmers will therefore realize that when they make their selections in this sale that there is a long line of ancestry behind them that means something. Wild Eyes Winsome 19th as a nine-year-old daughter of Airdrie Duke of Hazelhurst and out of a daughter of the famous old bull, Peculated Wild Eyes. She is a straight Wild Eyes and has a heifer calf at foot by Duke of Wapsie 229370. Kirklevington Lady 5th is one of those Finley-bred Kirklevingtons; is eight years old and one of those broad-backed Bates cows. She is a most excellent breeder and has a splendid bull calf at foot, one that can be made a herd bull if properly cared for. Grand Duchess of Walnut Park 6th is an eight-year-old Duchess and a daughter of that famous bull, 2d Duke of Oaks 123663. She is a grand good cow and will have a bull calf at foot by Wapsie Grand Duke 9th. There are a great many that we could mention in detail, but we will say to our readers that it is the best lot of Bates cattle that has been sold in the West in many a day. The cows are those large, broad-backed kind, having good udders and are splendid milkers. In fact, they are the kind that always pay the way, either at the milk pail, or when you come to sell them for beef. Many of the cows will have calf at foot and others are right at their calving. There will be eleven bulls in the sale, including Duke of Wapsie 229370, weighing nearly 2,200 pounds. There will be other bulls in the sale that are fit to head herds, and every lover of a good Bates animal, "a milking Short-horn"—one that helps lift the mortgage off the farm—should come to this sale. Mr. Osborn will put in six head, one bull and five females. Some of these are Scotch-topped on the very best Bates foundations. There has never been a cleaner lot of Bates cattle sold in the West than will go through this sale. Write to Mr. O. M. Healy, of Bedford, Iowa, for catalog and please mention The Homestead.

Combination Sale of Herefords at South Omaha, January 8th and 9th.

Mr. W. N. Rogers, of McCook, Neb., wishes to announce through the columns of this paper that they will hold their next combination sale of Hereford cattle at South Omaha, Neb., January 8th and 9th. After a visit to this grand herd of white faces we feel confident in saying to our many readers that this will be an opportunity of a life time to secure good cattle of this breed. At this writing we are not informed as to just who all will consign cattle to these two sales, but by watching the field notes of this paper you will know at an early date. It will be remembered that the Shadeland Park Farm is the home of Monarch of Shadeland 3d, the 3,000-pound bull. Not only is he of mammoth size, but has much quality and has been a great factor in building this wonderful herd to one of the greatest in America. He was first and sweepstakes at Lincoln in 1903, first and sweepstakes at interstate fair at Sioux City, Iowa, 1904, and stood at the head of the sweepstakes beef herd, all breeds competing, at the same fair. This is also the home of the great Beau Donald 28th, the first and sweepstakes bull at Lincoln in 1902-04-05; first and sweepstakes at state exposition, Topeka, and state fair at Hutchinson, Kan., 1904, also at state fair, Pueblo, Colo., the same year. This great combination of breeding has proven second to none and the produce of these two bulls is just what Mr. Rogers has been trying to get together for many years. Remember the dates and if you are in the market for something good in the Hereford line it will pay you to attend this sale.

Dispersion Sale of James Burke's Short-horns.

On December 20th at the farm of Mr. James Burke near Stanwood, Iowa, will be dispersed his entire herd of Short-horn cattle. This is our initial notice to the farmers and Short-horn breeders of the middle West that here will be an opportunity to buy the pick and cream of Mr. Burke's herd which has heretofore never been offered to the public. There will be sold fifteen cows with calves at foot and twenty-nine of the females are of breeding age. The remainder are yearling heifers, some seven in number, and seven bulls, all reds, including the two herd bulls, Baron Taylor and Diamond King, both exceptionally thick, beefy bulls, the modern Short-horn type, and each possessed of a splendid breeding-looking head. Mr. Burke has been breeding Short-horns for many years, but now finds himself at that station in life where old age has wrought its effects and he can no longer give the business the proper care and attention that has been his custom in the past. He has now sought property and proposes to retire to a quiet life and sell these cattle to younger breeders who can give them the proper attention necessary to success. More particulars will appear in these columns from time to time; in the meantime it would be well to address Mr. James Burke, Stanwood, Iowa, for a catalog, which will doubtless be ready for distribution to our readers by the time this article is read. Note the quarter page announcement on page 46.

Mills & Son's Sale of Percheron and French Draft Stallions and Mares.

On Wednesday, December 19th, at the farm near Perry, Iowa, Messrs. J. R. Mills & Son will sell a very choice lot of Percheron and French Draft stallions and mares, and their sale will contain stallions and mares that will be a credit to any stud in the land. Mr. Mills, Sr., has been a breeder of draft horses for a great many years, and now that he is retiring from active business has decided to close out. There will be twenty head of Percheron horses in the sale, all registered in their respective stud books, and also having state certificates, thereby complying with the recent law enacted by the state of Iowa. The old stud horse, Narcisse 10976 (42440), imported by Mr. M. A. Dunham, and a prize winner in France, will be sold. This horse is a splendid breeder and many of his colts to be sold in the sale will convince everybody of this fact. There will be four stallions and six mares by him

40 SELECT 40 Short-horns

At Auction at Hall's
Salo Barn, David City,
Nebraska,

WEDNESDAY, DEC. 12TH.

The ten bulls include the Straight Scotch yearlings Gold-dust and U. S. A., and other desirable herd headers as well as useful farmers' bulls. The thirty females include the great Straight Scotch show cow Mildred 12th, whose dam is a full sister to the dam of Pine Grove Mildred, the \$1,000 and highest priced cow in Col. Lowden's sale last June; the Straight Scotch show heifer Sibyl of Riverdale; the great Hadding-bred heifer Anoka Strathallan A.; and numerous other tops, both Scotch and Scotch topped from the herds of S. E. Prather Co., Sherman, Ill.; Lewis Stookey, Harris-town, Ill.; Denby Bros., Carlinville, Ill.; A. H. Robertson & J. J. Littrell, Clark, Mo., and Gentry Bros., Sedalia, Mo. Show cattle of both sexes and several are by imported bulls and many females in calf to imported bulls. For catalog address,

50 Great Auction 50 Of Straight Scotch, Pure Bates and Scotch Topped

Short-horns

AT SWEDBURG'S SALE STABLE,
HOLDREGE, NEB.,

SATURDAY, DEC. 15TH.

Sixteen bulls including herd headers for both Scotch and Bates breeders are cataloged, and the cows and heifers include as grand an array of the purest Bates blood and the choicest individuality as was ever offered in the West. Superb Scotch topped females are also profusely offered. The noted breeder F. M. Marshall, Blackwater, Mo., catalogs twenty-five head and it is a better offering than that upon which he realized an average of \$170.00 during the drouth in Missouri last June. C. C. & R. H. Wilkinson, Edinburg, Ill., extensive and reputable breeders, catalog twenty-seven head, largely of Bates breeding, but many of which are in calf to and some of the younger animals sired by the celebrated prize-winning Straight Scotch bull Scottish Stamp. For catalog address,

Association. Twice President of Missouri
Auctioneers' Association.

in the sale. Constant 15086 is a two-year-old son of Narcisse, brown in color, a low-down, heavy fellow and will now weigh 1,700 pounds. He will make a 2,100 or 2,200-pound horse when matured. He is well coupled and has lots of style. Another splendid two-year-old is Conrad 15089. He is also a son of Narcisse and is a black in color. He is one of the real plums in the sale and taking age into consideration he is hard to beat. Salem 15092 is one of the best yearlings in the offering. He was a year old in August and now weighs over 1,200 pounds. He is a bay and the man who buys this colt and takes care of him will have a horse to proud of one of these days. Minot 15090 is another good two-year-old, sired by Narcisse and out of Nellie V., the dam of the yearling just mentioned above. Banner 13189 is a four-year-old and is sired by Brilliant 3149. This horse has been used some and has proven a good breeder. He is a big fellow and has plenty of style, a good flat bone and now weighs 2,000 pounds. Six of the mares in the sale are sired by Narcisse and two by Brilliant. These range in age from colts to a twelve-

year-old mare and some with colt at side. Their old foundation mare was Flora 7185, and she will have two daughters and two sons in the sale. She has been a grand old brood mare and as a producer she is hard to beat. Floretta and Coly are two splendid black mares, one eight, the other nine years of age. Floretta is bred and safe in foal to Narcisse, and Coly has her colt at side by the same horse. These are team mates and make a spanking pair. The man that buys one of these should by all means get the other. There are other matched teams in the offering, also some splendid yearlings, twos and three-year-old mares. The man that is looking for Percheron stallions or mares should by all means go to this sale. They will also sell four head of registered Short-horns, two cows and two young bulls. Besides these there will be seven head of Aberdeen Angus bulls, all eligible to registry; two head of work horses and one pony, twenty head of cows and heifers, twenty-four head of Short-horn steers and twenty head of Duroc Jersey sows. Write Messrs. Mills & Son, Perry, Iowa, at once, for catalog and kindly mention The Homestead.

BREEDERS SALE :::: 200 HORSES 200

Bloomington, Ill., Jan. 9-10-11, in Coliseum Wednesday and Thursday, Jan. 9-10, will sell 125 Registered Percherons, French Draft, Shires, Clydesdale Horses, Mares and Stallions.

These horses are consigned by the very oldest breeders in the state and out of the very best families and show herds that represent over 2,000 premiums to their credit. We don't claim to have all the prize winners of France, England or Scotland, but we do claim to sell you horses that were good enough to win at St. Louis, Springfield and other fairs in 1904-5-6. This will be one of the largest sales of pure-bred horses ever held in the state. These are the wide-as-a-wagon kind and a number of them will weigh over 2,000 pounds.

FRIDAY, JANUARY 11, WE WILL SELL 75 REGISTERED TROTTERS, GRADE DRAFT, COACH, ALL-PURPOSE AND SADDLE HORSES, STALLIONS, MARES AND GELDINGS FIT FOR THE MARKET.

This offering will consist of some of the very best bred ones in the state, and some with very fast mark, also a lot of gentlemen's drivers with several good matched teams and a lot of all-purpose horses. This will be a lot of very high-class horses, with a number of mares and geldings fit to ship to any market.

CONSIGNORS—Wm. Crownover, Hudson, Iowa; A. J. Dodson, Normal, Ill.; A. M. Storm & Son, New Lenox, Ill.; John C. Baker, Manhattan, Ill.; D. Augustin, Carlock, Ill.; Hurt & Reid, Arrowsmith, Ill.; Dillon Bros., Normal, Ill.; Wm. Ritter, Arrowsmith, Ill.; Walter Allen, Dunlap, Ill.; W. F. McTaggart, Pana, Ill.; Bloomington Horse Sale Company; Wm. Westmorland, Arrowsmith, Ill.; Frank McClure, Gibson City, Ill.; Mat Campbell, Bloomington, Ill.; M. G. Murray, Holder, Ill.; O. M. Weishir, Heyworth, Ill.; Chas. Boulware, Fletcher, Ill.; C. J. Raboin, Askum, Ill., and other consignors. Catalogs ready December 15th. Sale each day at 9 a. m.

C. W. Hurt, Mgr., Arrowsmith, Ill. Cols. John D. Snyder, D. L. Brown, Aucts.

Saunders' Anniversary Sale.

December 19th marks the tenth anniversary of the entrance of Mr. C. A. Saunders into the ranks of the Short-horn breeders of this country, and on that occasion he has mapped out one of the most interesting programs that has ever been furnished Short-horn breeders of the West. He proposes to sell and has cataloged seventy-one head of cattle, thirty of which are Scotch cattle, and these will be offered for sale on this occasion. His reason for selling seventy-one head will be made apparent when Col. F. M. Woods opens the sale on that date. It is an offering of rare individual worth, and many of the individuals that he is selling he would rather keep in the herd. But he says he cannot make a good sale without selling good cattle, and, therefore, has selected the best he has in the herd. And while particular stress can be laid on the imported and straight Scotch cattle that go into his sale, the fact must not be overlooked that he has not forgotten the farmer and the younger breeder, and they in turn will find what they want, and at the prices that they are willing to pay in the Saunders sale. Seventy-one head of cattle is a lot to sell in one day, and it may be to the interest of everybody to be present on that occasion. Just a word about some of the more prominent tribes represented. There will be a number of Duchess of Glosters in the sale, Orange Blossoms, Secrets, Miss Ramsdens, Lady Bells, Narcissuses, Sweet Briers, Elizas and Roan Bettys, and these and many others are worth going a long way to see. No. 1 of the catalog is Lady Fragrant. She is a roan in color and is a daughter of Imp. Marengo's Count, and her dam is Imp. Lady Marengo, the dam of his great young bull, King Marengo. Imp. Scottish Myrtle and Imp. Miss Law are both seven years old. The former is a daughter of the great bull, Scottish Victor, the latter a daughter of Jubilee Star. Either one of these will do to take home and there will be buyers who will want both of them. Then comes old Gladiolus, and when this cow goes she will take with her some of the fondest memories connected with the earlier history of Mr. Saunders' efforts as a Short-horn breeder. This grand old Cruickshank cow is now twelve years old, but she doesn't look it. She is a daughter of Imp. Brunswicker and her dam is Imp. Gardina, by the great Cruickshank bull, Cumberland. She will have a calf at foot by the great Cumberland's Last. She is the dam of King Champion, now the leading herd bull on the Greeley Stock Farm. She has been a veritable mint to her present owner, and she is good for many years to come. Czarina is a four-year-old roan cow, a daughter of Master of the Ring out of Imp. Claudine by Prince of Fashion. She will have a heifer calf at foot by the noted sweepstakes bull, Ceremonious Archer. There will be a daughter of Imp. Steadfast in the sale, another by Imp. Golden Crest, several by old Cumberland, Merry Marshal, King Champion, Imp. Best of Archers, Canute, and other popular and well-known sires. There will be a choice lot of Scotch-topped cows and heifers in the sale, and these will be bred to his best bulls. The females that will be sold in this sale will have calf at foot either by Cumberland's Last, the reserve champion bull at the International, King Champion, Ceremonious Archer, or others that have won for themselves a name, both in the show ring and as breeding bulls. Mr. Saunders is selling a good bunch of young bulls, a number of which are straight Scotch. One of the best of these and a bull that should be sought after by some good breeder who has a good herd is Lord Champion 2d. He is a son of King Champion and out of the great cow, Cherry Sweet Brier, by Imp. True Britton. His grandam is Sweet Brier by King James, the sire of Cumberland, and then comes Imp. Sweet Brier 7th by the noted Cruickshank bull, William of Orange. He is a red in color, and a very likely proposition for a herd bull. The splendid catalog that Mr. Saunders has issued and which is about ready for distribution tells all about the rest of them, and every Short-horn breeder in this country should have one of them. It will be a work of art, as well as a ready reference. It will be sent only upon application, and provided you mention this paper.

Joint Sale of Short-horn Cattle.

On December 12th, at the farm of Mr. J. W. Hanna, of Garrison, Iowa, will occur a very important sale of Short-horn cattle, the property of Messrs. J. W. Hanna and Andrew Robertson, at which time they will sell forty-five head from their two herds, which are the natural increase of the herd. They are a good, practical, money-making lot of cattle. There will be thirty-one females in the offering, seven or more of which have calves at foot. Practically the entire calf crop of 1904, which are now two-year-old heifers, are consigned to this sale, and they are a choice lot from every point of

view. The offering is particularly attractive from the fact that there are no old or worn-out cows, nothing in the sale being more than five years old. All females of breeding age that do not have calves at foot are safe in calf to some one of their three good Scotch herd bulls. Both of these herds have maintained the best of Scotch bulls at their heads for many years; thus, the high character of the cattle to be offered is accounted for. The splendid lot of young bulls to be sold range in ages from twelve to eighteen months. Mr. Robertson has at the head of his herd Gold Gem 197484. This is a splendid red bull, calved May 23, 1902. He was bred by Messrs. Walpole Bros., his sire being Golden Rod 159519. He belongs to the celebrated Campbell tribe, the Urys. Mr. Robertson is selling eighteen catalog lots for his portion, sixteen of breeding age. The families in his herd run as follows: Young Marys, Matildas, Floras and Fisher's Roan. The last-named family will be remembered as the one that furnished some of the choicest Canadian winners at the last International. Mr. Robertson has been breeding Short-horns for twenty years and his herd is entirely red in color and practically all of one type. While this may not be any advantage to the lovers of the reds, whites and roans, yet to those who are tenacious for the red color, it will furnish the nucleus for stock bred on these lines that can surely be depended upon to reproduce. The same in this respect may be said of Mr. Hanna's herd. Mr. Hanna has been breeding Short-horns all his life, as did his father before him. They were partners in business for many years and up to the demise of the elder Hanna. The two splendid bulls that head Mr. Hanna's herd are two that are seldom equaled on one farm. In next week's Homestead we shall have some detailed mention of these two famous bulls, and the numerous good things that go with the same, bred to them. Mr. Hanna's herd is made up largely of the Rose of Sharon family, and while there are a few Young Marys and other prominent American families, the preponderance of the offering is of the famous Waverly Rose branch of the Rose of Sharon family. This was the branch Rose of Sharon that became so very popular in the hands of Senator W. A. Harris, of Linwood, Kan., during his palmy days, as a Short-horn breeder of more than national reputation. Application for catalogs of this sale should be made to either J. W. Hanna or Andrew Robertson, Garrison, Iowa. Parties attending the sale, who are in close proximity to the Chicago, Milwaukee & St. Paul Railroad should come to Van Horn. Those coming over the Rock Island should get off at Garrison. As Mr. Hanna's farm is equidistant from these two stations it matters little which place visitors come to, as they will be met with free conveyance at either point. The sale will be held in a heated tent, and Col. Carey M. Jones, the popular live stock auctioneer, of Chicago, will officiate.

Long John Comes to Iowa.

Word has just reached us that Dr. J. A. Downs, of Glidden, Iowa, has recently purchased from Mr. E. B. Weeden, of Rock Port, Mo., that famous old Duroc Jersey boar, Long John 8987. He is a half brother to old Orion, and formerly shared honors with him at the head of the Manley & Co. herd at Lyons, Neb. This famous old warrior has done great service for the Duroc Jersey breeders in the West. Many of the most noted winners of late years were out of daughters or granddaughters of his, and he has enjoyed the reputation of being one of the best brood sow boars in the West. Dr. Downs, the present purchaser of Long John, is one of the best physicians in Iowa, and incidentally one of the best and most enthusiastic Duroc Jersey breeders. He has recently bred about thirty sows for his January sale to Clovercroft King, Adjuster, Clovercroft Arion, Clovercroft Advance and old Long John. Just watch the smoke that is going to curl over and above the Downs' herd in the coming years. He has bought some splendid foundation stock and there is no reason why he cannot put up one of the best offerings of the year.

Regarding International Herefords.

If space would permit, a great deal could be said relative to the Hereford cattle that are to be sold on the afternoon of Thursday, December 6th, during the International Show at Chicago, Ill. In the very important sales that the Hereford association conducts during the shows at Chicago and Kansas City, no one breeder is allowed to contribute more than three head and the cattle of each contributor are very critically inspected by a member of the association appointed by the board of directors for that purpose and no animal, unless of high merit, is allowed to be cataloged. In this particular sale some of the very best cattle that the contributors own have been drawn from their herds and we are safe in saying that not an objectionable animal will

The JONES NATIONAL SCHOOL

OF AUCTIONEERING
AND ORATORY

IS THE ORIGINAL SCHOOL, AND HAS HAD FIVE TIMES
AS MANY STUDENTS AS ALL OTHER AUCTION SCHOOLS
..... IN THE WORLD COMBINED

The instructors are practical auctioneers of national reputation. Their reputations have been made by a careful study of the auction work and by conducting all classes of sales throughout the United States and Canada. A special instructor is employed in each department.

Students Conduct Sales Every Day.

The school does not advertise to instruct students in work we do not understand ourselves. When spending your time and money to secure an education the school should be considered, not the price.

The eighth term opens December 10, 1906, and following this term the school will practically be open all the year round, with the possible exception of a short summer vacation, and there will be classes opening at short intervals, enabling those who desire to attend to enter at almost any time, the tuition remaining the same, and each class will be given a six weeks' course, with an opportunity to graduate in four weeks if proficient.

Write for free catalog, list of graduates, and other information, mentioning this paper, and

COLS. WOODS, BELLOWS AND JONES, AUCTIONEERS.

Jersey Cattle As Bred by Hunter & Smith.

A representative of this paper who has been a frequent visitor to the herd of Jersey cattle owned by Mr. J. B. Smith, of Beatrice, Neb., one of the members of the firm of Hunter & Smith, of Beatrice, Neb., has again recently visited the herd. That Mr. Smith has a great herd of dairy queens is expressing it mildly. We have for upwards of fifteen years been a frequent visitor to some of the leading herds of Jerseys west of the Mississippi river; have at different times seen practically all the leading bulls of the breed, both imported and home bred, and if we have ever seen a herd that is better equipped with herd bull material we fail to recall the occasion. Mr. Smith has used great herd bulls ahead of the present array of bulls; in fact, he is one of those breeders who realize that the bull is fully one-half the herd if, indeed, he may not be considered even more. While great bulls have been, and are, in service, our readers must not forget that Mr. Smith has a herd of cows such as is only found where the true dairy form is appreciated. We shall first speak of the bulls that now head the herd, then of the cows as a whole. The leading herd bull now in service is Emanon (imported), got by Golden Fern's Lad, a bull that sired twenty-eight head that sold at auction at an average of \$600.25. Emanon's dam, Little Eminence, has a better record of twenty-one pounds and six ounces in seven days, and was a winner wherever shown. In addition to this, Emanon is a half brother to Flying Fox, that sold in one of Mr. Cooper's sales for \$7,500, and to Golden Fern's Sensation and Golden Sultana, two prize winning cows at the St. Louis World's Fair. He also carries 75 per cent of the blood of Eminent and Eminent 2d, that sold on Decoration day of 1905 for \$10,000. Emanon himself has proven a great show bull by winning first and championship honors wherever shown. Thus it may be seen that Emanon comes by his individuality through inheritance. As a sire he is making good in Mr. Smith's herd to such an extent that all his get are snapped up by those who visit the herd. The second herd bull and one that is good enough for any herd is Catillon's Bachelor, got by Bachelor's Guenon Lad, undoubtedly the best son of Imp. Guenon Lad and out of Bachelor's Juliet, a cow that made twenty-seven pounds and three ounces of butter in seven days. Catillon's Bachelor's dam, Catillon's Beauty, carries six crosses of the great Golden Lad, a bull that has made a greater reputation than has any other Jersey bull. She is also rich in Fountain blood, a strain of Jerseys noted for their capacity as rich, heavy milkers. Catillon's Bachelor is now two years old; is a great handler, a level-headed fellow, showing great constitutional vigor, and is of the Island type. He is being used quite freely on the younger things in the herd, as Mr. Smith has great hopes of him as a sire. The third bull in service, while quite young, is perhaps the most sensational bull that has been brought out for some time past. Mr. Smith has given him the name, Guenon's Champion Lad, he being by Victoria's Champion Lad and out of a daughter of Bachelor's Guenon Lad. A more richly-bred bull would be hard to find. As an individual he is about the neatest proposition that has been brought out for some time. The man who appreciates true dairy conformation in a bull that has a wonderful constitution will do well to watch the record that this young bull will make should Mr. Smith continue to follow the show ring. At the Iowa and Minnesota State Fairs this year he stood at the head of the class for junior yearlings and was only beaten for championship by the great bull, Emanon. The cows in Mr. Smith's herd are in the same class as the herd bulls. Several are imported, others are from imported stock and the heavy milking St. Lamberts are well represented. Many are cows that have official butter tests ranging as high as twenty-three pounds in seven days. Every cow in the herd must demonstrate her ability at the churn and pail and as a result Mr. Smith's herd of cows last year paid him \$119.25 per head for milk and butter alone. Sales of breeding stock have been good, yet we saw some young

bulls that should go to some good herd. One of these is a son of Victoria's Champion Lad, a double son of Golden Lad. His dam, St. Lambert's Gem, is a daughter of King of St. Lambert's Gem, one of the greatest St. Lambert cows known to the breed. Another is a son of Emanon and out of Golden Pink's Pride (imported), a double granddaughter of Golden Lad. Golden Pink's Pride was a member of Mr. Smith's great show herd this year and was an easy second prize winner. A few other young bulls are also offered and all are from the best cows in the herd. Some ten or twelve yearling heifers just nearing the breeding age are also offered. These are by Emanon, Owl of Hebron got by The Owl, Guenon's Golden Lad and Victoria's Champion Lad. For a foundation herd it would be hard to find another such an opportunity as Mr. Smith offers in these helpers. They are being priced right and are right in every respect. See page 44 for advertisement of Messrs. Hunter & Smith, of Beatrice, Neb., and when writing about these Jerseys, kindly mention this paper.

One Hundred Registered Percheron Stallions and Mares at Auction.

The announcement made by the Hon. H. G. McMillan of 100 registered Percheron stallions and mares to be sold at auction in two days, is unprecedented. No breeder of high-class horses of whom we have any acquaintance has ever had the courage to place upon the market 100 head of as high-class animals as Mr. McMillan has decided to sell at the new pavilion, Union Stock Yards, Sioux City, Iowa, December 12th and 13th. On the above date more than thirty good stallions and sixty mares will be offered at public auction to the highest bidder. We wish to state right here that the writer has been in attendance at a number of Mr. McMillan's annual offerings of horses, and that in every instance every animal that received a bid was sold. There has never been any protection or by-bidding of any description. In fact, we have seen stock sell for very much less than its value, but Mr. McMillan was satisfied that this would only inspire confidence and encourage those who had secured great bargains to not only attend future sales, but to tell their neighbors that Mr. McMillan sold his horses on the square. The number to be sold is unusually large, and is undoubtedly an experiment to some extent, as we have no record where anything like 100 registered Percheron stallions and mares has ever been exposed to public auction by one breeder at one time. This stock has been largely bred at Lakewood farm and has been reared on the natural blue grass and other products of the farm. These mares will come fresh from the pasture. A number of Mr. McMillan's state fair winners are included in this sale and quite a number of the stallions are suitable to place at the head of a hand of registered mares. Good size, clean, strong bone, with plenty of quality and action are some of the strong points possessed by these stallions. Their breeding also is of the very best known to students of Percheron pedigrees. They have been grown and developed out of doors, where they had constant exercise, and are naturally very healthy and acclimated, which will insure them to be satisfactory breeders. The mares and fillies have been grown in the same manner as the stallions, and have received little or no grain, except during the first winter of their lives, and while at the present time they are not overloaded with flesh, they are in fine condition and are a clean, top-py lot. A very large proportion of them are two and three-year-olds. Thus, it will be seen that their entire lives of usefulness is ahead of them, and for their new owners. Owing to these ages, however, in the minds of many, they should and will sell for less money than the older and heavier matured mares. With a very few exceptions these mares have been bred and are believed to be safe in foal to the state fair and International prize winners, Calypso and Olbert, unquestionably two of the greatest Percheron stallions that have ever landed on American soil. It is certainly

PUBLIC SALE SCOTCH & SCOTCH TOPPED

Short-horn CATTLE

REGISTERED CLYDESDALE AND PERCHERON MARES AT

MASON CITY, IOWA, DECEMBER 18TH

On the above date at the feed barns in Mason City, Iowa, I will offer for sale 48 head of Scotch and Scotch-topped Short-horn cattle, including imported cows, 16 head of the offering being Scotch. Forty-six females and two bulls. I will also sell at the same time and place six registered Clydesdale mares in foal to an imported stallion; four Percheron mares in foal to an imported stallion; one Percheron and one Clydesdale stud colt. Of the Scotch cattle, the following families are represented: Imported Likely, Mysie, Secret, Butterfly, Rose of Aberdeen, Airy Buckingham, Orange Blossom, Vain Maids, Crocus or Isabella, etc. Of Scotch-topped families, Rose of Sharon, Desdamonas, Arabella, Rosebud, Josephine and Pearlette. Send for catalog at once to

A. H. BRETT, MASON CITY, IA.

COL. AL P. MASON, AUCTIONEER.

Mention Homestead when writing for Catalog.

worth something to procure mares bred to such stallions as these whose service fee is \$100 each. The present day of \$100-an-acre land and upwards compels the farmer to stop, scratch his head and reflect, if he is not on wrong lines in trying to do his farm work with common horses, when pure-bred mares can be secured of much heavier weights, much more shapely, that will do all the work necessary on the farm and produce a \$300 colt each year in addition. This has been and is being done by a number of the most enterprising farmers of Illinois and Iowa. Why should not this good business proposition prevail to a much greater extent than it does. There is no additional cost in producing these high-class colts over the grade or scrub, except in the original investment for the mares. Owing to the excessive offering in these two days' sales there is all probability that some cheap stallions and mares will be the order of the day. Nevertheless, every animal of-

fered will be sold at some price, if there is a bid made. Mr. McMillan is overstocked for the winter, and besides this he has been planning for this two days' sale for a long time. It has been the ambition of his life to be able to offer 100 head of registered Percheron stallions and mares of higher quality than any other breeder in the world has ever exposed to auction at one time. Whether this over-offering is a good business venture or not remains to be seen; but parties who are in the market for some first-class stallions and mares will undoubtedly find this the best opportunity that has yet been offered in America to secure them at their own price. Mr. McMillan has prepared an exceptionally fine catalog, which should be in the hands of every breeder and lover of Percheron stallions or mares. In our next issue we will present in full the unparalleled show record of Lakewood farm Percherons, which thus far has been invincible.

DISPERSION SALE OF SHORT-HORN

.... **CATTLE**
ON DECEMBER 14TH

WE will disperse our entire herd of Scotch and Scotch Topped Short-horn cattle consisting of 56 head including our two Scotch herd bulls and several other young bulls. A goodly portion of the offering are Scotch cattle; the remainder are Scotch Topped of the most desirable sorts. Some 15 or more calves will sell with their dams. As this is an entire dispersion, it will afford an unusual opportunity to Short-horn cattle breeders of Iowa and Minnesota particularly to secure the plums of our herd at bargain prices. For catalogs and other information address, Dr. Chas. L. Marston, Mason City, Iowa.

MARSTON BROS., PROPS.,
Mason City, Iowa.

FRANK IAMS

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—Save \$200 and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 - SAVED AT IAMS \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye opener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors. 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coachers you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

PETER HOPLEY & SON

EIGHTH ANNUAL SALE OF

LAKEWOOD PERCHERONS

Sioux City, Ia., Wednesday & Thursday, Dec. 12-13
STATE FAIR WINNERS UNDER THE HAMMER.

100 Registered Stallions and Mares 100

Thirty-two stallions and sixty-eight mares and fillies. Everything offered is of the highest quality and will be sold regardless of price. A number of our state fair winners are included. The stallions are a grand lot, by far the best we have ever offered. All of our winners at Iowa and Minnesota State Fairs have been reserved for this sale. The mares and fillies are of the choicest breeding; all but five are under seven years of age and nearly all are bred to our famous stallions, OALYPSO and OLBERT, the STATE FAIR CHAMPIONS and INTERNATIONAL WINNERS. The great opportunity of the year to buy Percheron stallions and mares of the highest class. Catalogs mailed on application.

SHIRE, PERCHERON,
BELGIAN and
HACKNEY STALLIONS

Good American Bred Stallions, \$800 to \$1000.

First Class Imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.

NOTICE

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars. The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stables, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered. Send for catalog.

TAYLOR & JONES,

WILLIAMSVILLE, ILLINOIS,

IMPORTERS AND BREEDERS OF

**PERCHERON, SHIRE
AND BELGIAN STALLIONS.**

WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND
SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN
ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

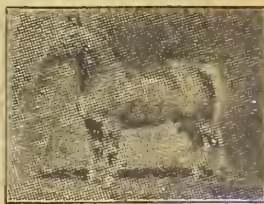

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

PERCHERONS AND PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARKS now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

POLAND CHINA BOARS

WE have 20 March and April boars sired by R's Keep On, Iowa Chief and other noted boars. Long, growthy fellows, good colors, heavy boned, smooth as an apple and out of large, roomy sows. They weigh from 175 to 200 lbs. If you need more size in your herd it will pay you to get one of these pigs. We guarantee our pigs as represented and always satisfy our customers. We cannot afford to send out a poor pig, as we are in the business to stay, and expect to supply our customers again in the future. Below is a copy of one of the many letters we receive from our customers:

RUKAZL Bros., Rockwell City, Ia.
DEAR SIRS:—We got the pigs Friday evening, the 20, O. K. We are all well pleased with them. They are just as you said they were. Respectfully Yours,
Nels Nortvedt,
E. O. Peterson,
M. H. Peterson.

Callender, Iowa.
All correspondence cheerfully answered.

Geo. F. DORCH, Prop. Cook, Neb., Breeder of Duroc Jersey swine.

No Place Like Home

Be It Ever So Humble, Joy Rules
Where Hearts Are Happy

Is your home attractive to you? Or do you simply live there because it's just plain home? Home is only what you make it. If it's dull it's because you may be weary. If it's sunny it's because you are sunny.

If it's dull there is an offer for you that will bring sunshine into every corner of it. If it's sunny now you can make it a hundred times more attractive. The great Edison phonograph makes a palace out of the humblest home, just as it makes the

A DELIGHTED FAMILY GROUP.

grandest home a place of the strongest attraction.

And the Edison phonograph distributors are making such a surprisingly liberal offer that the best Edison machines are now within the reach of all.

If you are tired this wonderful instrument rests you. If you are seeking pleasure its melodies will give you a world of delight. If true refinement is desired the Edison gives you the benefit of the highest culture—real culture—that comes with healthful music. If you are seeking perfect happiness you will know what it means when you listen to an instrument that drives away all your care, and all your worry and gives you that wonderful pleasure that comes from the perfect voice, the perfect song, the perfect musical instrument.

Laughter and Song

Laughter and song move the world. They make the home. They are the perfect jewels that crown the domestic circle. The Edison phonograph laughs, it sings, it talks. Its voice thrills you with its beautiful music, moves you with its wonderful singing, or sets you off into a roar of happy laughter with its comical utterances. Where the Edison is there is no care, there are no "blues."

Music appeals to all. The Edison phonograph is music itself. The child feels its refining influence and enjoys its delights, the young folk take keen pleasure in its waltz or two-step or reel. The old folk get the full joy that comes from songs they love or new things they admire. A happy home—this is what the Edison phonograph gives. And a happy home is beyond price.

Magnet to Hold Friends

What is home without its big circle of friends? The familiar faces of those we love—we are glad to have them about us. What a thrill the labor-wearied housewife has when "company" is coming! Friends! They are the bright spots in our lives, and we never fully feel how we ourselves draw them to us by our qualities or surround-

DELIGHTS OF THE DANCE.

ings as they draw us. An Edison phonograph in your house is a magnet to all who know you. It is the charm that draws those you like into a closer circle about you.

A winter night! The cold blows and storms outside. Everything in the house is tight and snug. The stove casts a grateful warmth, the lamps throw their yellow

light over faces now smiling with the joy of a happy evening in the home. But reading tires, conversation lags. What shall we do?

The Edison phonograph is touched, and lo! there bursts through the house the thrilling strains of a Sousa march. What is your mood? Serious or light? The phonograph answers. It is a friend who never fails—a companion who never tires.

What the Editor Says

The editor of this paper knows well the difference in the home a phonograph makes. He had his dull moments till he got an instrument. Then what a change! "It's wonderful," was the cry from all. "The boys never were at home so much," said mother.

"Why, it's the best dance music I ever heard," said my girl.

You can't tear me away from my phonograph now.

What I did you can do.

You can make your home cheerful in a remarkably simple way, for the Edison phonograph is being sent out on free trial to all honest, responsible people.

Surprise in the Catalog

The new illustrated Edison catalog, which you can get by clipping the coupon in the last column of this page, quotes the great Edison outfit No. 5 at its rock bottom price. Prices and terms that may SURPRISE you. With this great Edison catalog you get a list of beautiful pieces and comic recitations, 1,500 selections of the

sound. We gathered such an amused crowd that the experience gave my girl an idea, which she put into practice a little later, when the weather got warmer.

Young Folk Made Happy

My girl was getting busy, busier than I ever had seen her before. There was a new spirit in her. She planned and fussed, and the first thing I knew she had arranged a big picnic. There was nothing remarkable in that, but she later confided to me that she was going to take the phonograph to the picnic grounds and surprise her guests. And she did. They had the merriest time a picnic party ever had, for the phonograph amused them and sang for them, and played so they could dance to their hearts' content.

Picnics became very popular after that, and phonographs began to bob up everywhere. Indoors and out you could hear their sweet voices. Our friends came so often and we were so taken up with the concerts we had to give them that we began to think we had no other tasks to do.

"Better charge an admission fee," said the Doctor.

"It's better medicine than yours, Doc," I said.

His laugh didn't sound very hearty.

Good in All Seasons

So it went from season to season. In warm weather we had our crowds outdoors and in cold weather we squeezed them in where we could in the house. It

have a number of light-hearted friends who are seeking an evening's lively amusement.

LAUGHTER AND JOLLITY.

You give them a minstrel show programme, something like this:

An Evening's Fun

9344 "Flanagan's Night Off"..... Talking Sketch
8293 "Turkey in the Straw"..... Song
8910 "The Yankee Doodle Boy"..... Song
8841 "I've Got a Feeling For You"..... Banjo Trio
9100 "Everybody Works But Father"..... Song
9404 "Jingles, Jokes and Rhymes"..... Song
9084 "Nobody"..... Comedienne Song
8013 "Casey Counting His Girl"..... Kissing Record
9280 "At the Minstrel Show, No. 6"..... Song
9306 "Nothing Like That in Our Family"..... Song
7358 "Pat Malone Forgot That He Was Dead"..... Song
4005 "Laughing Coon"..... Comedienne Song

The programme is just what you make it; and you can vary it to suit your mood or to suit your company. If your friends want to dance you have a marvelous selection of waltzes, two-steps, reels and jigs. If you want a Sunday service you can pick the finest sacred music ever written, your favorite hymns. If you want singing you can get the best of songs by the best singers. If you would rather have instrumental music, the list of band and orchestra pieces is immense.

Phonograph a Necessity

The editor is so confident of your approval that he is inclined to grow enthusiastic, but enough to say you are missing a great deal if you haven't got a phonograph. Why, it is no longer a luxury. It is almost a necessity, and soon it will be a necessity, for everybody is getting one. And it isn't a fad, either. It never tires. You play the things you like over and over. If you are tired of them you have a whole world of new things to choose from.

The Edison catalog, which costs nothing, is a marvel. It tells you how easily you can get the noted Edison outfit on an absolutely free trial; how, if you are a responsible, reliable person, they ship to you without any cash, without any deposit, without C. O. D., without any guarantee, the wonderful instrument for a thorough trial in your own home, where you can use it on free trial 48 hours or more.

A Valuable Catalog

The catalog explains how, after you have thoroughly tested the machine, if you do not want it you can return it at the expense of the Edison distributors. On the other hand, if you should want this King of Entertainers, and I know you will, you can pay in full or on easy payments. You suit yourself about that, for there is no difference in the price. Cash customers are not given any discount because there is only one price for the Edison—a rock-bottom figure, below which the Edison is not allowed to go.

Mr. Edison says:

"I want to see a Phonograph in every American Home."

Sign This Coupon

and get promptly the great Edison catalogue and the free trial offer on Edison Phonographs.

Your Name.....

Your Address.....

You need not bother with a letter; just write your name and address plainly on the coupon, inclose in an envelope and mail today to FREDERICK BABSON, Edison Phonograph Distributors, Suite 3248B, 149-150 Michigan Ave., Chicago, Illinois.

Edison Outfit No. 5

Thomas A. Edison

Mr. Edison famous phonograph—the (new style, 1907 model) latest improved instrument—by far the finest phonograph ever produced and now to be bought at the surprising **ROCK-BOTTOM PRICE—**one-fourth the price of inferior imitations.

HERE is the great Edison outfit No. 5, the outfit which is now being shipped on free trial to responsible persons everywhere in the U. S.—payable either cash in full after free trial or on easiest payments—Two dollars a month, a dollar a week or less, just as the purchaser prefers. The editor advises you to write for a free Edison catalog to Mr. FREDERICK BABSON, Edison Phonograph Distributors, 149-150 Michigan Ave., Suite 3248B, Chicago, Ill.

great classics as well as the latest popular airs. This catalog is free, prepaid, and with this catalog you get full explanation of the free trial offer.

The editor is impressed by the variety of entertainment the Edison affords. With this instrument you can play any kind of a programme you like—serious, religious, humorous, classic or miscellaneous.

Suppose you want to give an afternoon or evening entertainment to your friends—one of the kind that costs a dollar or two in the big cities. You select your list and you can have a free concert something like this:

An Afternoon Concert

9237 Waltz of the Roses..... Orchestra
9162 "Silver Threads Among the Gold"..... Song
9288 "So Long, Mary"..... Song and Chorus
8902 Virginia Reel..... Military Band
2018 "Holy City"..... Song
93 "Stars and Stripes Forever"..... Sousa March
8958 "In the Shade of the Old Apple Tree"..... Song
8784 "Dixie"..... Patriotic Selection
9054 "Dearie"..... Song
7207 "Nearer My God to Thee"..... Sacred Quartet
8347 "Hiawatha"..... Concert Band
804 Anvil Chorus from "Trovatore"

The editor has tried the phonograph under all conditions. The wonderful instrument has no seasons. Summer or winter, spring or fall, it is always ready to lend itself to your service.

"Let's take the machine out-doors," said my boy, after we had had it a little while. It was a soft, spring evening, and we put the box on the porch and touched it off. The great tone could be heard for blocks, which astounded me, for I had not realized how the walls of a house can confine

gave the boys and girls the finest kind of an excuse for getting together, and of course you know they were not slow to take advantage of the chance. Their good spirits and laughter and merriment made my heart light, and I wished I could pass this feeling on to everybody.

Suppose you want to fill your home with fun. You have only to pick out from the

JOY FOR EVERYBODY.

thousands of records what your tastes suggests from a long list of rollicking songs, comical recitations, and lively minstrel performances. Every shade of taste is represented, so that you can suit yourself perfectly. For instance, suppose you

THE AMOUNT OF GRAIN FOR CALVES

The following communication has been received from a subscriber, Mr. I. P. Brandt, of Sumner county, Kan.:

I am feeding some spring calves and would like to have a little information concerning the amount of grain that they should eat daily. I have to use corn, oats and bran and for roughage wild hay and kafir corn fodder. How much grain would you advise feeding daily and what proportion of each would you use?

Much depends upon the character of these calves and upon the intentions of the owner. If it is his desire to finish them out at an early age they should receive just about all the grain that they will eat up clean, and the same is also true of the roughage. On the other hand, if it is only the intention to take them through the winter in good form so they will be ready to turn onto grass and make good gains next spring and summer, less grain will be required. A calf that has been well started ought to go through the winter on a pound of grain a day for every hundred-weight of the calf.

The above-mentioned amount, however, will not contribute to the greatest possible gains. Professor Henry in his "Feeds and Feeding," reports an instance where W. A. Harris, of Linwood, Kan., made Short-horn, grade and pure-bred steers weigh from 910 to 920 pounds at the age of eleven months. Mr. Harris estimated that each calf consumed 1,120 pounds of corn, 1,000 pounds of bran and 300 pounds of oil meal. According to these figures Mr. Harris' calves ate practically seven pounds of grain daily until the time they were eleven months old. Of course, during the first few months they would not eat as much as a pound daily per hundred weight, but during the last few months they would eat more. This method of feeding means that they are being shoved for just about all they will stand, because any man who can make a calf weigh 900 pounds at eleven months has a good one to begin with and must feed him well every day.

A good mixture for the calves in this instance would be equal parts of corn, oats and bran. This ration will be a little more expensive than corn and oats, and for that reason it might be practicable to feed rather a larger proportion of corn. If the calves do not carry much outward fat we would have no hesitation in supplying them with a ration composed almost of one-half corn.

QUEER THINGS ABOUT HOG CHOLERA

A subscriber, Mr. E. E. Roberts, of Adams county, Iowa, sends the following communication:

You have frequently advised your read-

ers to be very careful when cholera is in the neighborhood about scattering the disease with wagons, horses, dogs, or even the hoots of man. You state that germs are carried about in this way and that much of the loss could be cut off if one were more careful in this regard.

In view of this I would like to give you a little of my experience. There was a good deal of cholera in my neighborhood a few years ago and I succeeded in keeping a bunch of 250 hogs in the very pink of health. I used a little Venetian red and some turpentine in their swill three or four times a month, my object being to absolutely destroy all worms in the intestines. Practically every neighbor lost his hogs, and as mine were healthy I was naturally priding myself over that fact. One day, however, the worst happened and my entire bunch got through the fence and visited a neighbor who had lost nearly all his hogs. Some had been thrown over the fence, and before I got mine rounded up the carcasses of several were eaten. I thought, "Surely I'm in for the cholera," but strange to relate I took those hogs home and not one case developed. I kept them three or four months after that time and there never was any indication of cholera in my herd. If cholera is spread in the manner you describe, how do you account for this instance? The fact given cannot only be vouched for by myself, but by many of my neighbors.

An instance of this kind would indicate that the hogs in the neighborhood referred to here were not affected with cholera, but were in all probability swept away by other trouble, notably worms. The bunch that were saved in this case, as Mr. Roberts states, were fed Venetian red and turpentine, and this, without doubt, kept them free from worms and they were therefore in the pink of condition when the neighbors' were dying. We have known cases where well posted men made the claim that worms were the cause of all the loss that is commonly credited to cholera and swine plague, but we take no stock whatever in that theory. We have known instances where whole herds have been swept away in a very few days, and in such cases no man can stand up and tell us that worms will bring about fatality so suddenly.

Moreover, we do not believe that it would be possible to turn a big bunch of hogs like these loose and let them consume hogs that had died of cholera and yet escape the disease. We still hold to the theory that it pays, and pays well, to take every precaution to keep germ diseases away from the farm. Long ago we came to the conclusion that it did not pay to keep a dog, especially one that ever went away from home, and much as we like a good dog yet we prefer to sacrifice in order to lessen the danger of bringing cholera to the farm. One would make a great mistake if he were to assume that because Mr. Roberts' hogs came in contact with a diseased herd and did not take the disease,

that it is ever safe to be careless about a matter of this kind. Keep them free from worms and healthy and they are much more apt to resist disease if it should get into the herd, but at the same time do not fail to be convinced of the fact that if the real thing gets into your herd it matters not how healthy they are you are apt to lose a very large percentage of your animals. We base this statement on the fact that some of our most successful swine raisers, men who always feed a balanced ration and who use plenty of disinfectants and keep their hogs free from worms, have had their entire herds swept away in the matter of a few days, or at the outside in a few weeks.

MODERN CONVENIENCES FOR THE FARM HOME.

The above is the title of a bulletin recently prepared by Elmina D. Wilson for the Department of Agriculture, Washington. It deals with almost every phase of supplying water to the home and discusses at length cisterns, elevated tanks, pneumatic tanks, etc. The question of power is also taken up and the hydraulic ram, windmills, gas and hot air engines are all compared in the matter of cost and utility. Even the heating system in its modern application is treated in detail, and the question of ventilating the house is given full attention.

This bulletin is well illustrated and it is written for the man or woman who is a non-expert along these lines; that is, for those who have to deal with the problem of improving their home, but who have to employ others to do the work. The bulletin simply furnishes a lot of bright ideas that will help the person who is building a new home or overhauling an old one.

Those who are specially interested in this subject should write the Department of Agriculture, Washington, D. C., and make a request for Farmers' Bulletin No. 270. It may be obtained free of cost.

THE PROFIT IN GRINDING GRAIN.

The following communication has been received from one of our subscribers, Mr. Chas S. Kling, of Chickasaw county, Ia.:

The subject of grinding grain has never been discussed to my entire satisfaction. I have in mind the feeding of oats and corn to hogs and to milk cows. My observation is that whole oats fed to cows will to a large extent pass through them without being masticated. The same is true to some extent with corn. I believe that others besides myself will be interested in the question, and I hope that you will give it a thorough discussion.

Possibly we cannot do better than

quote from Professor Henry, of the Wisconsin station, on this matter of grinding grain. On this subject Professor Henry says:

This subject is a difficult one to discuss, owing to the great variety of conditions existing as to both grain and animals. Directions are here given which may serve to guide the feeder in his practice. For horses which are out of the stable during the day and worked hard, all grain, with the possible exception of oats, should be ground. For those at extremely hard work, all grain should be ground and mixed with chaffed hay. For idle horses, oats or corn should not be ground, nor need the hay or straw be chaffed. A cow yielding a large flow of milk should be regarded as a hard-working animal and her feed prepared accordingly. Fattening steers and pigs may be crowded more rapidly with meal than with whole grain, though there is more danger attendant upon its use. Sheep worth feeding can always grind their own grain. In general, idle animals and those having ample time for mastication, rumination and digestion do not need their grain or roughage prepared as carefully as do those with only limited time for these essential operations. Experiments quite generally show increased gains from grinding grain, but in many cases they are not sufficient to pay the cost of grinding.

In two experiments conducted at the Kansas station in the feeding of steers, 6 per cent of grain was saved in one instance by grinding and in another 35 per cent. The latter is a larger saving than has been effected elsewhere by any of the experiment stations. An average of the results obtained in feeding swine at the Kentucky, Missouri and Ohio stations shows that it required 533 pounds whole corn to make 100 pounds of gain, whereas in the case of corn meal it required 532 pounds for 100 pounds gain. In some very extensive experiments in feeding hogs at the Wisconsin station, Professor Henry found that the saving effected by the grinding of corn was 8 per cent.

It will be seen from the results quoted above that there is some advantage in the grinding of grain, but another factor enters into the situation that should be considered. For example, the experiments at the stations along this line were concluded with the use in the one case of ground grain entirely, and in another case whole grain. So far as we know, there have been no experiments performed in which only part of the ration was ground, and herein lie great possibilities for error. In actual practice we have found that in the case of hogs, steers and cows it pays to grind at least part of the grain. Take a bunch of fattening hogs, for example, and give them a mixture of ground grain that has been steamed and you will find that the use of this ground grain, fed in the form of a slop, will affect the digestive system in such a way as to seemingly make the hogs get more out of the whole grain consumed. Some of

THE LAST LINE-UP AT IOWA AGRICULTURAL COLLEGE BEFORE STARTING FOR INTERNATIONAL EXPOSITION.

Reading from left to right the steers are: General Manager, Black Prince, Krambeck, Gay Rock, Tama Jim Jr., Black and White, Blue Rock and Gridiron.

the best gains that we have known to be made in the case of a bunch of fattening hogs have been made in this way—that is, by feeding one meal a day of ground grain.

Where one is feeding oats to cows, along with bran or corn, we think that it pays to grind both the oats and the corn. In this case we would not shell the corn, but grind it cob and all and mix together the corn-and-cob meal, the ground oats and the bran. If these are mixed in equal parts and dairy cows given about all they will eat up clean at a feed you will get good results at the milk pail. This is not based on any experiments conducted at the stations, but is based on sound experience and we have no hesitation in recommending it.

FECONDITY OF POLANDS AND DUROCS.

Some time ago the department of agriculture at Washington undertook to ascertain whether or not the Poland Chinas were increasing or decreasing in fecundity. Nothing is more common than to hear men state that the Poland Chinas are not nearly so prolific as they were years ago.

The records of the American Poland China Association were examined into and it was found that during the years 1882, 1883, 1884, 1885 and 1886, the average size of litters varied from 6.81 to 6.98, and that the average was 6.87. In other words, the average during those five years was practically six and seven-eighths pigs per sow.

In the years 1898, 1899, 1900, 1901 and 1902, the size of litters varied from 7.43 to 7.61, the average for the five years being 7.49. This means an increase in percentage of a little more than one-half pig per sow during the latter five years as compared with the former. An examination of the records of the Ohio Poland and China Record show that during the years 1882, 1883, 1884, 1885 and 1886, the average size of litters varied from 6.95 to 7.32, the average being 7.16. In the years 1898, 1899, 1900, 1901 and 1902, the average size of litters varied from 7.56 to 7.63, the average being 7.59. In this instance the gain in fecundity, or in the size of litters, amounted to a little less than one-half pig per litter per sow.

Combining the records as taken from both associations, it was found that during the first five years, that is from 1882 until 1886, the average size of the litter was 7.04, while from 1898 to 1902 it was 7.52. This means an increase of .48 per litter. Considering the fact that in the first five years fourteen thousand litters were taken and that in the second five years thirty-nine thousand litters were used in making the above computation, it must be apparent that Poland Chinas are increasing in fecundity. When it is considered that the hogs in this instance come from pure-breds and that these are used largely for foundation material, this item of nearly one-half pig per litter is a matter of considerable importance. It shows that we are going in the right direction.

Duroc Jersey records were also considered by the department. It was found that from the years 1888 to 1892 the average per litter in the case of sows registered in the National Duroc Jersey Record was 9.04, while from 1893 to 1897 the average was between 9.25 and 9.33. Although the figures in the case of the Duroc Jerseys are not considered of value as showing any increase or decrease in the fecundity of Duroc Jersey sows, they are valuable inasmuch as they give a correct idea of the fecundity of the breed as a whole.

FEED MILLET JUDICIOUSLY.

From the acreage of millet that we have observed going into stack this past season there will be much of this valuable hay fed this winter. With the scarcity and prevailing high prices for hay and other forms of roughage in many parts, the tendency will be to over-feed with millet should there be a good supply on hand.

Millet is one of the hays that must be fed with a degree of caution. In the first place it should not be fed to horses. The use of this hay by horse-men has been very unsatisfactory and careful farmers never allow their horses access to it. The irritating seeds have an undesirable effect, and the kidneys appear to be excited. The result is that the system is poisoned and in some cases the joints swell and produce lameness.

For other stock, millet may be used without danger. When fed as the only

roughage the results are much less favorable than when used as one-half of the hay or forage. Millet that has been cut in an early stage so that it comes out of the stack with a very bright green color often produces scouring. In this condition it should be fed carefully.

Everyone has noticed how sparrows flock to millet stacks. Poultry will scratch a millet stack bottom over and over again. The seed is used extensively by poultry feed manufacturers. In composition it compares with corn, but contains more crude material.

The hay is very similar to timothy in composition, being quite deficient in fat and protein, hence it will be seen why free use in the dairy is not desirable. Fed in conjunction with clover hay to cows and young stock, except horses, millet should produce satisfactory results. It is one of our forage feeds that will never yield an extensive acreage, but a few tons on the average stock farm will always come handy.

HANDLING HOGS IN WINTER.

The following communication has been received from a subscriber at Cassopolis, Mich.:

When shall we have the young pigs come? is a question that is bothering me at this time. I have ten March sows to breed and am inclined to believe that the first of January will be soon enough to breed them. I think I can figure on one-third more pigs to have them come about May 1st instead of any time during March. The pigs will have a more uniform growth with fewer runts, will be much easier and cheaper raised, and I think will weigh more than the March bunch of pigs by winter. During the fall while the weather was dry I went to my pasture field where I had fed my hogs during the summer and gathered up about forty bushels of dry cobs and put them in a bin in the corner of my granary. The granary has a stove in it and a cement floor. During the winter I gathered up the rest of the cobs as fed every night, which gave me cobs enough to heat two pairs of water boiling hot during all the coldest weather. I turned this hot water into one pair of wheat middlings, stirred thoroughly, then diluted with four pairs of water from the well. This ration was given about 10 o'clock each day. My boiler was a square box 10x16 made of wood with a sheet iron bottom. It would be a great saving of fuel if the stove used were such that the boiler would be close down to the fire. If the stove pipe runs up through the bottom of the boiler another saving would be attained. This of course would make the boiler stationary and necessitate dipping the water out, or having a faucet. This small ration of middlings is fully paid for in the better digestion of the corn you feed, aside from the good that the middlings do.

We heartily commend the practice of feeding slop somewhat warm to hogs during the winter. Most of the experiments conducted at our stations with cooked feed for the purpose of ascertaining the relative value of cooked and raw feed are to some extent misleading, as the ration in one case is entirely cooked and in the other case all raw. No farmer would attempt to feed in this manner. In the first place it would make his feed too expensive, and in the second place there is not a farmer in the corn belt but knows that the hog is amply able to digest the greater part of his ration in a raw state. It is an entirely different proposition, however, to supply just a little warm feed every day, because, as expressed by this subscriber, the warmed mill feed seems to aid digestion so that the hogs make better use of the corn.

We have known many instances where a good feed of warm slop once a day during the winter made the difference on a big bunch of hogs between a gain and a loss. It is not by any means impossible to take a good growthy bunch through the winter making an average daily gain of one and a half or two pounds if they are fed warm slop once a day, while on the other hand if they are given nothing but cold water and dry grain there may be weeks at a time when they will stand still.

The plan of cooking must be adapted to conditions, though we have found that it is generally cheaper in the end to buy a good cooker rather than to temporize with a home-made affair. Nothing is better than a good meal of warm feed once a day for brood sows, and for this purpose one can use the small grains, such as oats or barley. Of course if to this may be added, when it is warm, a little oil meal or tankage, so much the better because this contributes to the health and thrift of the sows and to the proper development of the little pigs.

"TIP" AND "BUTT" IN CORN SCORE CARDS.

There are a good many corn growers who are not in accord or in sympathy with some features of the score card that is used in most of the states of the corn belt. On most of these cards 10 per cent of the points are given

for tip and butt covering; that is, 5 per cent for each item. Of course, every man prefers to have corn that is well covered on the end if the standard is maintained in every other respect. The objection to this "covering" item, however, is that when this is closely followed in selecting corn from year to year the tendency is to shorten the ear.

The percentages given in the score card, either for stock or for grain, are interwoven one with the other, and because of that it will always be difficult to think of a part separate from the whole. One might have an ear of corn that would score full on butt and tip and yet be only five or six inches long. Such corn, of course, could not be rated high if judged according to the score card, as it would fall off seriously in the number of points given to length. The only question is that the ten points given for length, even if wholly deducted, are not sufficient to indicate the true value of such an ear, and in that case the score card cannot be slavishly followed. As said before, each item is closely related to every other item and the whole is in turn subject to modification according to special tastes and knowledge of the man who is selecting the seed.

We favor the practice of keeping up the length in the selection of seed, whether the butts and tips are well covered or not, particularly the tips. We would rather have a typical ten-inch ear without a single kernel over the tip than one fully covered, though but nine inches long. In the first place the bare-tipped ear that is an inch longer than the other will in all probability weigh out as much grain, while as a foundation ear there is no question that the product of the long ear will more nearly be up to size than in the case of the shorter ear, if there is anything in the theory that like begets like. It is not unreasonable to suppose, however, that by skillful selection from year to year it might be possible to keep up the length and at the same time keep the tips well covered. We have in mind a few varieties that very closely approach perfection in this regard, and enough has been done already to indicate that men should not be too hasty in coming to the conclusion that it is inadvisable to pay attention to tip covering, but, as said before, keep up the length that seems to be best adapted to your conditions. If corn ten, ten and a half or eleven inches in length matures with you, there should be no difficulty in selecting out of a few thousand bushels enough corn right up to the standard to plant next season's crop. If either the item of length or tip covering must be sacrificed, and one is of the opinion that corn is not too long for the locality, then by all means sacrifice the tip covering.

MARKETING SALE HOGS.

One of our subscribers from Lake Park, Iowa, asks for information concerning the marking of hogs on sale day. He calls attention to the fact that under ordinary circumstances it is hardly possible to watch the ear marks, and for that reason desires to have some of our readers give their views.

We would be pleased to hear from men who handle pure-bred hogs on this subject. Of course the marketing material that would be used in the case of a white hog would not answer with Poland, and vice versa. This matter should be taken into consideration in the description of methods.

UNLOADING MANURE IN PILES.

The title refers to that time-honored practice of unloading manure in small heaps in the field, and scattering later those piles which the harrow, the wind and weather did not reduce sufficiently to be plowed under.

Not until of late years has the full value of barnyard manure been appreciated. It is easy to see how people who little regarded its worth might take this method of getting a disagreeable job off their hands quickly. But nowadays when the value of this product can be calculated in dollars and cents, it would seem that more improved methods might be used.

The objections to handling manure in this way are not theoretical. They are so plainly sensible that the farmer following such a plan should be convicted of his mistake on a moment's thought.

The work is rather lengthened than shortened. The task of scattering the piles will quite likely be neglected until some inopportune time, and besides it is

YOU Can Save a Lot of Work!

ELECTRIC

much easier to spread manure from the wagon than from the ground. The results will be very uneven for where the heap stood the best part will leach into the soil and the following season there will be found a rank growth there with more plant food than needed, while about it there will be a lack of nourishment for vegetation. If it happens to be small grain it is liable to lodge and if it is pasture the grass will be rank and coarse and often left untouched. Theoretically the manure when in the heap also depreciates the same as it does when left about the buildings. This is due to the fermentation, though of course it is not marked in the small piles and probably not accountable for much loss.

The manure spreader is ideal in the matter of spreading manure and litter. The nearer the man with a pitchfork can duplicate its results the better.

FEEDING OUT A BUNCH OF HOGS

The following communication has been received from a Kansas subscriber, Mr. J. N. Wolfenbarger:

I am handling a bunch of seventy-five shoats that now average between 100 and 120 pounds. They are now running behind cattle and have the freedom of an alfalfa pasture. I have to market these hogs about the 1st of February. How shall I handle them to get the largest possible gain on the least amount of feed?

A good many modifying factors enter into a proposition of this kind. In the first place, if these hogs are running after a small bunch of cattle in all probability they will have to be given some grain outside of what they will pick up around the yards. Just the amount of this will be determined by the judgment of the man who does the feeding. The mistake that is likely to be made is that of feeding too much corn. The experiment stations have demonstrated that it always pays in feeding out a bunch of hogs to use some of the by-products of the mills, such as shorts, oil meal or tankage. Even if these are only used so that they constitute no more than one-ninth or one-tenth of the grain ration, they will be profitable in this proportion. If the by-products are not available, it is entirely practicable to use the small cereals, such as oats, rye or barley. If these are mixed with a little mill feed and soaked for a period of twelve hours before being fed, they generally make a highly palatable ration and tend to balance the corn.

We have known some exceedingly successful swine raisers who make a practice of feeding corn twice a day; that is, morning and night, and use slop at noon composed of small grain or mill products. This gives variety to the ration and, as said before, it also balances it. With the coming on of cold weather it will pay, and pay well, to warm the slop that is fed. We have known instances where this practice resulted in making double the gains on the same amount of food as would have been obtained had no warm slop been fed. If one goes to this trouble, he could carry the matter one step farther and warm all the drinking water. Hogs on a heavy grain ration will drink a great deal of water if they have access to it after the chill is taken off. It is not unreasonable to suppose that half the amount of food eaten by hogs during cold weather is required for warmth. If much water is taken into the system at the freezing point, do not be surprised if it takes the other half to warm this water.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for 25 years.

Farm Furrows

Turned by a Practical Farmer.

Don't let your angry passions rise when your neighbor asks you to fix up your part of the line fence.

Don't be affable, nice and smiling with your friends and as grouchy as the old Harry with the members of your own family. People who live with you need the sunny side of your nature the most.

There is no show or gathering during the year at which a farmer or stockman can receive such an inspiration as at the International Stock Show in Chicago. If for any justifiable reason you are unable to attend, do the next best thing. Read a full report of it in this paper.

A Missouri girl married a young guide, who, after the wedding, took out a thousand-dollar life insurance policy. On a trip the young bridegroom was accidentally killed. The widow notified the family in a note that read: "Bill parst away yestidy. Loss fully covered by insurance."

The thief that stole on the instalment plan was not the first man to apply this method to his art. Many a farmer works on the instalment plan, mixing town-going, neighboring and other side issues with corn gathering. His final visits to the corn field are usually made before Christmas.

I never could understand why steers should sell so much higher than heifers when they are fat. I have slaughtered a good many of both kinds and am free to say that I could detect no difference in the quality of the meat. It is said that an Englishman prefers heifer meat to steers, and no one will deny that "Johnny" knows something about meat.

Apples are so plentiful that we can afford to eat them in any old way we like. A good cook tells me that boiled apples are better than baked apples. That's new to me. She says to rub the apples clean, and to stick four cloves into each apple. Put in an earthen dish and half cover with water, add one cup of sugar to each pint of water, place on the stove and cook until the skins of the apples crack open, then boil down the sirup until like jelly and pour over the fruit. Sounds good to me.

I am tired raising road horses around where there are barb wire fences. One can rear a dozen drafters and never get a mark on them, but just as soon as you decide to raise a good driving horse you find that the barb wire fence is his enemy right from the start. I had an extra good colt this year and twice she has been cut to the bone on the fore arm with barb wire. Fortunately the wound has healed well, but nevertheless I don't like the business. A man ought to have woven wire fence or go out of the business of producing standard horses.

I have come to the conclusion that a good melon patch is the best paying piece of property that one can have on a farm. This year my boys asked me if they couldn't put in a little patch and I gave consent. In my absence they planted the melons, and to my surprise they used nearly a quarter of an acre of ground. For six weeks we had melon three times a day and melon in the evening when company came. After the season was over we got enough from the patch to pay good rent for the ground, though we fed the melons to hogs and cattle. I have always been on friendly terms with the melon and in that respect the boys take after their dad.

The Hints and Devices department of this paper has furnished many a man with ideas that have saved him labor or money, or both. The chief value of the suggestions that are given in that department is due to the fact that they come directly from the farm. The reading season is on us once more, and the Furrows man suggests to subscribers the advisability of sending in a good hint or device. There is not a farm in the corn belt but what has some convenience that is not found on any other farm. It may have been there twenty-

five years and so common-place that you don't notice it. Please think over the situation, ascertain what you have that might help the other fellow and send it in at your convenience.

Reports indicate that election bets have nearly all been settled. A friend of mine lost out and his bet was that he would saw a cord of wood on the public highway. Wood is so scarce in this part of the country that it looked for a time as if the bet would be settled without the work. It was produced after a time, however, and the program carried out. The "better" afterwards gathered up the sawdust and said that it would be handed down to future generations as Exhibit "A," showing the foolishness of an ancestor.

The smell of ripe apples is more satisfying than the finest of perfumes. We mean those large, luscious, sound ones that are to be found in the cellar. An old apple grower once told us that half the enjoyment of the fruit was in its fragrance. He would sit with a large

red one in his hand and smell of it like a flower. The old man was not so fanciful after all.

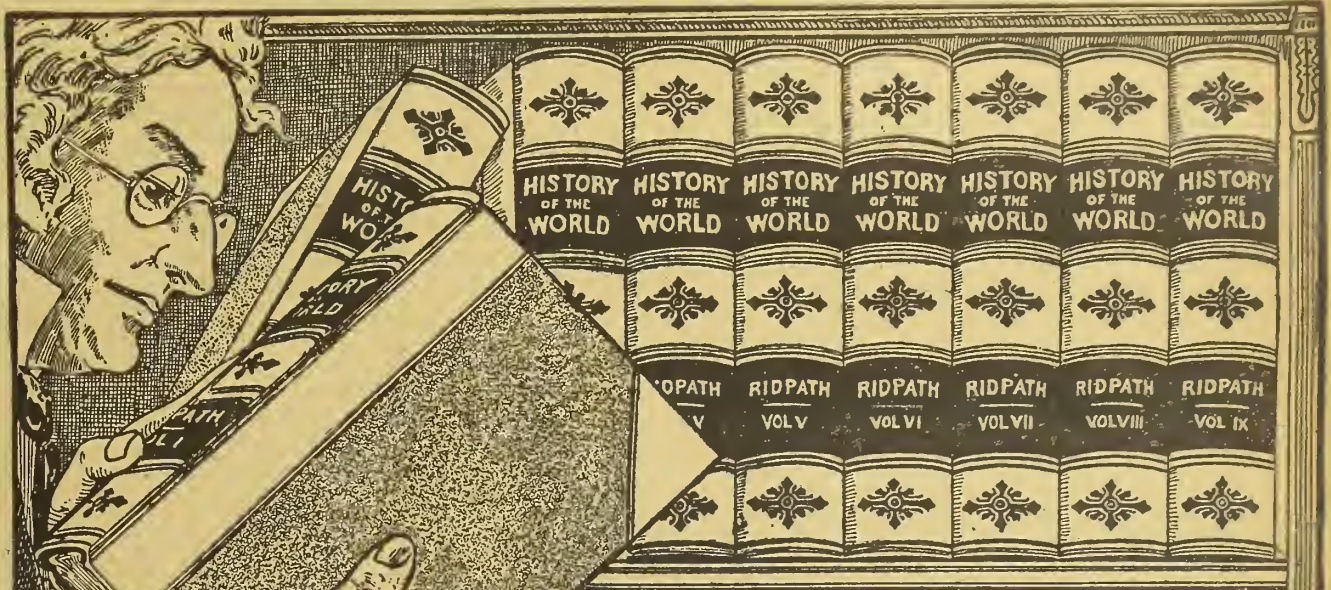

The new government inspection law makes it pretty difficult for goats to masquerade for mutton now. The retail butcher knows what he is buying, though of course many a consumer will eat his goat chop thinking it is high-class mutton. Mohair is less in demand for garments also and goat ranches may need to send their stock to the brush and tin pile.

If there is one thing harder than another it is to find a convenient and satisfactory method of watering hogs during the winter, because all patented waterers are put out of business just as soon as the weather is cold enough to freeze water and keep it frozen all day. I saw a pretty good plan last winter. A stockman friend had made a box four feet square and two and a half feet deep out of plank. He buried this in the ground so that only a foot appeared above the surface. A

tank heater was placed in this big box and it was then covered all but one corner, out of which the hogs drank. It pays to have some contrivance to warm the water for hogs, especially for those being fitted for the meat market.

With many it will soon be time to "swap roosters" and a few patriarchy will be spared their heads for another season. Possibly this manner of securing a male fowl may be all right, but the many troubles that poultry people have to contend with in the way of infertile eggs and disease points to faulty management somewhere.

There is trouble brewing in the Aberdeen Angus Association, as a good many of the stockholders of that association are dissatisfied with the way affairs are managed in the office. The proxy business has run riot and the servants of the association are now its masters. There are good and bad sides to the proxy question, but it's never a good plan to let a secretary get control of them all.

THE Publishers Failure

Places in Our Hands the Remainder of Their Greatest Publication

Ridpath's History of the World

9 Massive Royal Octavo Volumes--4,000 Double-Column Pages--2,000 Superb Illustrations--Brand New Down to 1906--Beautifully Bound in Half-Morocco

At LESS than even DAMAGED SETS were ever sold

Wouldn't it be worth Your while to fill out the Free Coupon on the lower corner of this page, mail to us to-day, and find out what a Great Bargain we have to offer on this wonderful set of books? We will name our price only in direct letters to those sending us the Coupon below. Tear off the coupon, write name and address plainly and mail to us now before you forget it. Dr. Ridpath's family derive an income from his History, and to print our price broadcast, for the sake of more quickly selling these few sets, would cause great injury to future sales.

A Royal Christmas Present

\$1 ONLY OF YOUR CHRISTMAS MONEY, BALANCE SMALL SUMS MONTHLY

Here's a set of books you will find a veritable household treasure. It will interest the entire family, even the children, who ask thousands of questions about its thousands of interesting pictures. You'll buy it sometime, anyhow. It's fast getting into all comfortable, well-to-do American homes. Here's a chance to get it for about half what it will cost you if you let this opportunity slip. Isn't it Common Sense to get it now?

RIDPATH'S enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors; to sit in the Roman Senate; to march against Saladin and his dark-skinned followers; to sail the southern seas with Drake; to circumnavigate the globe with Magellan; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know Napoleon as you know Roosevelt. He combines absorbing interest with supreme reliability, and makes the heroes of history real living men and women, and about them he weaves the rise and fall of empires in such a fascinating style that history becomes as absorbingly interesting as the greatest of fiction.

RIDPATH'S History should be in your home. It's a work you will value as long as you live. You can associate with the world's heroes; you can cross the Rubicon with Caesar, after which Rome was free no more. You can sit at the feet of Socrates, the loftiest genius of the ancient world. You can kneel at the shrine of Lincoln, "the greatest human of all time; the gentlest memory of the world." It is ennobling to commune with these children of destiny. To be associated with great men and events is to be great one's self; and you will add to your store of knowledge which is power, and to the richness of your life.

RIDPATH'S History is the most complete, most charmingly written, most up-to-date, best illustrated and carefully indexed History of the World in existence.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

IN-AND-IN-BREEDING.

In a bulletin published recently by the Michigan Experiment Station relating to a plan for improving Michigan cattle, the subject of in-and-in breeding comes in for a little discussion by the author of this bulletin, Prof. R. S. Shaw. Among other things, Professor Shaw says:

It is astonishing the extent to which in-and-in breeding and in-breeding are allowed among the common stocks of the country, and this, too, by some persons who realize fully the seriousness of the practice. It arises, of course, from the selection of sires from among the offspring of the herd; in some cases, it may be due to a lack of means to make a suitable purchase, but, in general, it is due to carelessness or indifference. When in-and-in breeding is carried too far the following evils are likely to result, namely, loss of size, delicacy of constitution, impaired reproductive powers, and in fact, general deterioration.

The practice of in-and-in breeding and in-breeding should not be denounced entirely, for they may become useful factors when employed by those skilled in the art of breeding; they must almost necessarily be used in the formation of new breeds, where it is the aim to fix new characters in animals and secure uniformity and permanence in the transmission of the same. But, on the other hand, the improver of common stocks has no occasion to resort to close breeding. He is not going to become a breeder of new breeds, or types, but is going to improve his common stock through up-grading, in which he will rely solely on the prepotency of the sires chosen to work the transformations by which each succeeding generation will be brought nearer to his own standard of excellence.

There are a good many men in the corn belt who are ready with a club for the man who has anything to say against the practice of in-and-in breeding. They claim that only in this way is it possible to fix type within the breed and that to denounce the practice is to simply try to remove the corner stone from the breeder's business.

We agree with Professor Shaw that the practice should not be denounced entirely, because those who are skilled in the principles of breeding have been able in the past to bring about marvelous results in the breeding of animals that are closely related. The average man, however, whose means do not permit him to buy top animals, especially males, should guard against the practice of pur-

chasing males that are closely related to his females. He is sure to propagate or fix the imperfections rather than the perfections.

Some time ago we cited an instance where a sow with four pigs when bred to a half-brother, farrowed and raised a litter of ten, and when these weighed 250 pounds they were all walking on their dew-claws. The plan in this instance was to fix other desirable characteristics in the offspring of this sow, but instead the weaknesses were reproduced. The breeder in this instance rid himself not only of the offspring, but of the sow herself.

It often happens that one has a pig that is a half-brother to all the young sows, and as it is cheaper to use him than to buy an unrelated pig, the practice is too often resorted to. The same is also the case in too many instances with pure-bred cattle, and the practice in our opinion is responsible for the tearing-down of constitutional powers and the lessening among females of prolific qualities.

We can well understand the temptation to in-breed, because where no in-breeding has been practiced in a given strain of live stock, the tendency to variation is very wide. This is especially true among hogs. If there is no in-breeding, you may have several types in a single litter, whereas in the case of in-bred stuff they may be as uniform as peas, as the saying goes. However, you will usually get more pigs to the sow if she is not in-bred, and other things being equal they will have better constitutional powers, and if they are intended for the pork barrel they will finish up a profitable bunch for their owner at nine or ten months.

We have no advice on this subject to give the expert, as the man who has been producing good foundation stock for years is amply able to take care of himself. We could name men who are in the hog business living in the corn belt who have demonstrated beyond any question of doubt that it is not altogether a sin to in-breed, these individuals having done much for the breed by way of fixing type without impairing the reproductive characteristics.

DIP FOR SPRAYING PURPOSES.

The following communication has been received from a subscriber, Mr. John Rending:

I have a dipping tank and have been dipping my hogs from time to time during the summer. Of course, the liquid is still on hand and I cannot use it in cold weather. What would you think of putting it on the walls of the poultry and hog houses and around chicken coops for disinfection purposes?

Used dip can be put to no better use than to sprinkle it around the walls and floors of hog quarters and hen houses; indeed, it is one of the ideal ways to kill off lice and nits just before winter. Where there are lice around hog quarters, it is an excellent plan to take pains to clean out all old straw and such manure as can be handily removed and then spray thoroughly with a good dip. It is surprising if beds are changed two or three times late in the fall and treated in this way, how much it will do toward ridding hogs of lice, as hogs seem to be able to get rid of what is on their bodies, providing their beds are free from the pest.

FEEDING TOO MUCH CORN.

The following communication has been received from a subscriber at Pomeroy, Iowa:

I would like if you could tell me what is the matter with my Chester White pigs. A few of them eat only chicken droppings and they are quite weak in the hind legs. One of them has been so afflicted all summer, and a few more have started to go that way lately. They have been fed corn and kitchen slops and have had the run of a large pasture. Most of my pigs are doing well, but these are not.

In our opinion these pigs have been getting a little too much corn. As we have said dozens of times before in this paper, corn is not a balanced ration, and if it is supplied too freely to growing pigs there is always some danger of them going wrong. Of course it is also true that where hogs have the run of pasture they will, with corn in addition, come along in many cases and make very satisfactory gains and attain good weight by the time they are ten or eleven months old. Just why this should be the case is not exactly clear to us, unless enough pasture is eaten to balance the corn.

We would have no hesitation in advising any man under circumstances like these to purchase some mill feeds, oil meal or tankage. These are all richer in ash material and in flesh-forming

WESTERN NORMAL COLLEGE.

SHENANDOAH, IOWA.

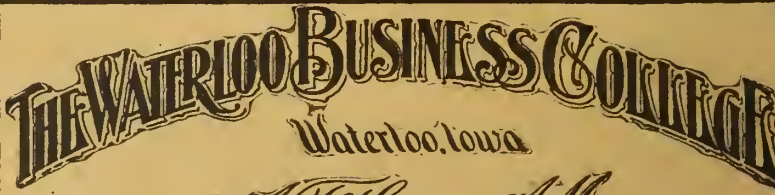

Student's Railroad Fare Paid. Send for Schedule. School Year 48 Weeks. Students Enter Any Time.

Approved by State of Iowa. Located in Ideal College City, Finest Equipments Throughout. Faculty of Specialists. Trains large numbers of Teachers. Business, Shorthand and Music Departments unequalled in the West. Courses:

- | | | |
|------------------------|---|---------------------------------------|
| 1. Normal | 7. Common School | 13. Plain Penmanship and Pen Art |
| 2. Dialectic | 8. County Certificate | 14. Music, Piano, Voice, Violin, etc. |

H. C. BROWN, President, BLOOMFIELD, IOWA

substances and consequently will build up the hog in bone and in muscle. The very fact that only a few of this bunch of hogs are acting in this way is highly significant, and the matter should be taken in hand without delay, or others will drop out so that there will soon be on hand a bunch of very unprofitable hogs.

We realize that the by-products of mills are high in price, but with hogs at their present value it is a short-sighted policy to utilize good feed if they are not making satisfactory gains. Do not hesitate to sell corn and buy the mill feeds if it is necessary to do so. The small grains may be utilized to some extent, and, indeed, oats or wheat may be often used to offset the fattening tendency of corn, and thereby build up the frame and the muscle of the fattening animal.

Send Us Your Advertisement.

Beginning with our present issue, The Homestead resumes the regular publication of its Department of Classified Advertisements, for the accommodation of farmers, poultrymen, stockmen, dealers in farm lands and others who are not large or regular advertisers. This department appears this week on page 7.

All classified advertisements will be set in uniform style, without display type or illustrations, thus giving all an equal chance to attract the reader's attention.

A charge of five cents a word will be made for each insertion, no insertion being accepted for less than \$1.20. Terms, cash with the order. Each number, initial letter and abbreviation counted as one word.

All classified advertisements will be inserted without additional charge in The Wisconsin Farmer, Madison, Wis., which has 30,000 circulation, and The Farmer and Stockman, Kansas City, Mo., with over 50,000 circulation; guaranteed circulation of the three papers over 165,000.

To insure insertion, copy for any issue must reach The Homestead by Saturday of the preceding week. For example, copy for our issue of December 20th should be received on or before Saturday, December 15th.

Write your copy plainly, with special pains to make numbers, prices and proper names legible. Do not delay, but send in your advertisement at once. Twenty-four words, one insertion, \$1.20; four insertions, \$4.80. Address, The Homestead Company, Des Moines, Iowa.

Winter Wire Stretching.

To the Editor of The Homestead:

It is always more or less of a difficult matter to get wire fence stretched to

the proper tension whether the weather be warm or cold. Those who find it necessary to stretch wire fencing this winter may find their corner posts leaving the anchorage next summer unless care is taken in the use of the stretcher. As is well known, the tension of a wire fence varies with the weather. A piece of woven fence eighty rods long may be as taut as desirable in July, while November may make it look like a poor piece of work.

The result of heat and cold on iron is well illustrated in changing length of a railroad rail. In hot weather one may notice a space between the ends of the rails as much as an inch. Cold causes the rails to expand and touch in winter. Thus while a rod of fence may be only a quarter or half-inch shorter in summer, the difference amounts to several feet in a quarter of a mile. Some inventors have attempted to regulate this changing tension by attaching wires to corner posts with springs. However, the success of such a contrivance would be doubtful.

The point is to stretch the winter-made fence much tighter correspondingly than that made in summer. Possibly a little extra care in this regard may save a good many hours of work next season.

Subscriber.

The cutting of ornamental and shade trees along the highway by telephone companies is deplorable. The belief exists (and perhaps it is fostered by those it protects) that the telephone company has a right to do any amount of damage in order to construct or improve its line. This is not true. It has, however, a right to do as much cutting as is necessary, and no more. It seems that such companies should at least have the courtesy to allow the farmer an opportunity to do his own trimming. It would then be carefully done and the damage reduced to the minimum. A law to that effect would be commendable. A few damage cases for ruthless chopping would teach the corporations what their rights really are.

"No-Tar" Roofing

I WANT to tell you how I make roofing without tar, so that it will resist fire. I want to tell you why my "No-Tar" Roofing enables you to get lower Fire Insurance rates.

Send me your name and address on a post card, and I will write you a personal letter all about my roofing.

I will also send you a sample of it to test and a copy of my FREE book on how to lay roofing without outside help, and only a sharp knife and hammer for tools.

My "No-Tar" Roofing is the only roofing that is weather, water, acid and almost wear proof, as well as Fire Proof.

It won't crack in cold weather, nor melt in the hottest sun.

You ought to send for my book at once if you have any roof that needs fixing.

"No-Tar" Roofing

is the best for new buildings, the kind for re-roofing old buildings, and the easiest to patch with.

Let me tell you how I can save you a lot of money and give you the best roof protection you ever heard about.

Write me a post card today.

Show-Yard Judges and Their Types.

By Leslie Smith, St. Cloud, Minn.

A close study of the winning types of the various beef breeds for the past quarter of a century in the show rings brings to our minds the question, "Are we showing a better class of beef cattle than we did in years gone by?" When we think of some of the stars and champions shown in times past and in memory compare them with the present-day champions, we are forced to admit that all the different beef breeds are more nearly of one type than they were twenty-five years ago. Time was within the recollection of men living today when size and weight were the first consideration in determining the value of a beef animal. "What does he weigh?" was the first question asked a thousand times a day by as many visitors at the fairs as they paused to view the animals on exhibition. The same question can still be heard from the present-day visitor, although not quite so often as of old. Anyone who can recall the champion fat steer of 1884 at Chicago and compare him with the International champion of 1905 will admit that there was considerable difference in the type of those two animals.

We can take the circuit of shows just finished with the American Royal, at Kansas City. How many in the four principal beef breeds carried the same honors right along with them? True, there were some that were never turned down, but a good many went up and down. One case in particular I recall where a female won first place and went as low down as seventh, one of the same company being placed first that stood along with her when she was placed first.

Truly this judging is a conundrum, but it is a very easy matter to criticize the judges, and the criticism is very often done by men who did not even lay hands on the animals and outside appearance is often deceptive. Put those same critics in the judge's position and they would be like a captain with his ship on the ocean without a compass. We know that many men have many minds and animals don't all look the same to judges, but the shows are supposed to be for the education of the public, and a judge when called on to give his reason ought to be able to do so, and not be like Dr. Fell:

I do not love you, Dr. Fell,
The reason why I cannot tell;
But only this I know full well
I do not love you, Dr. Fell.

But never advertise yourself by denouncing the judges. Remember they are very often selected or recommended by your different breed associations, and whether you got what was coming to you or not, the world will always be-

lieve that you got both an intelligent and honest rating, and their only comment, if any, will be, "Listen to that kicker."

Just a word as to the course of the judge in the performance of his task in the show ring. It is presumed that he knows his business from experience as a breeder; that he has confidence in his own judgment and is honest and unbiased. It is well, after a general look over the animals, to draw out a few of the most likely and after a close and careful examination have them walked around a circle to see how they look in motion, and then place them in their order of rating. Always keep your breed type in view, and if you commence with a certain type follow along down your class as far as you can go, so that your work will show uniformity. Your work then, if well done, will be an education to those who need to learn the best type of the breed. On the whole, most of the judges of the beef breeds who are up to date, look for nearly the same type of animal. Of course, there are different characteristics of the different breeds, but we all look for the same broad backs and smooth forms, thickly-fleshed loins, long level quarters, well-sprung ribs, thickly covered with natural flesh, mellow to the touch, yet firm and not flabby, and carrying coats of soft, silky hair—cattle that carry the bulk of their weight on their backs, where the highest-priced cuts of beef are found. We sometimes hear men describing cattle that suit them as low down, blocky, wide as a wagon and all the rest of it. That may be all right and it may not. I am not very sure but that you can get them too low down. The nearer we put their bodies to Mother Earth, the more weight we will have under, and that means more cheap meat. Then again, your very deep animals don't always carry as much width as they ought.

Some years ago, along with a noted cattleman, I was looking over a bull I had thought of purchasing. I remarked that I thought he was rather flat along the ribs. My friend said on account of his great depth it made him look flat. I said that the rule would work both ways, that on account of his flat ribs it made him look deep. Intelligent breeders have all been working with the same end in view, to get the greatest weight of the cuts that bring the highest price in the world's markets. The science and the art of breeding comes not from fine-spun theories, but it is largely an intuition which comes to the man who lives with his stock, studying their nature and individual characteristics, watching and directing their feeding and development.

conduct of Professors Bliss and Dinsmore and will meet at the new pavilion on the fair ground, and instruction in domestic science will be given in the Y. M. C. A. kitchen, under the direction of Miss Rausch.

Features of the school will be lectures and addresses by President Storms, Messrs. C. F. Curtiss, Geo. M. Rommel, W. H. Manss, Asa Turner and others.

This school is largely maintained by contributions from the business men and the farmers of southeastern Iowa. The officers and the committees of this school serve without pay and the tuition (only \$2.50 for the entire course, including the lectures and admission to the corn shows) has only been put sufficiently high to meet the legitimate expenses, and in order to establish and maintain this school year after year, it will be necessary for it to have the liberal patronage of the general public. The list of prizes is very generous.

PREMIUM LIST OF IOWA CORN GROWERS' ASSOCIATION.

The fourth annual contest of the Iowa Corn Growers' Association will be held at the agricultural college, Ames, Iowa, during the short course period, from December 31st to January 12th, inclusive. We herewith append the greeting of the president of the Iowa Corn Growers' Association, Mr. Asa Turner:

The officers of the Iowa Corn Growers' Association direct the attention of corn growers to the liberal premiums offered in the several classes, to be competed for in our annual contest.

It has been our ambition to offer a series

ADVERTISING!!

DO "What You ADVERTISE"!!

"ADVERTISING," as the term is commonly accepted by the public, means anything and everything in the shape of publicity. This poor, misused and much abused but vitally important commercial word has been "made over" until what it actually does mean will be a surprise to the average person, when consulting Webster's dictionary. To advertise really means to make public the actual untarnished, unvarnished and undistorted facts. How many advertisements really do this?

In writing an advertisement, the motive should be an aspiration to inform the public clearly of the bona fide conditions; it should not be an aspiration to hypnotize the public and loosen its purse strings, without regard to merit, truth or veracity, as we know to be the guiding star of many an advertisement writer in this modern age.

In explaining our position on our "five year guarantee" question, we want to say frankly that we intend to "practice what we preach." We are daily making the assertion that the Litchfield Spreader stands head and shoulders above other machines and we don't want this to be an empty statement. We mean what we say and we intend that our advertisements shall say exactly what we mean by backing up our statements with a guarantee that talks for itself.

There is a tendency on the part of many advertisers when exploiting certain farm machinery, to make unreasonable claims and then back them up just as little as they can. We intend to avoid any such a position and hope that our advertisements, crude though they may be, shall stand out by themselves, bearing the stamp of honest convictions.

When we tell the trade that the Litchfield Spreader has a strength of construction not found in other spreaders; that it is far ahead of the average machine in various details and in many general ways, we want it distinctly understood that we have weighed our words carefully. We wish to make it clear that no statements are placed before our customers without being carefully weighed and measured.

What we advertise, we mean to do and we know our spreaders will do. We make claims and, to sustain these claims, we have the evidence sufficient. We don't ask any man to buy a Litchfield Manure Spreader because we tell him to, but we do ask and demand of the careful conservative buyer, his investigation and an unbiased opinion.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

of premiums that will challenge the serious thought and energy of every corn grower.

A splendid new trophy has been added to our already beautiful trophy series.

This association desires to render a useful service to every one who may be interested in better farming, better homes and better citizenship.

Those of us who have grown enthusiastic in our corn work feel that we ought to act as missionaries and invite others to share this fountain of youth.

If we exercise judgment and are faithful in our plans, it means larger yields and better quality of corn.

The young man of today who is facing the problems of high priced land, who needs more "red blood" to make his dreams come true, will find not only inspiration, but more profitable farming when he has gotten into the corn gospel work.

I want to sound the bugle call and invite my G. A. R. comrades and their neighbors to share the pleasures which are awaiting all of us who are willing to join hands with a generous Providence and study nature in all of its beauty and infinite features of interest.

Your loyal patriotic service in the days of '61-'65 was not measured by your meager pay. Your corn gospel service will repay you liberally in larger crops and better quality, but your largest measure of pay will be in the pleasure found in the spirit of "farming a little better than you ever farmed before," and this will arouse latent energy in you and cause a broader ambition for our sons who are to follow us in our chosen work.

Let us "stand to attention" and "fall in" with this splendid army of a greater Iowa who are making Iowa the greatest of all corn states.

Bring your sons and your neighbors and their sons and mingle with men who "do things" and you will take home with you new thoughts and new purposes which will fill each winter day with profitable plans, each summer day with a new found pleasure and each autumn day with a harvest which makes the heart truly glad.

All exhibitors of corn in this contest must be members of the Iowa Corn Growers' Association, and the corn must be grown by the exhibitor during 1906. All entries must be made and exhibits in place before noon Wednesday, January 2d. Exhibitors desiring to ship their corn may address it to Sec. J. W. Jones, Agricultural College, Ames, Iowa, and the freight or express must be prepaid. We suggest that all those who would like to take part in this contest send at once for a copy of the premium list. A card to Mr. Jones will bring you a list by return mail.

There is no reason why the contest this year should not be greater than ever. Iowa raised a mammoth crop of good, sound corn and the work of the agricultural college is responsible for a good many of the bushels raised; that is, for the bushels of increase. The two weeks' short course will pay any young man, or even any old man who still has a vital interest in agricultural affairs—

it will pay not only in dollars and cents, but in every other way that is worth while. We have never known an instance where the time spent at one of these courses has ever been regretted.

A SPLENDID GRAIN AND FEED CLEANER.

Experiments conducted at almost every station in the United States indicate that it pays to grade grain. We have in mind one farmer who has been grading his oats for a period of twenty-five years and he has made the record during that time of never having raised less than fifty bushels per acre. In 1906 his yield was sixty-four bushels per acre. This man usually raises one-third more grain per acre than his neighbors who do not grade their seed. The Hall Grain Grader Company, of Winfield, Iowa, are putting on the market a high-class cleaner and grader for \$19.98. This not only grades fall grain, but screens No. 8 and No. 9 grade corn for an edge-drop planter perfectly. This grader has seven complete riddles, four double wire screens and its capacity is such that the grading of grain for a quarter or half-section farm only requires a short time. A guarantee goes with every machine, and the freight will be paid in advance by the company. For further information address Hall Grain Grader Company, Winfield, Iowa, and mention The Homestead when you write. The advertisement appears on page 14 of this issue.

ARE YOU GOING ABROAD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Cheeseman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

Hygeno

KEEPS THEM ALL HEALTHY

Every good Veterinarian urges frequent use of a coal tar disinfectant. HYGENO is the best coal tar disinfectant made—the best it is possible to make—nothing dirty, gummy, weak or watery about it, yet when prepared for use it cost only about one cent per gallon. HYGENO kills lice, ticks, scab, mites and all parasites on any animal; cures mange, itch, ring-worm, nettle rash and other parasitic skin diseases; destroys germs, foul odors, stomach worms, screw worms, grubs, etc.; heals galls, wounds, cuts, scratches, sore mouth and similar injuries and diseases. HYGENO is endorsed by leading sheep, hog and cattle breeders, horse owners and poultry and pet stock fanciers. Free booklet tells why. Write today, we will tell you where to buy Hygeno. The Hygeno Disinfectant Co., 582-583 Citizens Bldg., Cleveland, Ohio.

A PLAN OF RENTING LAND.

Some time ago the owner of a 640-acre grain and stock farm asked for information concerning the best way to rent land. He stated that he was obliged to leave it for a term of years and yet did not want to sell. It was well stocked with brood mares, cattle, hogs and farm machinery. This inquiry was submitted to Mr. Charles Rhinehart, of Dallas county, Iowa, who went into the subject somewhat in detail as to what should be done under the circumstances. We have recently had a few inquiries from men who have mislaid their copies of the paper containing Mr. Rhinehart's article, and we thought it might be advisable to give the substance of it again. In part Mr. Rhinehart said:

In the first place, the owner of the property is entitled to, and should be contented with, a reasonable rate of interest upon his investment, and if the tenant enjoys the confidence of the landlord to the extent that he will entrust the supervision of his entire farm, including horses, cattle, hogs, machinery, etc., to him for a term of years, there should be no difficulty in insuring to the landlord a reasonable rate of interest for his investment and at the same time pay the tenant well for his labors.

There are many plans that have been used for renting stock farms, each one probably peculiarly fitted for local circumstances and conditions. The partnership plan is probably most satisfactory, when it can be made to apply. In this case, I would suggest that a partnership be formed with some man whose capital is limited, but who has the ability and aptitude to conduct a farm of this size, and let him share in the profits of the entire farm in exchange for the labor in conducting it.

Take an inventory of all the horses, fix the price for each individual animal of those you expect to keep on the farm indefinitely; the cattle in the same manner; the hogs and farm machinery, including wagons, harness, tools, etc.; also take an inventory of all grain on the farm, hay and straw, including all feeds to be used or fed on the farm, and fix the value in each instance. This inventory will represent the amount of investment of the landlord other than the land. Fix the rental value of the pasture land at what it is worth in your locality. Then there should be a thorough understanding of how the business is to be conducted, whether you expect to feed steers, milk cows, raise hogs or horses, about what you expect to do in the rotation of crops, kind of crops, etc.; in fact, a general understanding of the intention of the partnership.

The tenant should either own or pay interest upon one-half of the investment in the way of stock, grain, feed and tools, and should pay half of the rental value of the pasture. The tenant should perform all labor in connection with conducting such farm, keep buildings and fences in repair, material to be furnished by landlord, and then all the increase from original investment should be divided equally with landlord and tenant. That is, if any grain is sold off the farm, it is divided equally; if milk, butter or eggs are sold, the proceeds are divided in the same way; in fact, all increase is divided that may be disposed of during term of partnership or at expiration of same. If any of the original investment is disposed of, the amount of the original investment of the same shall be tendered to the landlord before any profit shall be divided. Then, in case stock, grain or tools are bought, each party shall pay half, or in case landlord pays all, the tenant should pay interest on half. At any time any of the original investment is disposed of in the way of stock, feed or tools, the interest on that amount should stop.

This, in a general way, I think explains the idea of the partnership arrangement. It amounts to just this much: that the landlord furnishes the farm and half the stock, the tenant performs all the labor and furnishes half the stock, then the profits are divided equally. In order to increase the responsibility of the tenant it would be well for him to have some money of his own invested.

We assume that a man who owns 640 acres of land and has it stocked with horses, cattle, hogs, machinery, etc., is a successful business man, and should have the management of the business under his supervision; and I would suggest that lease or partnership be limited to one year, with the understanding that it can be continued if it is satisfactory to both parties.

This sort of an arrangement should be satisfactory to the tenant, as he has stock, horses and tools to begin work with and has

a chance to share the profits of a successful business man and also has a chance to invest his earnings in the business as fast as he makes them, thereby stopping interest and actually owning a share. On the other hand, the landlord has his farm conducted the way he wants it, can keep it in a high state of cultivation, and can retain his stock so that in case he wishes to return to the farm will have everything as in the beginning, excepting for natural wear.

This is but a general plan, based on the supposition that the tenant has no resources other than his capability and aptitude to conduct a farm of this size. Should he have money to invest, stock or tools, this arrangement may be altered to suit conditions.

I would emphasize the importance of the landlord assuming entire control of the business management in case of difficulty arising from difference of opinion, and I would avoid entering an agreement for a longer term than one year, the term to be extended if satisfactory to both parties.

Now, that this subject is up we would like to have it discussed by others. There is a growing tendency in the direction of landlordism in this country and there are two classes that are interested in the plan of renting, namely, the land owners and the tenants. If you have had experience in the capacity of either one or both we shall consider it a favor if you will kindly submit your views on this subject for the benefit of others.

INDOOR VS. OUTDOOR FEEDING FOR FATTENING STEERS.

An experiment was conducted during the winter of 1904-5 at the Pennsylvania station, the purpose of which was to ascertain the relative gains made by steers kept in a barn and those kept in the yards. The results of feeding the twenty-four steers are shown in the followings table:

	Open Barn.	Shed.
Daily gain per steer.....lbs.	1.94	1.52
Hay fed for a pound of gain.....lbs.	3.29	3.45
Stover fed for a pound of gain.....lbs.	3.32	3.47
Grain fed for a pound of gain.....lbs.	8.86	9.08
Estimated cost of feed per pound of gain.....cts.	10.66	11.26
Difference in favor of barn-fed steers.....cts.	.60	

The results show in a general way that the steers fed in the open ate less total food than those fed in the barn, but slightly more per pound of gain, thus making the cost of feed per pound of gain somewhat greater for the open-fed than for the barn-fed lot. The difference is so slight, however, as to make it impossible to draw a deduction favorable to the one method over the other.

The relative value of barns and sheds has been tested at other stations. Thus, at the Kansas station, it was found that the steers running in yards made larger gains on the whole than those tied in stables, but required about 12 per cent more grain for a given amount of increase.

At the Minnesota station the question of shelter was one of the points studied in a series of feeding experiments. A lot fed indoors made an average daily gain of 1.74 pounds as compared with 2.26 pounds in the case of the lot fed in sheds, the cost of a pound of gain in the two cases being 6.47 cents and 5.61 cents, respectively; that is to say, the gain was greater and more cheaply made when the steers were fed in open sheds than when fed in stables; but Professor Shaw, who carried on the experiment, considered that additional tests should be made before definite conclusions could be drawn.

At the Missouri Experiment Station, H. J. Waters made a series of tests extending over several years to determine the effect of shelter on the gains made by steers fed heavy rations of corn and hay in the winter. In every case the most satisfactory gains were made by the animals which had the least shelter. The average daily gain of the steers fed in barns was 1.7 pounds per head; of those fed in sheds, 1.92 pounds, and of those fed in open yards, 2.05 pounds, the amount of feed required per pound of gain being 14.79, 14.12 and 14.22 pounds, respectively.

Taking into consideration all these experiments it would appear that there is no special advantage in placing steers in warm quarters during the winter period. Of course every man knows that it will pay to have a good shelter from storms and that it will also pay to keep yards or sheds well bedded so the steers have dry sleeping quarters. A shed with a good roof and closed on the north and on the west is about all the protection a fattening steer needs.

Oil Meal for Steers.

To the Editor of The Homestead:

One of your subscribers writes:

Will you please let me know, through your paper, where I can buy oil meal from the

1856-Sandwich-1906
Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

mills or from some reliable wholesale dealer, and what it costs per ton? I can buy it right here, but have to pay \$30 per ton for it. Would it pay to feed it at that price to fattening cattle?

Old process oil meal can be secured from the Midland Oil Co., Minneapolis, Minn. Oil meal can usually be purchased \$3.00 to \$5.00 per ton cheaper, when purchased in carload lots from the mills, than when purchased in ton lots from dealers.

Would advise your correspondent not to use oil meal at this price, if he can secure clover at \$6.00 or alfalfa at \$10.00 per ton. Tests made by the Iowa Experiment Station show that the increased cost of gains, where oil meal cost but \$23.00 per ton, offset the greater gains and higher finish secured by its use. Corn was valued at forty cents per bushel, and clover hay at \$4 per ton.

In general, the use of oil meal may be considered profitable when corn is fifty cents or higher, and when no protein bearing roughage, as clover hay or alfalfa, is available. Even in this case, however, the use of oil meal at \$30 per ton would be attended with risk.

Four and one-quarter tons of choice clover, or two and two-thirds tons of choice alfalfa hay, furnish as much protein as a ton of oil meal. These feeds can be grown on the farm at a cost not to exceed \$4 or \$5 per ton, and enrich the land while growing. Fed to steers, they give nearly as satisfactory gains, and lack but little of giving equal finish.

If your correspondent cannot secure such hay at prices indicated, and has

only straw and corn fodder for roughage, would advise using a limited quantity of the oil meal—about two pounds per steer per day for the last sixty days of the feeding period. The use of so small a quantity will not increase the cost of gains to any very marked extent, but will add to the palatability of the ration, have a desirable influence on the digestive tract, and give greater bloom.

The high prices which have prevailed recently for such supplemental feeds, may be expected to continue, as foreign countries are heavy purchasers. Improvement of pasture lands, feeding on grass, and an increase in the acreage devoted to clover or alfalfa, offer us a solution of the cattle-feeding problem, despite the high cost of supplemental feeds. Wayne Dinsmore.

HOMESSEKERS' RATES VIA CHICAGO GREAT WESTERN RAILWAY.

On the first and third Tuesdays of each month this winter the above railway will sell homeseekers' tickets to points in states of Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Indian Territory, Iowa, Kansas, Kentucky, Louisiana, Mexico, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Tennessee, Texas, Utah, Virginia, Wisconsin, Northern Michigan and Wyoming at rate of one fare plus two dollars for the round trip. To some points in the South and Southwest a flat rate of \$23 is made which is less than the regular one way rate. Tickets have limit to return of twenty-one days to some territory and thirty days to other and allow stopovers in homeseekers' territory. For full information address E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

When writing to advertisers please mention this paper.

FOURTEEN FOR ONE
FOR X-MAS!

To introduce in American homes our splendid pictures of the scenery in the Rockies—the snow-clad peaks under the blue skies of Colorado, we make a most extraordinary offer for this X-Mas.

We will send, postpaid, on receipt of only one dollar, six large, fine pictures—ready for framing, of the most beautiful scenery in the states, and as a premium a splendid, guaranteed fountain-pen, the like of which you cannot buy anywhere else for less than \$2.50. This is \$4.00 worth for one.

But this is not all. To the first 100 customers, who mention our ads, we will further give FREE a splendid stickpin set with a pure gold nugget, right out from the treasure chests of the Rockies, with a gold value of \$10. Thus you can get \$14 for one.

Our pictures should be in every home, our pens in every pocket and if you order promptly, you will own that splendid stickpin of pure gold.

Old and young will think it the greatest X-Mas present of the year. Address,

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

ABOUT CORN.

Mr. Thomas Eggenberg, Iowa City, Iowa. I ask your opinion as to the following question: If a man hires out through corn picking, is shocked corn included as well as standing corn?

Answer.—It is.

HUSBAND AND WIFE—PROPERTY.

A Subscriber, Ames, Iowa.—A and B are husband and wife and have no children living. All of the property is in A's name. If the wife should die first, who would get the property?

Answer.—The property being owned by the husband, he would continue to own it at and after the time of his wife's death. Her death has no effect whatever upon the property owned by her husband in her lifetime.

INHERITANCE—WISCONSIN.

Mr. J. A. F., Lyons, Wis.—A husband and wife have no children. They own a farm and some personal property, each one owning one-half of it. Suppose that neither one of them should make a will, and one should die, what share of the deceased one's property would the survivor get, according to the laws of Wisconsin?

Answer.—If at the time of death there be no children, or issue of children, the survivor would get all of the property of the deceased one, both real and personal.

HUSBAND AND WIFE—DEED.

A Subscriber, Yale, Iowa.—A and B are husband and wife, having been married fifteen years. They have no children. At the time of the marriage, B, the wife, had \$500 in money of which \$100 was used to buy a town lot and the remaining \$400 was applied to the building of a house. The title to house and lot was put in A's name. A has transferred said property to B by a warranty deed, naming the \$500 as money consideration. The transfer was not made because of indebtedness. Is the transfer from A to B valid as against heirs and creditors?

Answer.—The transfer is perfectly good and valid against the whole world.

RAILROAD CROSSING HIGHWAY.

Mr. J. P. H., Camp Grove, Ill.—I own a farm in South Dakota. The railroad runs through it, and crosses the public road on the east side of my farm. The public road is on a section line. The railroad company has not put in a crossing where its line crosses the public road. Can I compel the company to put in a public crossing at that point?

Answer.—There seems to be no law in South Dakota which requires railroad companies to put in crossings where their lines cross the public roads. It would, therefore, devolve upon the highway authorities to put in such crossings.

RECORD OF DEED—SURVEY.

A Subscriber, Blakesburg, Iowa.—In the transfer of land that is less than congressional sub-divisions or where the boundary is irregular, is it required by the laws of Iowa that a survey shall be made by the county surveyor before the conveyance can be entered for record, and taxation?

Answer.—It is not required that a survey be made in order to entitle a deed to be recorded. It might happen that a survey would have to be made in order to get a correct description to put in the deed in the first place, but when a deed is properly signed and acknowledged, it is entitled to be recorded.

FENCE VIEWERS—APPEAL.

Mr. G. A. Steele, Ogden, Iowa.—I have been unable to get the man who owns the land adjoining my pasture to keep in repair his part of the partition fence, and I have been constantly annoyed by his stock getting into my pasture, and my stock getting into his pasture. We had the trustees come and view the fence, as fence viewers, and they pronounced it good, when in fact it was in such a condition that stock could walk back and forth over it without any trouble. One of the trustees is my neighbor's son-in-law. This condition of things has continued for the last six years, and it cannot be remedied by land cannot be used for either pasture or crops. My neighbor's scrub hulk has been getting in my pasture through this bad fence, and getting my heifers with calf, and a bunch of his shoats run in and out continually. I can prove by a number of men that the fence is not a lawful fence and is in no condition to turn stock. Is there any way by which I can compel my neighbor to keep his part of the fence in good repair?

Answer.—There is a way. Again request the trustees as fence viewers to view the fence and make an order on your neighbor to put in such repairs as to make it a lawful fence. If the fence viewers should again decide that the fence is a good and lawful fence, when it is not, take an appeal from their decision, to the district court, and then

CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted under this heading. Each number and initial letter or abbreviation counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 185,000, reaching a farm population of at least 825,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

REAL ESTATE.

THE BRAZOS Valley made Texas famous. West of the Brazos, cane, corn, cotton and alfalfa, east of the Brazos, rice. We are on the west side and have as fine land as there is in the United States at \$12 to \$18 an acre for small tracts, and \$9 to \$12 for large tracts. It's prairie land, almost level, dark soil, free from sand, rock or gravel. No blizzards, hot winds or droughts. Best of markets and ten months growing season. I own the land and can give best prices. No trades. J. H. and P. Lockwood, 431 East Houston St., San Antonio, Texas.

ARE YOU looking for a home? No farmer should think of buying land before seeing a copy of The Journal. It has nearly 4,000 farms, city property and stocks of goods advertised in it, so that anyone can find just what he wishes. It reaches 45,000 readers each issue 85% of which are farmers. Advertising rates 2c. per word. Send 75c. and we will mail you the Journal for one year; or for 10c. in silver we will send it two months on trial. Farm and Real Estate Journal, Truer, Iowa.

A COZY home in sunny, productive Oklahoma. 160, 2 1/2 miles from station, 1/2 mile of school, rural free delivery, telephone in house, three acres heavy orchard, 75 in cultivation. Best corn land. The corn on this farm made sixty bushels per acre this year. Best of soft water, windmill and tanks. Price, \$20.00 per acre. Perry DeFord, Oakwood, Okla.

FOR SALE. 560 acre grain and grass farm, seven miles Ft. Scott, 140 cultivation, 200 acres meadow, balance prairie grass, two sets fair improvements, \$19 per acre, will divide to suit. Before you buy write for free lists giving description, location and price of many bargains, Kansas and Missouri. F. H. Humphrey, Ft. Scott, Kansas.

IMPROVED farm for sale. 450 acres deeded and 640 acres school land lease. All deep, rich, black loam and level, 7 miles from county seat. Will produce equal to any land in western Nebraska. An ideal place for stock. A bargain at \$15 for deeded land and \$1,000 for lease. A. B. Wilcox, owner, Grant, Neb.

COZY FARM HOME, 80 acres for \$850; 40 rich valley in cultivation, balance good timber; 4 miles town, 4-room house, 2 barns, good out-buildings, water, fruit, garden. Must sell. F. G. Simmons, Springfield, Mo.

CENTRAL MISSOURI farms. Send for lists of 200, Callaway county, Missouri farms, with full description and price of each; Missouri's best grain and bluegrass county. Kootz & Palmer, Fulton, Mo.

WHEAT FIELDS. One hundred thousand acres now growing in Lane Co., Kansas. Best lands improved and unimproved, \$7.50 to \$20 per acre. McWilliams Land Co., Dighton, Lane Co., Kan.

FINE farm, 640 acres for rent, in Cass county, Nebraska to a good farmer and stock raiser. Man with plenty of help of his own preferred. Write for terms. E. G. Dovey & Son, Plattsmouth, Neb.

SETTLERS wanted for our Five to Ten dollar farming lands on easy terms. Good climate, soil, markets, roads, schools, etc. Improved farms \$15.00 and up. Claggett, Pine City, Minn.

560 ACRE RANCH, well improved, in Coffey county, no better in eastern Kansas, at a bargain if taken soon. For description and maps write Lane & Kent, Burlington, Kansas.

FARM BARGAINS. Northeastern Kansas, in Atchison and Jefferson counties, also Indian Territory land. Send for our list. Lehman & Hamm, Nortonville, Kan.

GOVERNMENT bonds no better than these farm bargains, being well improved and well located; \$40, \$18,000; 160, \$5,200; 80, \$2,100. Buckeye Agency, Williamsburg, Kan.

A BARGAIN. 320 acres fine improved farm 3 miles from town, half bottom, choice alfalfa land. Write for full description. R. G. Tonkin, Abilene, Kansas.

you can prove in court the true condition of the fence, and the court will finally determine the matter and make an order that can be enforced. When the fence viewers make their decision you have twenty days within which to appeal, and you must have your appeal bond approved by the township clerk. It would be advisable to employ a competent lawyer in the beginning, to start the proceedings and see them through.

HUSBAND'S DEATH—WIFE'S SHARE.

A Subscriber, Stuart, Iowa.—A husband and wife have forty acres of land and some live stock, all of which property is in the name of both of them. The wife has money enough to pay for half of it. Neither of them have children. In case the husband should die without making a will, what share of the property would the wife be entitled to by law?

Answer.—She would retain her half of the property which she owned in her husband's lifetime, and in addition

REAL ESTATE.

BARGAIN.—120 acre prairie farm, \$2,000 improvements, near here, only \$37.50 per acre. Half cash balance 6 per cent. Write Hicks-Northcott Inv. Co. Macon, Mo.

STOP paying rent! Buy improved farms along new electric road, from \$5 to \$25 per acre. Easy terms. Write quick. W. A. Hoffarth, Fowler, Mo.

PRIDDY'S Patron's Milk Record prevents misunderstanding when settling. Samples free. Show your creameryman. W. N. Priddy, Box B, Bloomer, Wis.

tion thereto, she would be entitled by law to one-half of the half interest which her husband had before his death, —the other half of his share going to his parents.

FENCING THE WHOLE COUNTRY.

Harry Ward, Who Makes "Don't Rust Fence," Says He Has Conclusive Proof of General Prosperity.

We are able to say upon the authority of President Harry Ward, of the Ward Fence Company, Marion, Indiana, that never before in the history of the wire and ornamental fence business has there been such overwhelming evidence of the general prosperity of the people of this country. Mr. Ward speaks with a wide general knowledge of farm conditions especially, as he has probably sold more farm and poultry fence in every state in the union than any other man in the business. The Ward Fence Company have done the largest business this year that they have ever done, and Mr. Ward considers it conclusive that farmers, chicken raisers and country people everywhere are in even

better financial condition than they have been at any time during the past ten years.

Mr. Ward is an enthusiastic business man and puts a lot of enthusiasm into the several hooks on fences and ornamental wire work that his company make, including the "Don't Rust Fence," which has taken the place of the old-time wire fence that rusted in two or three years.

"Don't Rust Fence" is so heavily galvanized that it simply can't rust. It is the cheapest kind to buy.

Any of our readers will probably find it well worth their while to write Mr. Ward and ask for these hooks, which will be sent free on request. They will give you an idea of the improvements that others are making on their places in farm and ornamental wire fencing and gates, wrought iron and steel fencing and gates, harp, plain and galvanized, and all sorts of similar improvements that cost less money nowadays than even split-rail fences used to cost. It will be well worth any man's time to write a postal card to Mr. Ward and ask him to tell about fence conditions.

The Homestead and The Homemaker \$1.25 per year.

IN THE GREAT SOUTHWEST.

It is reported that the goat and sheep raisers of the Sacramento mountains in New Mexico lost from 60 to 80 per cent of their herds in the recent blizzard. This is one of the heavy losses of the storm.

The first Oklahoma company to make denaturized alcohol is the Cotton Oil & Fuel Co., of Mountain Park.

While a performance was in progress at a St. Louis opera house a horse, utilized in the last act to draw the heroine in a buggy, became frightened and sprang over the footlights into the orchestra. The heroine fell unconscious to the stage and three women in the audience fainted while the horse floundered around in the orchestra pit demolishing chairs, with its hoofs and creating excitement in the theater. Presence of mind of a number of men in seizing the horse, at the same time admonishing the people to sit down, prevented a panic.

Postage stamps of the issue of 1907 put on sale at 6,000 presidential post-offices will bear on their face the name of the state and city in which the post-office is situated. The chief reason for this innovation is said at the postoffice department to be the belief that it will help to do away with the big postoffice robberies and make it much easier to trace criminals.

Thirty-four sacred cattle have been imported from India by a noted ranch owner near Paris, Texas. With the exception of three head, the consignment is all males. The plan is to use this breed as a cross on the native stock. Being easy keepers and immune from tick damage, they may prove very valuable for improvement purposes.

The present outlook is that the new state of Oklahoma will have within its borders ninety counties. The present territory of Oklahoma has twenty-six counties. This, therefore, calls for many changes in the present map of Oklahoma territory. It means the division of many of the present counties, and in some instances the division several times of one county.

The Farmers' Elevator System was organized at Salina, Kansas, in 1901. Farmers now own more than seven hundred co-operative elevators in the middle West. The total saving in running expenses or in the cost of marketing grain has been enormous, and is said to be three millions in Kansas alone. It appears that grain growers will soon be in a position to fix and maintain a reasonable price on farm produce.

The chief engineer of the war department has recommended that \$150,000 be appropriated to remove snags and make navigation safer on the Missouri river.

Mr. Arthur P. Turner, of England, who will judge fat bullocks at the International at Chicago this week, toured through parts of Missouri and adjoining

states before going to the show. Mr. Turner was very much pleased with the country and thought it was some of the finest he had ever seen.

An acre of seeder ribbon cane made a farmer near Ballinger, Texas, a neat return. The sirup amounted to 275 gallons, which, at fifty cents a gallon, brought \$137.50.

The great battleship Kansas, named after the Sunflower state through the efforts of the Kansas delegation in Congress, is nearing completion at Camden, N. J., where she is being built by the New York Shipbuilding Company. The Kansas is 450 feet in length, or the length of a railroad passenger train comprising an engine, boiler, tender and six coaches. From her keel to the top of her signal mast she is 140 feet high.

The recent snows and rains have made fall prospects more gratifying to farmers. There will now be ample moisture for the growing wheat, while stock ponds, in many places, have been replenished.

The Kansas Agricultural College will be well represented at the Chicago Stock Show in the fat cattle classes. The herd consists of seven Short-horns, four pure-breds and three grades; two Aberdeen Angus and one Hereford. One of the pure-bred Short-horns is the white steer, Tim, who won sweepstakes championship at the last American Royal Show at Kansas City.

Drury College, at Springfield, Mo., received a donation of \$50,000 from John D. Rockefeller.

Black walnut is produced in this country at an annual rate of about 33,000,000 feet. The larger portion of it now comes from southwestern Missouri, Arkansas, Oklahoma and Indian Territory. The home demand for black walnut lumber is only for comparatively small quantities. Its use is largely confined to gun stocks, novelties, electrical work, etc. The chief demand for walnut comes from Germany, and Hamburg is the great market.

The Buchanan county court recently granted a franchise to the St. Joseph, Savannah & Northern Railroad company from St. Joseph to the Buchanan-Andrew county line, including a right of way through the county farm. This is an interurban project and the promoters say a line to Savannah will be built at once.

Scarcity of cars is paralyzing the trade in wheat in Oklahoma. A number of mills are closed down as they are heavily stocked with flour and are unable to secure cars to fill their orders. Most of the elevators in and around Oklahoma City are full to the roof, and thousands of bushels of corn have been thrown on the ground and are liable to be seriously damaged.

Harness dealers and makers of leather goods claim that they have been losing money for a number of years. While leather has advanced in price 40 per cent, leather goods has advanced only 20 per cent. The harness men of Missouri, Kansas, Oklahoma and Colorado have lately organized and will meet at Kansas City in January to fix a scale of prices for retail dealers.

At a meeting of the stockholders of the North Missouri Mechanical and Agricultural Association the directors have taken steps to dissolve the organization and sell the property. Chillicothe will not have any more fairs, as this association is known as the Chillicothe Fair Association. The reason assigned for the step taken was that the fair was a money losing proposition.

The J. M. Guffey Petroleum Company is about to build a pipe line from the Indian Territory oil fields to Port Arthur, Texas. The line will be nearly 500 miles long and will cost twelve million dollars.

An organization known as the Missouri Good Roads Society has on foot a project for a public macadamized road from Kansas City to St. Louis and branches to points north and south of this line. They propose to use convict labor for crushing the rock and for laying the road. The society has asked that the fees for the issuance of hunter's licenses be appropriated for this purpose. Last year this amounted to \$126,000.

I. H. C.

Spreader Pointers

A good spreader costs considerable but it is worth more than it costs.

A poor spreader is an expensive luxury, no matter what it costs.

When you buy an I. H. C. Spreader you are buying something standard.

You get for your money—

—A substantial, durable machine

—One that is easily handled

—It handles manure in any condition.

—No spreader made does better work

—No spreader is lighter in draft.

I. H. C. Spreaders are well proportioned machines. They are strong

but not needlessly cumbersome—strong where strength is needed, with due regard for light draft and load to be carried.

The I. H. C. apron is driven at both sides, by both hind wheels. This eliminates all binding, friction and undue strain.

It has a vibrating rake to level the load—exclusive feature.

It has a wide range of feed, consequently a large or a small amount of manure per acre can be distributed. It is the only spreader controlled and operated entirely with one lever.

Made in three sizes for each of the two types, Cloverleaf, endless apron, and Corn King, return apron.

Call on the International local agent for catalog and full information or write to home office.

Send three 2 cent stamps for a copy of "Farm Science." Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U. S. A.

The road is to be partly supported by license fees on motors and vehicles. Of the many projects for such a road that have been offered this one may be realized.

The Kansas Agricultural College has been engaged in one of the greatest "corn campaigns" ever held in the state. Thus far over a hundred meetings have been held in different counties. The institute circuit for December begins at Alma on the 3d; December 5th, Cottonwood Falls; December 6th, Marion; December 7th and 8th, Eldorado; December 10th, Sedan; December 11th, Independence; December 12th, Oswego; December 13th, Pittsburg; December 14th, Osawatomie; December, 15th, Spring Hill.

The agricultural college at Stillwater, Okla., will hold its third annual course in stock judging and seed selection during the week January 7-12, 1907. The station staff will be assisted by such noted specialists as John Hamilton and A. D. Shamel of the department of agriculture; Jos. Wing, of Mechanicsville, Ohio, one of the most prominent lecturers and writers on agricultural subjects in the United States; A. P. Grout, of Winchester, Ill., an extensive feeder and practical scientific farmer, who perhaps has done more than anyone else to put the livestock industry of Illinois on a firm basis. Crouch & Son will bring a string of German Coach and Belgian Draft horses and will deliver lectures on horse breeding. The Oklahoma Corn Breeders' Association will give a corn show on one day of the week and a large number of premiums will be offered. A rate of a fare and one-third for the round trip has been granted by railroads from all points in Oklahoma and Indian Territory. This rate is also good for the meeting of the Oklahoma Board of Agriculture held at Guthrie, January 15th and 17th.

Snyder Bros.' Poland China Sale.

The eleventh sale of Poland Chinas held by Messrs. Snyder Bros., of Winfield, Kan., took place at Winfield, Kan., November 28th, before the largest assembled number of breeders from Kansas, Missouri, Illinois and Oklahoma ever held in southern Kansas. The hogs offered were the very best individuals and best-bred lot of hogs raised in this section. Cols. James Sparks and John L. Snyder and others officiated with excellent

success. After the sale Mr. John L. Snyder, who is also well known as one of the best auctioneers of pure-blooded stock, invited all his guests to proceed to the Arlington Hotel to partake of his hospitality. Fifty-five head were sold at an average of \$32.75. She is a Flower, one of the best On and On gilts out of Flower E. L., was purchased by Mr. Joseph Roy, of Peck, Kan., which was the top Price. Goldie's East Perfection, a daughter of On and On, was knocked down to Mr. T. E. Cox, of Rose Hill, Kan., for \$125. Below is a list of sales of \$25 and over:

Lot.	Price.
1. Joseph Roy, Peck, Kan.	\$134
2. A. P. Wright, Valley Center, Kan.	43
3. Harry E. Lunt, Burden, Kan.	40

The Stodder-Marshall Bros. Sale.

The Stodder-Marshall Bros. sale which took place at Burden, Kan., November 24th, was well attended by local breeders and bids by mail were much in evidence. Messrs. M. O. Ruthrauff & Son, of South Haven, Kan., topped the sale, paying \$75 for a son of Mc's Pride. The sale was a success in every way, forty-seven head bringing the neat sum of \$1,433, which made an average of \$32.81 per head. Col. John D. Snyder and others conducted the sale in a very satisfactory manner. Below will be found a list of sales which brought \$35 or more:

Lot.	Price.
42. M. O. Ruthrauff & Son South Haven, Kan.	\$75
24. L. C. Dressell, Eatonville, Kan.	65
40. H. H. Hague, Walton, Kan.	53

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

CONCLUSIONS ON SILAGE TAINED MILK.

That milk from silage-fed cows possesses a flavor and odor distinct from other milk is a generally conceded fact. The impression of sweetness to the taste and smell is characteristic. On account of the supposed impurity of such milk by misinformed consumers, dairymen have been put to much unnecessary inconvenience and loss. The stand generally taken by sensible people has been that while sound, well-preserved silage may taint milk, it cannot contribute to the impurity of the product. Experiments at a number of leading stations now confirm this statement.

As with turnip, cabbage and other strongly flavored foods, silage should be fed after milking. Only when fed just prior does the milk have the pronounced characteristic flavor. While it seemed to be the general opinion that there was a more pronounced flavor to milk from silage-fed cows, the impression to the taste is not at all objectionable. In Illinois 372 persons were given a sample each of silage-made milk and that produced from grain and hays. Sixty per cent favored the former article and 29 per cent the latter, while 11 per cent had no choice. While we are not positive, we suspect that these persons were selected from the college population and were fully as particular in their tastes as the patrons of any milk route. City experts have been subjected to a similar test and results were practically the same. The influence on the butter seems to be that of giving a higher and better flavor.

Formerly it was thought by some that the taint from silage found its way into the milk from the atmosphere pregnant with the odor of the silo ferment, rather than through the cow. But milk placed in the silo with everything favorable for the reception of odors, and milk with the air of the silo forced through it, was found to have received in both cases practically no taint, as compared to that tainted from the cow.

The favorable conclusion of these tests must not, however, make the dairyman careless about the feeding of silage and the exposure of milk to silo odors. There is always the possibility of bad odors and badly fermented silage. Milk produced from such a product should be as objectionable as that produced from moldy or otherwise damaged feeds. The difficulty in the use of such feeds is further increased by the impossibility of avoiding the flavor in butter or other products made from such milk. Thorough-going dairymen have found these results in accord with their experience.

and consumers will we hope soon know the fallacy of their discrimination.

Practical Knowledge of Bacteriology.

To the Editor of The Homestead:

The word bacteria has been so badly abused and misrepresented that it has become almost a by-word and a farce with some people who never saw them under a microscope. The fact of their existence, however, comes home to us very directly when we stop to consider the changes which they produce in milk and matter existing immediately about us.

Wherever we find heat, moisture and food in the proper proportions; such as in milk at 90 degrees F., ensilage, hay, grain, or manure which is heating we notice decay or degeneration taking place, although we do not always consider that it is nothing more than the work of these micro-organisms.

The effect may be checked in milk by cooling to a low temperature. The same is true in each of the other cases. Cooling in some instances may consist of allowing more air for ventilation and in some cases the application of ice. However, it is merely controlling the growth of the bacteria present.

We can control the bacteria in the first place by creating cleanly conditions, for they exist principally in dirt and filth. In the cow stable by eliminating as many of the shelves as possible where dust may collect or by removing all unnecessary piles of rubbish where the same occurs; by allowing pure air to circulate and by carefully grooming cows whose hides are a veritable nest for bacterial growth. In the dairy we construct smooth walls with rounded corners to leave no place for dust to collect. All dairy utensils, cream separators and strainer cloths are carefully washed and sterilized each time after using.

Filters used for water are often found to be a great source of contamination if not frequently cleaned. In our houses we should discard plush furniture as much as possible and buy only plain wood or leather covered furniture which does not collect and hold dust and germs. The flies which spend much of their time on decaying rubbish leave hundreds of putrefying bacteria in their tracks whether they light on victuals on the table or on one's face, and they are not very particular on which place they alight.

Pet animals, such as cats and dogs, like cows, are covered with bacteria and our children are too often allowed to play with them. Frequently these animals spend a part of the night eating some dead carcass and in this way may carry innumerable disease germs directly into the home.

The barber who does not dip his razor in boiling water each time after shaving a customer may inoculate a great many men with any skin disease with which his razor comes in contact. Barbers' itch, caused by the mold and many other diseases are spread in this way. Similarly a dentist may, through lack of proper precaution, distribute most of the diseases known to man, although as a rule they are more sanitary than barbers. It is claimed by competent authorities that 90 per cent of baldness is due to the use of improperly cleaned razors, brushes and combs in the barber shops.

Such instances as these should open the eyes of people who laugh whenever the term bacterial infection is spoken of. There is no need, however, of living in constant fear of bacterial contamination for we breathe them every minute, but it is necessary to avoid unsanitary conditions and to keep our bodies in a healthy condition so that they may be able to throw off the effect of undesirable contamination.

C. W. Melick.

The Week in Kansas.

To the Editor of The Homestead:

In time to make everything pleasant and lovely for a day of Thanksgiving, the weather has again flopped into the usual old-time Kansas style. The snow has gone, the sun once more shines, and were it not for the benefit the moisture was to the wheat and the damage it was to the roads, the unusual snow storm of last week would be a forgotten incident.

As if to please the old guard of weather prophets, who are always predicting that "this snow will go off with a rain," the snow of last week did go off with a rain. All day Sunday there was little

A FARMERS' COMMITTEE SAYS
TUBULAR IS WORLD'S BEST
CREAM SEPARATOR

Low Can
Lightest Bowl
Simplest Bowl
QUICKEST CLEANED

The Tubular

Self Oiling
Ball Bearing
Enclosed Gears
CLEANEST SKIMMER

A community of farmers and dairymen recently united and appointed a committee of six wide awake farmers to thoroughly investigate cream separators and decide which is best.

Why? Simply because they were convinced that cream separators pay, and wanted to know the best before buying. The committee requested all leading separator representatives to meet the committee and show their machines.

Why did they do that? Because the committee wanted to find out positively which separator actually is best. They didn't want to take anybody's word for it, but wanted to see all reliable separators side by side and decide for themselves.

When that committee met, many farmers were present waiting the decision. The committee carefully examined the different separators, and unanimously decided that the Sharples Tubular Cream Separator is best, excelling all others in fifteen essential points.

The members of the committee backed up their decision by buying for themselves six No. 6 Sharples Tubular Cream Separators right on the spot—one Tubular for each farmer on the committee.

What did that mean? That this investigation had absolutely satisfied the committee that the Sharples Tubular is the best cream separator built—the best in every way. If you buy a Sharples Tubular, you will get the world's best separator.

It is to your advantage to learn all about this committee—its decision—and the world's best separator. Write for our handsome, complete catalog C 121, with leaflet and the committee's sworn statement telling all about it.

Get More Milk Money

Your profits from your cows, your comfort and convenience depend upon the kind of Cream Separator you use. We want to prove to you that the

OMEGA CREAM SEPARATOR

will make more money for you and give you less trouble than any other. You surely are anxious to make no mistake in buying a separator—why not investigate our claims and make us prove them? That's all we ask. Send today for book "More Milk Money," and our Golden Rule Guaranty.

Omega Separator Co., 35 Concord Street, Lansing, Mich.

time when it was not raining. The way the dry ground soaked up the water that fell, though, was the surprise of Monday morning. Sunday evening was cloudy and rainy, with water covering all the surface; Monday morning was bright and clear, with the water almost disappeared. This is the way of a weather change in Kansas.

While it was storming, and all outside was gloomy and disagreeable, the daily newspaper told of stock suffering and great hardship to the farmers; when the sun came out bright and with its old-time warmth, the very editors that wrote of suffering and damage sang praises to the storm to the tune of a big wheat crop assured, and the soil going into the winter in fine shape. Thus we see even the heart of the editor of a daily newspaper is affected by the rays of Kansas' sun.

Corn husking was commenced again yesterday and will be stopped tomorrow only long enough to partake of a dinner such as can only be put together by a woman of Kansas, in celebration of the day of Thanksgiving. And what have we to be thankful for? For all that we have, the greatest of which is Kansas. With a crop that has proven a money maker; with health that is brought by the sun and wind of a healthy state; with a people for neighbors that cannot be equalled in all this wide, wide world, what is there we cannot be thankful for?

With the few who are through husking helping the men who still have corn to husk, the work will be rushed from now on, if the weather continues favorable, as it looks, this, the day before Thanksgiving. Little corn is going to market, partly on account of the roads, which are now a little heavy, and partly because of a scarcity of cars to ship what has already been hauled in. Some feeders have been paying as high as thirty-three to thirty-five cents, and all agree that spring will see corn higher in price than it now is.

Henry Hatch.

Coffey Co., Kan., Nov. 28, 1906.

Better Than Ever

No matter what separator you are now using—No matter what separator you are thinking of buying—No matter how you now handle your milk—you ought to examine the

Improved Frictionless
EMPIRE
Cream Separator

It won't take you long to see its good points—and it's worth a whole lot to you in good hard money to find the separator that turns easier, is more simple in construction and does better work than any other. All we ask is that you investigate. Send today for catalog and valuable dairy books. Empire Cream Separator Co., Bloomfield, N.J.—Chicago, Ill.

A Cream Separator
Without Cost

That is What We Offer You in the

Iowa Dairy
Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

DAY BY DAY

Agricola

Sunshine is a germicide, say the scientists. Agricola knows of no more practical way to get the benefits of sunshine for cows in milk than to have barn windows so arranged that the sunshine will fall full upon their backs. Then see that they have dry bedding in abundance, and that the bedding is clean as well as dry, and you are well to the head of the class in sanitary proficiency. It is something that the cows appreciate, and something to which they will respond at milking time, and disease is ward off at the same time. When the days are cold but clear the cows are bathed in warm sunlight, and it is an invigorating bath.

Not only do cows need sunshine, but all young animals need it. No calf or pig deprived of sunshine can be thrifty. This is doubtless one cause of the great mortality among early spring pigs—at least it was in this locality. The days were dark and overcast, and a pig in sunless quarters is easily persuaded to die young.

Chicago commission firms sent circulars to farmers just before Thanksgiving urging them to ship all the poultry they could, as the price would be high. The response was so great that the local dealers grew timid and cut prices and still had more poultry offered than they desired, fearing that there would be so decided a glut that they would lose money even at the reduced buying price. It makes no difference to speak of to the city commission men, for they get their percentage just the same, which is less on each "bird," but there are so many more of them that they do good business. Well, it gave the poorer class the opportunity to have a feast and be thankful, and that is all right.

I know a boy who grew up and landed in the state insane asylum. He was later returned to the county as incurable, and kept in the county asylum, proving to be the most degenerate and troublesome to manage of any there. The cause was ascribed to devouring yellow ten-cent novels which fired the baser passions and dwarfed the nobler, unbalancing his reason. This is one marked case. There are scores of others less pronounced, but all of them teaching the same lesson—what a man grows to be depends much upon his daily food, mental and material.

"As the twig is bent, the tree is inclined," is an old saying which is ever new. "Bring up a boy in the way he should go, etc." is still older, and it is as pregnant with wisdom as it was centuries before the Christian era.

Why does Agricola recall this matter to the attention of the thousands who read this journal? Because the long winter evenings are here, and because winter is the seed time for spiritual affairs. Now is the time to select the reading matter for the year. Not only

Are you tired of trying to make a high-priced farm pay?

Isn't it a pretty hard job to make a good living on a small farm? If you could get the adjoining 80 acres you could do better. But what about the cost? Wouldn't it take a good deal of money to buy enough land to really make a good living where land is so high? Wouldn't it be a good deal better to

Go to the Southwest and get a big farm?

You can get anywhere from 10 to 20 acres in the Southwest for the price of one acre in your state. And you never saw better land. 30 bushels of wheat to the acre is the average yield, 50 bushels of corn and 90 bushels of oats are the regular thing.

Perhaps you haven't thought of it—but the Southwestern farmer has all the best of you. His crops are as big as yours—or bigger. His land cost only a fraction of what yours cost. He has as good markets as you have—or better. He gets better prices for all he raises. He has fine schools and churches. He enjoys a fine climate and is healthier than farmers most anywhere else. You can't induce him to return to his native state. He is too well pleased where he is.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines
1413 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

does the family need good agricultural papers, but it needs good journals of general nature, good magazines, good books, and now is the best time to select them. Every local paper has clubbing lists, of which it gives the full benefit to its patrons, and money is saved and all trouble and risk by consulting local publishers. But talk with the mother and the children before ordering. An unread book or neglected paper is of no value, and those which are read in their stead may be harmful. There are useful publications which are also interesting.

I have a friend who is a nurseryman, as well as farmer. How he manages to protect his young fruit trees from rabbits is what puzzled me. But he made the matter plain. He has a rabbit-tight fence, although not entirely enclosing his grounds, but when a rabbit gets in, the dog drives him to the tight fence and that rabbit makes no more trouble.

The interstate pure food law now in effect forbids offering for shipment any veal carcass less than three weeks old. Nor can the farmer ship it then until he has made out a certificate in duplicate certifying that he is a farmer and that he killed and dressed the animal himself and that it is healthy and fit for food. This is in accord with modern civilized sentiment. Who wants to be fed upon immature animal food—that so near birth as to lack the individuality of the flesh characteristic of the animal? Thousands and tens of thousands of veal calves of the tender age of three days have been shipped to Chicago from this vicinity, and our city cousins ate them and thought the flesh tender and sweet. Where ignorance is bliss the government steps in to protect the ignorant from their mistakes of appetite.

But there is no effort made to protect the lovers of "quail on toast" from having new-born chickens palmed off on

them for quails. And how much depends upon our inherited tastes! We sell the egg itself—yes, we eat it, and call it good. But should we stop to reflect we should be forced to the conclusion that we are not in all matters really consistent.

Most of the farmers finished husking while the weather was fine, and the cattle have reveled in the delights of the stalk fields ever since. On the other hand, some farmers have been unable to secure the necessary help and have felt that plowing must be done while the ground is not frozen, and corn can be husked afterwards, and they are behind with the husking. Enough has been picked from day to day to keep the pigs eating, and that is about all. And those who shred have been delayed by snow and rain. Shredded fodder must go into the mow dry or it will spoil. Better weather than usual, and worse than usual, have alternated. Husking with the ground covered with mushy snow is no picnic.

In the discussion whether the corn binder pays—whether it is really economical to cut corn with it instead of using the twenty-cent hand knife of the daddies, the condition of the labor market is a determining factor. Had Agricola been obliged to cut by hand this fall or let it stand uncut, it would have stood until it fell down. Take sweet corn, the ears of which have been sent to the factory, and each alternate row is a "down row" after the ears are gathered, what kind of work could hand cutters do, even if they could be procured? But every last one of the otherwise unemployed had a job in the factory—man, woman or child.

And then there is the fodder corn—that which is drilled in thick, especially for fodder, and no ears on it except nubbins. The nubbins are not knocked off by the machine, and it cuts and binds

the heavy drill row as fast as three horses walk, but the one who tried to cover much ground by hand would have to hump himself and then make slow progress, and then the fodder corn would be loose and unwieldy to handle.

There is more attention paid here to improved breeds of swine than to improved breeds of cattle. It seems to be easier to get into good stock, do not have to wait so long for breeders to come to breeding age, and a litter or two a year of several to the litter soon fills the pens and pastures, and brings in the cash from sales. And then, the different breeds are not so much at variance with swine as with cattle. There is no "dual-purpose" muddle, and no beef breed nor butter breed to discuss. It is simply a question of bone and muscle and vitality, and you can take your choice as to color with the same ideal in mind as to form and constitution, with the rare exception of the few who are insistent upon the "bacon type."

SPECIAL RATES.

On Saturdays and Sundays from December 16th and January 5th to March 31st the Chicago Great Western Railway will sell winter visitors week end tickets to points 150 miles distant up to and including all stations within fifty miles of St. Paul and Chicago at rate of one fare plus \$2 for the round trip. Tickets limited to seven days, with privilege of extension on payment of one-third of regular one-way rate. Short-limit tickets to nearly all stations on sale at all stations Saturdays and Sundays at one fare for the round trip. Tell your friends about it and have them come and visit you. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

NOTICE.

When you write your friends in North Dakota advise them about the low-rate tickets on sale now for home visitors to Iowa points—one and one-third for the round trip. Don't forget to tell them that the Chicago Great Western Railway is the only line which has three trains every day in the year between St. Paul and Minneapolis and Iowa points. Complete information from E. J. Sawyer, 514 Walnut St., Des Moines, Iowa.

MUSCULAR AILMENTS

The Old-Monk-Cure will straighten out a contracted muscle in a jiffy.

ST. JACOBS OIL

Don't play possum with pain, but tends strictly to business.

Price 25c and 50c

VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENTS.

CANCER.

I have a full-blooded Chester White sow that raised a litter of pigs last spring, and after weaning pigs her bag became swollen and would break and matter at intervals. It is as large as a gallon pail. Can you tell me of a remedy for this? Would you advise breeding her for another litter?

The condition of the udder is incurable and either cancerous or due to the fungus that causes lumpy jaw in cattle. Do not breed her again. She should be slaughtered.

LAME COLT.

I have a colt seven months old that seems crippled in its hind parts. It was all right when it was foaled, but about a month afterwards it got to rubbing its back under a hay rack, and rubbed all the hair off, and it was not long until it became crippled. It has a good appetite. Can you tell me anything to do for it?

We are quite unable to say what is the matter with the colt as an examination would be necessary to determine the cause of the trouble. All we can suggest is that you keep the colt in a roomy box stall and feed it generously.

LAMENESS.

Please advise me what to do for my four-year-old filly. She is lame in her right fore shoulder and shows sweeney. When she trots or runs she carries her foot. When she walks she places one fore foot right ahead of the other. She has been this way for about three weeks.

We are not at all sure that the shoulder is the seat of the lameness. It may well be located in the foot, from your description. If a thorough search of the foot proves that it is sound, remove hair from shoulder and blister with cerate of cantharides. It would, however, be much better to have an examination made by an expert.

ABORTION.

I have had bad luck with my cows losing their calves. Have lost thirteen calves. Is carbolic acid good for this trouble, and if so, how much should the cows be given?

Mix two pounds of pure carbolic acid with one hundred pounds of barrel salt and allow cattle free access to it all of the time. We fear, however, that this will not rid the herd of abortion and the treatment by use of antiseptics on cows and bulls is troublesome and requires to be continued a year and a half or more. If the cattle are common natives better market them and start over anew after thoroughly cleansing, disinfecting and whitewashing the stables.

LOCOMOTOR ATAXIA.

We have a bay yearling gelding which seems to have lost the use of all four legs. He can stand up, but when he goes to walk he just wobbles all over. He has been running in good pasture and stalk field. He is in good flesh, eats well and drinks well. Can you tell me what is wrong with him?

We can give you little promise that the gelding will recover, as there is some serious condition of brain or spinal cord causing the staggering gait. Feed light rations and give him half a dram of fluid extract of nux vomica three times a day, gradually increasing the dose until you notice involuntary twitching of the muscles, at which stage go back to first dose and repeat if necessary. If nux does no good try effects of a dram

of iodid of potash in water twice daily for periods of one week at a time.

FOUNDER.

I have a six-months-old colt that has gone lame in the front feet or shoulders—I think feet. She stands or walks with feet as far out in front as possible, with joints straight, but can bend them if you make her. She has been in that condition for six weeks. She has a good appetite. I have done nothing except to clean out feet, as I do not know what is the matter. Neither colt nor mare has had any chance to get foundered that I know of.

The symptoms point unmistakably to founder, but we have never seen the trouble in so young a colt. Still it would be well to blister the coronets in the usual way after removal of hair. Cerate of cantharides well rubbed in will be sufficiently strong for the purpose. Also give internally fifteen grains of iodid of potash twice daily in water for a week.

THUMPS.

I have twenty-five shoats that will weigh ninety to 150 pounds. About three weeks ago one took sick and now six more are sick. They breathe like a heavy horse, only faster. They have no appetite and just lie around. I have been feeding corn with middling shorts. I put a small handful of salt in slop every day, give turpentine occasionally, and have a box of salt and ashes they run to all the time. Please answer through the columns of your paper.

Stop all grain food and substitute a light slop of milk, middlings and dried blood meal or tankage and in it mix lime water freely. Physic the pigs with epsom salts in slop. Make them run out doors as much as possible for exercise. Bad cases cannot be saved. Distress may be relieved by giving alternate doses of tinctures of opium and digitalis every four hours following the physic. The dose ten to fifteen drops of each medicine.

SICK HOGS.

I am feeding sixty-three head of hogs. Fifty-nine of them are spring and summer shoats. Have been feeding these ever since corn was fit to feed. Am stopping them heavily with mill feed, oil meal, stock food, with once in a while a little turpentine in the slop. The shoats all have a cough. Two of them, which will weigh 125 pounds, have had their ears dry up and come off as if they were frozen. The hair from the ears back on the shoulders has come off. They are all looking well and in good condition. Can you tell me what is the matter with them? A week ago I fed and stopped them in the morning and did not see anything wrong with them, and about 4 o'clock in the evening I found one of them dead. This one would weigh 150 pounds. Kindly give me any information you can in regard to them.

Read answer under head of "Cough." Hogs are being fed too heavily; also the stock feed is quite unnecessary and should not be given. For a time put the hogs on very light rations, not including corn, and let them run out doors as much as possible. Give them the turpentine treatment so often prescribed here.

DEHORNING.

(1) Please publish in your paper how to prevent horns growing on calves. (2) Does it do any harm to cut off cows' horns? I have a cow that will calve next month. Would it bother her to cut off her horns now? Do cows do better with horns off? (3) I have a cow that calved last September. The calf never sucked her, but since I have tied her up she will start to draw up her milk and bump her back as soon as we begin to milk her. I don't get all the milk. Can you tell me anything to do?

(1) Horns may be stopped from coming in by wetting over horn button and then rubbing in caustic potash until a crust is formed. This must be done just as soon as horn button can be felt. (2) Do not dehorn her before she calves. Dehorning is unnecessary unless cow is vicious or a number of cows or other cattle are to be fed at a trough or shipped in cars. (3) Foment her udder with hot water before milking and then rub in a little lard. If you find that udder is sore, rub with belladonna ointment after each fomentation.

OEDEMA.

Please advise me what to do for my six-months-old colt. About three weeks ago he became dull and languid; appetite poor. About a week ago, when on pasture, a cold rain came up and when taken in he was quite chilled. That night his throat swelled up, but it went down the next day. Have kept him up since then. Two days ago turned him out for two or three hours' exercise in the field, it being a mild day. That evening his throat and under the jaws was badly swollen. His sheath was also swollen. Swelling went down from throat next day, but sheath and body forward from it is swelling. Appetite is better now than for some time. Does not seem to have had any fever at any time.

The swelling is dropsical and probably indicates bloodlessness most likely due to worms. The blood worm is the worst for causing this condition. Feed the colt generously on oats and bran along with best of hay and allow him free access to a box containing a mixture of four parts barrel salt, two parts flowers of

sulphur, one part ground gentian root and half a part of dried sulphate of iron. Rub his throat with druggist's soap liniment four ounces; turpentine and aqua ammonia of each one ounce; water to make one pint. We advise the latter treatment as it is just possible that he is coming down with strangles.

SWOLLEN JOINTS, ETC.

(1) I have a four-year-old bay gelding that has a swollen hock which was kicked last spring, as I understand, but am of the opinion it is caused from a sprain. He is a little crooked behind and curbed a little in same leg, but has no pulls and is not lame. When driven it goes down a great deal, but at night it swells badly. The joint below also swells. Please prescribe treatment. (2) A neighbor of mine has a mare that got her hip knocked down about ten years ago, when she was three years old, but the last year her hips are exactly the same. He says the other is knocked down, too. Is he right or has the affected one been replaced? What could be done for a valuable three-year-old having one hip knocked down? Could a skilled veterinarian knock the other down and make them both the same without laming her? (3) I have a four-year-old family mare that has a small ringbone on her left fore foot that was treated about ten months ago, when she was very lame, by putting ringbone paste on it. She now limps but little and steps lightly on same. There is a scar, or thickness of the hide, on the worst place. Would you advise more treatment with the same? I think her foot has been broken in the lower joint, from the shape of it, as it is longer and shaped like a cow's hoof. A veterinary told me he thought it could never be cured without taking a chisel and bursting the growth or bone in two or three places. Would you advise this?

(1) Remove the hair and blister joint with cerate of cantharides at intervals of one month. (2) Nothing can be done when the point of the leum (hip) has been "knocked down." Leave it alone. The proposed operation should not be attempted. (3) The proposed treatment is absurd and would ruin the animal. Don't listen to men who know nothing of anatomy and veterinary science. Repeated blistering would do good, but avoid the scarred place.

COUGH.

Will you please tell me what ails my hogs and what to do for them? I have fifty spring pigs weighing about 150 pounds each and thirty fall pigs two months and a half old and six old sows. These hogs have all had the run of twelve acres of pasture all summer and fall. Did not feed any new corn until about the middle of October, but have had a liberal feed of old corn and slop twice a day, of ground oats one-half, corn one-fourth and middlings one-fourth, and the last week or two a little oil meal. They have had all the salt and ashes they would eat and have fed some coal this fall. They look well and seem to be hearty, but have had a cough for the last month. I fed them for the cough half a gallon of turpentine and six pounds of copperas, but it does not seem to help them. They have never had any more feed than they would eat up clean and squeal for the next feed, and have had good, dry sleeping quarters and plenty of room. I went out to feed them one morning and noticed that one wasn't eating. She lay down and I made her get up. She seemed to breathe hard and jerked her sides like she had the thumps. I made her stir around and she began to cough very hard and tried to vomit, but did not that I could see. She has laid around since then (I put her by herself) and seemed to hump all up and be stiff, and this morning she was dead. They all cough if you start them up quick or when they are playing and running they will all commence coughing.

You should have at once opened the dead hog and made a careful examination for cause of disease. We suspect that lung worms (*strongylus paradoxus*) are present in the air passages of the lungs, but cough often is present in "thump" from overfeeding and lack of exercise. Treat with turpentine again and stop feeding corn dry or in slop.

NO REST NIGHT OR DAY.

With Irritating Skin Humor—Hair Begun to Fall Out—Wonderful Result from Cuticura Remedies.

"About the latter part of July my whole body began to itch. I did not take much notice of it at first, but it began to get worse all the time, and then I began to get uneasy and tried all kinds of baths and other remedies that were recommended for skin humors; but I became worse all the time. My hair began to fall out and my scalp itched all the time. Especially at night, just as soon as I would get in bed and get warm, my whole body would begin to itch and my finger nails would keep it irritated, and it was not long before I could not rest night or day. A friend asked me to try the Cuticura Remedies, and I did, and the first application helped me wonderfully. For about four weeks I would take a hot bath every night and then apply the Cuticura Ointment to my whole body; and I kept getting better, and by the time I used four boxes of Cuticura I was entirely cured, and my hair stopped falling out. D. E. Blankenship, 319 N. Del. St., Indianapolis, Ind. Oct. 27, 1905."

Clean Bones

"Any kind of growth knocks the price of the horse. Usually his services are lost too. 90% of these, including Spavin, Ringbone, Curb and Splint are cured by

Kendall's Spavin Cure
Used Two Years Successfully.

West Hampton Beach, N. Y., June 22, 1904.
Dr. B. J. Kendall Co., Enosburg Falls, Vt.
Gentlemen—Please send me a copy of your "Treatise on the Horse and his Diseases." I have a stable of fine horses and have used your Kendall's Spavin Cure for two years with the very best of results, and cannot speak too highly of it.
Yours truly, John Custer.

Price \$1; 6 for \$5. Greatest known liniment for family use. All druggists sell it. Accept no substitute. The great book "A Treatise on the Horse," free from druggists or

A Large Egg Yield

A hen—any hen—will lay a great number of eggs (some more than others) if conditions and surroundings are such as meet the requirements of her nature. Here is where your part comes in. Give the hen a regular daily portion (a penny's worth is enough for 30 hens) of Dr. Hess Poultry Pan-a-ce-a, and she will do the rest.

DR. HESS POULTRY PAN-A-CE-A

is not a food—it is a tonic, specially prepared to give "tone" to the digestive and reproductive organs, so that the maximum of food, over and above the maintenance ration, is used to make eggs. It has also a property foreign to a so-called poultry food. It is a germicide, that is, it destroys bacteria, the cause of nearly all poultry ailments. Poultry Pan-a-ce-a is the prescription of Dr. Hess (M.D., D.V.S.), is endorsed by the leading poultry associations in United States and Canada, and is sold on a written guarantee.

1½ lbs. 25c, mail or express, 40c.
5 lbs. 80c.
12 lbs. \$1.25.
25 lb. pack, \$2.50.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

WORMS IN TURKEYS.

The following communication has recently been received from one of our subscribers at Belknap, Iowa:

Will you please tell me what to do for worms in turkeys? In their droppings are numerous small white worms and of course they are doing no good. Will oil meal hurt them? Will santonin hurt them and how should it be given? I feed mostly corn, oats and milk.

The infected birds should be yarded for a time to prevent the spread of the worms, and the soil of their yard often sprinkled with slaked lime. Many drugs are recommended to be used against the parasites, such as sulphate of copper, turpentine and santonin. Santonin is deservedly a popular remedy for worms. It is the most reliable anthelmintic known to the medical profession.

Turpentine gives excellent results. It is cheap and not difficult to give. Catch the birds and give about one teaspoonful, following the dose with a teaspoonful of a strong solution of epsom salts. One dose is usually sufficient, but if necessary give a second dose two or three days after the first treatment. Give about two grains of santonin, followed by salts. They should have only soft cooked food while they are ailing.

It would be the means of preventing much sickness among turkeys if they could be kept from wandering over rain-soaked fields and away from swampy land, for their fondness for angle worms seems to be responsible for most of the diseases to which they are subject; that is to say, infectious diseases.

Amount of Food.

To the Editor of The Homestead:

You submit to me the following inquiry received from one of your subscribers:

Where hens are confined in pens and cannot get at other foods, how much grain is required per day to keep, say 100 in good condition so that they will be profitable as layers? The grain that will be used in this case will be corn, wheat and barley. What proportion should be used, and what is the total amount of grain daily that should be given to these 100 hens?

How much to feed is as important as what to feed. The only rule for feeding is the rule of appetite. Keep the appetite good, and to do this is the fine art of feeding. It cannot be taught; it must be learned by practice. Fowls do not eat the same amount of food each day. Those that are laying eat far more than fowls of the same age and breed not laying. Pullets not laying eat more than the same weight of old hens not laying. Some breeds eat more than others, all other conditions being equal. Individuals of the same variety and age differ in their capacity to consume food, therefore hens cannot be fed by rule of weight or measure.

Poultry folks differ in the amount of food to feed each fowl. An ounce of food to each pound weight of each fowl is about the right quantity. One-third of the food consumed by the laying hen is required to repair the waste tissues, one-third goes to waste and one-third to egg production. Liberal feeding is necessary to produce prolific laying. No more food than is consumed with keen relish should be given. We must learn by doing.

A good plan is to give a light feeding of mixed grain early in the morning in litter, to feed at noon a warm, soft mash which will be eaten within a few minutes, and at night to scatter as much mixed grain as they can possibly eat. Hens should go to roost with their crops full. There is as much danger from over-feeding as from underfeeding. The latter error, however, is more common.

B. F. Wilcoxson.

Eating Poisoned Meat.

To the Editor of The Homestead:

In a recent issue of this paper I noticed the account of a subscriber who lost some chickens, as he supposed, from eating the flesh of poisoned animals, and as I remember the editor of the poultry department assured the subscriber that the chickens were not poisoned, but probably had the roup.

Now let me relate an experience of

2/3 SAVED

In money, time and work. The test of time has shown that chicken raisers can pin their faith to the Queen Incubators. No incubator so well made, no incubator can show so great a percentage of hatches as the perfect Queen, no factory so fully equipped for incubator building as ours, no construction so good as in

QUEEN INCUBATORS

The best of materials—selected California redwood, heavy cold-rolled sheet copper tanks, lock-seamed and soldered are indestructible asbestos-lined double walls make the Queen incubator one that can be depended on for sure results. Queen Safety Lamps ARE safe and the automatic heat regulator insures even heat better than you could with constant watching. will save half your feed bills and double egg yield. Guaranteed to cut more bone, in less time, with less labor, than any other. Send for Special Trial Offer and handsome catalogue.
HUMPHREY,
Hame St. Factory, Joliet, Ill.

It is generally brought on by letting the cold wind strike the fowls or by letting them roost in damp houses. Damp weather is a breeder of the disease. With proper care roup can be prevented. It is a difficult disease to cure when it once makes the attack. Begin in time and depend upon the preventive and not the cure.

You have no doubt heard of the man who took a bath once a year, whether he needed it or not. Do not clean your hen house this way. Clean it often. It is worth the trouble just to see the fowls enjoy it. Clean the dropping boards and cover them with ashes. This answers several purposes. The fowls enjoy picking the charcoal from it while it is clean; it helps to remove the next lot of droppings, keeps the boards sweet and clean and helps to keep lice away.

When selecting the young pullets bear in mind that any lack of vigor in them while they are small is evidence that they will not be hardy when fully matured. Hardiness is everything with a

ours along that line: Last summer while I was busy haying I neglected to clean out my horse barn for several days, and when I did clean it out under the manure were thousands of tiny maggots, and in my ignorance I allowed the chickens to eat of these little worms, which some of them did very freely. This was in the morning, and in the evening when I came in from work there were three dead hens and several sick ones around the barn. I was at a loss to know the cause of the trouble, so of course I examined the dead ones and in the crop of every one that died was found a quantity of these maggots. Two hens were all that recovered out of eleven sick ones.

A neighbor informed us that she had had the same experience with her chickens eating maggots in an old rotted straw stack and another time from maggots from a decaying turtle. I don't think the maggot lives in the crop of the fowl to cause the trouble, but rather that it poisons the fowl, as some of ours had fits similar to an animal that has been poisoned, and they were all partially paralyzed and seemed to be blind. I would say that these fowls were healthy up to the time mentioned, and none have been sick since.

Lyon Co., Kan. W. W. Covert.

Give the Poultry Buttermilk.

To the Editor of The Homestead:

It has long been known that buttermilk is one of the best drinks for invalids, and in fact for the average person, but I doubt if very many who are interested in poultry realize its value as a drink or food for poultry. Buttermilk contains about the proper amount of lactic acid necessary to induce perfect digestion. It may also take the place of meat to a great extent.

It keeps the fowls in a laxative condition, and at the same time furnishes considerable valuable, readily digested food. I prefer to give it to them in vessels, but if soft feed is given them, buttermilk may be used instead of water to mix it with. The fowls are very fond of it, and it has proved as valuable for the hens to induce egg-laying as for the chicks which are making flesh, bone, muscle and feathers at one and the same time, and which need a varied diet of the most nourishing foods. It makes the fowls plump and the flesh lighter colored, tender and juicy. As it has proven to be such a great aid to digestion, it is not more than what could be expected that fowls which have access to buttermilk are less subject to cholera or diarrhea, and this has through years of experience proven to be so.

A. F. Sorensen.

Cleanliness is a necessity. Neglect to observe cleanliness will quickly outdo all other work. Clean quarters are as necessary as food and just as essential to health. Fowls cannot breathe bad air continually at night and remain long in health. Unclean surroundings debilitate and render the fowl more subject to disease. Vermin results from filth and neglect to keep the poultry in proper condition. One remarkable fact about the poultry business is that it gives relatively quick returns. Years are required for cows, sheep and horses to grow, and pigs require a considerable length of time. But even if poultry raising is begun by selecting eggs for hatching, the product in the form of broilers, capons or mature fowls should be ready for the market in from six to eight months. It is a business in which women may engage successfully.

The pullets that we expect for winter layers must be kept growing and in good health. We should see that they are not overcrowded. The fall of the year is the worst time for roup.

flock, for if any of the old or young stock cannot pass through the warmer season of the year with perfect freedom from disease, they will not prove profitable as layers next winter. The getting of eggs from a flock during cold weather depends on the selection and management of the pullets in the summer and fall.

When Alonzo Murphy, of Jasper county, Iowa, set his favorite Plymouth Rock hen a few months ago he placed under her a lot of eggs purchased in the village, and which bore evidence of being in cold storage. Mr. Murphy was not at all confident that cold storage eggs could be hatched and he was agreeably surprised when the old hen in due time came off with a brood of seventeen lovely little chicks. The chickens grew rapidly, but it was noticed that no feathers replaced the down on their bodies. A close examination showed that they were covered with fur. It is Mr. Mur-

phy's theory that through a wise and bountiful provision nature adapts all animate beings to their environment. The fur is thick and glossy and of various colors. The absence of feathers prevents these remarkable young fowls from attempting to fly, which Mr. Murphy considers a distinct advantage. In all other respects the chickens are normal. This report is not accompanied by any affidavit. I think the above will answer the question which I receive almost daily, "Will packed eggs hatch?"

Breeding for beauty is all right in its place, but when beauty interferes with utility then it is time to let beauty take second place. There are mongrel hens that lay as many eggs as the most prolific Leghorn, but they cannot be depended upon to transmit the tendency to their progeny. This is where the mongrel fails.

We want better egg records, and we want better carcasses, but it does not seem to have occurred to the average poultryman that it is far easier and better to secure or increase those qualities in the breeds we have, by proper care and mating, than it is to manufacture something new with the desired traits.

It is rather poor economy to cram fifty cents worth of drugs down the throat of a sick chicken that would not be worth over a quarter if it were well.

A quick maturing fowl is desirable as a market fowl and also for home consumption, especially in early spring. Careful selection will aid in this.

Do not undertake to keep too many hens at a time. A few well cared for is better than a large number left to look out for themselves.

POINTERS.

—Buff Cochins are bred exclusively by Mrs. C. Wonderly, of Benedict, Neb. See advertisement on this page.

—Mrs. Nettle Crane, of Blencoe, Iowa, has Single Comb Buff Orpingtons for sale as per her advertisement appearing on this page.

—Mr. O. N. Woody, of Newton, Iowa, has some Plymouth Rocks which he will offer for the next thirty days at bargain prices. His advertisement appears on this page.

—Mr. S. R. Young, of Greenville, Iowa, has Silver Wyandottes from high-scoring stock which he will offer at reduced prices for the next thirty days. His advertisement appears on this page.

—Mr. E. O. Wolcott, of Gilmore City, Iowa, is offering Single Combed Brown Leghorn cockerels that are extra choice for sale in his advertisement which appears on this page of The Homestead.

—The Forest Home Poultry Farm, at Audubon, Iowa, have ten fine two-year-old White Holland turkey toms on which they are quoting price in advertisement on this page. They also announce that they do not have any White Wyandotte stock for sale at present.

—Mr. M. Hummel, of Monroe, Iowa, writes that he has an extra good lot of Barred Plymouth Rocks for sale—450 in number. They have heavy bones and are sired by high-scoring Iowa State Fair and Jasper County Fair first prize winners. Nothing but first-class stock will be shipped.

—Mr. Cyrus H. Whitford, of Iowa Falls, Iowa, is offering Barred Plymouth Rock cockerels for sale in his advertisement on this page. He writes: "These cockerels are large, growthy birds with fine heads and correct markings. They are all strictly farm raised with plenty of range at all times."

—Messrs. C. C. Drake & Son, of La Harpe, Ill., are offering Barred Plymouth Rock cockerels for sale in an advertisement on this page. These cockerels are of the Bradley and Neibert strains and their pens are headed by males direct from these breeders. They are closing out their entire flock of pure-bred Fitchel White Plymouth Rocks and are going to sell them at bargain prices.

—Mr. G. W. Stout, of Rosehill, Iowa, breeds Barred Plymouth Rocks exclusively. His young stock this season, he considers finer than ever before. In his advertisement on this page of The Homestead he reminds our readers that good breeding stock is the cheapest in the long run, no matter what the first cost may be. He is pricing cockerels at \$2 and pullets at \$1 each, if taken in lots of five or more.

—"These cockerels are extra fine," writes Mr. J. L. Barber, of Harlan, Iowa, in sending copy for his Barred Plymouth Rock advertisement which appears on this page. "They are very evenly barred, nice low combs and will be guaranteed to be O. K. or no sale. I wish to close them out at once, and will sell them well worth the money. They are of the Bradley and Latham strains and I never raised a finer lot of cockerels. If looking for first-class stock, write me. They cost you nothing if they are not as I tell you."

—Homestead readers desiring to purchase Barred Plymouth Rock cockerels or Mammoth Bronze turkeys will do well to write Mr. S. V. Latham, of Montezuma, Iowa. Mr. Latham writes: "I have a grand lot of big-boned, well-marked Barred Plymouth Rock cockerels to offer. They are the kind that will be sure to please. I have in the past few days shipped birds to Massachusetts, Mississippi, North Dakota and to several points in Iowa. I also have a fine lot of Mammoth Bronze turkeys for sale, sired by the first-prize tom at Iowa State show. My turkeys have also been first prize winners at the Montezuma and Marshalltown shows. Can mate pairs and trios not akin. I also

have Pekin ducks for sale." Look up his advertisement on this page and write him your wants.

—Mrs. C. Rogers, of Exira, Iowa, has White Wyandotte cockerels for sale and in her advertisement on this page she is quoting a very low price.

—Mr. H. M. McKeen, of Sac City, Iowa, has been a breeder of Black Langshan chickens for the past nine years. He is offering carefully-bred stock for sale in his advertisement that appears on this page.

A SEVEN DOLLAR INCUBATOR. The Belle City Incubator Company, of Racine, Wis., are offering a 120-egg incubator, freight prepaid, for \$7. It has double cases all over and has a copper tank. This same firm offer a 100-chick hot water brooder for \$4.50. Incubator and brooder ordered together will cost you \$11, and satisfaction is guaranteed. A booklet has recently been published entitled "Hatching Facts," and one will be mailed to you without delay if you will address a card to Belle City Incubator Company, Box 52, Racine, Wis. Look up their advertisement on page 12 and please mention The Homestead when you write.

THE IDEAL INCUBATOR. The J. W. Miller Company, of Freeport, Ill., are offering their Ideal 240-egg incubator for \$11.75. The advertisement will be found on this page of this issue. The 120-egg size costs \$9; the 60-egg size, \$7.50. Brooders are correspondingly low in price. The Ideal is not a "cheap" incubator in the ordinarily accepted sense of the term. It is low in price, but the materials in it are of the very best and the workmanship is also of high order. Ask for 128-page booklet entitled "Poultry for Profit," addressing the J. W. Miller Company, Box 305, Freeport, Ill. Mention The Homestead when writing.

VICTOR INCUBATORS. Everyone who keeps hens ought to be interested in the "Autobiography of a Hen" which gives the whole story from the chick in the egg to how to make hens lay. This book is published by the George Ertel Company, of Quincy, Ill., the manufacturers of the Victor incubators. Forty years' experience in making an incubator ought to be a sufficient guarantee to the public that everything in the Victor incubator is right. The Victor has had a good name all this time and it has lived up to it, and that is the reason why there are so many now in use that are giving satisfaction. For further information about the Victor address George Ertel Company, Quincy, Ill. The advertisement of this firm will be found on this page. Mention The Homestead when you write.

WHERE THE HIDES GO. Shoe men use them up in a way that is appalling—the Mayer Shoe Factory of Milwaukee uses 415,612 annually. Steers, cows, calves, goats, horses, sheep and kangaroos contribute to one of the greatest industries on earth.

In the mad whirl of business, people rarely pause long enough to consider the little things of life and how closely they are identified with the greater ones—how inseparable, in fact they are, from and how essential to them. Take for instance the shoe business—did ever anyone ponder long enough to realize the wealth of actual energy and animal life expended in the production of footwear for the human race.

As an example, take the Mayer Boot & Shoe Co., a Milwaukee concern that in its 300 working days has consumed no less than 415,612 hides of all kinds during the past twelve months.

Here then we have the hides of 60,298 steers, 31,163 cows, 55,704 calves, 196,846 goats, 67,599 sheep, 2,523 horses and 1,479 kangaroos, all consumed and distributed by the great Mayer factory within the period of a year. Stand these animals in a straight line and they would cover a distance of 351 miles, nearly one-sixtieth of the earth's circumference.

To bring this live stock to its final point of destination, required no less than 3,000 twenty-six foot cars, which strung together would cover over fifteen miles of railroad track. It takes the hides of nearly 1,500 animals daily to supply the demands of this monster shoe enterprise and were all of them spread out at one time, it would require an area of over 5,000,000 square feet to accommodate them.

Nearly 1,000 skilled artisans are employed by the Mayer Company the year round making the Honorbilt shoe for men, Western Lady for women, and the celebrated Martha Washington comfort shoes; also school shoes that wear like iron and work shoes for all classes and purposes. The total capacity of the Mayer factory is 6,000 pairs of shoes a day. The equipment of this factory is as thoroughly modern and up to date as money and experience can make it. Another decidedly favorable feature is that of location, which is in the greatest leather market in the world, thus enabling the company to secure first choice on products consumed. The

Will You Just Try This Water-tight RUBBERHIDE BOOT?

Made of purest rubber and best sole leather—sewed not pegged—absolutely water-tight and snag-proof—can be resoled—your money back if they do not outwear two pairs of the best quality rubber boots of other makes. If you work in the wet, you want a boot that will keep your feet perfectly dry—and at the same time not to go to pieces in a few weeks time. Well, here it is:

The Rubberhide Boot

Made of the purest rubber, with heavy leather outsole, and leather innersole, with a rubber welt and middle sole, all joined together (without pegs or nails), and joined to the upper so securely, that a team of horses can't pull them apart.

And not a drop of water can find its way in. The heavy leather sole does not cut or snag when you step on a nail or a sharp stick.

It protects your feet from stones and rough surfaces.

It conforms to the shape of your foot, and

It can be easily resoled—any cobbler can "tap" or half-sole the Rubberhide. The uppers are so good that they will outwear two or three pairs of soles.

Outwears Two Pairs

The inner sole of leather prevents excessive perspiration which makes the ordinary rubber boots such a nuisance.

The Rubberhide is the only absolutely water-tight boot made;

It will last longer than two or three pairs of rubber boots;

It will keep your feet comfortable all the time.

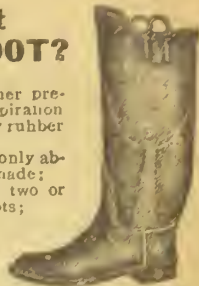

Will You Try a Pair?

If your dealer handles the Rubberhide he will sell them to you on a positive guaranty that they will outwear two pairs of even best quality rubber boots of other makes. If they do not, he will refund every cent you paid for them.

If he does not, send us direct (giving dealer's name) and we will send you a pair with the same money-back guaranty. We pay the express charges.

Write for our Catalogue and Price List.

RUBBERHIDE CO.,

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

A wire screen corn popper that should answer the purpose of such a utensil very well is made with a yard of unpainted wire screening. Double the piece over and sew up the sides and part of one end with wire. Leave an opening to insert and empty the corn. The large surface presented to the stove makes quick work of popping.

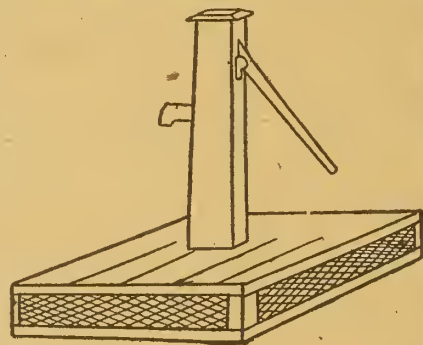

Of the many devices that should be acceptable to a farmer are those which eliminate heavy lifting. Perhaps one of the most dreaded jobs is the killing of a beef. The carcass is most difficult to handle unless some kind of a derrier is provided. But much simpler is the following idea and it has been in use for generations: A pole three or four inches in diameter is thrust through the hook.

Two ropes are hung from above, as shown and should reach the ground on each side of the hind quarter. Into each loop is inserted a twisting stick and with a man to each, the process of elevating the beef is begun by winding up the ropes on the pole. When the desired height is attained the ends of the winding levers are tied to the rope from above.

Those who remember how pure the water used to taste when it was drawn up from the old open stone walled well will welcome any plan of improving our present wells. The sweet satisfying taste which it possessed is not now very characteristic of much of the farm well water. The fact is that people, as a rule, are very careless nowadays about the source of drinking water. Wooden curbing, absolutely no ventilation in many cases and poor soils for the purification of water have brought about the change. A farmer who believes that plenty of pure air in the well will aid

much in the purity of the water gave us the following plan: The frame for the support of the platform is made of 2x4's, allowing a space of four to six inches between the top and bottom parts of the sides. This space is covered on

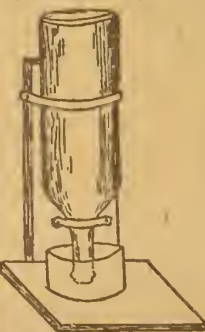

the inside with two screens. The first is a large mesh to keep out large vermin. Over this is a fly screen to keep out dirt, insects, etc. The well never becomes foul. In winter the platform is covered with straw and snow.

It is quite an art to cut up a beef so that the pieces will present the best appearance and be of the proper size for roasting. Still it is not a difficult job when one knows how. One of our good subscribers sends us a method which has been found to be simple and practical.

The dotted lines in the sketch indicate the place to cut. After the beef is halved make the following cuts in order as given: From A to B leaving one rib on hind quarter. Take out kidney and suet and remove flank meat by cut C D. Follow by E C, then C F which cuts off the leg. If the round is to be divided cut H G. Now on the forequarter cut D N, cut off neck by N L. The other cuts which follow will leave the ribs in nice pieces for roasting after being cut crosswise in three places so that the roast may be rolled.

Not long ago we saw a device for watering poultry which is certainly very simple and practical. Take an ordinary beer bottle and attach it to an upright board by means of leather bands,

as shown in the drawing. Fill the bottle with water and stand it bottom end upwards, placing the mouth of the bottle about one-half inch from the bottom of a pint tin or a half tomato can. The water fills the tin till it is within an inch of the top. It never overflows but as fast as the chicks drink out the water it refills from the bottle. By making a stand out of two boards, as shown in the drawing, the bottle can

LITTLE STAR Grain and Seed Cleaner

A money-maker for the farm. Increases yield of every acre 5 to 15 bushels. Pays for itself every year with every 20 acres tilled. Has 7 complete riddles, 4 double wire screens, 11 in all, and does the grain and seed work for a 160 acre farm perfectly. Has double the screen surface of any machine of its kind. Separates, cleans and grades all kinds of seed, performs all three processes at once and will perfectly clean, separate and grade any four similar seeds at the same time no matter what proportion the mixture. The cheapest, most efficient grader made. Our "Corn Grader" screens No. 8 and 9 provide an absolutely even "drop" from the "Corn Planter," edge drop or otherwise. You are sure of the exact number of grains in a hill. Removes all weeds and noxious seeds including thistles. No shifting riddles nor change of adjustment. Does work of three machines, sells for the price of one. Price complete, freight paid, \$19.98. Order today. Every machine guaranteed.

Hall Grain Grader Co., 224 Locust St., Winfield, Ia.

be filled by turning the stand with the bottom side upwards, which places the bottle with the mouth upward. Then place the tin over the mouth of the bottle and invert the stand. In this way the bottle can be filled without spilling any water around where the stand sets.

Delmar McCann's Sale.

The first annual Short-horn sale of Mr. Delmar McCann was held at his farm near Kennard, Neb., on November 27th, and the forty-two head sold at an average of \$100. Imp. Flora, a seven-year-old cow, topped the sale at \$220 and went to Mr. Alec Calder, of Fremont, Neb. Mr. Calder also secured some of the other good bargains in the sale. Caroline of Ploverdale 2d, a daughter of Baron Lavender, and out of an Imp. True Briton dam, sold for \$200 and was purchased by Messrs. H. H. Hess & Son, of Surprise, Neb. The yearling Scotch bull, Brawith Lad, topped the bull offering at \$185. Below we list those selling for \$100 and over. Colonel Bellows cried the sale and was well received by the people who came out to hear him, it being his first sale at this point.

The Chas. Neff Sale.

One of the best crowds of the fall season, both of breeders and farmers, was in attendance at the sale of Mr. Chas. Neff, of Walnut, Iowa, on November 26th. The cattle were presented in nice condition and an average of \$100 was made on the entire offering. The herd bull, Captain Lovely, a five-year-old son of Imp. Scotchman, sold for \$225 to Mr. H. S. Giltner, of Griswold, Iowa, and was one of the bargains of the sale. Mr. Neff showed as good a bunch of heifers sired by this bull as has gone through a sale ring in a long time. Rosamond of Ashburn, the seven-year-old Scotch cow, brought \$200, and was purchased by Mr. Perry Woods, of Marne, Iowa, and her daughter, Rosamond Lovely, sold for \$155 and went to Mr. H. M. Baker, of Atlantic, Iowa. Esther Cumberland, the six-year-old daughter of Cumberland, went to Mr. G. H. Oshorn, of Council

I Am Perfectly Cured

This is the testimony of thousands who have consulted us. If you are weak or "diseased" due to habits, excesses or over work and are discouraged and despondent, don't give up, but instead consult us and be cured. Twenty years of successful practice in Des Moines guarantees you honest, skillful and up-to-date service. Our cures are quick, safe and permanent. What we have done for others we can do for you.

**WE CURE
ALL MEN'S
DISEASES**

Our reputation and name is too favorably known to make promises we cannot fulfill. We effect life long cures in NERVOUS DEBILITY or LOST VITALITY, whether due to habits, excesses or overwork. VITAL WEAKNESS, VARICOSE or ENLARGED VEINS, RUPTURE, BLOOD POISON, SKIN DISEASES, PROSTATE, STRICTURE, URETHRAL, KIDNEY and BLADDER diseases cured to stay cured. COME AND SEE US AND RECEIVE OUR LEGAL GUARANTEE TO CURE OR NO PAY. Reference, any bank or newspaper in Des Moines. Examination free. Write for free book if you cannot call.

Drs. Fellows & Fellows Co.
323 W. Walnut St. Des Moines, Ia.

Bluffs, Iowa, at \$150, and she was a bargain at that price. She was the best individual in the sale, but showed a little nervousness when brought into the ring, and therefore did not bring what she was worth. Col. Geo. P. Bellows presided on the box and handled the sale with credit to himself and the seller. Below is a list of those selling for \$100 and over:

COWS.

Rosamond of Ashburn, seven years, Perry Woods, Marne, Iowa.	\$200.00
Tidy Girl 2d, twelve years, Henry Mutunn, Walnut, Iowa.	100.00

**One Movement
of the Foot**
Lifted the Plow
and Men, and
Leveled the
Frame

A Marvelous Plow

The J. I. Case Self-Leveling High Foot-lift, Sulky Plow, is a marvel in more ways than one. For instance, the operator with greatest ease can put the plow six inches under ground or lift it six inches above ground, and with the same operation level the frame. Two results with one operation. To do this with other foot-lift or hand-lift sulky plows it is necessary to handle an extra lever placed there especially for that purpose. This single lever feature is original with J. I. Case Plows and is a great labor saver. But the best feature ever placed on any sulky plow, is the adjustment in the J. I. Case Self-Leveling High Foot-lift Sulky for raising and lowering the heel. It is one of the reasons why J. I.

C. plows are so light draft, because it enables the operator to set the plow so all friction is removed from the underside of the landside and the share except right at the point. And it enables him to set the plow so it will enter and plow hard ground where sulky plows without this adjustment cannot be made to plow. Don't be fooled by dealers who do not handle J. I. Case Plows, claiming that "my plow is set right at the factory." It may be, but in a very short time the suction is worn out of the share. This is when you will need the J. I. Case heel adjustment. Other important advantages are: The bottom enters the ground point down, heel up and starts plowing at once. It comes out point up, heel down.

Write for free catalogue which fully describes this marvelous plow.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Rhubarb.

To the Editor of The Homestead:

Late fall is the best time to plant rhubarb. It is very easily transplanted and one old clump will generally make about six new ones. Dig up the old clump and with a sharp knife or spade divide it according to its size and the number of strong perfect eyes. These eyes are easily recognized. One strong eye to the hill is enough, though if you have plenty of old roots, a larger clump will produce more and stronger stalks the next spring. Set them in holes as large as you have the time and energy to dig, and fill with half earth and half well-rotted manure. Place the roots about three inches below the surface, after the dirt has been tramped down solidly, and then mulch them with a big forkful of manure. This will protect them through the winter and bring them up early in the spring.

Rhubarb should be more extensively raised. Its culture is very simple and it always yields abundantly when given a good rich soil. A half-dozen hills will provide a family supply. But it should be reset every three or four years to keep it vigorous and healthy.

Rhubarb is quite a profitable crop where there is a market for it. Scarcely anything will yield a larger profit according to the space occupied. I have five rows 100 yards long that occupy about one-ninth of an acre. For the last two seasons these rows have yielded about \$45 worth of stalks besides the family supply, and had there been a demand for it at least three times this amount of stalks could have been pulled. Yet what was sold yielded at the

rate of \$400 per acre. One or two cultivations in the spring are all that are given, as the rows meet before fully grown. Later on, any large weeds that may happen to spring up are cut off with the hand-sickle. L. R. Johnson, Missouri.

Cold Storage--A Cure for Exorbitant Apple Prices.

To the Editor of The Homestead:

The writer is in receipt of a letter from Corning, Iowa, from which the following is quoted:

There were lots of apples here this fall. One man bought a carload of Jonathans in bulk for twenty-five cents per bushel. Before the end of the season the price got up to fifty cents per bushel.

That looks cheap to us who have paid twenty to thirty-five cents a peck for Jonathans, or gone without. The difference is represented largely by railroad and wholesalers' profits.

It has been demonstrated that some of our best fall apples—notably the Wealthy—keep well in cold storage. The Wealthy is a very hardy tree. It bears well and the fruit is of excellent quality. The cost of storage, on the other hand, is not great. It seems to us that the solution of apple prices is in the formation of local cold storage companies and the planting of more extensive orchards of Wealthies and other good fall varieties. Increased production, facilities for storage and fair short-haul freight rates would mean freedom from the extortions of the commission men. Franklin Brown.

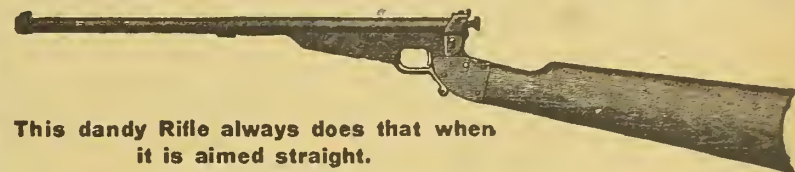

We read reports of apples—fancy Jonathans and other good varieties—being sold at \$1.50 to \$2 per barrel in Missouri orchards, and slow sale for them at those prices. The same article cannot be had in Des Moines and other northern cities for less than \$4.25 per barrel. Most of apples to be found in bulk at our groceries and fruit stands are such as have been refused by the packers or brought up for immediate shipment at ten to twenty cents per bushel—though in northern towns they sell at thirty-five or forty cents per peck. It looks like there is something wrong somewhere. Perhaps the Interstate Commerce Commission will be able to look into the matter and see that the Iowa consumer has a fair buying price, or that the Missouri grower has a fair selling price.

The season for meetings of horticultural societies is drawing near. Every one interested in horticulture should plan to attend as many of these meetings as possible. A great many good ideas may be gathered, and one may profit much, by exchanging experiences and listening to the able discussions.

It is interesting to notice that the wood on fruit trees generally is well-ripened. This means very little winter killing if we have an ordinarily hard winter, and consequently increases the prospect for a good crop of fruit next year.

Fruit-tree agents will be frequent callers at country homes the next few weeks. In buying trees it always pays to pat-

BOYS---IT HITS THE MARK!

This dandy Rifle always does that when it is aimed straight.

Unless you want to hit the mark don't get one. But you do—don't you? Everybody means to hit the mark some time. Then write us at once and you'll crack the bull's eye. For you can get that rifle, boys, without a cent of money. Just a few minutes' work among your friends, or your friends' friends—and the rifle is yours, sure thing. It's the handiest and the handsomest little gun on the market. We're giving it to you straight. And it can be earned just as easy as rolling off a log. Write us about it—just a line. Give us your full name and address and say you want to earn a rifle. That will do. We'll pull the trigger, and back will come a letter to you with full particulars, and it is ten to one you will have earned the rifle the same day you get that letter. It's up to you now. Get out your goose quill and address,

ronize home industries, or if one goes outside, buy only of firms of high reputation for just dealing.

A good protection against damage to trees by mice is to throw a mound of earth four to six inches high around each tree. The mice prefer to make their runs where there is some vegetation.

In selecting varieties of fruit trees, it pays to determine which varieties have done best in your neighborhood and stick rather closely to them. Life is too short for one to do much experimenting with trees.

Now is the time to cover those grape vines if you want to be sure they will live through the winter and bear fruit next summer.

The farmer who does not have some of the products of his garden on his table every day is evidently not equal to the task of providing for his family. Half the enjoyment of living on the farm is lost if the grocery store has to be depended upon for the greater part of the contents of the larder.

A Profitable Side Line.

To the Editor of The Homestead:

I know a farmer living down near St. Louis, Mo., who is making considerable money every year selling dressed beef, veal, pork, and also sausage and lard. He has five or six steers to butcher every fall, two dozen or more hogs, a half-dozen calves, besides a lot of dressed poultry. Last year, he tells me, he sold \$2,250 worth of dressed meat from eighty acres of land. He raised every particle of feed fed the animals and was not out a cent for feed except a small amount for oil meal and cottonseed meal and one or two other concentrates. He figures that \$100 will cover the expense, the balance being profit, since he raises his own poultry, hogs and cattle.

He sells halves and quarters, principal-

Drink Habit Easily Cured

Wives and Mothers

WANTED--A BRIGHT MAN with high team, as salesman in your own locality. Experience not necessary. Steady work and good pay guaranteed to right man. Reference required. For particulars address, Koch Vegetable Tea Co., Box X, Winona, Minnesota.

SALESMEN WANTED to introduce Burbank's wonderful stoneless plum, miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. Oregon Nursery Co., Detroit, Mich.

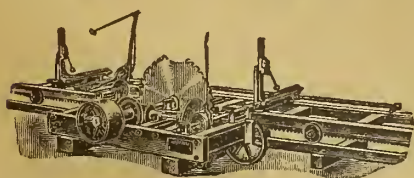

ly to the well-to-do laboring men, who work in the shops and factories and who want "home-cured" meat and "home-rendered" lard. He gets seventeen to twenty-two cents per pound for home-cured hams, fifteen to eighteen cents for home-cured shoulders, eleven to fourteen cents for home-cured bacon, fifteen cents for home-rendered lard; and for the beef he gets from four to nineteen cents, according to the cut. These prices make a hog bring from \$20 to \$35 each, a calf from \$18 to \$25, and a steer or cow from \$50 to \$80.

He gave me his recipe for making sausage and I repeat it below:

"Use only fresh pork, as soon as it is cold. Then separate the fat from the lean. When ready to grind, mix the fat and lean at the rate of one pound of fat to three of lean. Grind well. In seasoning, I use for every eight pounds of sausage, the following: Two ounces of fine table salt, one ounce of ground black pepper, one ounce of good sage, one tablespoonful of good cayenne pepper. The seasoned sausage I then put down in a stone jar and pour boiling lard over the top, and leave in the jar till ready to take to market. I have had it keep fresh for three months in this way."

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

By this time the Home will be growing decidedly interested in the fortunes of the young couple whose case we have been considering the last two weeks. It will be remembered that they are twenty-eight and twenty-five years of age respectively, that for some reason they are deferring marriage, that the young man seems to feel that he is not being given as much of his fiancée's exclusive society as their relation justifies, and that he is wondering if her pleasure in the company of old friends and admirers indicates that they are not sufficiently congenial, sufficiently in love to justify marriage.

The ideal condition is where an engaged couple have such absolute confidence in each other that mistrust is unthinkable. But conditions are rarely ideal, human nature is not ideal, and engagements are entered upon without that mutual knowledge and confidence which are necessary to harmonious relations. As a result there are often misunderstandings and heartburnings, sometimes even a parting of the ways. All this means unhappiness but it is much better that the misery should be before marriage than after it.

From the context we are led to think that in the case under consideration it is not his love for his promised wife, but hers for him which the young man questions. Before we look at that phase of the question it might be well to suggest that the love which doubts love has in it an element of mistrust which is fatal to marital happiness. Of all the causes which work misery in homes there is probably none more fruitful than a jealous, exacting temper, whether that temper be the man's or the woman's.

How shall we tell whether or no this man's doubts of his fiancée are justifiable or no? It is a difficult question. If he had told us why the marriage is being postponed, whether it is the woman's wish or his, it might be easier, perhaps. If a man seem less keen about naming the happy day than a woman thinks he should be she is naturally a little piqued, although she may be unconscious of it. She is likely as a consequence to keep him somewhat at a distance, likely to use her womanly powers to make him feel that she is not anxious to have his exclusive society, and she can get along quite nicely with periodical visits and occasional tete-a-tetes. And if there is a particle of coquetry in her make up—and the charming woman is rarely without it—she will have a mischievous delight in letting her lover see that he is not the only man who admires her, not even the only man whose company she enjoys.

Among the four things which Solomon admitted to be "too wonderful" for him is the "way of a man with a maid." If Solomon lived in our day he would surely turn the phrase about for there is nothing in the world, in America at least, more puzzling than the way of a maid with a man.

If a modern American girl is distant, cold or reserved with her accepted lover there may be any one of a dozen reasons for it. To consider a few, first of all, she may love her sweetheart dearly but think it unmanly to let him know how much she cares for him—it has been instilled into women for countless generations that they should be the sought not the seeker, and that even after they are engaged to be married they should be careful not to seem to "run after the man." Second, her heart may not be really awake; she may be only beginning to love; she may be of the type which waits for love before loving. Third, while loving she may not love with the grateful, almost adoring passion of the woman of other days who had almost no object in life but loving. If a woman be self-supporting her independence makes a lover more or less of a luxury, and even if she be not self-supporting the modern girl has such a full life that a husband is not an absolute necessity. Fourth, she may think it good for her lover's health to "keep him guessing." There is an idea abroad that when a man gains the object of his desire that he, to a certain extent, loses interest in it; that pursuit and not possession is his joy. Accepting this theory

THE MOST IMPORTANT FACTOR IN MAKING FARMING PROFITABLE

Is your fanning mill. Don't it pay you then to get the best money can buy? What does the difference of a five or ten dollar bill make where hundreds and possibly thousands are at stake? Your whole profit of your farm lays in the way you treat your seed and grain.

Every weed and every particle of dirt that is left in your seed grain when you sow, is a setback to your crop, and a deducter from

your price, when the time comes to sell. There is a machine on the market now, that will take every weed, every particle of foreign stuff out of your seed grain.

We can guarantee it, because we have tried it on the worst possible mixture of dirty grain that a farmer can get. You would have been surprised to see how perfect and fast it cleaned. This machine is

THE NEW SUPERIOR FANNING MILL

It has never been on the market before. It is a modern machine designed to separate, clean and grade modern seed and grain. For perfect work, capacity, and wide range of usefulness, no other grain cleaner or fanning mill can approach it. The "New Superior" is the product of twenty years of experience, thorough knowledge of grain, inventive genius and skilled workmanship. Its separating devices are unique and simple, and will perfectly separate, clean and grade any seed and grain, that is raised.

WILL YOU LET US PROVE IT, WITHOUT COST TO YOU?

Then write us and we will tell you how you can try this new, wonderful fanning mill in your own granary without the slightest cost or risk on your part. We will also give you full particulars and prices. Write today.

J. L. OWENS CO., 606 Superior Street, S. E., Minneapolis, Minn.

DO YOU RAISE CORN? THE OWENS CORN GRADER will make it more profitable. Write for particulars and prices

SKUNK

ANDERSCH BROS., Dept. 19 Minneapolis, Minn.

WE WANT NAMES.

WE want YOU to send us the names and addresses of from ten to twenty-five farmers living in the United States, having a few head of stock (cows, horses, pigs). You can send us the names from any number of different post-offices. If you will send us these names we will send you TWO BEAUTIFUL COLORED PICTURES FREE. These pictures are reproductions of the most celebrated paintings in the world, and they are of high quality, and we know that you will be pleased and delighted with them; no pictures will be given for a list of less than ten farmers. We want to send a sample copy of the RURAL HOME to a lot of farmers who are not now taking our paper, and for that reason we want these names. Send us immediately a list of at least ten farmers and we will send you, postpaid, ABSOLUTELY FREE, TWO REPRODUCTIONS OF THE WORLD'S FAMOUS PICTURES, in beautiful colors, size 16x20 inches. Address THE RURAL HOME, 22 North William St., New York, N. Y.

a girl sometimes deliberately plays her lover as a fisherman does a fish. This type of girl is something of a flirt. She is the popular girl with men. She frequently has several "strings to her bow" and she has no anxiety if the one she most favors occasionally grows restive.

We might go into this subject more deeply, but probably somewhere among the cases considered, or among those suggested by them, our inquiring lover and others who are disturbed in mind may find a clue for the solution of their particular problem.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

If I Him but have,
If He be but mine,
If my heart, hence to the grave,
Ne'er forgets His love divine—
Know I naught of sadness,
Know I naught but worship, love
and gladness.

Where I have but Him
Is my Fatherland,
And all gifts and graces come
Heritage into my hand—
Brothers long deplored
I in His disciples find restored.
—Friederich von Hardenberg.

WHAT SHALL WE GIVE?

The editor issued a call a few months ago, asking readers to name the three Christmas gifts of 1903 which had proved themselves the most acceptable during a half year's use. To give the entire list is out of the question, it is so long, but the following are representative of the favorite gifts mentioned. They are classified as "household" and "personal" gifts, the former including articles for use and decoration in the house, the latter including all other presents: Household gifts—Sewing machine, hand-painted china, tablespoons (silver), antique bureau, hall lamp, cut glass dish, hemstitched table linen, carpet sweeper, chafing dish spoon, sofa pillows, breakfast plates, writing desk, embroidered centerpiece, set of flatirons, picture, library table, gas drop light, food chopper, mattress, repapering of a room, calendar with quotations, box of jellies. Personal gifts—Silk waist, knitted shawl, bathrobe, prayer book markers, covered and perfumed coat hanger, embroidered handkerchiefs, knitted sweater, embroidered linen waist, brush and comb, sewing apron, waterproof apron for washing dishes, etc., fountain pen, darning bag and supplies, traveling box covered with cretonne and fitted with straps of silk elastic to hold small article, slumber robe, stickpin, book.—Good Housekeeping of 1904.

A CHRISTMAS SCRAPBOOK.

A form of practical charity which is as delightful to the giver as to the recipient has been tried for several years by the writer, and has been voted a great success. It is the making of a Christmas scrapbook for the children's ward of a city hospital, for an orphan asylum, or for some small "shut-in" in one's own acquaintance. Procure a stout blank book, with unruled thin paper, of a shape and weight easily

held by weak little hands. A grocer's order book, costing about twenty-five cents, or a school exercise book with a firm binding, is best. Cover it with kitchen toweling in the natural linen shade, or with dull green or red denim, and paste as well as sew the edges together on the inside, for the book is sure to get rough treatment. In the meantime, save every picture, verse, short story or anecdote you can find pertaining to Christmas.

The type should be as large as possible and a good share of the pictures colored, else the pages will not look attractive. Arrange them with plenty of space about them, and, if you are anything of an artist, draw, sketch or paint head and tail pieces, or borders, of "Santas" and well-filled stockings. Needless to say, it is best to begin collecting scraps the Christmas before. Paste on both sides of the pages, and when finished, decorate the covers with the prettiest and brightest of your colored pictures. Iron the pages as you work so that they will dry smoothly.—J. S. F.

SEASONABLE RECIPES.

Tarts—Line patty pans with a rich puff paste, and fill with very thinly sliced pears, which have been stewed in a rich sugar sirup. Bake in a quick oven and when done dot the tops with cherry or currant jelly. Can the sirup the pears were stewed in for pudding sauce or to serve with hot cakes. It is delicious for either purpose.

Plain Plum Pudding—One cup suet chopped fine, one cup molasses, one cup sweet milk, three and one-half cups flour, one and one-half cups raisins, one cup currants, one teaspoonful soda. Steam two hours in a dish or bag.

English Plum Pudding—Make a batter of four eggs, one pound flour, one pint milk and an even teaspoonful of salt; add one-half pint of suet chopped fine, one pound raisins and one pound currants. Stir all well together, tie closely in a cotton cloth, put in a kettle of boiling water and boil steadily four hours. Serve hot with lemon sauce, or any kind of pudding sauce that is preferred.

Banbury Tarts.—Chop very fine one lemon, one cupful of seeded raisins and a few English walnut meats. Mix with one well-beaten egg. Cut rich paste in pieces the size of a saucer; lay one tablespoonful of the mixture on each piece, fold together, turning the edges so it will have a crinkled look. Bake in a moderate oven.

Whigs—Mix one-half pound sugar with six ounces of butter, a couple of beaten eggs, and a teaspoonful of cinnamon. Stir in two pounds of flour, a teaspoonful of yeast and sufficient milk for a stiff batter. When light, bake in small cups.

Macaroons—Two cups of sugar, one granulated and one pulverized; whites of four eggs beaten together; two cups of nut meats rolled fine and vanilla for flavor. Drop spoonfuls of this mixture on buttered tins and bake in a slow oven, scarcely hot, until they are hard on top.

AMONG OURSELVES.

For the next few weeks the hum of preparation for Christmas will be heard in the Home, but we must not allow Christmas to crowd out everything else. Our program will be opened by "An Ill-

nois Friend," who is in sympathy with the woman with a past:

Although I am a silent member of this department I am moved to speak in behalf of our young fallen girls and I was especially interested in what A Dakota Farmer's Wife had to say. I was made to think how little we realize the influence we have on those that are in reach of us, and that it may be for good or evil. I esteem that Dakota lady very highly for the much good she did for one who was almost beyond help. Who of us wouldn't have become discouraged as this young wife with just a gambling husband, without speaking of what was behind—her past life. Perhaps she was deprived of many things, but had thought these deprivations need not interfere with her trying to live a noble life, and leading her husband to better things. And, then, as she had these aims about accomplished, some cruel one stirred up the past. Once mentioned, such a story goes like wild-fire, and how ready we are to believe false reports and to repeat things, not knowing whether they are true or not. I say, then, dear sisters, let us awake and realize the importance of being the right kind of a leader, as this noble woman was and let our influence go out to help the trodden underfoot.

Oddly enough, an Illinois man, "A Bachelor," entered the Home almost on the heels of the friend whose good words we have had. If his ideas governed society there would be very little necessity for speaking of the matter which prompts them both to speech—but hear what he has to say:

My observation is that the chief reason of the downfall of most girls is entering society too young. Why too young? Because then they are so easily influenced to do wrong. I am a young bachelor, trying hard to pay for a farm for which I went in debt and I have often been asked why I did not get married. My answer is, because the right one has not come along. I believe in waiting until one knows one's own mind. So many girls begin keeping company at the ages of fourteen or fifteen and in two or three years are married. Most of them go to their new homes unprepared as housekeepers, and soon repent it. I am twenty-five and even now wonder if I am old enough to become the head of a household. I know of so many unhappy marriages and ruined lives that I shudder when I see young girls keeping company. My advice to the girls is to be careful. Don't allow young men to take liberties with you. They will respect you the more for it. I make it a rule never to go with a girl who will allow me to give her a good night kiss.

It is well to have these words from a young man. They carry more weight than if uttered by a woman. I would specially commend the closing remarks of our bachelor friend to the girls of the Home; not only do they tally with the teaching of my beloved mother, but years have taught me that she knew men, knew human nature, and that she spoke wisely when she advised her daughters to bear themselves with maidenly reserve and to save their lips for their husbands.

And now about Christmas; first we shall have some "Suggestions," from "A Child-lover."

An idea to be of far-reaching benefit must

be one to appeal to the largest number. So as Uncle Sam's "younger sons" and their families comprise by far the larger part of our population it is for them we write. Mothers, teach your children that the heart of Christmas is to give, not to get. Help them to give someone else a happy Christmas and you have not only given them a beautiful memory, but you have been permitted to help in that most important work on earth, character building. As an ounce of experience is said to be worth a pound of theory, I will tell you of one of our efforts in this direction. We thought of several little ones who we felt sure would be unremembered on that day and planned accordingly. As money was almost a minus quantity we exercised our wits thinking up things to do, contrive or evolve. As the little boys had some mechanical skill they were encouraged to use it in making game boards, carving jumping jacks and tumbling dolls, making doll trunks and work boxes, as well as doll houses and furniture. The girls, though small, could help dress dolls; make the tiny quilts and pillows and hang the cute curtains. And what enthusiasm they showed putting down the parlor carpet and selecting the tiny dishes for the dresser, and when Jacky dipped a wooden doll in the ink bottle, lo! the kitchen was complete with Dinah in a red gown by the little stove. As the tree would be of good size, many toys would be needed. So old toys thrown away as worthless were brought out and with a little paint and glue and patience were made good as new. One battered doll was made a thing of beauty and of joy—for a while at least. This is the story of her evolution: A new nose was built up of putty, then painting considered reprehensible in many cases was deemed justifiable in this. When her complexion was attended to I donated some hair I had cut off when people wore bangs, and when this was glued on, braided and tied with ribbon it looked so real it made me creep. But if I ever saw contented bliss it was when that small mother sat herself down to comb and braid her child's hair. This is only one item. Space forbids my telling you all the details, but when the last article was placed in the box, the candy made, the corn popped, the long strings of cranberries strung (even the tiniest could help in that), the tree was brought in and fixed in place by papa amid wild cheers. The day was spent decorating that tree and placing thereon the love offerings of childish hands, and in all the land I do not think the angels saw a fairer, for it was made for those whom Christ said we always have with us.

There is plenty of time for these beautiful "Suggestions" to be carried out to the enriching of many a home. I do hope very many of the friends will see their way to setting their children to work along the line suggested. There is altogether too much thought with children as to what they shall get at Christmas. Only yesterday a four-year-old child lisped: "What are you going to give me for Christmas?" to a neighbor who chanced in.

"Big Heart, Little Purse" is on for the next number. She will be followed by Mrs. F. B.:

Christmas should be the happiest day of the year, and by giving little tokens of remembrance, small though they be, to the ones you love, you are made happy, as well as the ones who receive them. How much we enjoy the little things from relatives and friends. It is so good to be remembered. Husband and I have been trying to save to buy us a home and I was almost tempted to let this Christmas pass without giving a present, for it costs when you come to buy for thirty-five or more and that is the number I would like to remember; but I thought to myself, "How selfish you are growing," and as I do not want to grow selfish I will give them all something. By making most of the gifts it will not cost me much. These are the things I have made: A clothes-pin apron for mother and mother-in-law. It is made of blue denim cut short and round with no fullness; an upper portion cut the same only with a rounded piece about four inches wide and eight long cut out on each side from the waist down and about two inches from the edge for pocket holes. These as well as the apron are bound around with white tape. I made a pair of white cotton flannel mittens to go with each to use in cold weather when hanging out clothes. Of a piece of white taffeta silk which I had I made two fancy collars for sister and sister-in-law. For my brother (fifteen years old) and brother-in-law I made glass necktie cases about a foot long and three inches wide by binding the pieces of glass with ribbon and tacking together. It has two hinges of ribbon and ribbons to tie in a bow in two places to fasten shut, and padded bottom of silk. Cousin Freddie (six months old) will get a rag Santa Claus stuffed, and brother Fred (six years old) a pocketbook, for boys of that age are very proud of a pocketbook when they have pennies to put in it. I have made several pretty handkerchiefs for girl relatives and friends and plain hemstitched ones for the boys.

I happen to be one of those who have but little to buy Christmas gifts with, and the thought came to my mind this week, why not utilize what I have on hand? And I am sorry I did not think of this plan sooner. "To a sister back east who makes a slave of herself doing housework and will not take time to read," I will cut out letters from our Home Department that I think will encourage her and send them to her. Then to a friend who has plants to care for I will send the flower talks and to a friend who reads a great deal I will cut out those book talks. To father and my sister-in-law some of my choice magazines. As nice a letter as I can write will go with some of these and a kodak picture of our family may go to sister and an old schoolmate in far off Montana. To my only brother, 1,500 miles away, who has a sense of humor, I will send a drawing on a card board in three scenes, representing myself catching and killing a flea. For my boys I am making balls from old yarn and will get the shoemaker

Does What Other Stoves Fail to Do

In almost every house there is a room that the heat from the other stoves or furnace fails to reach. It may be a room on the "weather" side, or one having no heat connection. It may be a cold hallway. No matter in what part of the house—whether room or hallway—it can soon be made snug and cozy with a

PERFECTION Oil Heater

(Equipped with Smokeless Device)

Unlike ordinary oil heaters the Perfection gives satisfaction always. First and foremost it is absolutely safe—you cannot turn the wick too high or too low. Gives intense heat without smoke or smell because equipped with smokeless device. Can be easily carried from room to room. As easy to operate as a lamp. Ornamental as well as useful. Made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds 4 quarts of oil and burns 9 hours. There's real satisfaction in a Perfection Oil Heater. Every heater warranted. If not at your dealer's write our nearest agency for descriptive circular.

The Rayo Lamp

makes the home bright. Is the safest and best lamp for all-round household use. Gives a clear, steady light. Fitted with latest improved burner. Made of brass throughout and nickel plated. Every lamp warranted. Suitable for library, dining room, parlor or bedroom. If not at your dealer's write to nearest agency.

STANDARD OIL COMPANY

How and Where to Buy a Washer.

The market is flooded with poor washing machines, free offers, premiums, etc. That is not the cheapest way to get a thoroughly reliable washer. Most of them are expensive and provoking in the long run. Get a guaranteed washer, made by the reliable manufacturer. That's what we want to say to you about the

O. K. ROTARY WASHER.

It's the easiest washer to operate, the simplest to understand. Our guarantee is tacked inside of every machine. The O. K. Washer will handle your biggest washing and do it so much better that you cannot afford not to have one. A beautiful machine, too, painted in maroon and fitted with gilded hoops. No warping because the lumber is Louisiana Red Cypress. The lid is steam proof.

SEND US YOUR NAME TODAY.

Also the name and address of your dealer. We'll tell you where and how to get the O. K. washer, and full particulars. Address the factory.

to stitch a cover on. These will be stout and yet not be hard enough to knock a tooth loose. To my daughter some music or a picture for her room and the same would be nice for the boys. These are only a few suggestions, but they may help someone who has little money to spend and yet wants to remember friends in some way.

is learning, in the pleasantest possible way, lessons that will aid her in preparing her own wardrobe later on.

The doll suit pictured in No. 5505 is in

Just one word about Christmas buying. Do make an effort, dear friends, to do your shopping before the last week. I make this suggestion for two reasons; one is you will secure better service and find a better selection if you make your purchases before the middle of the month, and the other and more important reason is that late shopping is a violation of the Christmas spirit, for it makes life a burden to the salespeople who are entirely at our mercy in this matter.

Dressmaking and Millinery—No. 546.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] By the time you are reading this you will have begun to plan a little for Christmas, and will be wanting to select any patterns you may need in making preparations, whether these shall be of garments or of toys, and because there is always some delay in getting patterns that are ordered by mail I am showing our usual doll offering early that you may order the pattern and have it at hand when wanted. Many order these doll garments to be used as one of the gifts for the wee girlie of the family, while others want to use them in making up the garments in which the Christmas doll shall first greet her "Little Mother," and for either purpose they are a boon. The dressed doll brings greatest Christmas joy, but for the pleasure of the days to follow give each girlie her set of patterns, and the material required for such garments as they are designed for, and note the exquisite delight she finds in fashioning them, and meantime she

[5505 Doll's Peter Pan Suit. 18, 22 and 23 Inches in Length.]

Peter Pan style, and is modeled on the same lines as were those worn by "real people" during the season that is past. The suit

I CURE CANCER

MY MILD COMBINATION TREATMENT IS NOT A NEW REMEDY.

It has the experience of years back of it and has cured hundreds of cases where the hand of death seemed to forever have closed upon them. Endorsed by physicians, ministers, bankers, business men and others.

Treatment Not Painful
There is no necessity for the patient enduring the intense pain caused by applications of caustics, burning plasters, dicy poultices, etc. Scores of the most advanced cases of Cancer have been cured by my Mild Combination Treatment entirely without pain.

BEWARE OF THE KNIFE

No case of Cancer was ever cured by a knife operation. The patient suffers untold agony and shortly finds himself in worse condition than ever. I cure cancer by a combination treatment. Local treatment destroys the deadly cancerous growth; constitutional treatment drives the disease out of the system, thus preventing its return.

Names of a Few of the Many I Have Cured

Mrs. Anna E. Guffy, Arcadia, Kans., Cancer of Breast.

Mrs. Frances Downey, Silell, La., Cancer of Jaw for 14 years.

Mrs. A. E. Foyt, Rosebud, Texas, Cancer of the Womb after operation failed.

Mrs. D. E. Stone, Harper, S. C., Cancer of Lip after operation failed.

Mrs. J. W. Groschong, Wright City, Mo., Large Cancer in the Forehead.

Mr. N. J. Bell, Newburg, W. Va., R. No. 2, Box 11.

Mr. Peter L. Rice, 1225 14th St., Des Moines, Iowa, Cancer of Stomach.

FREE BOOK—CANCER AND ITS CURE

I send this large book to sufferers free of charge. Tells how and why my treatment cures. If you cannot come to my office for treatment I can cure you at home. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—do not give up hope but write at once.

DR. O. A. JOHNSON,
1233 Grand Ave.,
Suite 327, KANSAS CITY, MO.

consists of a waist, skirt and hat, the patterns for all coming under one number, and being enclosed in one envelope and sent as

[5502 Blouse or Shirt Waist. 32 to 40 Bust.]

one pattern. Note this. The waist is in the blouse or shirt waist style, having turn-over collar and turn-back cuffs as a finish to

the three-quarter length sleeves. As pictured, the waist is of white, and the skirt of check, but the costume may be of one material throughout, and there are pretty woollens that will make up beautifully in this mode. Then the hat should be of the same material, or at least match it in color. The skirt is in one piece and kilt pleated, the pattern showing the lines on which the pleats are folded. The hat consists of crown and brim, the trimming being of braid and a couple of quills. Any variation may be made to suit the taste or the materials at hand. A fancy tie and belt complete the outfit. Now note that this pattern, No. 5505, is cut in three sizes, these being for dolls of 18, 22 and 26 inches. Say which size is to be sent. For this measure the doll from top of head to heel.

A very neat and stylish shirt waist is pictured in No. 5502, and yet its lines are all very simple. By referring to some of the recent numbers you will find a skirt design that may be used with this model with especially pleasing results, as its lines are so similar in every way, and yet either may be used separately. The back shows long lines of tucks, similar ones being seen at the front, but the latter are stitched to yoke depth only. The fronts consist of two pieces the side fronts being lapped over on the fronts and held by means of small buttons. There are buttons on the deep pointed cuffs. The fullness at the lower edge of the sleeves is arranged in flat stitched pleats. As will be seen by looking at the two designs, the sleeves may be made in either of the two lengths, narrow cuffs being used on the elbow length. Pattern No. 5502 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

The International Sunday-School Lesson.

Fourth Quarter. Lesson X. Luke XXIII. 33-46, December 9, 1906.

Jesus on the Cross.

The quadruple description of the crucifixion is a literary marvel. Though a circumstance of transcendent importance, the narrative of it is surprisingly condensed. There is no spinning out of details, no obtrusion of the personal opinions and sentiments of the narrators.

Here is a suggestion of how we ourselves should approach Calvary. It is not a theme for volubility. There should be no striving to magnify its painful horrors, or to compare the physical sufferings of its victim with those of others. A spiritual interpretation is the thing desirable. A personal appropriation by faith is great riches.

Religious romancists have paved all the way between the Praetorium and Calvary with miraculous incidents. In strong antithesis to this, the evangelist mentions but two circumstances. At sight of one on whose brow innocence and benignity was stamped led to a shocking death, the daughters of Jerusalem wept aloud in pity. Jesus turned, and, as if with the impending siege in plainest view, bade them not to weep for Him, but for themselves and for their children. In those awful days, barrenness, the disgrace of the Hebrew woman, would be at a premium. For if such a cruel deed as was now being done was possible, the tree of their national

life being yet green, what horrors would characterize the extinction of that life! The fainting strength of Jesus makes the impressing of some one to bear His cross necessary. A foreign Jew, recognized as such by his Libyan garb, is compelled to do so. A changed heart was probably his exceeding great reward. So goes that most pitiful procession earth has ever seen. The centurion, mounted and in the van; a guard in shining armor, and numerous enough to make rescue of the victims impossible; the condemned, with their crimes, recorded in black letters on boards daubed with gypsum, and hung about their necks; in the rear, slaves carrying refreshments for the soldiers, besides nails, hammers, ropes, etc., necessary for the execution; and, back of all, such a motley, unsavory crowd as a public execution would draw in our day.

Following the narrative, we first have the numbering of Jesus with transgressors. He was crucified between the malefactors, the insurgent robbers and murderers. He who could challenge the world to impeach His sinlessness, was "made sin." He was put to the extremity of a convicted felon.

With the first shedding of His blood begins His mediatorial prayer, "Father, forgive them." The "inventiveness of love" finds a palliating circumstance in their ignorance. "They know not what

Rambler

The Monarch of Modern Travel

Model 19, \$1,250.

Whether on business or pleasure, a Rambler Automobile will carry you farther at less expense and a greater degree of comfort than is obtainable by any other means.

To the progressive man of modern methods, the automobile is as necessary as any of the other labor and time-saving devices, and the man who knows uses a Rambler

There are many reasons for this and our nearest agent will gladly give you a positive demonstration that the Rambler is

OUR RED LETTER Combination Offer

AGAIN OPEN TO THE FARMERS
OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25
A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

they do." The prayer sweeps out to include, not the coarse executioners alone, but the cunning conspirators who use them as their tools.

It is enough to brand it with infamy, that destroying vice of gambling, that it obtruded itself at the crucifixion. The soldiers threw dice to determine which should have the most valuable garment of the sufferer. They "chanced off" the seamless robe.

"He saved others." Unconscious, undesigned encomium! "Let Him save Himself." Last recurrence of the wilderness temptation! That which is a literal possibility is a moral impossibility. Except He stay on the cross He cannot be a Savior. If He remains not, He cannot utter that ineffable cry, "It is finished!"—"the work the Father gave Me to do." Keener than mortal pangs are the brutal gibes of rulers, populace, and soldiery.

That triple inscription may signify that the story of the cross is destined to go into all languages, as it there appeared in the tongues of conquest, culture, and colloquy.

The sovereign power of redeeming love has a splendid exemplification even in the deepening gloom of Calvary. As the hours wear away, the innocence, the Divinity of his fellow-sufferer dawn upon the mind of the malefactor. It pains him to hear the continued railing of his comrade in crime. He chides him, reminding him of the justness of their condemnation, and affirming the guiltlessness of Jesus. To eye of faith there opens to him a blissful vis-

ta beyond the chasm of death. He recognizes the sufferer, spite of His marred visage, as monarch of that realm. In the strength of a belief that prompts to action, he joins his fortunes irrevoc-

cably with those of the crucified Nazarene, and entreates recognition when he comes to the regal splendors of His coronation.

What Jesus did then, He has been doing ever since. He opened paradise to a penitent. But His obedience unto death, even the death of the cross, was the key, and the only one, to unlock that paradise.

Nature, as if become sentient on account of the incomparable tragedy now enacting, drapes herself in a veil of impenetrable blackness.

In that darkness, the seventh word from the cross is heard. The Son, having drunk to its dregs the cup the Father had given Him, now, in the very hour and article of death, confidently commends His soul to that Father.

Analysis and Key.

1. Two incidents on the way to crucifixion. (1) Jesus' words to the women. (2) The impressing of Simon of Cyrene.
2. Arrival at Golgotha. The nailing to the cross; anesthetics refused.
3. Cross erected; first word from the cross, "Forgive."
4. Sanhedrists offended at inscription on the cross. Change refused.
5. Ridicule and reviling.
6. Conversion of crucified thief. Second word addressed to him.
7. Gambling at the foot of the cross.
8. Filial piety prompts the "third word," in which Jesus commends His mother to John.
9. "Fourth word," inexplicable cry of the sufferer, "Why am I forsaken."
10. "Fifth word," "I thirst."
11. "Sixth word," "It is finished."
12. "Seventh word," the committal; Soul given to God.

The Teacher's Lantern.

Pilate's ironical inscription has a germ of truth in it. Jesus is king. His dominion is wider than the most ambitious Caesar ever dreamed of.

What was a taunt to the Jews was a tribute to Jesus. Pilate would fain acknowledge Him a kingly spirit, of whom the Jews were not worthy. To this

covered eulogy of the procurator the dying thief added his "Thy kingdom."

The cross is always divisive. It once separated a believer from an unbeliever. It does so yet wherever it is preached. People range themselves in two classes. The cross is the divisor.

A study of Calvary reveals the intensive forcefulness of the expression, "Crucify the Son of God afresh." Indifference, unbelief, and apostasy are doing this daily.

It is inconceivable that the spirit of Jesus, just mingled with common air, was dissipated and lost, as to its identity, when He breathed it forth. He commended it as an inconceivably precious thing to the care of a personal God, the Father of Spirits.

The Lord of Life helped the dying penitent at his side to stand the shock of dissolution by the assurance of a perpetuation of conscious life beyond, and an immediate entrance to paradise.

When Jesus entered paradise it was in company with an executed criminal. This trophy of His redeeming love, this evidence of the power of His cross, He presented to all the intelligences of the sky.

It is a common error that the man who was impressed to bear the cross was a negro. The presence of a Jew from Africa can be easily accounted for. Ptolemaeus Lagi forcibly colonized Cyrene, North Africa, with a great number of Jews, who built for themselves a synagogue in Jerusalem to which they might resort at feast-times.

The thoughts of Jesus, even in His mortal agonies, were upon others, as His three first "words from the cross" indicate, "Father, forgive them;" and to the penitent thief, "This day;" and to His mother, "Woman, behold thy Son."

Gambling is that one horrid vice that could intrude upon even the crucifixion scene. The rattle of the dice-box was heard at the foot of the cross. It is the dehumanizing vice. At Monte Carlo, today, the suicide's revolver often rings at the table. Liveried servants throw a sheet over the corpse and carry it out, and the game goes on!

Crucifixion was abolished by Constantine, out of sacred regard for the cross as the instrument of the Savior's passion. Thus for fifteen centuries the world has been rid of this cruellest mode of capital punishment. And the spread of the humanizing Gospel has reduced to the minimum the pain and indignities of those who must suffer the extreme penalty.

The twenty-second Psalm, written, as Hengstenberg affirms, in the greatest heat of David's conflict with Saul, is also strikingly minute in its portrayal of the last agony of Jesus. The agonized cry, the derision, the pierced hands and feet, the parting of the garments, and many other circumstances, are here. They are directly quoted, or at least alluded to, in the New Testament.

Forestry in the West.

To the Editor of The Homestead:

The early settler in the west would plant trees as soon as the ground could be gotten ready and young trees could be grown or bought. In the seventies Nebraska was regarded as a windy country; we perhaps felt the wind more because no groves would shelter the buildings, the prairie hay was short and light and hard to handle when windy. The four varieties of trees most commonly planted were soft maple, box elder, ash and cottonwood. Cottonwood was the only variety of the four that would grow from clips or cuts and therefore mostly planted. The other varieties had to be grown from seed that we would gather on the little streams that empty into the Missouri river.

When bought at the nurseries the price was generally \$2 per thousand, the same as osage hedge. We would plant them about four feet apart both ways, often marking the ground off with a corn marker, such as we used before the check rower was known. The trees so planted were soon found to be too close, and, fuel being a scarce article, we would cut out every other row, then every other tree in each row and so on, but the hot sun then burning down between the trees proved too much in dry weather and many groves would in this way get in bad shape.

In gathering the seed along the creeks it was easiest gotten in the drifts and in this way many water elm seed found their way into the nurseries; they afterward proved to be most valuable, making trees that would withstand the

Good Natured Tools

It is not necessary to force Keen Kutter Tools. Keen Kutter bits, for example, work quickly and easily in any kind of wood. Lips are long, strong and perfectly tempered, adding years to the life of the tool. Keen Kutter Tools like hard work. The edged tools never lose their temper—handled tools never work loose or fly off—hammered tools keep their faces straight.

"The Recollection of Quality Remains Long After the Price is Forgotten."
Trade Mark Registered.

unfavorable climatic conditions, and high winds could not break them down. Some of the most valuable groves were grown in the following manner, after the cottonwoods were planted:

In the fall following we gathered black walnuts and stuck them in the same rows, they started slowly but when we afterwards cut down the cottonwoods, the walnut made rapid growth. When we broke up the prairies it was not long until the draws would commence to wash, cutting deep ditches and different methods were employed to fill them, mostly without the desired result. Finally willows would start up in the draws without planting, working their way up from the creeks and in many cases the willows would hold the dirt and fill up the ditches and much wood was grown in this way.

Post timber was a scarce article and barbed wire scarcely known so we wanted fences and therefore started to grow osage hedge, not knowing that osage hedge would make the very best nearly everlasting post. We planted honey locusts for this purpose thinking that they would make a fence also. They really failed in both; unless barbed wire was used the fence could not be relied upon to turn stock. Today we have hedge to burn and osage posts to sell. The osage proved a nuisance along the roads, unless kept down to four or five feet, which is expensive and prevents the developing into posts. If the hedge grows up high it will shut off the wind during hot summer days, it will take the sap out of the ground for two or three rods, in particular on the south side, and it will cause the snow to drift and make roads impassable in winter, but what are you going to do about it? I was guilty myself of planting twenty-one miles of osage hedge. We are pulling out some but this is hard, expensive work and most of us are just letting them go, cutting them from time to time for posts, using the small branches for fire wood. On the whole, this planting of groves and hedges is regarded as one of the factors to bring about more precipitation which fact is generally admitted in this and the European countries, but here comes another subject, that of precipitation which I will discuss some other time and I will return to the subject of forestry in the West.

I have seen the working of the timber claim law and must say that few claims, comparatively, were rightfully earned by the men who took the land under this act. I think it was a mistake to push the leafwood up to a high elevation towards the Rocky Mountains and not push the pines down from the western hills, which I understand the government is now trying to do. In my opinion the sand hills are the easiest to plant

and maintain in trees. The forest fires will destroy the forest on the buffalo sod, while the vegetation in the sand hills may be checked in a manner not to permit the fires to sweep through the forests. I have seen thousands of acres planted in Northern Germany near the coast of the East and North seas, seemingly, in pure sand and those forests became valuable until some insect played smash with them. I have seen many acres on the foot of the Harz mountains, in Germany planted to fir and spruce. Those lands were really solid lime stone; holes were picked about the size of a half bushel and filled with sand, then those pine trees were taken, a few inches tall only, from the nurseries and in time grew nicely. The only way for them to get nourishment was for them to drive their fibrous roots into the crevices of the limestone which, decaying, perhaps furnished additional food for the trees.

Another species of tree, much recommended and highly praised is the catalpa, a tree which I never appreciated and as post timber it cannot be compared with osage. We planted five groves of those trees and neither of them can be compared with walnut or elm or even ash. As fuel the catalpa is no better than willow and for fence posts we only use them if we wish to make a temporary fence around a wheat field or where a fence is wanted for one season. In a place like this the wood being light, mostly straight and easily sharpened to be driven, we consider them of same value as ash and no more lasting. On the whole it may be said that while the original timber along the streams fifty miles or more west of the Missouri river has been greatly reduced, more timber is growing in this territory than ever before and most well regulated prairie farms have all the wood needed for fuel. Further west corn cobs are relied upon exclusively for summer fuel and they fill the bill to perfection.

Nebraska.

WEEK END RATES VIA M. & ST. L. R. R.

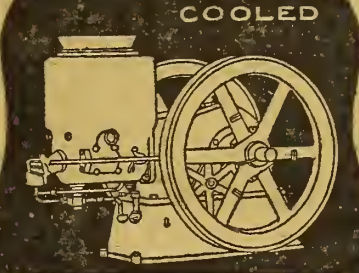

On Saturdays and Sundays the Minneapolis & St. Louis R. R. will sell round-trip excursion tickets, Des Moines to Waterville and Montgomery, Minn., at one fare plus \$2. Return limit seven days, including date of sale. Buy tickets at City Ticket Office, 512 Walnut St., or Union Station.

LOW RATES TO THE SOUTHEAST

Commencing December 18th and on the first and third Tuesdays of each month thereafter until March, 1907, the Chicago Great Western Railway will sell one-way colonist tickets at nearly half fare to points in Alabama, Louisiana and Mississippi. For further information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HAVANA, CUBA.

On December 18th to 20th the Chicago Great Western Railway will sell round-trip tickets to Havana at one fare for the round trip, with limit to return of January 9th. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

WATER COOLED

FULLER & JOHNSON'S
Frost Proof
Gasoline Engine
Is the Engine for the Farm.

Because it can't freeze—you can operate outside with the thermometer 30 degrees below zero. No frozen, bursted pipes to stop you in the midst of some important work.

You do your work where and when you want to, not when the engine wants to. Besides, it is the easiest engine to understand and operate. This is true because Fuller & Johnson have worked and experimented for 25 years to develop this simple engine for the farmer.

The FULLER & JOHNSON Guaranty back of this engine means absolute protection to you against loss or disappointment.

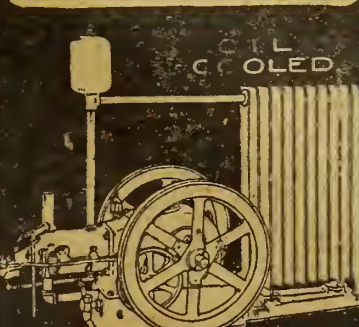

But, before you buy any engine, send a postal asking for our valuable free booklet, "Helpful Hints on Farm Power." It handles the farm power problem from the farmer's standpoint and will prove a valuable guide no matter what engine you buy.

Investigate Fuller and Johnson's Line of Farm Implements

If you want the highest standard of quality in materials, workmanship and design. Various styles of riding and walking Plows, Harrows and Cultivators, Corn Planters, Transplanters and Manure Loaders.

The Fuller & Johnson name plate has meant satisfaction to farmers for the past 45 years. We know the farmers' needs—we can supply your requirements.

Fuller & Johnson Mfg. Co.,
104 Washington St., Madison, Wisconsin.

The Best Time for Sows to Farrow.

To the Editor of The Homestead:

There would seem to be no best time for sows to farrow; one that would apply, as a rule, to all localities, conditions of climate and to the varied and different seasons—sometimes cold, wet or dry, and often interspersed with blizzards and storms. The farmer must be his own judge as to the best time for himself. Many things, in the way of suitable facilities for caring for the little pigs during the first few days of their lives, can only be known to the breeder himself.

Take the majority of the farmers in any locality with no special preparation for housing and caring for the little fellows, except a straw stack or a few boards for a roof over them in a corner of the fence wherever the sow may chance to make her nest by farrowing, and I would say that April or even May would be plenty early enough for the sows to farrow. But if the breeder is equipped with suitable quarters to protect the young things comfortably from all inclemencies of the seasons I should prefer March or even February, particularly when I desired two litters a year.

If I were raising hogs for pork purposes and wished the shoats to follow feeding cattle in the fall and winter months I would breed for May farrow, because I have known pigs about six months that when put after cattle did much better than the older hogs in feed lots. They will be ready for market by the time the cattle are ready to be sold.

I breed for two litters per year, one early in the spring and the other as early in the fall as circumstances will permit, and I have always had good success, with but small loss from weaklings. In my judgment most of the weak pigs at farrowing time result from two causes, namely: Where a farmer has several sows to breed and wishes an even bunch of hogs, all about the same age, he selects a certain time to breed them and turns the boar in with the whole bunch and they nearly all come in heat at the same time, and the condition of the over-worked male results in quite a large percentage of weaklings. In the second place, after the sows are bred, often little attention is paid to them in the manner of their living except to feed them either properly or improperly to near farrowing time. In the meantime they crowd together in bad weather on many occasions, sometimes badly overlie, sometimes getting too hot, called from their beds steaming and hot to their feed, the result being many weak pigs that are not able to survive the first few days of life; and hence greatly to the surprise and perplexity of their owner great loss is sustained.

Boone County, Mo. D. W. B. Kurtz.

After reading the article in your paper entitled "A Subject for Discussion," my mind wandered back to my boyhood days when the hog business was not at all as it is now. In those days an old sow with a nose almost as long as a man's arm would hunt a corner off from other stock and animals as much as possible. She would make a nest out of such stuff as she could find, and without help or trouble of any kind would have from eight to a dozen or more good pigs. Perhaps one would be smaller than the rest, but it would not die unless you would kill it.

Boars were as much different, also. The boars of those days were kept for many years and traded around among the farmers. If one was on the farm you could smell him as easily as you could a skunk in the hen roost. Hog rings were unknown in those days, or, at any rate, not much used. There was not much hog fence and the hogs had large territory to run over.

The hog of today is not the same kind

of an animal, and he has much different surroundings. He is bred from a boar that is only half-grown and that has been pushed along with all kinds of rich feed to fit him for sale or for the show ring. Then brood sows are raised in a like manner and are bred to the boar when much too young for the good of themselves or the pigs.

However, it is all a natural outcome of our greedy and fast way of farming. Smith made a thousand dollars last year on his hogs and Jones will try and go him one better this year. Farms in this part sell for \$80 an acre and it is a race and a chase to make payments. A poor man must put on as much "dog" as a rich man, and so it goes. Now if we would keep half as many sows and breed them so they would pig on grass, breed from fall-grown boars and throw away the hog rings and feed less corn, we would all be far better off.

Westgate, Iowa.

Reader.

Regarding this question will say that in all things we must not draw our conclusions too much from our latest experience, but from our experience, observation and convictions of many years, modified by the last results, but not governed too much by what occurred last, as this only slightly modifies the average result.

Now as to any shortage of pigs raised

How You Can Test Standard Stock Food

—Entirely at Our Risk—

We want you to use Standard Stock Food this season whether we have a dealer in your town or not. Whether you deal with us direct, or with your dealer, we will take every particle of the risk of your being satisfied. If you are not or if the food does not do all we claim, then we will return every cent you have paid for it, and it shall cost you nothing. This paper stands behind this guaranty.

WE believe you will be fair with us. We want you to believe we will be fair with you—because we will.

Now if your dealer does not handle Standard Stock Food, we ask you to tell us and give us the privilege of making you our **DIRECT OFFER.** We will ship you the amount of food you need to make a thorough trial, and if it does not do everything we claim, we will refund every cent you have paid. If you are not fully satisfied, it shall not cost you anything.

Can you ask for a fairer offer.

* * *

Your animals are not like nature intended them to be; not like they would be under natural conditions. They are highly fed, quickly developed, and easy to get out of condition.

They need a little help from day to day—not medicine, or dope, or physic, but a condiment, a seasoning, to give variety to the feed ration, and make it taste better: a tonic to aid digestion and help get more nutrition out of the feed.

Your animals need a condiment, a flavoring, a seasoning just as you need salt and pepper, mustard and catsup, sauces and gravies, and various flavorings and seasonings to make your food taste better; to aid your digestion.

Standard Stock Food makes the ration taste better so your animals eat with a greater relish. It promotes the flow of all the digestive juices so that they digest their feed more quickly, more easily, and more thoroughly.

Its tonic properties put the entire system in that prime condition which means more thrift, better finish, and bigger profits.

We can prove the value and the superiority of Standard Stock Food so fully on every point that all we need is the opportunity.

So we put it straight and plain—take all the risk—don't ask any conditions—nothing but your word that you will use the food fairly, thoroughly and according to directions.

A dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer and produce more and better results than a dollar's worth of any other stock food made whether it costs 5c or 15c a pound.

We know there is no question about Standard Stock Food paying you, and paying you big too. We have been making and testing it over 20 years. We have over 400,000 customers who have proved that it is the best condiment- tonic to mix with the feed ration that can be

had at any price.

You take no risk. We guarantee absolutely and without conditions, that it shall cost you nothing if you are not satisfied with it. You know that this paper would not print this advertisement unless we always make our word good.

We refer you to your own Bank, or to any Bank or business house in Omaha for information as to our responsibility.

**A Condiment-Tonic.
It Makes Stock Thrive.**

If We Have a Dealer In Your Town See Him; If Not, Write Today For Our Direct Offer.

Tell us how much stock you keep, and we will tell you how much Standard Stock Food you need for a fair trial. If you request it, we will send you a copy, **FREE**, of our fine stock book, **THE STANDARD FEEDER**, regular price 50c, 160 pages, 200 illustrations, chock full of valuable information on the feeding and care of all kinds of live stock.

STANDARD STOCK FOOD COMPANY, 1516 Howard St., Omaha, Neb.

the early litters are favorably considered.

For the great bulk of the fat hogs, May-bred litters may be more successful with less careful attention, but for the professional breeders and the breeding stock on the farm I do not think that any adverse experience from early farrowing will much modify the time of breeding.

Jefferson County, Neb.

ABSORBINE FOR WIND PUFFS.

Mr. Lewis J. Holmes, Glen, N. Y., writes under date of May 21, 1906: "Absorbine has been very highly recommended to me by Trainer McDonald and Mr. Geers for wind puffs on horses."

Absorbine is a prompt and effective remedy in removing wind puffs and similar blemishes. Does not blister or remove the hair and horse can be used during treatment. The first action of Absorbine is to remove any soreness or inflammation that may be present, then it goes to work bringing about a dissolution of the deposits in the underlying tissues until part is restored to normal and active condition.

You can procure Absorbine from your local druggist or dealer in horse goods, or I will send a bottle express prepaid upon receipt of \$2. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

SEND US THE ADDRESS OF YOUR FRIENDS IN NORTH DAKOTA.

Special rates from North Dakota up to the boundary line to points on the Minneapolis St. Louis R. R. and Iowa Central in Iowa and Illinois, on sale during November and December and good to return until April 15th. Send us your friends address and we will advise them fully. W. K. Adams, D. P. A.; D. B. Ransburg, C. P. A., 512 Walnut St., Des Moines, Iowa.

HORSE OWNERS! USE

CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all blemishes from horses. Impossible to produce scar or blemish. Send for circulars. Special advice free.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

"FRENZIED SHEPHERDS."

About a year ago when there was so much of frenzied finance being published in certain magazines, there appeared in an eastern farm paper an article with the above caption which attempted to show the folly of farmers who were paying the long prices asked for feeders. The opinion then was that a boom was on and when it collapsed prices would drop and there would be a lot of men left with high-priced goods on their hands on which they could not realize. As a result of this condition the writer of the article closed out his flock of pure-bred sheep at \$9 per head expecting and hoping to be able to buy them back again when the crash came at \$5. He is still without sheep, for that opportunity has never come, and the facts are that sheep and lambs are worth more today than a year ago and feeding lambs and breeding ewes are much higher in the country now than at that time.

It is a difficult thing for any man to foretell what the future prices will be. Some of the best judges of conditions have failed. There was a time

when one could figure on supply and demand and a knowledge of these conditions would equip a man for making a good estimate. Let us look at some of the prices. A year ago feeding lambs were quoted in the Chicago market at \$5.75 to \$6.40. They are now selling in that market at \$6.60 to \$7. A year ago breeding ewes sold at sales at \$4.25 to \$5.40 and now the same farmers are asking \$6 per head, and one man reports a sale of some sheep at a farm sale at \$6.50 to \$7.50. Of course no one knows just how long these prices will prevail. It certainly looks as if sheep would be good property for a year or two, at least.

We have frequently said in these columns that the men who are in line to take advantage of such prices are those who have all the time kept a good flock of sheep, whether they have been high or low. One can hardly pay too big prices for A No. 1 breeding ewes, for he does not expect to sell them again at a profit. We have often said that the men who do the most dodging in the sheep business are those who miss the golden opportunity, for they usually dodge out when sheep are low and they dodge back in again when they are high.

THE PURE FOOD LAW AND MUTTON.

The visitor at the Stock Yards, Chicago and Kansas City, often asks: "What becomes of the goats that are sold on the market and are slaughtered somewhere, since we never hear of any goat meat being sold over the block?" Yes, that is a question to be asked. Can it be possible that their flesh is transformed into canned salmon or fricassee chicken? We have been around some and have never seen goat meat on the bill of fare at the hotels and restaurants.

In speaking of goat meat the Shepherd's Bulletin says:

The chances are that most of us have at one time or another borne down upon a piece of goat meat that came to us under the nom de plume of mutton. It is rumored that an inspection law will soon be in force that will add a new item to the bills of fare, as killers will be compelled to sell goat meat as such instead of selling it as mutton, which has been the practice heretofore. Many people do not like goat meat that have no prejudice against mutton. If, when they order mutton, however, they have

a presentiment that they are going to chew a piece of billy goat, and especially, when their inability to tell the difference could be taken advantage of, it is easy to conceive that mutton itself would soon come to be disfavored by them. Where ignorance is bliss it is folly to be wise, but it is very doubtful bliss if we have a lingering suspicion that the other fellow is making a big profit on our ignorance.

Goat meat may be as good as mutton, but the meat eaters of the United States feel that this question ought to be left entirely to their discretion.

LUSTER OF WOOL.

It is not often that we see in market reports that luster is one of the features of quality in wool. Fineness, length of fiber, brightness and strength are characteristics that are carefully looked after in the wool market, but it has only been in recent years that luster has come forward as a good quality of wool. Manufacturers have now come to classify wools into three classes—lustrous, half-lustrous and non-lustrous. We have the best sample of the first class in wool from the Lincoln and Leicester breeds of sheep. It is in wool from such sheep that we find a gloss of metallic brightness, called luster. This is given it to distinguish it from dull wools. Merino wool is noted for its fineness, but does not possess the characteristic called luster, for that is foreign to its character.

In the manufacture of some certain kinds of fabrics it is a matter of some value that wool has luster, and it should be remembered that this luster is not lost during the process of dyeing. It takes on color well and shows a bright luster in the fabric.

A ram with "both legs coming out of the same hole" should never be used. If one has a narrow chested ram, he should look around a good deal before using him in the flock another year.

A great deal of disappointment will surely come to the sheep breeder who depends on poor fences. A good fence must be maintained where sheep are kept. We have heard people say that barbed wire is not good for sheep as they will pull the wool from the sheep. This is a mistake, for we had such fences for twenty years and never lost

NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred. Also Feb. ram lambs. Wish to make room for new importation. D. M. NORTON, Sanborn, Iowa.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

GOTSWOLD RAMS FOR SALE!

REMEMBER I am still selling your choice of my imported Percherons, English Shires and Belgians stallions at \$1,000 each.

A. LATIMER WILSON, CRESTON, IA.

20 REGISTERED Shropshire ewes, \$20 to \$35 each. W. C. Frazier, Atlantic, Cass Co., Iowa.

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Anita, Iowa.

more than enough wool for the birds to make nests of.

Some years ago sheep feeders said they could buy feeders from ranchmen cheaper than they could raise them and they went out of the business. Now ranchmen have found that the demand for them has caused prices to go up and the former breeder is out. It has almost arrived at a place where lambs are selling for more than they are worth.

Occasionally one will find a glutton in a flock of sheep that seems never to become filled. Notwithstanding that fact a generous feeding of grain will change a great many searching sheep into quieter ones. When a sheep seems to be looking all the time for something it is nature calling and if that is not satisfied the sheep is going to cause trouble.

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route; one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer C. T. A. 514 Walnut St., Des Moines, Iowa.

GRIND YOUR OWN GRAIN

Save time, trips to mill and expense. Grind your grain with a "Corn Belt" Feed Mill—fully guaranteed, and pay yourself the toll. Largest capacity, lightest draft, greatest strength and durability. Grinds all kinds of grains—corn in all conditions. We sell it on 20 Days Free Trial. Try it before you buy. Patented cutting and shearing process does not heat feed; reduces cob and grain to an even fineness. All other good points told in free catalog. Write for it today—ask for our free trial plan.

Spartan Mfg. Co.
234 Chambers St.
Galesburg, Ill.

ADVERTISING NOTES.

The Adams Seed Company, of Decorah, Iowa, are quoting prices on hides in their advertisement which appears on page 27 of this issue. They also buy tallow, wool, beeswax and pay the highest price for furs. Send for price list and shipping terms.

You cannot go far astray in buying a package of Conkey's Roup Cure which is advertised on page 13 of this issue by Messrs. Livingston & Co., of 713 Grand Avenue, Des Moines, Iowa, for fifty cents. It is an established fact that Conkey's Roup Cure does just what is claimed for it.

Mr. S. E. Newhouse, of St. Louis, Mo., has several thousand acres of Missouri land located around Sikeston, in the southeast part of the state, which he is offering for sale at a very low price per acre in his advertisement that appears on page 24 of this issue. Write Mr. Newhouse for literature and dates of low excursion rates.

If you have a farm home, no matter where located, which you wish to sell for cash within the next ninety days, Mr. A. Edgar Davis, of Lincoln, Neb., makes the announcement on page 25 of this issue that he can sell it for you. Mr. Davis has hundreds of buyers and keeps in touch with them through his 1,500 agents. Write him sending description and price of property, mentioning this paper.

The advertisement of Messrs. Myers & Myers, of Matthews Bldg., Milwaukee, Wis., offering a 170-acre farm, 125 acres of which is under cultivation, the rest in pasture and meadow, appears on page 24 of this issue. There is an eight-room house, large barn and other buildings on the place, and convenient to churches, school and creameries. This firm also have other properties for sale or exchange, or they will buy. Write them for their sale and exchange lists.

There is offered for sale on page 25 of this issue of The Homestead, a corn, stock or dairy farm, containing 360 acres, about 240 of which is improved. The farm is located in one of the best farming sections in Minnesota. There are fine large buildings and improvements and it is of the best of corn, clover or small grain land. The price per acre is named in the advertisement, and for terms and other information address the owner, Mr. E. M. Kieron, 311 Nicolett Ave., Minneapolis, Minn.

If it should be the misfortune of any reader of this paper to have hogs afflicted at the present time with worms the advertisement of the Farmers' Hog and Cattle Powder Company, of Shenandoah, Iowa, will be of especial interest to him. It appears on page 27 of this issue. The claim is made that the 175 million dollars worth of hogs died last year from what is called hog cholera, but it is estimated that 90 per cent really died from losses originating from hog worms, a certain forerunner of constipation, fever and hog cholera. The price at which these powders are sold is named in the advertisement. Send and get it today if your hogs are afflicted.

One of our representatives called at the Waterloo Business College recently and found its president, Mr. A. T. Harvey, busily engaged enrolling new students and adjusting them to the work in the school room. Their attendance is more than 25 per cent above that of last year. This is due to the careful, painstaking work in the school room and in securing positions for graduates. This school ranks among the leaders in commercial education and our readers may rest assured of the best of service if they send their young people to Waterloo for a business education. We especially call your attention to their advertisement on page 4 of this issue. Write for their catalog and see what they can do for you. Address Mr. A. T. Harvey, president, 500-520 Syndicate Building, Waterloo, Iowa.

It is with a great deal of pleasure that we call the attention of our readers this week to the illustrated advertisement of the Commonwealth Land Company, of Windsor, Mo., that appears on page 24 of this issue. This company have a choice lot of land for sale in the very best portions of Indian Territory, south central Missouri and western Texas, which they are offering at low prices and on easy terms. They make the announcement that they are positive that they can save money for those who purchase land of them. They guarantee good titles and they have sold one billion dollars worth of land in the Southwest. They can furnish to prospective purchasers the names of 200 satisfied customers. They consider that now is the proper time to buy land, as values are rapidly increasing and they think will double or triple

in value within the next year or two. Write them for maps and particulars.

It is a pleasure to comment upon the conservative methods employed by the G. & C. Merriam Company in the publication of the Webster's International Dictionary. Not every little slang word or phrase is put into the book regardless of its scholastic or linguistic qualities. It is this conservatism backed by the scholarship of the editor-in-chief, William T. Harris, Ph. D., LL. D., late United States commissioner of education, and hundreds of others of the greatest educators of this and other nations which has made the International the standard in the United States Supreme Court and all the state supreme courts, also the standard of the government printing office, and the basis of nearly all the school books in the country. It is endorsed by every state school superintendent, universally recommended by college presidents and educators, and adhered to as standard by over 99 per cent of the newspapers. Should you not own such a book? Get the best. See page 8.

DON'T FAIL TO READ
the advertisement of Mr. L. Odum, offering for sale a fine south Missouri stock and fruit farm, on page 24.

GOOD FARMS CHEAP.
Four especially fine farms are offered at extremely low prices by Messrs. L. A. Briggs & Co., of 206 Hall Bldg., Kansas City, Mo. Their advertisement will be found in the Lands and Homes department on page 24. Those who are interested in farms near Kansas City should write this firm.

A HEAVY FENCE.
You will find the advertisement of the Brown Fence and Wire Company, of Cleveland, Ohio, on page 16 of this issue. This firm are selling fences all the way from fifteen to thirty-five cents per rod and the freight is paid to its destination. One hundred and thirty-three styles of fence are manufactured by this firm, and our readers cannot do better than send for a fence book, addressing Brown Fence and Wire Company, Cleveland, Ohio, mentioning The Homestead when you write.

NORTH MISSOURI FARM BARGAINS.
Some of the finest farm bargains that have been offered through our columns for some time will be found in the announcement of Mr. Alvin C. Frisbie, N. Y. Life Bldg., Kansas City, Mo., in the Lands and Homes department of this issue. As was stated in The Homestead heretofore, Mr. Frisbie has moved from north Missouri to Kansas City and is investing his money in property there. He owns these farms and is offering them at less than the market value. Anyone interested in a bargain should look up his advertisement on page 24 and write him.

AN AIR-COOLED ENGINE.
Opposite this field note in this issue you will find the advertisement of the "New Way" Motor Company, of Lansing, Mich. This firm manufacture the New Way air-cooled engine. In the advertisement you will find a letter from Mr. Colon C. Little, deputy dairy and food commissioner of Michigan, that will interest you. Write without delay for catalog "L" to the New Way Motor Company, Lansing, Mich., and mention The Homestead when you write.

CATARRH TREATMENT FREE.
Dr. Williams, of Des Moines, Iowa, makes an exceptional offer to all who are suffering from catarrh. For a limited time he is offering the public a full month's treatment free. If you have catarrh of the nose, throat, bowels, stomach, liver, kidneys or bladder, bronchial catarrh or lung trouble, write Dr. Williams for his free descriptive book and symptom blanks. All this will be mailed you free of charge and you can have a month's treatment free to convince you that his methods are effective. Hundreds of our readers have already taken advantage of this offer. We know Dr. Williams personally and we know the offer is made in good faith.

GATE TALK.
Farm gates are generally an endless source of trouble, especially the wooden gate; the one that perhaps has just been repaired for the twentieth time and is literally loaded with nails and riddled with nail holes. Cattle that walk through a wooden gate generally consider before attempting the same thing on one of wire and steel construction. The reasons are many. So important in fact that the Iowa Gate Company, of Cedar Falls, Iowa, have compiled them in a booklet. They will consider it a favor if you write them for it. On page 16 you will find something about their gates that will be interesting. Nothing bothers a farmer more in winter time than to need to shovel the gates out of snowbanks. With a wire gate much of this nuisance is prevented. Snow does not bank against the Iowa gate. Further, there is a special feature for lifting the gate from the ground so that in swinging it clears any obstruction in its path. Write to these people if in want of better and more serviceable gates. Their gates are made to last a life time. Kindly refer to The Homestead in writing them.

CHOLERA AND OTHER TROUBLES.
It is a long time since the corn-belt states have been bothered so much with cholera and other troubles in hogs as at present. And just now while hogs are worth good money is the time relief is most desired. It seems strange that the owners of good hogs will allow their herds to continue in bad health, full of worms and not getting the full benefit of their food. It is just as easy to keep hogs in good shape and growing nicely as to allow them to be unhealthy and subject to disease. Many of the best-known breeders and most extensive farmers of the country say there is sure relief for the hogs in the Snoddy system of treatment. Such men as Messrs. O. S. West, Paulina, Iowa; P. W. Peterson, Vermillion, S. D.; J. C. Gaebel, Louisvill, Neb.; Dave Rankin, Tarkio, Mo.; Geo. Seckman, Ripley, Ill., and hundreds of others who have used this treatment for years very highly recommend it. These men are too well known to need introduction, and what they say counts for something. In their endorsements of this treatment these men say it is a great worm exterminator, a fine health and thrift producer and that it actually cures and prevents cholera, swine plague and like diseases. Write to the Snoddy Remedy Company, Box 862, Des Moines, Iowa, for circulars showing the picture and endorsements of the men above named and hundreds of others. They will also send you a hook of valuable information on the hog and his

YOU WANT THIS FREE BOOK

Here is a book—yours for the asking—which should be in the hands of every progressive farmer in America. From cover to cover it is brim-full of facts of vital importance to you. It comes from the greatest independent telephone house in the world—the house that has been most instrumental in bringing the blessings of the telephone to hundreds of thousands of farm houses all over the land. It shows you how simple and easy and inexpensive it is to own a

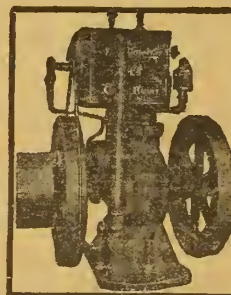

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the day—a convenience and comfort you shouldn't even try to do without, and a protection against sickness, robbery, danger and fire that pays back its trifling cost over and over and over again. You owe it to your business and your family to get this book at once and read every line in it. Your letters will get personal attention and you'll have the help of experts from this great factory in every move you make toward owning a telephone. Sit right down now and say: "Send me your 52 page booklet G12 'How the Telephone Helps the Farmer.'"

Stromberg-Carlson Telephone Mfg. Company

ROCHESTER, N. Y.

CHICAGO, ILL.

The "New Way" Air Cooled Engine.

"AN EXPERT DAIRYMAN TALKS"

Coopersville, Mich., May 24, 1906.

THE "NEW WAY" MOTOR COMPANY.
Gentlemen:—I am perfectly satisfied with the engine. I cannot find one single fault with it. We start the engine when we get ready to milk and never have to look at it or pay any attention to it until we are through. Yours very truly, COLON C. LILLIE, Deputy Dairy & Food Commissioner.

troubles. Investigate this at once and learn how to grow hogs with a profit to yourself.

THE STROMBERG-CARLSON TELEPHONE.

A book has recently been published by the Stromberg-Carlson Telephone Company, of Rochester, N. Y., and Chicago, entitled "How the Telephone Helps the Farmer." You will find, according to the advertisement of this firm, which appears on page 22 of this issue, that this book is brimful of facts from cover to cover. It comes from the greatest independent telephone house in the world—the house that has been instrumental in bringing the blessings of the telephone to thousands of farm homes. Simply take a postal card and write on it the following sentence: "Send me your 52-page booklet G-12, 'How the Telephone Helps the Farmer,' and address it to the Stromberg-Carlson Telephone Company, of Rochester, N. Y., or Chicago, Ill.

THE OMEGA CREAM SEPARATOR.

If there is anything in a name, the "Omega" Cream Separator, manufactured by the Omega Separator Company, of Lansing, Mich., ought to soon forge to the front; indeed, this is just what it is doing, because the manufacturers have from the start adopted the policy of making a high-class separator. It is a combination of about all the best things that can be found in a separator, and we have no hesitation in asking our readers who milk as many as five cows to send for the book entitled, "More Milk Money," to the Omega Separator Company, Lansing, Mich. This company offer what they call their golden rule guarantee and every reader who contemplates buying a separator will be interested in that guarantee. Mention The Homestead when you write. The advertisement will be found on page 9.

HOW FARMERS PROSPER IN CANADA.

Every farmer who is anxious to better his condition should send for and read a little book entitled "The Home Builders." In which is presented an unusual opportunity for securing a comfortable and happy home and at the same time for making more money in farming than ever before. The section described in this book is the Saskatchewan Valley, which is the great wheat region of western Canada. The figures given show conclusively that Saskatchewan produces more bushels of wheat to the acre, and therefore more money to the acre, than any other part of the world. It has a perfect climate, deep, rich soil and unfailing markets. Nor is wheat the only crop in which this wonderful valley excels. The yields of all kinds of grain and produce are immense; fruit trees bear heavily; stock is raised with least expense and largest profits; poultry is a big money maker; dairying brings great financial returns. Saskatchewan, in short, is the land of prosperity for the farmer. The book tells about one man who bought 320 acres of Saskatchewan land three years ago for \$12 an acre, paying only \$2 an acre down, or \$640, and is today worth at least \$5,000. There are hundreds of similar instances of success in Saskatchewan. And it is easy for progressive farmers to buy land and establish prosperous homes in this great wheat region. The Saskatchewan Realty & Improvement Co.,

which own thousands of acres of the best land in the region, offer very easy terms, and also give a bond agreeing to refund the price paid and 50 per cent more if the buyer is not fully satisfied at the end of five years. A copy of the book can be obtained free by addressing the St. Paul office of the company mentioned. See advertisement on page 25.

A NODAWAY COUNTY, MISSOURI, FARM BARGAIN.

In our land and home department on page 24 will be found the advertisement of 330 acres of land that should appeal to the man hunting a home in this, the finest part of the corn belt. The farm advertised is an all round productive farm, splendidly located, being within one mile of railroad station of the Chicago, Great Western R. R. and four miles of railroad station on the Burlington R. R., and about thirty miles north of St. Joseph, Mo. It is a part of the Steward & Hutchison fine stock farm, used by them for the breeding of Herefords. Of the tract offered for sale 160 acres is corn land which has produced for the past two years from sixty to eighty-five bushels per acre. It is bottom and second bottom land thoroughly tiled. The remainder is rich bottom land and is in grass. The late Jno. Steward and Wm. Hutchison bought this land expecting to hold it as a breeding farm indefinitely, but now that Mr. Steward's estate must be settled the administrators are offering this farm at a bargain price.

BUY AN "ONLY" HOG AND SHEEP WATERER.

"Now that winter is near at hand, the wise and the thoughtful man will look to the future welfare of his stock, and one of the most annoying things is the freezing of the watering tank or trough. One of the simplest hog and sheep waterers now on the market,

and one that can be kept from freezing in the coldest weather, is the "Only" Hog and Sheep Waterer, manufactured by the Only Manufacturing Company, of Hawarden, Iowa. They claim that it will not freeze when it is 40 degrees below zero. Write for further information to the Only Manufacturing Company, Hawarden, Iowa. They will be pleased to quote you prices and tell you all about it.

DEAFNESS CURED
By New Discovery

"I have demonstrated that deafness can be cured."—Dr. Guy Clifford Powell.

The secret of how to use the mysterious and invisible nature forces for the cure of Deafness and Head Noises has at last been discovered by the famous Physician-Scientist, Dr. Guy Clifford Powell. Deafness and Head Noises disappear as if by magic under the use of this new and wonderful discovery. He will send all who suffer from Deafness and Head Noises full information how they can be cured, absolutely free, no matter how long they have been deaf, or what caused their deafness. This marvelous Treatment is so simple, natural and certain that you will wonder why it was not discovered before. Investigators are astonished and cured patients themselves marvel at the quick results. Any deaf person can have full information how to be cured quickly and cured to stay cured at home without investing a cent. Write today to Dr. Guy Clifford Powell, 50½ Home Bank Bldg., Peoria, Ill., and get full information of this new and wonderful discovery absolutely free.

IN AND AROUND WISCONSIN.

The cranberry crop for this season in Wisconsin is now largely in the hands of retailers and wholesalers. Though a large crop has been harvested, prices have been good on account of co-operation among growers.

Fifty thousand pounds of carp were taken from the waters of Lake Koshkonong in a recent haul. The shipment went to Chicago largely.

The fertile tract of 4,000 acres near Appleton, Wis., owned by the Shlaeton Garden Land Company, is about to be turned into an immense bulb and small fruit farm.

Present conditions operate to increase the cost of lumber. Logging operations in the northern part of the state have been impeded for lack of full crews and other unfavorable conditions.

A large portion of Polk county, Wis., was a lumber wilderness thirty years ago. Now it contains thirty creameries and four cheese factories, supplied by two thousand patrons. Most of the creameries are co-operative and the total output crowds the \$450,000 mark.

The acreage of peas in the Sturgeon Bay district this past season was 2,500. Over two and a half million cans of this vegetable were shipped to various parts of the country.

The millions of saw-handles that are being made nowadays come largely from the apple orchards of Michigan. At Hartford is a sawmill that deals in this kind of material. All of the orchards within two or three hundred miles are closely watched for any trees that for any purpose may be cut down, when they are bought up and shipped to the mill.

Good cabbage in Wisconsin warehouses is selling to wholesalers for nine dollars per ton. The price is advancing rapidly and choice stock is not over plentiful.

At the sub-station experiment farm near Iron River in Northern Wisconsin, some excellent results were secured this past season in growing sugar beets. Both the sugar content and purity per-

centage ranged higher than in other parts of the state. The average test for the sugar is 14.9, while the station workers secured two per cent more. Results are more indicative than otherwise, and further work will be done next year for conclusive evidence of the superiority of this region for beet growing.

The Oconomowoc Poultry and Pet Stock Association will give its second annual exhibition from December 7th to 13th. Special features have been arranged for, including a talk to poultry men by James A. Tucker, an orchestra concert, a baby show, and boxing matches between game birds. Many fine prizes are offered in the various classes and the judges are to be experts in the feathered stock line. James A. Tucker, of Concord, Mich., will be judge of poultry, and H. Vanslow, of South Milwaukee, judge of pigeons.

Sir Thomas Lipton will be an exhibitor at the International Live Stock exhibition. He will show his saddler, Erin-Go-Bragh. Sir Thomas' entry adds another bit of international flavor to the nominations for the stock show, which already include the shire horses of King Edward and Lord Rothschild as well as Lord Caven's champion flock of Hampshire sheep.

The Lawrence University at Appleton, Wis., has just completed the erection of \$55,000 library. Andrew Carnegie donated the money for this building.

State Game Warden Svenholt has, after consultation with the attorney general, ruled that allotted Indians are subject to the game laws. Heretofore the Indians on all of the Wisconsin reservations have been allowed to hunt there during the entire year. Ashland people, who were unable to get venison in any other way, were always able to do so by visiting the Red Cliff or Bad River reservations, but if the ruling of the state game warden is enforced, the only Indians who will be exempt from the game laws hereafter will be those who have not received allotments.

The invasion of the Mississippi valley by the Japanese has begun. A small company has already located on the Mississippi, five miles below Red Wing, Minn., on the Wisconsin side. Many more are to follow their countrymen in the spring. In this band are sixteen or seventeen young Japanese. They are all vigorous, alert, and busy, and were found doing carpenter and mason work and busy at various other kinds of employment.

"Jobbers who sell adulterated goods are attempting to get them off their hands in every state in the union before the new federal pure food law goes into effect January 1st," said Dairy and Food Commissioner Emery of Madison, Wis. "Once the retailer has those goods on his hands and finds they are adulterated it will be too late to reship them after January 1st, for the national law makes it a serious offense to ship adulterated goods from one state to another. The pure food laws of the state have been rigidly enforced and during the year 100 prosecutions have resulted."

A Talk on Corn.

To the Editor of The Homestead:

It is strange that the farmer who would spend hundreds of dollars for the improvement of his live stock, when he was financially unable to invest big sums in a sire, would overlook other things nearer to him and easier done. I have reference to the improvement of corn in which more can be accomplished, with less money, than in any other way pertaining to advanced agriculture. Many claim that they have bred seed corn for so long that they know all about it.

The mysteries of plant life are many and deep and the man who has solved them all don't live. I see that the increase in yield of the corn in the state of Iowa is explained by some agricultural writers as being solely the result of the improvement in seed corn. Now I don't want to belittle the work of any man or set of men, but to give those men the whole credit for the bigger yield in Iowa or elsewhere, is misleading. There

Our SPECIAL TIME PRICE Is What WE Want to Send YOU NOW on a Detroit Tongueless Disc Harrow

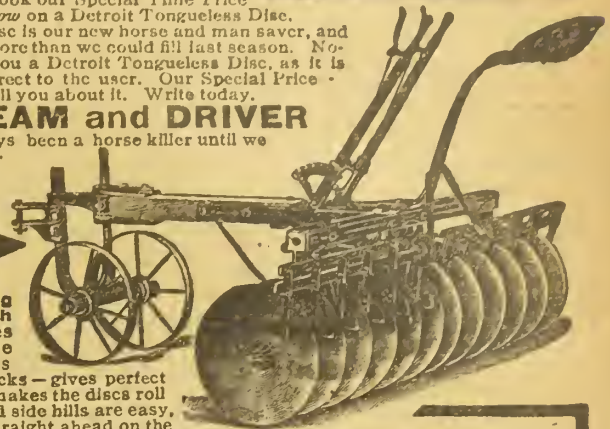

YOU can't afford to overlook our Special Time Price. We are making right now on a Detroit Tongueless Disc. The Tongueless Disc is our new horse and man saver, and we had nearly 1463 orders more than we could fill last season. Nobody else can make or sell you a Detroit Tongueless Disc, as it is our patent. We sell only direct to the user. Our Special Price will surprise you. Let us tell you about it. Write today.

Easiest on TEAM and DRIVER

Disc Harrowing had always been a horse killer until we made our Detroit Tongueless Disc.

This Light Truck Instead of Tongue is only one of the Great Special Features

Doing away with the tongue saves rubbing and side jamming on your horses—saves weight on their necks—gives perfect balance to the frame and makes the discs roll smoothly. Sharp turns and side hills are easy, as the team always pull straight ahead on the Eveners. The Detroit Tongueless is altogether the lightest draft harrow made, and will save its cost in horseflesh alone, besides doing your work easier for you, better for you and quicker for you.

We Allow '30 Days' Test FREE

We want you to order it on our 30-Day Field Test Trial. We want you to be satisfied. We want you to know that the Detroit Tongueless Disc is just exactly what we claim it is before you pay us one dollar

We Pay Freight—Both Ways If Not As We Claim

We pay the freight direct to you anywhere. You don't send us a dollar until after thirty days, and then you can pay cash or settle on our liberal time terms, if you find that it does just what we say it will. If it doesn't—you can ship it back to us at our expense. A month's work in your fields will

show you. We want to show you.

Order at Once for Future Delivery

and we guarantee to ship you the Disc when you want it. To order now is the only way to be sure of getting our Disc when you want it, for it looks as if we were again going to be behind in our orders in the busy season. Our right-now special time prices provide for longer time on advance orders. Don't put off writing for booklet and prices, anyway. You will be interested to know more about this harrow than we can tell in our advertisement.

AMERICAN HARROW CO., 142 HASTINGS ST. DETROIT, MICH.

are three other factors not to be overlooked and not to be neglected. First, better cultivation; second, clover, and third, rotation of crops. There was a time when careful cultivation did not pay best. We have seen the time in Iowa and Nebraska when it brought better returns to skim over more ground if we wanted more corn. The land was new and fertile, the weeds easier subdued and plenty of land lying idle all around us, which, with a plowing or two, would produce fair corn. One of my neighbors raised in the '80's three years in succession 10,000 bushels of corn each year with three cultivators. He could not do it today. Who thought of plowing corn those days after harvest with a single horse cultivator? While on my way to the National Farmers' Congress in Rock Island, Ill., recently, I saw more clover in Iowa and Illinois than I have ever seen before. I find in my old home in Illinois which I left thirty-six years ago, some farms more productive than they were those years.

The grain farming and selling has given away to mixed farming, and I find a method of farming established in the older states that I have for years recommended for Nebraska and particularly the western part of it, that is, "mixed farming." I don't advise dairying exclusively, but every farmer should milk a number of cows; nor horse breeding, but every plow on the farm should be pulled by a draft mare regularly bred and of whatever breed takes the fancy of the owner. A few sheep do well without extra effort to provide for them; hogs should be kept, and last, but not least, poultry. Not a bushel of grain should go to the elevator, all should be fed on the farm. I found the above conditions practiced on many farms in Illinois that this year have a bigger corn yield than they had for many years. The stubble were sown to clover in the spring, in many cases to be turned under the next fall. The pastures are not gnawed out of the ground, and lots of vegetation is allowed to fall down to enrich the ground and hold the moisture for the benefit of crops to follow, but I must return to my subject.

The selection of seed corn is of course the first important factor in corn raising, but I don't agree with the experts as to the importance of certain points claimed to be of absolute necessity for best results. For instance, the idea of selecting all perfect ears for seed I don't think a necessity or of great importance. I think a well-developed kernel of good variety is as good as any, at least this is my experience. In 1874 our corn crop was a total failure, the

only failure ever experienced in this section. The nearest corn we could get was at Hamburg, Iowa, about forty-five miles from here. A number of us drove over in wagons and got a load of nubbins—nothing else could be gotten. The best was reserved for seed, but we could get only a few kernels from many of the ears that would work in the planter. In some cases not over fifteen or twenty kernels were taken from an ear. We tested this corn and it grew all right, but we still were afraid of it and sent to Illinois for part of our seed corn. We received all nice, large ears. Next year the more acclimated Iowa corn produced the best, most perfect and uniform ears. From time to time we have observed similar results. While myself and most farmers would get their seed corn from the field which was the best on the farm, one of my neighbors would gather his seed on thinner soil, saying he would raise nice big ears if he planted this seed on his richer ground. He is one of the best corn raisers in the neighborhood.

What about suckers? I think they are the result of conditions connected with the growing of the particular crop in question. We have had the fewest suckers in fields from which seed was gathered that had the most suckers, and vice versa. When I commenced farming in Illinois in 1866 I could get no seed corn that had been properly cared for. The best I could get were the tips and butts and some chaffy ears, chaffy from the fact that they had been picked before maturity. Those kernels would not work in the old-fashioned planters of that date and we had to plant by hand, three in the hill. The result was three healthy stalks, with good, healthy ears, not all tips or butts, either. Give me for seed a good, healthy kernel of a good variety well acclimated and I don't care whether a few rows run out to the end. I think this dropping out of rows is a result of climatic or atmospheric conditions only. The silks are so delicate at first that the least thing might injure them, and not fertilize the kernels to the end oftentimes. I believe in the best seed corn obtainable and taken care of in the best possible way, but think other things should be well considered and given due credit, such as cultivation, rotation of crops, sowing of clover and other fertilizers, and soil culture. Wm. Ernst. Nebraska.

There is "Advertising" and there are "Advertisers," but this question is analyzed this week on page 5 in a manner that ought to interest every land owner who reads The Homestead.

FREE! My Book About Curing DEAFNESS AND EYE DISEASES AT HOME

I have published a new 128 page book which tells of a method by which people who are willing to devote fifteen minutes of their time each day for a month or two, following my instructions, can cure themselves without leaving home or visiting a doctor. Of Deafness, Head Noises, Catarrh of the Nose, Throat and Head; Catarracts of the eyes, Granulated lids, Sore eyes, Pterygiums, Films, Wild Hairs, Eye Strains or any weakness or disease of the eye, ear, nose or throat. This book gives the causes and symptoms of each disease. It tells you not only how to cure these diseases, but how to prevent blindness and deafness.

I want to place one of these books in every home in the United States. Write me a letter or a postal card and tell me your disease and you will receive this grand book and my opinion free of charge, and learn how people from every state in the United States are restoring their sight and hearing at home by this new method.

I want no money for this neither does it place you under any obligations to me whatever. I simply desire to show and prove to you how easy it is to get perfect sight and hearing by my method. Write to me today. Address

DR. W. O. COFFEE

340 Century Bldg., Des Moines, Iowa

Storing and Purchasing Seed Corn.

There are many different methods of storing seed corn, but the experiments which have been conducted by this station indicate:

1. That it is not advisable to harvest immature corn and place it in a warm room, as there is danger that the corn will begin to germinate as a result of the moisture and warmth.

2. That corn intended for seed should be allowed to mature thoroughly on the stalk or in the shock before husking.

3. That the best results are obtained when stored in a dry and thoroughly ventilated place.

4. That cold does not injure the vitality of corn when it is thoroughly dried and kept dry; but, on the other hand, if allowed to gather moisture, freezing will induce the vitality and may destroy it entirely.

5. That it is unwise to store seed corn in barrels or boxes, as it will gather moisture. Corn often contains a great deal of moisture, even though it appears to be thoroughly dry. This is especially true during the fall and early winter months.

The one thing that seems to be the most essential in the storing of seed corn is thorough ventilation.

In securing seed, the factor of greatest importance is obtaining corn which will give the largest yield per acre, of the best quality. The acre is the unit in corn production, and therefore that seed is the best which gives the largest yield per acre. Carefully selected seed of pure-bred varieties gives the largest yields. Hence, the important question for the farmer who must purchase seed is not one of cost, but of quality. It will prove far more profitable to pay three or four dollars for a bushel of seed which will germinate well, and insure an even stand and a large yield, than to accept an inferior grade, even though the first cost be exceedingly low. Purchasing seed corn in the ear offers the farmer the surest and safest way to secure seed which will prove satisfactory.

Heretofore the common practice among corn breeders and seedsmen has been to send out to farmers shelled corn. This method of handling seed corn can never, in any adequate way, really help growers to improve their corn. This is true because much of this corn has been indiscriminately purchased from farmers who have paid no attention to the selection and breeding of the corn. For this reason this seed often proves no better, if as good, as that which the farmer himself has been growing in years past.

A marked advance will be made in the

Economy is practiced, comfort is increased, and work is lessened by MACBETH lamp-chimneys.

* They cost less if you figure by the year instead of by the chimney. MACBETH lamp-chimneys add to the brilliancy of the lamp, and it is taken care of with half the bother when fitted with a MACBETH chimney.

There are other reasons. The Index explains them and also tells, all about lamps, their proper chimneys and care. It's free.

Address, MACBETH, Pittsburgh.

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsome printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published by its own \$20,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people, its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

improvement of the quality and yield of corn when farmers realize the importance of purchasing seed corn only in the ear. The following facts are offered as evidence that the custom of purchasing shelled corn is unwise and detrimental to the best interests of corn growers.

When the corn is in the ear the farmer can see just what he has. If, after a critical examination he is confident that it is unsatisfactory he can reject it and return it at once. This will enable him to secure corn from another source or use his own seed, which, in fact, may be superior to that which has been shipped to him. He will not lose a year in discovering that he has an undesirable type. The corn grower seldom buys seed corn for his entire acreage, and therefore it is possible for him to select, from the few bushels which he has purchased, the best ears, in the entire shipment. If these ears have been selected with care and are of a desirable type as to size, shape, market condition and character of the kernel, they should be planted on one side of the field where conditions are the most favorable. Thus a limited area is grown from the best seed. This portion of the field should yield superior seed for his future crops. When this plan of selection is repeated, year after year, corn is grown which is well adapted to the latitude and conditions in which it is raised.

Corn on the ear is also the farmer's strongest guaranty against the fraudulent practices of unscrupulous seedsmen, who often purchase entire fields or cribs of corn and shell it and ship it without care for selection or real merit. Seed corn handled in this manner is of inferior type and quality, often lacks vitality, and must necessarily give a poor stand and a low yield.

Again, when seed corn is received on the ear, two or three kernels from each ear should be tested. Those ears which show poor germinating qualities can be rejected. On the other hand, if shelled corn is purchased the kernels from the ears of low vitality or germinating power are mixed with the others and cannot be separated. The result must necessarily be a poor stand and a reduced yield. Experiments show that all the kernels from an ear possess approximately the same degree of vigor and, therefore, the vitality of an ear can generally be determined by testing a few of its kernels. If every purchaser will decline to receive any seed corn except in the ear, the most important step tending toward the improvement of seed corn will have been taken. Reliable seedsmen will stand ready to supply seed corn in the ear whenever the demand is such as to warrant it.

The purchaser, however, must not expect too much. Good ears of corn—those approaching perfection—are few in number. Seed ears such as are exhibited at corn shows are hard to find, and the farmer must not expect to receive corn from any source which is up to the standard of show corn. However, uniformity of shape, size and color of both ears and kernels—such uniformity as indicates good breeding, trueness of type, strong vitality, and freedom from mixture—should characterize every ear in the shipment. The question of seed corn is important, for upon the type and quality and germinating power of the seed planted will depend in large measure the stand, yield and quality of the succeeding crop. Too much emphasis cannot be placed upon the fact that success or failure in corn production is based very largely upon the seed planted. (Bulletin Iowa Experiment Station.)

LANDS AND HOMES FOR SALE

SOUTHWEST

THE LAND WHERE FARMERS MAKE GOOD

It is easy to succeed in the S. W. Good rich lands cost only a small part of what similar land costs where you now live. Crops are bigger and bring higher prices. The climate is mild and healthful. Now is the time to sell your few acres in the North and buy a big farm here. Land values are rapidly increasing and will double or triple in value within the next year or two.

HOMESEEKERS AND INVESTORS Our Co. has bought up large quantities of choice lands in the very best portions of Indian Territory, (now New State of Oklahoma), South Central Mo. & West Texas, which we offer at low prices and on easy terms. We can save you money. Our Co. is responsible, having \$100,000 paid up capital. We guarantee good titles. Have sold over \$1,000,000 worth of land in the S. W. Can give names of 200 satisfied customers. Buy direct from owners. We are the largest land-holders in Ind. Terr., and largest dealers in farm lands in the S. W. Write for maps and particulars to

WINTER VISITORS. WEEK END RATES.

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 5th to March 31st THE CHICAGO GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Oneida and south as far as Blockton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

EVERY DAY

This winter the Chicago Great Western Railway will sell tourist round-trip tickets to points in Alabama, Central America, Colorado, Cuba, Florida, Georgia, Louisiana, Mexico, Mississippi, New Mexico, North Carolina, Porto Rico, South America, South Carolina, Tennessee and Texas at very low rates. Tickets have limit of June 1st, to return and allow some stopovers. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa, for full information.

25,600 Acres TEXAS LAND

WE will sell as a whole, or in part from one section up, the forty sections of land controlled by us located in that portion of Texas being brought into prominence by the building of new railroads. This land is not in the Panhandle, nor on the coast. If you are interested in getting the best where every acre is a perfect one; where fine wholesome water can be obtained at from 10 to 30 feet, then write at once for full description, prices, terms, plats and state map of Texas free.

UNITED STATES & MEXICAN TRUST COMPANY,
Land Department,
101 Bryant Bldg. KANSAS CITY, MO.

TEXAS LAND

ARE YOU INTERESTED?
We have for sale lands in the Texas Panhandle, on the line of R. R. all the way from Oklahoma to New Mexico, from ¼ section to 10,000 acres, at prices ranging from \$5 to \$20 per acre. Why go from 10 to 40 miles from R. R. to buy lands when you can buy it at the same price along the railroad—and frequently near large towns? Stop and give this question your attention, and write to us or call and see us. Correspondence solicited. Join our next excursion for Texas.

BOYER & PETERSON,
Texas Land Dealers,

"On to Canada!"

Get a Home and Farm in the Heart of Saskatchewan, the World's Great Wheat Bin. Help Canada Feed the World

Western Canadian Farmers Raised a \$60,000,000.00 Wheat Crop This Year.

Farmers, get in the line of prosperity and progress up here in Western Canada. Come out where the soil is three feet deep—rich enough to grow anything—where crops never fail—where every farmer has money in the bank—where paupers and poverty are unknown.

Come and raise wheat where the average yield is 25 bushels to the acre. Where the first crop from virgin soil nearly pays for your land—no clearing to be done—the soil is ready for the plow.

This is the place to live, among an intelligent, industrious and prosperous people—most of them from the States. Give the young folks a chance, let them enjoy the advantages of Canada's fine schools and churches—bring them up to rugged manhood and splendid womanhood in this great land of health and opportunity.

Let us write you a personal letter about this wonderfully rich agricultural region, and send you our Free book, "The Home Builder," which tells why the country is rapidly filling up with the best and most intelligent farmers in the whole world.

It tells you how newcomers from worn-out farms get independently rich in a few years.

"The Home Builder" tells you everything you naturally want to know about this Great Wheat Region of Western Canada—about the healthful climate, the abundance of pure water and cheap fuel, the social and educational advantages.

Remember that land values are advancing rapidly and there's no time to lose. You can buy a 160-acre farm from us now for cash at the lowest price, or on easy payments, if you prefer, and our Company will give you a Guarantee Bond, stipulating that if at the end of five years you are in any way dissatisfied, we will buy back the land at an advance of 50 per cent over the purchase price.

We make this guarantee offer because we know the fertility and crop-producing power of the land, and that five years from now, under cultivation, it will be worth very much more than what you paid for it.

Over 125,000 people are coming into Western Canada this year. "On to Canada!" is the watchword of the hour. Come over while the choicest land that lies outdoors is yours at much less than its actual value. Write for free book F, at once, and ask as many questions as you wish. They will be cheerfully answered.

Saskatchewan Realty & Improvement Company

(Capital \$250,000.00)

312 Jackson St., St. Paul, Minn. Regina, Saskatchewan, Canada.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$80 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. This is no experiment, as the country has been thoroughly tested. Special inducements to parties buying this fall. Railroad fare refunded to purchasers. Write for pamphlet to

THE BIG BEND LAND CO., WILBUR, WASH.

Echoes From a Kansas Farm

By Henry Hatch

Good weather is like good health, we don't realize all that it is until the reverse occurs. Just now the ground is covered with a six-inch snow, an unusual fall for Kansas, in November.

Many have been so far behind with their work that the storm caught them without proper shelter for their stock. Especially did it catch those who depend upon hay sheds for their cattle. Hardly a hay shed in the neighborhood was in repair.

Compared with twenty years ago, there are few hay cattle sheds in the country, but there are too many as it is. There are some folks who contend it doesn't pay to build with high-priced lumber. The fault with a hay shed is not that it cannot be made warm, but that it is usually neglected.

In a snow like this is when the broad-tired wagon pulls hard. We find it impossible to use ours when the snow freezes to the tires, as they ball up until the team can hardly pull the empty rack. If, as some recommend, every farmer had nothing but broad tired wagons, it would be a case of not using a wagon in times like this.

Of all stock, cattle are the dumbest and dumbest in a storm. Horses and colts will warm themselves with exercise, hogs will hunt the warm place and stay there, but a cow will hump up and take the wind, not as much as stirring out of her tracks to warm herself by exertion.

We consider the best improvement made on this farm within the past three years has been the windmill and pipe that puts water in the yards around the buildings. A great many of our best farmers are slack in taking hold of anything like this. For \$150.00 we got something that proves a time and labor saver every day in the year.

Buying more land is laudable for the man of large family. It is a great thing to have all the children settle near when they start out for themselves, but for the head of the small family to put every dollar made into more land, letting the home farm go with scant and unhandy improvements, looks a little like folly. Some folks seem to think they have more than one life to live here, or can take all they have made with them when they go.

For some years now, though the crops have been good, the man who has made the most money has not been "the

rancher," or the man who runs a lot of ordinary stock cattle and farms many acres with hired help, but he who has looked better to what might be called by some the small things. Take poultry and good milk cows, for instance, the man who has concentrated the most on these two lines has done well.

Kansas is not a state of sleighs, but, immediately after a snow that makes sleighing possible for two or three days, it is a state of sleds. It is surprising how quick a Jayhawker can construct one of these uncertainties. We see them in all shapes and manner of construction, and have helped to build several of the unreliable affairs. But, then, the best workman in the land could not make a palace car out of two crooked sticks from the timber and boards off a hog pen.

People must learn that it is dangerous to pasture cattle on alfalfa. We have just had a letter from a reader who reports the loss of one of his best milk cows by the alfalfa route. This cow, too, had been used to running on the alfalfa pretty much all summer. It was thought that she might be immune, but one morning her carcass was found in the field, bloated like a balloon. It is claimed by some that a sprinkling of blue grass sown with the alfalfa will make it less dangerous.

It looks as though the railroads would have to double-track their main lines, build more branches and double or triple their number of box cars, or the business of the country will soon be crippled. There is such a thing as falling with its own great weight, and the business of the West seems in this danger. A few years ago it was the lack of salable products that troubled; now it is the great quantity of them, a quantity so great that the railroads are unable to handle all.

In a little town not far from here, where there are three grain elevators, all are full of grain and one has 30,000 bushels piled on the ground. But two cars of corn have been shipped in the last several days by this elevator, simply because no cars can be had. It is really getting to be a serious matter. Further west in the state, according to newspaper reports, a coal famine is immediate on account of lack of cars to haul the coal in. To use a common expression, the railroads are simply all in as far as taking care of the business is concerned.

W. W. Brown's Short-horn Sale.

The sale of Short-horns held by Mr. W. W. Brown, of Weston, Mo., at Kansas City, Mo., on Wednesday, November 28th, may be classed among the successful sales. No high prices were realized, but every animal was sold and the herd brought within a few dollars of what Mr. Brown expected to realize. No breeders from a great distance were present, but some of the most representative breeders tributary to Kansas City were present and lent their support. The Scotch bull, Tillycalra, sold to Mr. J. F. Adams, of Bosworth, Mo., for \$215. Messrs. A. M. Ashcroft & Son, of Atchison, Kan., bought four head, among which were the two Scotch Eliza cows, Lulu and Mayflower, both daughters of Pride Victor and out of daughters of Sir Charming 2d. Both had heifer calves at foot. For Lot 8, Lulu and heifer calf, Messrs. Ashcroft & Son paid \$200; for Lot 16, May Flower and heifer calf, they paid \$130. Messrs. C. F. Wolf & Son of Ottawa, Kan., were the next heaviest buyers of females. For lot 11, another Scottish Eliza, they paid \$105. Lot 23, another of the same family, went to Messrs. Wolf & Son at \$120. Messrs. Fleming Bros., of Pleasant Hill, Mo., secured Lot 13, a Pride Victor cow and bull calf, for \$100. They also took others at prices ranging below the \$100 mark. Mr. T. F. Stone, of Weston, Mo., was a persistent bidder on the Scotch sorts and bought several head. On the twenty-six head sold an average of \$68 was made. Colonel Harri-man did the selling to the entire satisfaction of both buyers and seller.

Gudgell & Simpson Hereford Sale.

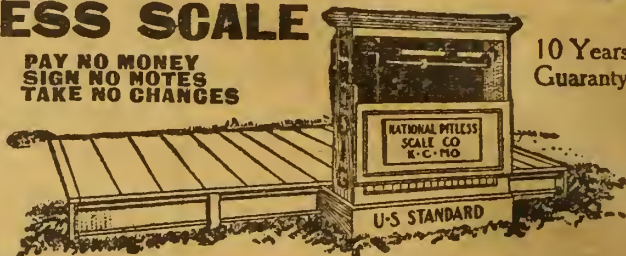

Considering the number in attendance at the Gudgell & Simpson sale held at Omaha, Neb., on November 27th, these gentlemen made one of the best sales of Herefords held this season. As is the custom of this firm they sold young things exclusively, and all of their own breeding. Nothing had been especially fitted for the sale and those who bought will find that they have bought good values and stock that will continue to improve and that will add to their herds. Mr. A. J. Chapman, of Rollins, Wyoming, was the heaviest buyer of bulls. Mr. Homer Bean, of Oberlin, S. D., bought freely of the females and secured several fine hargains. The top on bulls and the top of the sale was \$180, paid by Mr. Jno. Secord, of Mechanicsville, Iowa, for Lot 45, an October yearling. Mr. Secord also took several fine females. One hundred seventy dollars was the top on females, two head selling at this figure. Messrs. Miner Bros., of Craig, Neb., were good buyers and took several head. Colonel Callahan, of Omaha, assisted by Colonel Zaun, of Independence, Mo., did the selling.

PITLESS SCALE

FREE PAY NO MONEY
SIGN NO NOTES
TAKE NO CHANCES

Direct
From
Factory

10 Years
Guaranty

My One Profit Plan Saves You From \$30 to \$50.

If you would rather keep \$30 or \$50 in your own pocket than to hand it over to some dealer, I will show you how to do it—

And still get the scale you want. I make the Knodig Pitless Scale and sell it direct from my factory to the user.

Nobody else is making so good a scale at so low a price—or a better scale at any price—Nobody is selling on such liberal terms.

And my big illustrated catalog explains why

You simply can't afford to buy a scale until you know all about my proposition.

Send for my "Knodig" book and examine the brand new Models A. and B. with Protected Bearings.

Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in mild weather.

Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

The Man Who Stands
Back of the "Knodig"
Pitless Scale.

Can be moved anywhere on your land wherever the work happens to be.

Absolutely accurate because tested according to U. S. Standard of weights.

Why not deal direct with me and save all that profit that is added on for Agents, Salesmen, Jobbers and Dealers?

That \$30 or \$50 you pay the dealer doesn't make the scale any better.

I am willing to PROVE that the Knodig Pitless is the scale you want

I will send a set to you or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer on a month's free trial

You have nothing to pay until you are satisfied.—Don't send me a penny. Simply give the "Knodig" a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half-tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover.

Write for Catalogue! To-day.

HUNTER-TRADER-TRAPPER

The only MAGAZINE devoted to the interests of the trapper. Send 10 cents for copy. A. R. HARDING PUB. CO., Columbus, Ohio

that this book is hrimful of facts from cover to cover. It comes from the greatest independent telephone house in the world—the house that has been instrumental in bringing the blessings of the telephone to thousands of farm homes. Simply take a postal card and write on it the following sentence: "Send me your 52-page booklet G-12, 'How the Telephone Helps the Farmer,'" and address it to the Stromberg-Carlson Telephone Company, of Rochester, N. Y., or Chicago, Ill.

HINTS FROM THE FEED YARD.

LESLIE SMITH.

Many of the breeders of live stock depend entirely too much on the established reputation of the breed they own. Individually, they do not advertise as freely as they should; they seem blind to their own interests in this regard. Come, breeders, advertise your herds and let the people know more particularly what you have! You may be doing well without advertising, but would do much better with it, as inquiries for well-bred stock would then be addressed to you instead of to the publishers and editors of newspapers.

The question of housing and shelter for stock comes up as regularly as winter comes around. Those who are fortunate enough to have lots of stable room are all fixed, but be careful and don't get your stables too hot at night, as you may do more harm to your stock than if you had no stable at all. Keep your stables well ventilated; don't have them draughty, but try and get all the fresh air you possibly can, for fattening cattle are growing cattle. A grove with a shed will make a good shelter, but for milk cows and calves something more substantial ought to be provided.

It is a queer problem, this breeding. You mate two animals that you think will nick just right for sure, but the result is often the opposite of your expectations. Not long ago a young man asked me the reason why nearly all the best Short-horns were roan in color. He had been looking up a good many show-yard records. I had to tell him that it had always been so, or, if not always, since Jacob of Old had tried his hand at breeding cattle and used the streaked rods.

Not long ago I read an article on exercise or no exercise for fattening or breeding cattle, the writer advocating keeping the cattle tied up all the time to get the best results. I have always contended that in order to secure the greatest possible benefit from food consumed we must necessarily have a condition of as perfect health as it is possible to get, and in order to attain that perfect health we must avoid violating any of the laws of nature compelling an animal to stand tied up by the neck week after week and month after month. Allowing no exercise is surely in direct violation of nature's laws. It seems to me that a sufficient amount of exercise is as necessary as a balanced ration to get good results.

A cow is valuable in proportion to the perfect working of her digestive organs. Every article of food has a nutritive value, which value can only be shown by experimenting to know its effect on the animal fed in producing beef in beef animals or milk in milk animals. An animal is valuable in proportion to the smallness of the feed ration it requires to produce a given number of pounds of beef or pounds of milk. Therefore the intelligent breeder should secure those animals which will produce the

most beef or the most milk to a given ration.

Another point in feeding stock that occurs to me as being worthy of mention and one which I have had occasion to notice is that the animals having strong, powerful jaws, being widened out at the nozzle, with good breathing capacity, are nearly always the best doers.

In looking over some improved Yorkshire hogs, descendants of some improved Yorkshire sows imported a few years ago, I notice a good many of the pigs belonging to the third and fourth generations are more of the lard than bacon type. I came to the conclusion that with about two more generations of feeding corn the bacon type would be bred or fed out and they would be lard hogs. At the same time we have been using up-to-date improved Yorkshire boars of the very best bacon type we could find.

Get your water supply for stock fixed up for cold weather. Get the wells and tanks all banked up in good shape; get the tank heater in place and keep the icy chill off the water. Be liberal with the feed pail among your young and growing stock and be kind to them. Don't have them make for the farthest corner of the pen or yard when you make your appearance.

This is the season of the year to cull out the herds. There are always some females in nearly every herd that it will not pay to keep over the winter—some that are not good breeders, some that won't breed and some that don't give enough milk to make it profitable to keep on.

Not long ago a friend wrote asking me what was the best tool for dehorning, the saw or clippers. We recommended the clippers for immediate use, but for the future would recommend the Galloway bull.

A neighbor told me not long ago he fed a bunch of steers. Part of them had some Jersey blood in their veins, the balance were Short-horn grades. When he came to sell, the Short-horn grades brought \$10 per head more than the Jersey grades. That convinced him that if he was to follow up fattening cattle it would pay to use a beef sire, which is right. Breed and feed the animal that will grow sirloin and porterhouse steaks and prime ribs of beef and leave those alone that grow punch and soup bones.

The other evening I was thinking of the difference in the use and value of animals. I had been reading of some sales in Scotland of Short-horn bull calves, \$4,000 each and upwards being paid for some. I picked up another paper and read that a New York woman had paid \$5,000 for a pet dog. She had all sharp-cornered furniture in her apartments removed that the dog might not injure himself through bumping against it. I thought verily some men are unfortunate not to be born \$5,000 pups.

Retired Farmers Killing Time.

To the Editor of The Homestead:

Three years ago I found myself disqualified, on account of age, being eighty-six years old, for manual labor. I found it necessary to retire and find a home with one of my daughters in town, where I am now located, surrounded by four wide-awake grandsons and living over with them my own boyhood and early manhood by taking a lively interest with them in the public schools.

I am one of those who believe it better for us older fellows to keep in touch and stand shoulder to shoulder with Young America in all that relates to educational, social, religious and business life, although properly counted out of the ring on the score of age. Accordingly, since coming to town, instead of joining the already crowded list of professional loafers on the streets or playing the gossip in the places of business of my friends, I concluded to devote a large share of my leisure in posting up in respect to our most excellent system of popular education, by visiting the schools and comparing notes with the log schoolhouse of my boyhood or the "little red" of the teaching days of my young manhood.

True, I had some misgivings as to the reception an old retired farmer would receive at the hand of the four score

Free Catarrh Treatment

To you for one month—I make this exceptional offer to you as a catarrh sufferer so that you may have an opportunity of testing my new method of treatment, and satisfy yourself that I can do all that I claim I can do for you—one month's treatment has permanently cured—long standing and chronic cases, however, require a regular course of treatment—and this one month's free treatment will enable you to decide intelligently if you should continue, so confident am I of the benefits you will receive that I do not hesitate to make you this exceptional offer.

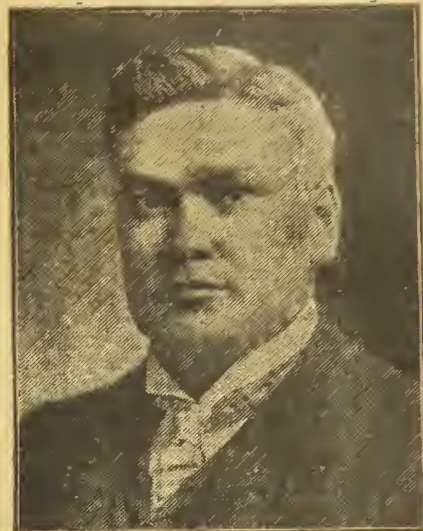

My Cured Patients Are My Best Recommendations

Dr. T. F. Williams: I had catarrh of the stomach for years and could find no relief until I began your treatment, and am now perfectly cured. You can refer my case to any one, and anything I can do for you, I will be only too glad to do.

T. A. HANSON, Boone, Iowa.

Dr. T. F. Williams: I am glad to say that I am perfectly cured of catarrh by your priceless medicine, and I am very thankful to you. I will certainly tell my friends how you cured me.

HOG WORMS ARE KILLING YOUR HOGS

Dead Shot Worm Killer Kills the Worms and Saves the Hogs.

One hundred seventy-five million dollars worth of hogs died last year from so-called hog cholera. Two hundred million dollars worth died this year. Ninety per cent of all losses originated from hog worms, the certain fore-runner of constipation, fever and hog cholera. "Farmers," don't experiment with uncertainties, but send direct to us for our "DEAD SHOT WORM KILLER." Five cents per head is all it costs to rid your pigs of hog worms. Price, 3 lbs., \$1.50; 7 lbs., \$3.00; 10 lbs., \$4.00. Express charges prepaid to your nearest express office. Send today and you will get the remedy tomorrow. Address,

Farmers Hog and Cattle Powder Company, Shenandoah, Iowa.

or more dandy teachers of the city, yet believing that I could so manage my card as at least not to meet with a cold shoulder, I made the venture. I was agreeably surprised to find myself most heartily welcomed by every teacher and officer and a most respectful and friendly greeting from the pupils. Visiting every room and but one room each school day it requires nearly a year to go the rounds, including the business college and academy, and now on my third round I find myself more heartily received than ever.

In addition to visiting the schools, I am decorating my room with the class work, lesson papers, short compositions, letters and pictures as a "School Art Exhibit." This is attracting a great deal of attention from patrons, parents and guardians, as well as teachers and pupils.

On the whole, I am satisfied with my experiment as a clever and harmless dodge for killing time that often hangs so heavily on the hands of the aged, and I would recommend a similar course to any who has a taste in that direction.

C. D. Fox
Rock county, Wis.

Moving Big Trees.

To the Editor of The Homestead:

I read the article of Mr. Brown of Polk county, Iowa, in a recent issue of your paper with great interest. This article is headed, "Transplanting Large Trees." Mr. Brown is eminently correct in his directions for this work and evidently knows what he is talking about. I have considerable experience in transplanting and transplanting trees and therefore take the liberty to supplement Mr.

Brown's article. Small trees grow easier than larger ones and the only reason for planting the latter kind is to have the benefit of their shelter sooner. Now this is not always the result unless the trees are properly watered and the most perfect way to do this is to dig a post hole something like two or three feet from the tree just planted, then insert three or four inch tile, collar up, such as are used for culverts on roads. Put the tile down full length and fill with water as often as necessary in the judgment of the tree planter.

A saucer from a common flower pot to fit in the collar of the tile is the most desirable lid to be placed on the tile. The fiber roots will in this way make rapidly for the bottom of the tile and the most astonishing growth of the tree may be witnessed. Well-rotted manure around the tree in a circle from four to five feet during the winter will enrich the ground and stimulate the growth, but care should be taken not to let the manure come solid against the tree; some forest trees cannot stand it while it might not hurt others. In the growing season the manure should be removed and if a mulch is wanted wheat chaff or leaves are preferable. The next thing is the trimming of the tree top. Not only will this give more vigor to the root system, but the tree can in that way be shaped to suit the taste of the owner or to fill the proper place in a park, etc. The trimming of a large tree when transplanting can hardly be too severe.

Wm. Ernst.

While we are talking about advertising we want to have our readers turn to page 5 and see what the Litchfield Manufacturing Company have to say on this subject this week.

Dressing & Packing Poultry for Shipment.

In the poultry industry, as in every other, attractive marketing is an important feature, and one too often overlooked. Many of the products marketed by the farmer do not realize high prices owing to a lack of proper packing, or because some special requirement of the consumer is not complied with. The Canadian experiment stations have devoted considerable attention to the poultry industry. Special efforts have been made to learn the requirements of the English market. In a recent report of the Canadian commissioner of agriculture and dairying, the methods of dressing, packing, and shipping poultry for British markets are discussed. Some of the directions for shipping turkeys seem of general application. Among the principal points are the following:

Plucked turkeys are regarded as more salable than unplucked. Fast the birds for twenty-four hours, to empty crop and intestines. The fermentation of food in the crops and intestines will wholly spoil the birds. Give a small quantity of water just before killing. Kill by wringing the neck, and not by knifing or sticking. One dealer says the easiest and best mode of killing is by dislocation of the neck. This manner of killing is generally adopted by the English and continental poulterers. It is done as follows: Grasp the legs of the bird in the left hand and the head of the bird in the right hand, the back of the bird being upward and the crown in the hollow of the hand. Hold the legs of the bird against the left hip and the head against the right thigh or knee. In this position strongly stretch the head, at the same time bending it suddenly backward, so as to dislocate the neck near its junction with the head. The bird is killed instantly, and plucking the feathers must be proceeded with at once. The method of killing turkeys is also recommended. It is as follows: The bird is hung up by the

We Guarantee to Save You \$20 to \$50 on the High Grade DAVIS Cream Separator.

We are the nine Davis Brothers—the cream separator makers you have heard so much about.

We were brought up on a Wisconsin farm where we learned the dairy business practically—from A to Z, every fact and detail of work and care. That was under the old system, the hard, slow, extravagant way.

About 20 years ago we began manufacturing cream separators. We saw the need of better methods and we set ourselves diligently to work to perfect them.

We have made thousands of separators ourselves, and we have examined and tested practically every other good separator made. We have seen our machines at work, some five years, some ten, some fifteen years. Of course we have learned some lessons.

The 1907 Davis results from our twenty years of experiment, our united efforts, our observations—all based on our intimate, practical knowledge of dairy needs and requirements.

Our 1907 model is a beauty. It's an easy runner. You know what that means. Your hired man or son will want to turn it.

It's easy to clean. And it's guaranteed to produce high testing cream so you are sure to get the highest price. Within the last year creamery companies began paying higher prices for cream testing 30% and higher. You are sure to get that with the Davis.

We are able to sell the 1907 Davis under one of the strongest guarantees ever made. Read it in our latest catalog.

Buy from Factory at Factory Prices.

One of the most remarkable things about the Davis is the low price at which it is sold.

DAVIS CREAM SEPARATOR CO., 54-L North Clinton St., Chicago, U.S.A.

B. J. DAVIS AND HIS NINE SONS

We said we would save you \$20 to \$50. Of course we had reference to high grade separators, machines of a capacity to do your work properly, machines that are made of the best materials, by expert mechanics and built on right principles—machines that claim to be in a class with the 1907 Davis—on such machines we can and do guarantee to save you \$20 to \$50 on the price.

Why? Because we sell you direct from the factory at factory prices.

Because there are no wholesalers', jobbers' or state agents' commissions and no travelling men's expenses to pay.

Because we are the actual manufacturers, have our own factory, use our own capital and superintend personally the making of every machine.

Because we are satisfied with a reasonable manufacturer's profit.

You have only to compare prices of the 1907 Davis with other standard separators to prove for yourself the saving we claim.

Is this saving worth while? Paying the higher price to get a separator through jobbers, etc. does not make the separator better. You might as well have that money yourself. You can get no better separator than the new 1907 Davis at any price.

We are ready to talk separators to you. We want to help you decide the question. Our money saving catalog will aid you. Merely send letter or postal saying, "Send me your Money Saving Catalog No. 118 free of charge." It will go to you by return mail. Address,

CUTTER BARGAINS

\$4.95 FOR THIS NEW 1907 CUTTER, complete as shown and all ready to attach to your buggy body. In twenty minutes you can change your buggy into a complete cutter.

\$8.95 FOR THIS NEW 1907 Plano Body CUTTER. Pronounced by everybody who has seen it to be the handsomest square body cutter on the market.

\$15.75 FOR THE FINEST HIGH GRADE 1907 MODEL PORTLAND CUTTER, complete with shafts, ever offered at anywhere near the price, as illustrated.

WE CAN SHIP IN AN HOUR'S NOTICE.

legs, the wings being crossed to prevent struggling. Next it is given a sharp blow on the back of the head with a stout piece of wood, which renders it insensible. The knife is then inserted into the roof of the mouth, so as to pierce the brain, cutting it along the entire length. The bird is left hanging by the legs for a few minutes to allow the blood to drain out. Pluck at once, while still warm. Feathers should be left on the neck for about three inches from the head; also a few feathers on the tail and tips of wings. Do not tear the skin in plucking, and do not under any circumstances dip the bird into water. Remove the intestines from the rear. Care must be taken not to break the gall bag. All the rest may be left inside. Tie the wings on the back of the bird. A string, which, however, should not encircle the body, may be used to keep them in place. As soon as the feathers are off, hang the bird up by the feet to cool. Do not lay it down or hang it by the head. The blood should drain toward the head and become coagulated there. One dealer says to lay the birds on their breasts on a setting board, pressing the rumps square, letting the head hang down until the body is set, when the birds will always retain their plump shape. Cleanliness is necessary. The feet and legs of the birds should be clean also. The legs of the dressed birds are often tied up. If the birds are to be displayed in a shop the head should be pushed up under the wing. The birds should be thoroughly cooled (not frozen), and they should be cold through and through before being packed in cases. Pack in any one case only birds of nearly the same weight, graded to within two pounds. In no case should any bird be lighter than the lightest weight or heavier than the heaviest weight marked on the package. Pack the cocks and hens in separate cases. Mark the cases at both ends plainly. Wrap every bird neatly in paper. The head of each bird should be wrapped with a quantity of thick paper, to absorb any blood. Spread a small quantity of wood pulp or dry, clean straw in the bottom of the case. Put paper on the bottom and top of the birds to keep them clean. A small quantity of wood pulp or dry, clean straw may be put on top, directly under the cover. Pack the birds with backs down, with heads at one side. Put from twelve to twenty-four birds in a case. Every case should be packed quite full and close to prevent damage during transit. Do not export any old tough birds. Every bird should show a good, plump, white, broad breast.

Opinions differ in the United States regarding the practice of drawing poultry before marketing. While it is desirable to suit the demands of the market to which shipment is made, the

401 Walnut St., DES MOINES, IOWA.

following conclusions from recent American experiments are of interest:

Under precisely the same conditions of temperature and humidity, drawn fowls will keep from twenty to thirty days longer than those not drawn. The presence of undigested food and of excrementitious substances in animals which have been killed most certainly favors tainting of the flesh and general decomposition. The viscera are the first parts to show putrescence, and allowing these to remain within the body cannot do otherwise than favor infection of the flesh with bacteria and ptomaines, even if osmosis does not actually carry putrid juices to contiguous tissues. Hunters

know the value of drawing birds as soon as possible after they have been shot, in order to keep them sweet and fresh to prevent their having a strong intestinal flavor.

That the opening the body of an animal and exposing the internal surfaces to the air may have some influence in itself of hastening putrefaction is admitted, but when the process of drawing is properly conducted this secondary objection to its immediate performance may be entirely set aside. Absolute cleanliness should be maintained throughout the operation, and if the entrails are torn and their contents allowed to come in contact with the flesh

of the animal its interior should at once be washed out with clean cold water and afterwards with a solution of common salt and the carcass hung up until thoroughly dry.—(Farmers' Bulletin, Department of Agriculture.)

The Farmer as a Horse Producer.

The mass of horses that supply the great markets and that do the labor of the world are produced, not at great breeding establishments, where every circumstance favorable to development is provided, but upon the farms of the country, under conditions good, bad and indifferent; not by the great breeders of the world, whose lives are wrapped up in this noblest of animals, but by the general farmers, who are primarily grain raisers, and who look upon animals as a means of marketing crops and sustaining fertility; not the product of carefully-bred females and great sires judiciously mated, but of females of every type and of no type, mated often to inferior, part-bred sires, or so mismatched as almost to insure inferiority of progeny. The general farmer will always remain the greatest producer of horses, not only for the reason that "white sheep eat more than black ones," but because the genius of the few really great breeders will always find its field in the production of sires and of phenomenal individuals. Many of these same breeders will

class as farmers, but they are essentially horsemen, and yet who produce horses in large numbers.

The general farmer should succeed better than he does as a horse producer. He would be helped, too, by a better understanding of his advantages and disadvantages, leading to a procedure more in line with his limitations. If a man be not a horseman, with a knowledge of and an eye for nice points, or if his attention be monopolized with other matters, there are two things he can never do, namely, he can never be a successful producer of sires or of their dams, and he can never be a producer of any class of horses that needs from birth up that painstaking and skillful care necessary to the development of track horses of the highest class, or of saddlers and carriage horses. This will always be the exclusive business of horse geniuses; and yet no other class of horses have been so extensively produced by the mass of farmers as a low grade of speed horses. Even yet, when it is hopeless for a part-bred horse to take a race even at a county fair, and when every racer must not only be bred in the purple but developed with the greatest care—even yet, hundreds of farmers are breeding mares of all classes to the nearest trotting stallion in the forlorn hope of getting a record-breaker. True, it is done under the excuse of getting a "carriage horse for the boy," but I know, and so does everybody else, that there is a hidden hope that something may happen; and when the ill-begotten thing is brought out it can go just fast enough to be beaten on the track and to be dangerous on the roads.

This thing has permeated the mass of farmers more than most people realize and is responsible for infinite damage to thousands of horses that should have been produced on a different plan. While the farmer who is not a horseman cannot produce breeders, and should let fast horses alone, he has certain advantages as a horse producer that ought to be recognized, and that ought to shape his course. These advantages are: First, a large amount of cheap feed which puts this feature of the industry on much the same basis as beef production, and leads to the common statement that it costs but little more to grow a horse than to grow a steer, second, abundant range for proper exercise of growing animals, and third, he is himself an extensive user of horse labor. Here is an important matter. The market calls mainly for geldings, and I take it that, broadly speaking, our farm work should be largely done by mares that are fully able also to produce a foal each year. The feasibility of this plan has been abundantly shown by experience.

Farm labor is not so severe, nor so constant as to preclude the use of breeding mares. In fact, the farm horse should be a breeding animal, to fully occupy her time and pay for her maintenance during the long periods of short work and comparative idleness. On a farm of moderate size I like at least one span of geldings that are always ready for any kind of work; but it is expensive to keep a horse a year for what he can do during the working season, and I have found breeding mares entirely satisfactory and far cheaper. Besides, one can afford a surplus of this kind of horse power, which is frequently almost a necessity for a limited time.

I expect to meet with the objection that it is too much trouble to raise foals from working teams, but that matter is generally magnified in men's minds. To be sure many farmers owning both smooth and rough lands may be able to let the mares run idle and do the work with geldings, but it is possible only on cheap lands. Putting it from the other side, the mare that is to devote a year to giving birth to a horse that will go upon the open markets to do the ordinary work of the world—that mare must do something besides all this; she must work, or the horse will cost too much, and farm work is well adapted to her conditions. The farm horse that does a year's work upon the farm and produces a foal has performed no more labor than the horse that works every day in the city, or the cow that has been developed to the point of yielding two or three times as much milk as her calf would need.—[Professor Davenport in Kansas Report.]

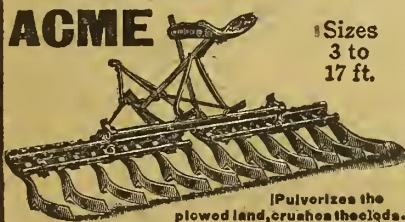

The American Sheep Breeder says: a half million western breeding ewes could be sold on three days' notice in any one of the states of Ohio, Indiana or Michigan at six or seven dollars per head.

Try this Harrow FREE

RETURN AT OUR EXPENSE
IF IT DOESN'T PLEASE YOU.

Here is a harrow that looks very different from the old pike or spring toothed harrow.

It is different. Every point of difference is a point of big improvement. It is as much better than the old fashioned harrow as a modern plow is better than the Indians' crooked stick.

Sizes
3 to
17 ft.

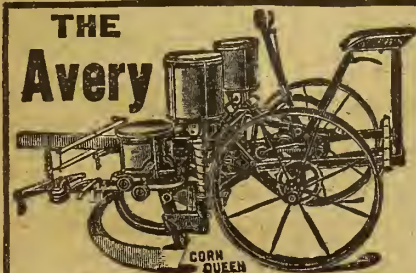

Pulverizes the
plowed land, crushes the clods.

The coulters or teeth of the "Acme" work as a gang plow. They turn over the pulverized ground and give the crop all the soil's benefit. Farmers will tell you that bigger crops grow after an Acme harrowing.

FREE BOOK for your Farm Library.

Write us today and we'll send you free, a valuable booklet, "A Perfect Seed Bed." It means money to you.

Windgalls in Horses.

Joints and tendons are furnished with sacs containing a lubricating fluid called synovia. When these sacs are overdistended by reason of an excessive secretion of synovia, they are called windgalls. They form a soft, puffy tumor about the size of a hickory nut; and are most often found in the fore leg, at the upper part of the fetlock joint, between the tendon and the shin bone. When they develop in the hind leg it is not unusual to see them reach the size of a walnut. Occasionally they appear in front of the fetlock on the border of the tendon. The majority of horses are not subject to them after colthood has passed.

Windgalls are often seen in young, overgrown horses, where the body seems to have outgrown the ability of the joints to sustain the weight. In cart and other horses used to hard work, in trotters with excessive knee action, in hurdle racers and hunters, and in most cow-ponies there is a predisposition to windgalls. Street-car horses and others used to start heavy loads on slippery streets are the ones most apt to develop windgalls in the hind legs.

The tumor is more or less firm and tense, when the foot is on the ground, but is soft and compressible when the foot is off the ground. In old horses, windgalls generally develop slowly and cause no inconvenience. If they are caused by excessive tension of the joint the tumor develops rapidly, is tense, hot, and painful, and the animal is ex-

ceedingly lame. The patient stands with the joint flexed, and walks with short steps, the toe only being placed on the ground. When the tumor is large and situated upon the inside of the leg it may be injured by interfering, causing stumbling and inflammation of the sac. Rest generally causes the tumor to diminish in size, only to fill up again after renewed labor. In old cases the tumors are hardened, and may become converted into bone by a deposit of the lime salts.

The large, puffy joints of suckling colts, as a rule, require no treatment; for, as the animal grows older the parts clean up, and, after a time, the swelling entirely disappears.

When the trouble is due to an injury, entire rest is to be secured by the use of slings and a high-heeled shoe. Cold water douches should be used once or twice a day, followed by cold-water bandages, until the fever has subsided and the soreness is largely removed, when a blister is to be applied.

In old windgalls, which cause more or less stiffness, some relief may be had by the use of cold compress bandages, elastic boots, or the red iodid of mercury blisters. Opening the sacs, as recommended by some authors, is of doubtful utility, and should be adopted only by the surgeon capable of treating the wound he has made. Enforced rest until complete recovery is effected should always be insisted upon, since a too early return to work is sure to be followed by relapse.—(Bureau of Animal Industry Report.)

The Date of Farrowing Proposition.

To the Editor of The Homestead:

That we were among the "favored ones" last spring in saving a large percentage of the spring farrow, we attribute solely to "hog luck," for most certainly March furnished no weather conducive to the business. With six sows, three of them yearling gilts, we saved forty-six of a total farrow of fifty-two, and carried this number through the fall feed lot free from disease.

The sows had the run of forty acres of blue grass pasture, with corn and shorts sown twice daily, and were in heavy flesh at farrowing time. The pigs were quite strong and very even litters. The feed was not changed after the sows farrowed, only as to quantity, except for a short time. Just as soon as the youngsters begin eating we arrange a creep for them and feed liberally with milk and shorts sown. This relieves the sows quite materially and at the age of two months the pigs may be weaned, although we always let the mothers attend to that.

We use the individual house with drop door full length at top front, which admits plenty of sunshine and fresh air when the weather permits. We prefer mature breeding stock in preference to breeding gilts for one litter and then fattening them. The mature sows being stronger they produce larger litters and are left as long as they produce profitably and do not develop bad habits.

For bedding I have never found anything as good as shredded fodder, as it does not pack and is a splendid absorbent, but change often whatever is used.

For fall pigs we have sows farrow not later than September 1st and thus get a good growth before winter, and by giving good, warm, dry quarters and extra care we have a fine bunch of feeders for the early grass and get good returns for our work.

As to the best time for the spring farrow, the individual must answer for himself, for his environments should govern him entirely in this matter. Certain it is, unless well provided with good shelter the March and April pigs are failures, generally speaking. For the one litter a year plan, May is the ideal time, but we can't afford (individually) to have our sows loaf so much of the time.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

Rex Flintkote ROOFING

A Perfect Poultry House

means bigger and healthier birds and increased egg production. The best is none too good, especially since the best can be had with the least possible trouble. For instance, pictured above is a poultry house covered (roof and sides) with Rex Flintkote Roofing. Besides the few rolls it took to cover the buildings, it required merely a hammer and as much of an ordinary farmhand's time as would have been required to lay so much carpet. It produced a poultry refuge, cool in summer, warm in winter; proof against rain, wind, snow, and danger from falling sparks.

Rex Flintkote Roofing

is made of chemically treated long-fibre wool, both sides covered with fire-proof compound and protected by a covering of flint, making the only conceded absolute resister of water, temperature, acid, alkali, rot and fire.

SEND FOR FREE SAMPLES

Make your own tests. We send also our book which shows other buildings of all kinds subjected to all kinds of climatic conditions, which are to-day proving the superiority of Rex Flintkote for all roofing purposes. Contains valuable information about roofing that every house builder and owner should know. The best dealers sell Rex Flintkote—always bears above trade mark. "Look for the Boy"—take no substitutes.

THE OLD RELIABLE

..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 lbs. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill. Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

Benefit of Grafting Trees.

To the Editor of The Homestead:

In many orchards there are particularly good trees of some well-known variety, representing perhaps some very desirable variation from the original type. It would be impossible to obtain more trees of the particular strain by ordering from any nursery. By propagating from the one desirable tree either by budding or grafting is the only method for accomplishing this. Seedlings which are desirable may be reproduced in this way only.

Many trees on account of the unproductiveness or poor quality of fruit are not worth the room they take up in the orchard, and their presence becomes an eyesore to their owner. By top-grafting these trees with wood from some good variety they may be made to produce as much and as well as if the better variety had been planted in the first place.

It often happens that a very desirable variety cannot be grown in a certain locality either on account of the uncongenial soil or root killing from the excessively cold winters. Both these disadvantages may be overcome by planting first some variety which does well in the community and later, top-grafting with the desirable variety.

There are two forms of grafting in general use, top-grafting as mentioned above, and root-grafting. Both are done while the trees are dormant. Root-grafting may be performed at any time during the winter, while top-grafting should be deferred until just before the growth starts in the spring.

Later we will give an outline of the details of both root and top-grafting.

Franklin Brown.

April and May Pigs.

To the Editor of The Homestead:

You ask my opinion as to the proper time for sows to farrow spring litters. I have positive convictions upon this matter. They should not come before April 1st. This applies to pigs grown for the general market, not to breeding stock. It may be all right for the breeder of fine stock, for which he expects to get from fifteen to forty cents per pound for breeding purposes, to breed to have pigs come in February and March and sit up all night with farrowing sows and act as dry nurse to litters of wiggly pigs. But the average farmer won't do it with common stock, and the consequence is that the early litters are largely killed off by inclement weather, and those which pull through until the warm weather of April are apt to be weakly and stunted and in no way equal to litters born a month later. More than 50 per cent of last March pigs were lost from severe weather. From April 1st to May 1st is the proper time.

Edwin Snyder.

Jefferson County, Kan.

Parsons & Stewart Short-horn Sale.

As per announcements in The Homestead, that veteran breeder of Short-horns, Mr. H. D. Parsons, associated with Mr. Andrew Stewart, of Newton, Iowa, held their sale of Short-horn cattle on Tuesday, November 27th. The sale came off according to announcement and a fairly good crowd of breeders assembled. Nebraska was represented, as was Illinois, which helped to swell the Iowa gathering. Col. F. M. Woods was on the block for the first time in some thirty days, having convalesced sufficiently from his recent attack of illness to again be able to work. His many friends congratulated him on again being about. Unfortunately the date of this sale was set too close to the International Stock Show. Unquestionably many people were kept away because of the fact that they could not well spare the time to leave home for this sale and then start immediately for Chicago to attend the International. As was predicted in The Homestead that bargains would likely be in store, this prophecy was realized on sale day. These parties offered a good lot of cattle, richly bred from a Scotch standpoint, yet prices were not paid for this class of cattle that are ordinarily paid. There was not a sufficient number of people on hand who wished good Scotch cattle. The buying was very conservative throughout, and at no time was there any spirited bidding such as has characterized nearly all former sales from this famous Malaka herd of Mr. Parsons. Messrs. Parsons and Stewart acquitted themselves in a very manly way, and while the prices were too low, they repeatedly urged Colonel Woods to sell the cattle at any price that the public would put on them. It is this straightforward manner and method of dealing with the people that inspires confidence in the seller. The demand for bulls was very light, \$262.50 being the highest price paid for a bull, while they sold down as low as \$45 each. Females sold down to \$42.50. While we have not separated the cattle for average purposes, Mr. Stewart's ten head sold at some \$40 above the average of the sale, he not having any bulls listed.

The Turner's Short-horn Sale.

On November 28th, the day following the Stewart & Parsons sale of Short-horns at Newton, Iowa, Mr. E. S. Turner, of Colfax, sold forty-eight head of cattle in the same pavilion under somewhat discouraging conditions. A goodly per cent of the crowd that had gathered for the Parsons & Stewart sale departed the night after the sale and did not remain over, which mitigated against the attendance at Mr. Turner's sale the following day. Mr. Turner's cattle were purely and solely a business lot of cattle from start to finish. Colonel Woods made a splendid appeal to the breeders present to take hold of such practical, useful cattle and explained that these cattle had never been hawked about, but had been bred and reared largely by Mr. Turner. A beautiful sight was witnessed at the opening of the sale when Mr. Turner drove in about twenty or twenty-five calves that were sold with dams later, all the get of his Scotch herd bull, Red Victor. Low prices seemed inevitable from the first, and yet, when it is considered that a large percentage of the offering were calves only about six or eight months old, which were entered up as catalog lots and sold separately, the general average is not nearly as low as it would at first seem, had the offering all been matured stock. Only two animals sold at \$100 or over, \$100 being paid for the big red cow, Hawthorne's Mazurka 5th and twin heifer calves. Mr. Jas. M. White, of Newton, Iowa, was the sagacious buyer of this rare bargain. The other animal bringing more than \$100 was the splendid herd bull, Red Victor. Colonel Woods paid this price on a mail bid from Mr. M. F. McNutt, of Sheldon, Iowa. Only two bulls were listed in the sale, which was probably a fortunate condition, owing to the crowd, the other bull selling for \$67.50. Forty-five females brought \$2,601.50, an average of \$57.80. The two bulls brought \$267.50, an average of \$133.75. Forty-seven head brought \$2,869, an average of \$61.

Wayne County Short-horn Sale.

Wayne county Short-horn breeders have safely passed the initial stage of sale management. Returns were all that could be expected. A large crowd gathered, some for sight seeing and many substantial farmer breeders, to lend encouragement to this first annual sale. A few consignors may need to correct their estimates. However, next year breeders will respond better. The town should lend better support and provide some sort of sale barn or pavilion. They can well afford to do this for so staunch and industrious a community and one on which they lean for support. It cannot be said that good animals were not appreciated. This fact is encouraging. Colonel Bellows did his best, as usual, and while bidding was not of the most active quality, it was generally felt that prices were in keeping with real merit. The sales list follows:

Lot.	Price.
1. T. Donald, Corydon, Iowa.....	\$252.50

.... BREEDERS' JOINT SALE OF
SHORT-HORN CATTLE

At Brown & Messman's Feed Stable in

MARYSVILLE, KANSAS, TUESDAY, DEC. 18, 1906.

The Contributors being D. G. Sutherland, Clarinda, Iowa; D. P. Richabaugh, Sheridan, Mo.; Geo. McMasters, Bedford, Iowa and F. P. Healy, Bedford, Iowa.

In this offering of 45 head of select cattle are a number of pure Cruickshank and Scotch breeding. The balance are Scotch-topped. There are several pure Scotch hulls suitable to head thoroughbred herds, and a number of deep, rich red hulls with Scotch tops. The cows and heifers are a most excellent lot, a large portion of which are two-year-old heifers bred to Scotch bulls. This offering is worthy the attention of any stockman in northern Kansas and southern Nebraska, who wants to buy some good Short-horns. We would like to mail a catalog to anyone interested. Right now while you think of it write for one. Address,

FRANK P. HEALY, - BEDFORD, IA.

COLS. R. E. EDMONSON, KANSAS CITY; BERT FISHER, NORTON, KAN.; F. E. KINNEY, OKETO, KANSAS, AUCTIONEERS.

A SELECT DRAFT

Hereford Bulls
and Heifers

At Public Sale December 19, 1906

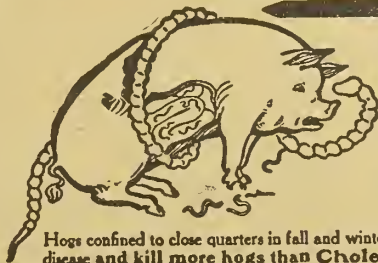

Blue Rapids, Kansas

At Hereford Association Barn

If you want bulls of this breed in carload lots, here is the chance. Thirty-five are offered. Their breeding is first class and they have been grown in such a manner as to insure future usefulness. They are sired by Baccalaureate 81587, Keep On 26th, Imp. Roseberry and Kenswick Brick. These are a particularly strong lot of sires and many are prize winners of note. The sixteen females are sired by the same bulls. They are bred to Onward 18th by the undefeated March On 6th. The best of breeding throughout.

DEFORMITIES CURED!

ALL PERSONS CRIPPLED OR DEFORMED, LAME OR PARALYZED, SHOULD INVESTIGATE AND SEE WHAT IS BEING ACCOMPLISHED AT THIS INSTITUTION FOR THESE CASES.

CROOKED OR CLUS FEET of any variety, and at any reasonable age, can be made straight, natural and useful. The methods used are mild; no cutting, no plaster paris, no coereve or painful treatment of any kind, and the result is guaranteed.

POTTS DISEASE, when treated in time at this institution, will result in no deformity; paralysis will always be prevented; the health and strength of the patient is at once improved; the growth not interfered with. Plaster paris is never used.

SPINAL CURVATURE, even in long standing cases can be perfectly corrected by the new and improved methods in use here; plaster paris, felt or leather jackets are never employed. Names of patients recently cured, after all ordinary methods and doctors had failed to afford relief, will be furnished on application.

HIP DISEASE can be cured without surgical operations or confining the patient to bed. Abscesses, shortening deformity and loss of motion can always be prevented, and, if already present, can be cured. The methods used here in the cure of Hip Disease in all its stages are radically different and more successful than those generally employed. Write for information.

PARALYSIS AND RESULTING DEFORMITIES. For no class of affections has greater preparation for successful treatment been made. Deformities of the limbs, joints or feet, resulting from Paralysis, can always be corrected without surgical operations or severe treatment. Paralysis should never be neglected; children never outgrow it; it is not incurable.

CROOKED AND DISEASED KNEES, Hips, Hands, Limbs and deformities resulting from Rheumatism are successfully treated without pain.

This is the only thoroughly equipped institution devoted to the cure and correction of deformities. Examination and consultation by mail or in person, free of all charge. References furnished on application. Pamphlets sent on request.

FIELD NOTES.

Mr. J. S. Golder, of Scribner, Neb., is offering some good Percheron mares for sale.
 Mr. Willard Miller, of Anita, Iowa, offers good Shropshire rams and ewes for sale.

Chester White boars are offered for sale by Mr. T. A. Stevenson, of Shannon City, Iowa.
 Four registered Hereford bulls are offered for sale by Mr. V. C. Atwell, of Little Sioux, Iowa.

Fifteen good Chester White boars are offered for sale by Mr. J. M. Janssen, of Sibley, Iowa.

Choice Chester White gilts, bred or open, are offered for sale by Mr. W. R. Webb, of Spencer, Iowa.

On January 17th, Mr. W. H. Hudson, of Lohrville, Iowa, will hold a public sale of Duroc Jersey sows.

Mr. Geo. Allen, of Lexington, Neb., the veteran Shropshire breeder, is offering some excellent rams for sale.

The date of January 15th is named as that on which to hold a Duroc Jersey brood sow sale by Mr. A. L. Bergsten, Mt. Union, Iowa.

Mr. Z. T. Kinsell, of Mt. Airy, Iowa, one of the most noted Hereford breeders in the West, is offering a grand lot of young bulls for sale.

An extra good yearling Duroc Jersey boar, a son of Top Notcher Again, is offered for sale by Messrs. W. M. Sells & Sons, of Indianapolis, Iowa.

Messrs. Peter Hopley & Son, of Lewis, Iowa, are offering a choice lot of Suffolk fillies for sale. Also a few good Percheron, Shire and Belgian stallions.

A few extra good Duroc Jersey boars are offered for sale by Mr. Z. T. Kinsell, of Mt. Airy, Iowa. The best of these will be sold at \$25 if taken soon.

Special prices on Shropshire ewes are offered for thirty days by Mr. D. M. Norton, of Sanborn, Iowa. He will sell a single animal or can furnish a car load.

Mr. W. W. Wheeler, of Harlan, Iowa, is making special prices on his table-backed cows and heifers for the next thirty days. He offers some of his very best for sale.

A public sale of Duroc Jersey brood sows is announced to take place at Corning, Iowa, February 12, 1907, by Messrs. Fred T. Harrison and G. A. Robinson, of Corning, Iowa.

One hundred head of Berkshire pigs of both sexes are offered for sale by Mr. E. H. Dancer, of Lamoni, Iowa. He has sold his farm and must sell his herd of Berkshires.

Mr. W. C. Frazier, of Atlantic, Iowa, in sending in change for his sheep advertisement, found on page 21 of this issue, writes that the ewes he has for sale are a splendid lot.

Mr. Robert Ridgway, of Amboy, Ind., is offering a remedy which immunizes dogs from cholera. His advertisement appears on page 27. We will send book free giving full information.

The Poland China News, of Freeport, Ill., has something to say to Homestead readers in its advertisement which will be found on page 46 of this issue, which will be interesting to all Poland China breeders.

February 14, 1907, is named as the date for Mr. A. W. H. Orr, of Lorimer, Iowa, to hold a public sale of Duroc Jersey brood sows. They will mostly be bred to a son of Proud Advance and a Crimson Wonder pig.

Mr. Geo. H. Lawshe, of Harlan, Iowa, is offering a splendid lot of Chester White boars and sows from his noted prize-winning herd. He will sell sows bred or open as buyers wish. He has the good ones.

Mr. Jesse A. Golder, of Scribner, Neb., advertises ten head of young Percheron stallions, two to four years old, weighing from 1,650 to 2,220 pounds. Also a few good mares at living prices. If you want some good bargains write him or go and see his stock. He will make you prices that will cause you

to buy if you really want a stallion or a mare.

Messrs. Chandler Bros., of Kellerton, Iowa, have one of the leading Shropshire flocks in the West, and are now offering a grand lot of imported and home-bred rams and ewes for sale. If you want the best order of them.

Mr. Thomas Canfield, the Large Yorksbire swine breeder, of Lake Park, Minn., is offering 166 gilts, safe in pig to imported and prize-winning boars, for sale in his new advertisement which appears on page 44 of this issue. He reports that all his boars are sold.

Messrs. Holt Bros., of Laurel, Neb., will make a draft sale of fifty head of Hereford cattle at their farm adjoining town on January 15th. These young breeders have built up one of the finest herds in northeast Nebraska and they are putting a choice lot of cattle in the sale.

Messrs. Blackmer & Nelson, of Albert Lea, Minn., announce on page 37 of this issue of The Homestead that they have a number of yearling Short-horn bulls for sale. These bulls are from a milking herd and all animals will be guaranteed breeders and pedigrees will be furnished.

Mr. C. E. Hallock, of Mt. Hamill, Iowa, has Duroc Jersey pigs which he is offering for sale at poor man's prices. He considers these hogs good enough for the rich man, and has 200 head from which selections can be made. He invites an inspection of his stock. See advertisement on page 37.

Mr. Jas. P. Spearman, of Papillion, Neb., is one of the best young auctioneers in the West, is thoroughly posted on pedigrees and individual merit and gives good satisfaction to those for whom he sells. He has a few open dates and will be glad to hear from breeders who are thinking of making a sale.

Mr. A. F. Graves, of King City, Mo., proprietor of the Lyndale herds of Short-horns and Poland Chinas, writes that he has bought two sons of Lail's Grand Chief, the \$3,000 boar, and the sire of practically all of Mr. Lail's show stuff. Mr. Graves is breeding a fine string of sows for his spring sow sale.

Mr. A. A. Hummer, proprietor of the Pioneer Stock Farm of Chester White swine, of Keswick, Iowa, writes: "I am nearly sold out, having disposed of eighty-six head to date. I have nearly enough orders on hand to take the gilts that are bred." Mr. Hummer's advertisement will be found on page 43 of this issue.

Improved Chester White boars, weighing from 200 to 250 pounds, are quoted at \$15 to \$25 each by Mr. E. J. Trumbauer, of Patterson, Iowa, in his advertisement which appears on page 37 of this issue. Mr. Trumbauer has also bred gilts for sale, and also four yearling sows which he is quoting at \$25 each.

The new advertisement of Mr. Sylvanus Hawthorn, of New Sharon, Iowa, offering Berkshire boars for sale, will be found on page 37 of this issue. He has a few choicely-bred boars he is quoting prices on that he says are good individuals, and they are now ready for service. They weigh from 150 to 165 pounds.

Mr. H. F. Allen, proprietor of the Mulberry Grove herd of Duroc Jersey swine, writes: "My boar trade has been very good and they are well cleaned up. I am very busy mating sows to the two champions, Crimson Wonder Again and Top Notcher Again, for our February 7th sale. Our herd is healthy and doing well."

Mr. A. Latimer Wilson, importer, of Creston, Iowa, writes that ble business has doubled from last year and the demand is for strictly first-class horses. He has had a great trade to firms that will resell the horses to companies in the far West. He will have another importation in January. He writes: "I am still selling your choice of the imported horses at \$1,000." See advertisement on page 41.

Mr. S. G. Collicott, of Lake City, Iowa, one of the well-known Duroc Jersey breeders in that section of the state, writes as follows: "My hogs are doing fine and I expect to put in my January 16th sale as good a hunch as has ever been sold in my section. I am using two as good boars as the breed affords. One of these is S. G.'s Crimson Improver 50101, he by the sweepstakes boar, Crimson Wonder I Am. He is assisted by Waveland's Ohio Chief, a son of the noted World's Fair boar, Ohio Chief. These boars are good individually and their breeding cannot be beat. There will be twenty-five yearling sows and five tried two-year-old sows and ten spring gilts in the sale. These gilts will weigh 250 to 280 pounds now and

they each have a good post under each corner. Tell the boys to mark my sale down as one of the good ones to be held in January."

Messrs. Manlove Bros. or Mr. J. H. Norris, of Bowen, Ill., can be written to for Duroc Jersey spring gilts bred to Illinois Chief, as per advertisement which will be found on page 46 of this issue of The Homestead. Illinois Chief was recently purchased by these gentlemen. They also have a few sows bred to him, and to the noted boar, Hambletonian, which they will sell at a reasonable price.

Messrs. W. L. Addy & Son, of Parnell, Mo., have a change of advertisement on page 47 in which they announce their sale date, at which time they will sell the greatest string of bred sows that have ever gone from the Iowa Banner herd of Duroc Jerseys. Just now they are offering fall males that for breeding are hard to equal. Mr. Addy writes that they have among these some of the finest pigs they have ever raised.

Mr. Frank Kean, breeder of Duroc Jersey swine, of Mt. Pleasant, Iowa, enlarges his advertisement in The Homestead and it will be found on page 37 of this issue. Mr. Kean has now on hand a fine lot of choice males that are ready for service and will be sold low for the next ten days. He proposes to make prices on them that will move them. He is also breeding a bunch of gilts that he will sell at moderate prices and will tell our readers about later on.

In furnishing copy for the new advertisement found on page 40 of this issue, Mr. J. Nissen, of Meservey, Iowa, breeder of Aberdeen Angus cattle, writes that for the next thirty days he will make special prices, on ten bulls and twenty cows and helpers; twelve of the latter have calves at foot. The bulls, calves and some of the helpers are sired by the Pride bull, Baltimore of Glendale 24275, a prize winner and sire of prize winners.

Mr. S. J. Philson, of Harlan, Iowa, is offering Chester White April boars and about fifty gilts and bred sows for sale at farmers' prices in his advertisement which appears on page 43 of this issue. Mr. Philson writes: "I had nineteen sows farrow just 200 pigs last spring and I raised 140 of them. I have about twenty good, lengthy, heavy-boned April boars left, and am breeding about fifty head of sows and gilts to offer for sale. These are bred to three different boars, all good ones, and the best of the blood."

Mr. E. O. Wolcott, of Gilmore City, Iowa, breeder of Poland China hogs, writes: "I am selling boars right along, but still have some extra good ones to put out including my two-year-old boar, King Pilot 107581. Some of my later sales are to Messrs. C. A. Cleal, of Pocahontas county, a fall boar; John Haley, of Pocahontas county, a spring pig; to C. A. Austin, of Humboldt county, a fall boar; to Peter Nave, of Humboldt county, a spring boar; to Matsell Bros., of Stone City, Iowa, a fall boar." See advertisement on page 46.

Mr. B. R. Burt, proprietor of the King B. herd of Chester White swine, of Coggon, Iowa, has decided to hold a public sale. It is to take place December 19th, and at that time he will sell twenty-three choice gilts and ten boars of April farrow. Good railroad connection can be made from Cedar Rapids, Manchester and Anamosa. His farm is one-half mile from town and free accommodation will be given. Mr. Burt's new advertisement appears on page 43 of this issue.

Mr. W. F. Hemmerling, of Dike, Iowa, writes in regard to his prize-winning Chester Whites: "The gilts I am offering for sale are principally sired by W. F.'s Model 12101. They are a very choice lot and making good growth. They will be bred to Modeler 12325, the peerless boar of 1906. Modeler is just simply getting better every day. He carries himself equal to the style of a three-year-old coach horse winning the blue ribbon, and those that are fortunate enough to secure a gilt bred to this matchless boar will be strictly in line for 1907." See advertisement on page 43.

Messrs. Taylor & Jones, importers and breeders of Percheron, Shire, Belgian and Coach horses, of Williamsville, Ill., write: "We have again to report the best trade we ever had. Only a few weeks ago we reported a lot of late sales and now have to report the sale of a high-class imported black Percheron stallion to Mr. John H. Lelneweber, of Mason City, Ill., and a home-bred Shire to Mr. Henry Williams, of Buffalo, Ill., making the fifth stallion sold to Mr. Williams. We have sold three head to Mr. Joe Myers, of Croft, Ill., including a high-class Percheron horse and a prize-winning yearling Shire mare. To Mr. Bogg Scott, of Coleman, Texas, we sold three Percherons, and five of our very best to Messrs. Burrier & Heisel, of Fremont, Iowa, all good, big, weighty, sound draft stallions. A company came here consisting of three men representing ten farmers and bought for their use at Greenfield, Ill., a good Percheron stallion. We have also sold an imported prize-winning Shire mare to Messrs. J. Canaday & Son, of Frankton, Ind., and a very high-class imported Percheron stallion to Mr. W. A. Jones, of Rushville, Ind.; Mr. Henry S.

Bowen, of Witten's Mills, Va., gets a show colt in a very fine black Percheron; Mr. Elwood Riggs, of Shirley, Ind., gets a very choice imported Percheron stallion, and Mr. George Bell, of Illinois, Ill., takes a Percheron stallion. Every one of these horses were sold at our barns and at prices we are making and the quality of stallions we are offering, backed by Taylor & Jones' guarantee, no buyer is leaving without a horse and all are well pleased with their deals." See advertisement on page 41.

Mr. A. L. Mossman, breeder of Duroc Jersey swine, of Radcliffe, Iowa, writes: "I am offering my herd boar, J. Wonder 43861, for sale. He is sired by West Side 23985 and is a litter brother to Crimson Wonder. He is a splendid hog and I have used him now two seasons. I have had good sales and the best of satisfaction has been given. I still have one Ohio Chief male pig for sale. My price is \$125. He is going to make a splendid hog. I am still offering thirty of the kind of hogs that are sure to please." See Mr. Mossman's advertisement which appears on page 48.

Mr. Chester Bloom, breeder of Chester White swine, of Bridgewater, Iowa, in furnishing copy for his advertisement which appears on page 42 of The Homestead, writes: "The twenty head of Chester White boars that I am offering for sale are mostly of May farrow. They weigh from 130 to 180 pounds and I will sell them at \$15 each to close out. The thirteen-months hog will weigh about 300 pounds and is nice enough to head any good herd. I will sell him for \$25. I have as nice a lot of gilts as can be found and will sell them from \$15 to \$20. I also have some good yearling sows for sale."

Mr. W. Z. Swallow, of Wauke, Iowa, Iowa's most noted Poland China breeder, sold eighteen sows and three boars to Mr. Chas. Eastburn, of Yardley, Pa., on last Saturday. Mr. Eastburn had been corresponding with Mr. Swallow for some time and was well pleased to think he had got just what he wanted. Mr. Swallow recently purchased the three-year-old boar, Satisfaction 86253, of Mr. Jas. Stump, of Van Meter, Iowa. He is a son of Guy's Best 86247 out of Ideal Lady by Ideal Butler. He was bred by Mr. Fred Rood, of Clearfield, Iowa, and will weigh 700 pounds in breeding condition. Mr. Swallow expects great things from this cross and next year you will see him out with a fine string of pigs.

Mr. A. E. Lanham, of Battle Creek, Iowa, has recently sold his herd boar, Onward 106601, a son of the great Keep On, to Mr. A. E. Bolton, of Glidden, Iowa, at a good round price. He goes to head Mr. Bolton's herd, and as he is a good breeder Mr. Bolton can expect some excellent results from the good sows he has in the herd. The boar, Onward, was in the second-prize litter at Des Moines in 1904, and he developed into one of the highest boars in that litter. He will weigh close to 700 pounds in condition and breeds a big bone on his pigs. Mr. Lanham is now offering bred sows and gilts for sale, sired by his noted prize-winning boar, L. S. Sunshine, and Onward, to farrow in March and April. He is pricing these very reasonably and is now booking orders.

Mr. J. G. Truman, manager of Trumans' Pioneer Stud Farm, of Bushnell, Ill., writes: "I am in receipt today of a letter from Mrs. R. A. Reynolds, of Dillon, Montana, reporting the safe arrival of the thirteen imported Shire mares and stallions purchased from us by her manager, Mr. George Baker, on the 8th inst. After inspecting them, the day after their arrival, she is highly pleased with the lot as a whole. It is a question whether a load of a strictly high-class young stallions and mares has ever been shipped to Montana. It is very gratifying to us, after having sold the late Mr. R. A. Reynolds all his stallions for the past twenty-five years, to receive this letter from Mrs. Reynolds speaking, as she does, in the very highest terms of the manner we have treated her and her late husband in every transaction during the past quarter of a century. I am pleased to say that our horses are all doing well. The prospects for a good season's business were never better. We hope to see all our old customers and friends at our old location in barn No. 10 at the International Exposition. From present indications, the 1906 International will outdo itself, if such a thing can be done. We have just received our latest catalog from the printers and shall be pleased to mail same to any of

your readers that will mention they saw our advertisement in your paper." See advertisement on page 42.

Messrs. W. T. Wendt & Son, of Donnellson, Iowa, have a new advertisement on page 37 of this issue of The Homestead. Writing in regard to their Poland Chinas they say: "We have been having a good trade in the last two weeks. We still have ten fine, large, heavy-boned March Poland China boars and twenty-one gilts of March farrow for sale. We will sell them at a cut price if taken by December 15th. They are a large, thrifty lot, not too fat. We have been in the business five years and have never had a man come to see our herd that did not take one or more pigs. We have a report from every hog we sold last year and every one proved to be good and prolific breeders. We can ship on the C., B. & Q., C., R. I. & P. or Northwestern railroads. We have telephone in house. Satisfaction will be guaranteed."

Mr. F. E. Wentz, proprietor of the Edgewood Stock Farm of Chester White swine, Mexico, Mo., in furnishing copy for the advertisement found on page 37, writes: "I am in shape to offer a few good Chester White boars and a lot of handsome gilts for sale to old and new patrons of The Homestead. My pigs are of excellent individual merit with quality, good bone and feet, nice heads with best of backs and are of good makeup. They are mostly sired by a pig that took second at the Missouri State Fair and was one of the first-prize litters. His litter brother took first at the Missouri State Fair, Iowa State Fair and sweepstakes over first-prize pigs at Springfield, Ill., and Sioux City, Iowa. He is a fine specimen and his offspring resemble his individuality. After January 1st this boar will be for sale. The pigs I am selling, both male and female, are priced right. Farmers and breeders alike can use them."

Mr. C. F. Shaffer, of Wellman, Iowa, breeder of fancy recorded Poland China swine and Short-horn cattle, writes: "Trade is brisk, having made sales recently as follows: One male pig to Mr. P. I. Humphrey, of Morrisou, Ill.; male pigs to Messrs. Chas. Schulty and Chris Whitoff, both of Washington, Iowa; male pigs to Messrs. Chas. Sacher, Sam Ramsey and Will Ihrig, all of Wellman, Iowa; one bred gilt to Mr. Pless Skeen, of Canyon City, Texas; one male pig to Mr. James Schulty, of Washington, Iowa; one male pig and one gilt to Mr. P. L. Ayres, of Wellman, Iowa; ten head of very choice gilts to Messrs. Augustine Bros., of Westchester, Iowa, and one male pig to Mr. L. I. Dennis, of Iowa City, Iowa. I have a choice lot of male pigs for sale that have extra heavy, smooth bone, nice black coats of hair, well hammed down to hock, with fine head, ear and nose. These male pigs are sired by my two great herd boars, G. S. Perfection Jr. 89471 and Black Chief 98855. Write for prices and pictures of herd boar, free on application. In Short-horns I have a choice lot of deep, red Short-horn bulls, six to twelve months old, of the low-down, thick, early-maturing kind, sired by my prize Scotch bull, Laurel Knight. I sold the fine ten-months-old bull calf, Buster Knight, to Mr. Fred Radda, of Richmond, Iowa. Mr. Radda expressed himself more than pleased with his purchase. Anyone wishing a young bull should not fail to write me for prices

and pictures of my great herd bull; free for the asking. I also have 100 head of very choice fall and summer pigs now ready to ship. Anyone desiring to start a young herd can get a number of pigs at a very low figure, quality considered. I can furnish pairs and trios not akin." See Mr. Shaffer's advertisement on page 46.

On December 20th will occur the dispersion sale of Mr. James Burke's Short-horn cattle. There comes a time in the life of every man when he feels that he must lay down the burdens of an active life and take the afternoon of his remaining days more easily. This stage has been reached by that venerable breeder of Short-horn cattle, Mr. James Burke, of Stanwood, Iowa. Mr. Burke has long been in the harness, actively engaged in the pursuits of farming and the breeding of Short-horn cattle, but he has now decided to retire and disperse his entire herd on December 20th, the herd consisting of seven bulls, including his two herd bulls, twenty-nine cows of breeding age, seven yearling heifers and fifteen cows selling with calves at foot. As evidence of what a good cow will do, we mention Leaf Glen, a cow calved March 12, 1897. She has proven one of the best breeding cows on the farm and as is always the case with a great breeding cow, she is also a great milker. She was sired by Bell Duke and possesses the good points requisite to a choice brood cow. Three of her calves have sold for \$385, all bulls. Another good female is St. Patrick's Lady. The same may be said of Louisa Craft 4th and Mary of Cedarvale. Mollie Hall is six years old and is one of the great producers on the farm, but one of the greatest producers is Wave-land Prinula 3d. She is only six years old, but is an exceptional breeder. She was sired by Home Victor. Another great producer and heavy milker is Oxford Belle, a full sister to Oxford of Hillside. It has always been the aim of this wise and veteran breeder to keep the very best bulls obtainable at the head of his herd. Common sense has prevailed in his selection, from the fact that he has always made individual merit the first consideration. While it has always been the aim of Mr. Burke to have well-bred bulls at the head of his herd, individual excellence was the first consideration, and on these common sense lines has he builded the present herd. He has never been possessed of any fads or fancies for other than good, useful Short-horns, and in this particular he has certainly accomplished much. His two present herd bulls, from an individual standpoint, must be rated as high-class bulls, although in breeding neither of them are Scotch, in that sense that is generally accepted as being straight Scotch (which is always a misnomer). The two bulls referred to are Baron Taylor 172837, a Young Mary bull six years old that from the standpoint of individual merit ranks very high with the good bulls of the land. The young bull is Diamond King 234716, also of the same family but sired by the Cruickshank bull, Lavender Lad. We can heartily recommend either of these bulls as being choice individuals, as are the five

SAUNDERS' ANNIVERSARY SALE ANNOUNCEMENT.

It is with pleasure that I offer at public auction, this consignment of pure-bred cattle, showing what can be done in a limited time. This sale almost reaches the ten-year mark, since I first invested in registered Short-horns. I am offering nothing at this time which I do not consider worthy a place in my own herd, and I must confess it is with reluctance that I offer many of these animals to the public. But this being so near the tenth anniversary of my engaging in the business, I feel that I am obliged to part with many favorites, in order to be able to offer this desirable consignment of seventy-one head of choice breeding cattle to my friends and fellow breeders. The reason of my offering seventy-one head will be explained on sale day. I point with pride to the general satisfaction expressed by those who have attended my former sales, and I assure those who attend this sale that they will find this much the best lot of Short-horns ever offered on "The Greeley." I have found the breeding of Short-horn cattle to be the most interesting and profitable part of my farm operations. I am in the business to stay, and it is my ambition to each year be able to offer a better lot of cattle than at former sales, and at the same time establish and maintain a reputation for square and honorable dealing with all my customers. A certified copy of pedigree, bearing seal and signature of the secretary of the American Short-horn Breeders' Association, will be furnished with each animal sold, excepting calves at foot, for which an entry blank, properly filled and eligible to registration, will be furnished. I reserve the right to withdraw any animal cataloged herein, that is not in condition on day of sale, and substitute something equally as well bred. All inquiries answered and facts stated as far as known on day of sale. Free conveyance to and from sale. All trains will be met, and the comfort of those attending looked after. Free entertainment to parties from a distance at Depot Hotel, Park Hotel and Gardner Hotel. Lunch for 1,000 at 11 a. m. Sale to commence immediately thereafter. Terms cash, or if desired, six or twelve months time at 8 per cent interest. Please bring bank reference. Stock will be at owner's risk as soon as bid off, but will be loaded free of charge on either the Chicago, Milwaukee & St. Paul Railway at Manilla, Iowa, or the Chicago & Northwestern or Great Western Railway at Irwin, Iowa. All lovers of good useful cattle are invited to attend this sale. Bids sent to Col. F. M. Woods in my care will be fairly dealt with. For catalogs and information address C. A. Saunders. Sale under cover; no postponement. Farm two and one-half miles southwest of Manilla, Crawford county, Iowa.

yearling bulls consigned to this sale. Mr. Burke will be pleased to forward his catalog to every reader of this article who applies to him for the same at Stanwood, Iowa. The sale will be held on the farm and the cattle presented in their every-day clothes, free from any pampering that would in any way injure their future welfare.

Mr. Grant Davidson, of Manson, Iowa, the well-known Duroc Jersey breeder and the owner of the Iowa State Fair sweepstakes hoar, Crimson Wonder I Am, writes as follows: "I have a few boars left, sired by 'Crimson Wonder I Am, two of which are hummers. I also have four boars out of American Belle by Iowa Wonder. These are all good, suitable for any herd, while two of them are extra fine. They have the bone, backs, length, color, hams and feet that should be eagerly sought after by every breeder. One of these has the most prominent hams on him of any boar I have ever raised. He is a regular corker. I also have a few boars by Iowa Wonder and out of a daughter of Crimson Wonder I Am. This was a boar litter, there being nine boars and one gilt, all raised. I have sold a couple of show pigs from this litter and have a couple more that are cracking good ones." If any of our readers want hoars, sired by such noted hogs as Mr. Davidson has in his herd, they should write him at once. He will be pleased to furnish you description and price.

Messrs. Bridgford & Nesbitt, breeders of Aberdeen Angus cattle and Poland China swine, of Aledo, Ill., in writing under recent date, say: "We still have some choice March and April hoars for sale at prices that should remove them quickly to persons wanting anything in that line. We are having good inquiries the last two weeks and have sold to the following persons: A boar to Mr. Frank M. Hare, of Rushville, Ill.; a boar to Mr. Howard Irwin, of Palo, Ill.; a gilt to Mr. T. H. Olson, of St. Olaf, Iowa; two boars to Mr. W. E. Callahan, of Kiethsburg, Ill.; a fall boar to Mr. A. R. Tonilson, of She-worth, Ill.; a yearling sow to Mr. E. L. Towne, of Jaunita, Iowa; a boar to Mr. John Swanson, of New Windsor, Ill.; a boar to Mr. Gus Swanson, of North Henderson, Ill.; a boar to Mr. J. E. Shingledecker, of Joy, Ill., and a boar to Mr. Thos. O. Smallen, of Fredericktown, Mo. We wish to say that if any of your readers wish some good stock at reasonable prices we are prepared to furnish some if they give us the opportunity. Write for prices, mentioning The Homestead." Their advertisement appears on page 46 of this issue.

KELLY'S DUROC JERSEY BOARS.

Fifteen good Duroc Jersey boars, sired by Ambition, Keep On 3d, Crimson Orion and Topmost, a son of Tip Top Notcher, are offered for sale by Mr. J. T. Kelly, of Gilmore City, Iowa.

A. B. GARRISON TO SELL POLAND CHINA BRED SOWS.

Mr. A. B. Garrison, of Beattie, Kan., one of the men who has never turned from the big Poland China, providing the quality was not lacking, will on February 6th make a sale of bred sows. The great Prince U. Tell, one of the best of the big kind, is being used freely on the sale stuff and buyers will find this one of the opportunities of the year.

A CAR LOAD OF SHORT-HORNS FOR SALE.

On December 18th, at Humbrey, Neb., Mr. F. E. Terrell, of Montezuma, Iowa, will offer a car load of Short-horn cattle for sale. This offering will consist of choice young cows, heifers and bulls. There will be a choice lot of the latter, some old enough for immediate use, including some prize winners at the New Sharon District Fair. The cattle will be sold off of pasture, but in good thrifty condition for the buyer. See advertisement on page 33.

M. L. AYRES' STALLIONS.

On page 37 of this week's issue we begin the advertisement of that veteran breeder and importer, Mr. M. L. Ayres, of Shenandoah, Iowa. There is not a better horseman in America than this veteran horseman, and he generally has his barns full. This year is no exception to the rule, and the man who wants a Percheron stallion or mare should make a visit to his stables. He has some remarkably good young stallions in his barns this year, blacks, browns and grays—horses that will easily weight a ton when matured, with excellent bone and plenty of style. If there is anything that Mr. Ayres

is interested in it is showing his horses, and if you want a stallion or a mare it will certainly pay you to call and see Mr. M. L. Ayres and his great string of stallions and mares.

A. B. GARRISON TO DISPERSE HIS HERD OF SHORT-HORNS.

Mr. A. B. Garrison, of Beattie, Kan., claims February 11th for a dispersion sale of Short-horns. Mr. Garrison has rented his large farm and will move to his new farm joining the town of Summerfield, Kan., and from this time on will devote his time to the Poland Chinas and the manufacturing of the breeding crate that is meeting with such favor among the hog men.

HUMBERT'S STALLIONS AND MARES.

It is with pleasure that we call our readers' attention to the advertisement of Messrs. L. H. Humbert & Son, of Corning, Iowa. This is one of the best importing firms of Percheron stallions and mares that is to be found in the West, and they never had a better lot of horses than they have now quartered in their barns. They have both Percheron stallions and mares for sale and they will be pleased to have any of our readers call and see them.

BREEDERS' ATTENTION.

Every breeder who intends to hold a sale of thoroughbred stock realizes the importance of having the stock correctly marked. Messrs. J. A. Mussillon, of Springfield, Ill., are offering ear tags for sale at the low price of one cent each. The numbers run from one to 100, and the tags are either brass or aluminum. It is well for breeders to have these tags on hand at once and not be bothered at the last minute with the uncertainty of not having tags on hand. Write at once as per advertisement on page 28 of this issue, kindly mentioning The Homestead.

THE DAVID CITY SHORT-HORN SALE.

The Scotch bulls in the David City Short-horn sale are of such quality that they should command the attention of leading breeders. Goldust, a yearling, calved March 14, 1905, is a bull of wonderful scale, great heart girth and exceedingly smooth in the shoulders. He is also a good hind-quartered bull, a good roan, and is of the Golden Drop family and sired by Morning Flash, a Missie bull whose sire and dam were both bred by Mr. Duthie. He was bred by Mr. A. H. Robertson, of Clark, Mo. U. S. A. was bred by Messrs. Deuby Bros., of Carlinville, Ill., sired by Sinnissippi Scotchman that was bred by Colonel Lowden, and out of Keepsake 4th, bred by Mr. J. F. Prather and sired by Imp. Duke of Hamilton 2d. He is a red and two of his half brothers included in this auction denote emphatically that Sinnissippi Scotchman is a high-class sire. The Cruickshank Orange Blossom hull, Gloster's White Orange, may not be appreciated on account of his color, but he is one of the handsomest youngsters to be found anywhere. He was got by Bapton—Gloster, a hull recently sold in one of Manager McGavock's sales to head the choice herd of Mr. E. J. Hays, of Hampton, Neb., and is out of a Cruickshank Orange Blossom dam by the Orange Blossom hull, Judge Gresham, by Goldfinder. Among the cows and heifers of superior quality we would mention the Scotch ones, Mildred 12th, Sihy of Riverdale, Anoka Strathallan A., Prudence and Gentry's Butterfly, all with calves at foot or in calf to noted sires. Several cows well along in calf to Imp. Highland Champion are included. This bull is considered by many expert judges to be the best red bull imported within recent years. Numerous of the get of Imp. Master Archer, a full brother to Ceremonious Archer, are cataloged from the herd of Mr. Stoker, his owner. Some fifteen yearling and two-year-old heifers are cataloged and those in search of high-class young females with their en-

fire lives of usefulness before them, will do well to attend this auction. A full list of the herds represented will be found in the advertisement on page 45. Manager McGavock considers that there are more tops included in this auction than any he has ever made, and a full attendance of the best breeders and stockmen is urged.

A. H. BRETT'S SALE OF SHORT-HORN CATTLE.

As per previous announcement in The Homestead relative to Mr. A. H. Brett's sale of Scotch and Scotch-topped Short-horns, we would for the last time call attention to the fact that this sale will afford a golden opportunity for breeders in northern Iowa to buy some good Scotch Short-horns, as well as a goodly number of Scotch-topped ones. The offering includes some forty-eight head of cattle all told, forty-six of which are females, only two bulls being listed. Of these females, sixteen are Scotch, the remainder Scotch-topped American sorts of the most desirable families. Sixteen calves will be included in the sale. The imported cows and American-bred Scotch cows offered are equal in breeding to anything to be sold this year. Inasmuch as there has been an abundance of rain in the vicinity of Mason City and fall pastures are more abundant there than in any other part of the state, the farmers and stockmen of that particular section will certainly find it to their advantage to attend this sale and secure one or more of the many good Short-horns to be sold on December 18th. For several years past it has been Mr. Brett's custom to make these public sales of Short-horns, at which time he has sold some splendid specimens of the breed. We might mention in this connection that at Mr. Brett's sales some as good bargains as were ever offered have been found. It has not been uncommon for buyers to secure cattle at his sales that were afterwards sold at

double the purchase price. It behooves the wise buyer, who is in search of either straight Scotch or Scotch-topped Short-horns, to keep this sale in mind. The catalog is now ready for distribution and may be had for the asking by addressing Mr. A. H. Brett, Mason City, Iowa, mentioning The Homestead.

VIEWS OF THE ROCKIES.

The Rocky Mountain Views Company, of Denver, Colo., have decided, in order to introduce in American homes the splendid pictures of the scenery in the Rockies, to make an extraordinary effort for this Christmas time. Their advertisement appears on page 6 of this issue, giving full particulars as to their methods of accomplishing this purpose.

TEXAS LAND CHEAP.

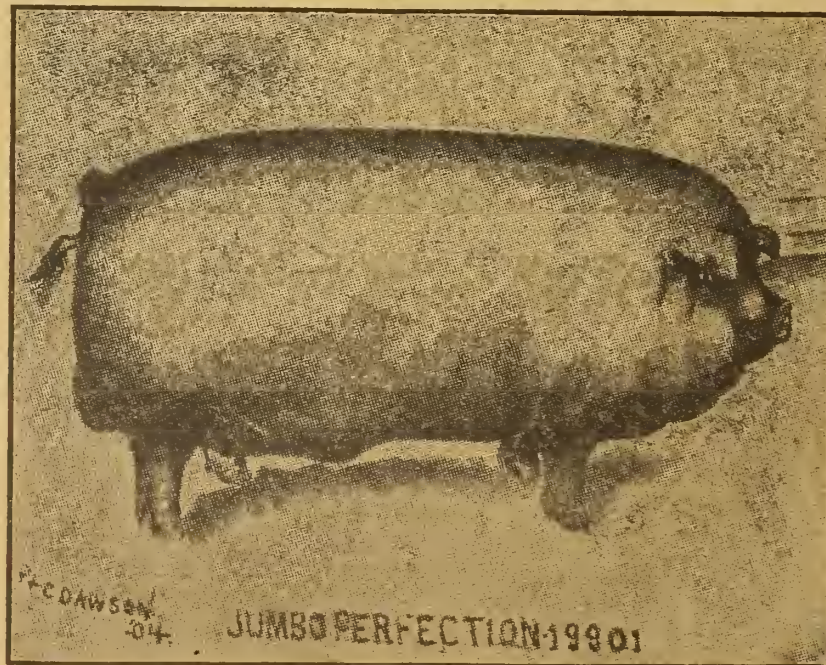

Those who are interested in lands in the Panhandle of Texas should not fail to read Messrs. Boyer & Peterson's advertisement in Lands and Homes department on page 24 of this issue. This firm have a splendid lot of land to offer homeseekers and investors, as the price is lower than is usually asked and it is near railroad, which is a big advantage. Better write them for full particulars.

GOOD TEXAS LAND.

Over a year ago the United States & Mexican Trust Co. purchased 25,600 acres of land in one body in Howard and Borden counties, Texas. These lands were selected by the company and are considered the finest body of unimproved farm lands in the Southwest. Those who are familiar with the purchase and know these lands will be glad to know that they are to be subdivided and sold off in small tracts. We are informed that every acre of this land will produce from three-fourths to one bale of cotton to the acre. The land is also good for wheat, oats, corn, kafir corn, milo maize, garden truck, etc. Fine water can be had anywhere at a depth of from ten to thirty feet. This one item alone is worth many dollars to the homeseeker. We call attention to the trust company's advertisement on page 24.

JOHN LISTER SELLS SHORT-HORNS.

The Hon. John Lister, of Conrad, Iowa, has selected December 20th as the date for his next annual sale of Short-horn cattle. Mr. Lister has been again honored by the people of his district to a seat in the house of representatives of Iowa and given such an endorsement as few men get. Mr. Lister is a republican and was elected on that ticket, the democrats feeling that he was such a strong man that they did not put up any candidate against him. Certainly no man can receive a higher endorsement from the people of his county than this. In order that his cares may be relieved, he has decided to make this sale prior to his going to Des Moines. Hence, on the above date he will sell forty-five head of the best Short-horns that were ever yet offered. There will be twelve bulls in the offering, eight of which are Scotch, and decidedly the best lot that he has ever put on the market. The herd is in charge of Mr. Geo. Pierce, who is certainly doing much to improve their condition and put them in shape for sale day. Mr. Pierce was Mr. Ed Donahay's old herdsman, and also served the late Martin Flynn, Mr. H. D. Parsons and other prominent breeders. Of the Scotch females represented in Mr. Lister's offering are two Victorias, two Orange Blossoms, one Dorothy, one Duchess of Gloster and one out of Imp. Bell of the Archers, one Nonpareil, etc. There are fifteen Scotch females in the sale and fifteen calves will sell with their dams. In other words there is at this time sixty head of cattle in sight that sell at forty-five catalog lots. Mr. Lister is very fortunate in having at the head of his herd two most excellent herd bulls, and both of the same Cruickshank family, the Victoria. We refer to Double Victor, the eight-year-old red bull that is included in the sale, and to Fearless Victor, the other herd bull that Mr. Lister paid \$1,450 for. Perhaps the top of the sale in the females is the beautiful roan heifer, Pleasant Ridge Athene. This is a thick, massive heifer, wonderfully good in the crops and chine, and is possessed of a very smooth, broad, thick-fleshed back. She was sired by Double Victor and is now bred to Fearless Victor. This is a heifer that would command attention wherever shown. She has a fitting stable companion in Pleasant Ridge Gladness, also a daughter of Double Victor. This is a thick, tidy, red heifer that is attractive throughout, and one of the kind that ought to stay in the breeding herd. If these two heifers do not signify that Double Victor is a great sire and that he is entitled to command a long price at this sale, we do not know what it would take to convince one of his good qualities. There will doubtless be

HOME OF JUMBO PERFECTION.

In many instances men have grown prominent in some breed of swine by the purchase of a notable sire or by buying a number of prize-winning sows, but it is the experience of successful men in this business that the man who is a careful student of his respective breed and has the knowledge of proper mating to produce the high-class animal, is the man that is the stayer. Such is the case with Messrs. H. B. Loudon & Son, of Clay Center, Neb. While they have never gone to extremes in their buying, they have produced some of the best animals known to the Duroc Jersey breed. This is the home of Jumbo's Perfection 1901, one of the most noted sires of the breed. He is now coming five years old and yet retains wonderful smoothness for a hog of his size and age. He was twice a winner of first at the Nebraska State Fair and was good enough to be placed third at the St. Louis Exposition. Not only is he a prize-winning sire, but is the sire of many of the best pigs shown at the state fair in the last three years. Messrs. H. B. Loudon & Son will hold their annual brood sow sale February 12th, in which they will close out their entire herd of Short-horn cattle. In this sale will be included daughters of Jumbo's Perfection, Hambletonian and many other noted sires, which will be bred to a son of Tip Top Notcher and a son of Ambition. With this great cross of prize-winning blood on produce, Mr. Geo. Schwab, of Clay Center, will sell on February 11th, and Messrs. Wm. East & Son on February 13th. Remember this circuit and arrange to attend all three sales.

I want DIFFICULT Eye Cases

I WANT every man, woman or child afflicted with diseases of the eye to write to me. No matter who the person is, what their trouble is, or where they live, I wish to convince them that in my Absorption Method there is hope, and you would say so too, if you know of the many, many cases that I have cured after others termed them hopeless. Here is one of the hundreds of cases successfully treated by the

MADISON ABSORPTION METHOD

after others termed it hopeless.

Mrs. F. L. Wintermute, 121 Second St., Jackson, Mich., under date of Oct. 18, 1906, writes: "After having been repeatedly told that there was no cure for my cataracts except an operation, today my eyes are perfect by means of your kufolose home treatment. I have regained my vision in six months."

Now, remember, no matter what your eye trouble may be, even if you are cross-eyed, sit down and write me today describing the case, and I will tell you what to do. I will also send you FREE my 80-page Book, illustrated in colors, which is a classic on diseases of the eye. It will tell you who I am, what I have done and what confidence others place in me. I treat every case personally. My reputation was gained by curing difficult eye affliction

P. C. MADISON, M. D., Suite 308, 80 Dearborn St., CHICAGO.

an opportunity to secure in this fellow a cheap hull on account of his years. However, a reasonable expectancy of four years' service is altogether probable. One crop of calves from this hull would be worth far more money by their increased value than the price this hull is likely to bring. A choicely-bred Victoria will be noted in Victoria 2d, sired by Collyville Victor and out of Victoria of Sunnyside 2d. This is a grand good cow just ready to drop a calf. A fancy heifer is Mina Victoria 2d and belongs to the Campbell famous Mina family. The writer has been familiar with Mr. Lister's offering for several years and at no time does he recall that he has ever placed on the market so good and useful a lot of Short-horns as will be sold in this sale December 20th. The sale will be held on the Lister farm, four miles from Conrad, and applications for catalog should be made to Mr. John Lister, Conrad, Iowa.

PRINE'S BERKSHIRE BOARS.

Those breeders who are looking for good Berkshire boars for immediate service will do well to write or visit Mr. Geo. S. Prine, at Oskaloosa, Iowa. Those who have been in the Berkshire business for some time will remember this herd under the name of Messrs. M. K. Prine & Son. From 1872 to 1900 the firm went under that name, but since the latter date the new firm name has been used. Mr. Prine, the present manager, has always pushed the business and his experience in the show ring and in breeding and growing this breed has made it possible for him to now offer some of the best specimens of the breed to his fellow workers. In this herd will be found much prize-winning stock, from such noted sires as Lord Lee 61133, champion at the 1905 American Royal and one of the famous sons of Lord Premier, which at the age of six years sold for \$1,500, and from his get was chosen 90 per cent of the winners at St. Louis. There is also some of the blood of the famous Masterpiece which sold for \$2,500, in this family. Write to Mr. Prine for more detailed descriptions of his stock. Kindly refer to The Homestead when making such request.

S. J. MILLER'S PERCHERONS, COACHERS AND JACKS.

Mr. S. J. Miller, of Kirksville, Mo., the importer of Percherons and coaches, writes that he has never had an importation of horses do better than has the present importation that are now in his barns. Mr. Miller has had several visitors at the barns who have visited many importers and all have said that they have never seen such an array of coming threes and fours as he brought over this year. Mr. Miller paid particular attention to scale, yet quality was an all important factor in all his purchases. Good colors were also looked after and nearly all are blacks, with a few dark grays. Mr. Miller has never asked high prices for his stallions, preferring to make quick sales and at a reasonable margin of profit. By this policy Mr. Miller has held his elder customers, they in turn have recommended his horses to prospective purchasers and he again this year will continue to sell at live and let live prices. Mr. Miller, while not making a specialty of jacks and jennets, has on hand and for sale some first-class mammoth jacks that must be seen to be appreciated. Among these is one that is pronounced by

competent jack men as one of the best jacks in Missouri. Mr. Miller's advertisement will be found on page 42. He requests that you write him, telling what you want. Pictures of the horses will also be sent on request.

BARBER'S PREMIUM CHESTER WHITES.

Mr. J. L. Barber, of Harlan, Iowa, the well-known Chester White breeder, writes: "Owing to the great rush of orders I am compelled to declare off my sale date on January 18th and instead will sell them all at private sale. Nearly all my boar pigs have been shipped on approval and not a pig has been returned. Inasmuch as I will not hold a sale, I have decided to give the buyers the benefit of the saving incidental thereto, and am now offering forty head of matured brood sows and thirty-five or forty gilts, and they are good ones. These will be bred to Chief Commander and Captain, the latter boar being one of the most noted Chester White boars living. He was first and sweepstakes hog at nearly all the leading state fairs and he is a grand hog in every way. He was reserve champion at St. Louis in 1904. I am also using the splendid boar, Hawkeye Boy, on these sows." Mr. Barber has the hogs and he will ship on approval and we can conscientiously advise any of our readers to send him an order. He will treat you right and you will be pleased with his stock, as he has the very best.

PETER STERLING FOR SALE.

One of the last chances to get a son of Chief Tecumseh 3d is offered by Mr. Thos. F. Miller, of Fullerton, Neb. He now offers to sell Peter Sterling 63535 by Chief Tecumseh 3d, dam Graceful by Grand Look 54435 by Look Out 28901; second dam Pride of Logan by Harding's Free Trade. We doubt if Chief Tecumseh 3d ever sired a better boar or a better breeder than Peter Sterling. As a sire of brood sows he has no

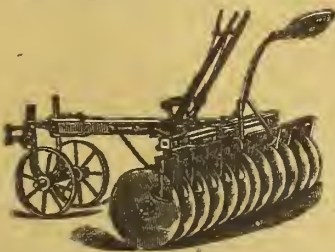

USERS OF DISK HARROWS, TAKE NOTICE.

One of our big advertisers, the American Harrow Company, of Detroit, Michigan, are using our columns earlier this season than ever with announcements advising our readers who wish to be sure of having a disk harrow to use at the season of the year they need it, to place their orders earlier because they cannot guarantee to fill all orders in their rush season.

This company have had a remarkable sale on their tongueless disk harrows, and last spring their books showed that they had to return 1,463 orders for these implements that it was impossible for them to fill on account of their factory not being able to turn out enough harrows to go round.

This phenomenal sale was brought about on account of the merit of their patented tongueless disk harrow, which has many points of advantage over the old-style disk harrows so generally used.

We can easily understand the points of superiority of the tongueless disk harrow over any disk having a tongue. By doing away

with a tongue, and using a forward truck, both horses pull alike at all times, either on straight-away pulls or short turns—the truck doing away with all side thrash and neck weight, which has "bumped up" so many horses just at the season of the year when they are most needed.

To any of our readers who are not familiar with the Detroit Tongueless Disk Harrow, we advise that they write to the American Harrow Company for their catalog and other printed matter, and if they decide to buy one of these harrows, we see a good reason why they should place their order early to be sure of getting their implement just when they need it.

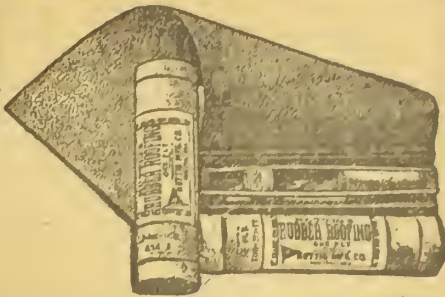

A postal card addressed to the American Harrow Company, Detroit, Michigan, will bring you full information.

superior in the West. He is now six years old, but is in good condition for his age. In condition he will weigh 800 pounds and has a ten-inch hone. As Mr. Miller is going to sell out in January and as he is through with the boar for this season, he therefore decided to sell him and allow some good breeder to get the use out of him yet this year. He makes the low price of \$75 on him if taken at once, and we want to go on record as saying that he is a great bargain to the man that will take care of him. We have known how this boar breeds for a number of years and we can recommend him to any Poland China breeder who wants a good sire of large and big-boned hogs. Write Mr. Miller at once and kindly mention this paper.

G. W. HARRISON'S SHORT-HORN SALE.

On Tuesday, December 18th, at his well-known Meadow Brook Stock Farm, near Washta, Iowa, Mr. G. W. Harrison will make his second annual public sale of Short-horn cattle. He will offer fifty-five head, thirty cows, twenty yearling heifers and five young bulls, many of which are sired by and are bred to the well-known bull, Scottish Knight 136371. Many of the older Short-horn breeders will remember this bull as the chief stock bull at the head of the H. W. Weiss herd a few years ago, when that herd was considered one of the most noted in the United States. He has had few equals as a breeder and many of the young heifers and young bulls that will be sold in this sale will be sired by him, and many of the females will be safe in calf to him. As a special attraction to breeders Mr. Harrison is putting in the great young heifer, Victoria Crown, a daughter of the noted Iowa Agricultural College bull, Imp. Scotland's Crown. Her dam is the noted cow, 20th Linwood Victoria, by Gallahad, and she is one of the greatest cows in Iowa today. This splendid young roan heifer will be well along in calf to Scottish Knight, and she is the kind that the best breeders in the land can afford to own. In fact she will be one of the very

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co., Muscatine, Iowa.

TYPEWRITER

FOR SALE—Several typewriters as good as new. Bargains for those who come first. Address, Gilmore Co., 303 Locust St., Des Moines, Ia.

choice bargains of the season. He is putting in a good bunch of Scotch-topped Canadian-bred cows, with great broad backs, the thick-fleshed kind, and splendid milkers. The man that buys one of these will never need a nurse cow to raise a calf, as they will do it and do it to perfection. There will be mostly bred to Scottish Knight. There will also be a lot of Scottish Knight heifers in the sale, many of which are out of these Canadian-bred cows. About ten of the cows

will have calf at foot by Scottish Knight and Young Scottish Knight. There will be three or four sons of Scottish Knight in the sale, two of which are straight Scotch bulls. Besides these he will sell a car load of young bulls fit to go on the range or are fit for any farmer's use. Those who want bulls in car load lots will find an excellent bunch in this sale. There are seventeen of these and they range in age from fourteen to eighteen months. Mr. Harrison is putting

up an excellent lot of Short-horns, of the practical debt-paying kind, and as there will be some good bargains in this sale we urge all our readers who are wanting cattle to attend the sale. His catalog is now ready and can be had for the asking. When writing kindly mention The Homestead.

RHEA BROS.' STALLIONS.

With this issue of The Homestead we again begin the advertisement of Messrs. Rhea Bros., of Arlington, Neb. We want to say to our readers that these breeders never had as good a lot of stallions and mares as they have this year. At the Nebraska State Fair they exhibited eleven stallions and won nine prizes, as follows: Second and fourth on four-year-olds; first on three-year-olds; second, third and fourth on two-year-olds, and

Every stallion sold under a positive breeding guarantee. Write or go and see them. Arlington is on the main line of the N. W. R. R., twenty-five miles northwest of Omaha and eight miles east of Fremont.

STAMM PERCHERONS.

The new advertisement of Mr. Nicholas Stamm, of Letts, Iowa, offering Percheron stallions for sale, appears on page 37 of this issue. Mr. Stamm is a breeder who stands at the top among American breeders of Percherons. It is a well-known fact, we are creditably informed, that he owns some of the best mares in the United States, and no one is better qualified or better equipped to breed and grow good draft horses than Mr. Stamm. His breeding stock has always been selected with great care, being very particular in re-

Improver 192264 and his get, the property of Mr. J. C. Hardman, of Brayton, Iowa, to be sold in the Breeders' Short-horn sale, at Audubon, Iowa, Thursday, December 20, 1906.

first, second and third on yearlings. At the Interstate Fair at Sioux City, Iowa, they had seven entries and got five places: Second on four-year-olds; first and third on three-year-olds; second on two-year-olds, and first on yearlings. Their horses are home bred and acclimated, have the size, bone and quality and are raised in pastures, and in consequence will always get the largest per cent of colts. They are not only in position to produce stallions at the lowest possible cost, but they are also in a position to sell a horse that will be satisfactory in every way. They sell them themselves, so can afford and do sell them at reasonable prices.

gards to type, size, quality of bone and action. The present head of his stud is Bannin, an ideal horse from a Percheron standpoint, and a tested sire. His get have been winners at International shows and stallions by him are used at the head of some of the best studs of America. Mr. Stamm breeds horses to sell and is now offering for sale a fine lot of stallions and mares at moderate prices, when quality and breeding are considered. Buyers will find his horses blacks and grays in color, with plenty of bone, and bred right. He has a number of ton mares in the herd and buyers who will take the time to visit him at his home and inspect his stock are assured that they will find nothing but first-class stuff, and we further assure them that Mr. Stamm will treat them courteously and deal with them honestly. We take pleasure in commending him as an upright, honest breeder of high-class Percheron horses and urge our readers who are in the market for a good young stallion or a span of mares, the breeding and ancestry of which can be relied upon, to write Mr. Stamm for prices and full description, stating that they saw his advertisement in The Homestead.

REGISTERED CLYDESDALE AND PERCHERON BROOD MARES FOR SALE.

On December 18th Mr. A. H. Brett, of Mason City, Iowa, will expose at public auction six registered Clydesdale mares of splendid conformation, bone and finish, all in foal to an imported stallion. These mares are royally bred and have come through a lineage of prize winners unequalled. At the same time and place he will sell four registered Percheron mares, all bred to a splendid registered Percheron stallion. These mares are splendid representatives of the breed and will certainly be sought after by the farmers of Iowa and Minnesota. He will also sell one choice Percheron stud colt, as well as one Clydesdale stud colt. This will afford some farmer an opportunity to get for himself first-class draft stallions by buying one of these colts and developing him to suit himself. Usually these stud colts can be purchased very reasonable and when grown to maturity will net for the developer a fine margin of profit. At this particular time there are more farmers and breeders in search of good registered mares of the draft breeds than ever before in the history of the country. The writer is aware of one breeder in Iowa who commissioned an importer to bring over twenty select imported mares for him this season. These mares were purchased and laid down in Iowa at a cost of \$17,000, or nearly \$1,000 per head. The chances are that the mares offered for sale by Mr. Brett, can be purchased for very much less money than the prices above quoted and will in all probability produce equally as good colts. However, the sale should be kept in mind by all who contemplate the purchase of registered mares, and applications for the catalogs of this sale should be made at once to Mr. A. H. Brett, Mason City, Iowa.

SALE OF CHOICE HEREFORDS.

One of the most promising sales of the season for this breed will be held by Mr. E. R. Morgan at Blue Rapids, Kan. The sale date is December 19, 1906, and a comfortable place has been provided at the large association barn at that place. Perhaps the most important feature of the offering is the bulls. Thirty-five of these are offered. Their breeding could not very well be improved upon. Mr. Morgan prides himself on this end of the sale. His bred bulls have always been selected with care. Among this offering of males will be found the get of Baccalaureate 81587, at the head of the herd for six years. He was a product of Messrs. Guggell & Simpson's breeding and his dam is Bangle 3d, one of the best cows in the herd of Mr. Funkhouser, of Indiana. Others of the sires are Keep On 43d 15466, a full brother to Keep On 26th, which holds enviable World's Fair record; also Imp. Roseberry and Imp. Kensington Brick. These sires are a particularly strong lot. They need little eulogy. While those who are desirous of buying in car lots are encouraged to attend, those looking for herd bulls will find something to their taste. Two of the

"I Am Completely Cured"

This is the unanimous declaration of afflicted men who are dismissed by Dr. J. Boyd, Des Moines' Successful Pelvic Physician who permanently cures:

Stricture, Blood Poison, Varicocele, Hydrocele

WATCH US, ..Boys and Girls..

We're WATCHING lots of your Boy and Girl Friends.
Why not You? With an INITIAL WATCH at that.

YOUR OWN INITIAL ON YOUR OWN WATCH.

No live boy or wide-awake girl will be without one. For an Initial Watch is your very own. No other boy or girl will want to borrow, swap, or steal. It is yours to keep, and

IT COSTS YOU NOT A CENT.

That's the beauty of it. You can get this watch for nothing. Just write us and we'll tell you all about it. But say, we're not guying you. It's a real watch we are talking about, not just a toy—a regular time keeper, and a beauty, too. It comes in two sizes the "Mite" or lady's watch and the regular 16 size boy's or men's time piece.

You've heard of the three kinds of pie the landlady had—"open-face, criss-cross and kivered top, all filled with dried apples"—Well, this is the open-face kind; but it is not filled with dried apples. It has a regular American lever movement, fully guaranteed, with solid nickel back, your own initial on the case, stem wind and stem set, with porcelain dial, polished steel hands, heavy beveled crystal; in fact everything that goes to the making of a first class time piece.

Do you want one? Just say the word and it's yours! Drop us a line, say you want to earn a watch, and send us your full name and address. You'll get a letter by return mail with full particulars and it's a sure thing you'll earn the watch the same day you get that letter. Address,

young hulls have already won prizes at the Nebraska State Fair. One is Dale 216522, a March yearling weighing 1,500 and a near relative of Corrector and Boatman. Dauntless 244672 is the other, an August yearling sired by Baccalaureate and dropped by Dream 73648, one of the best breeding cows on the farm. The hulls are from fifteen to twenty-four months old and have been grown in such a manner as to insure future usefulness.

The helpers are mostly two-year-olds and by the same sires as the hulls. Leta 2d 182668, a coming three-year-old and a granddaughter of Beau Brummel, has a bull calf by Onward 18th at foot. All females are bred to Onward 18th, champion, and son of the champion, March On 6th. Onward 18th was first as a yearling at St. Louis and junior champion at the Royal the same year; also champion at Nebraska this fall. If you

are looking for some choice Hereford males or females you can hardly afford to miss this sale. Here is variety, quality and utility. Catalogs will be sent only on application. For advertisement of sale see page 31 and kindly mention this paper when writing to Mr. Morgan.

THE MILLS PERCHERON AND FRENCH DRAFT SALE.

Those who are looking for Percheron and French Draft stallions and mares should be sure to attend the sale of Messrs. J. R. Mills & Son, at their farm, near Perry, Iowa, on Wednesday, December 19th. They are selling eighteen head of registered horses, and six of these are stallions. Besides these are a number of work horses and one pony. They are selling their old stud horse, Narcisse 10976 (4240), and a great many of his get. He was bred by M. Radals, of Souanee, France, and was imported by Mr. M. W. Dunham. He was a prize winner in France in his younger days, and as a breeder has few equals. He is not the largest horse in the world, but he does get a class of colts that always sell, and the eleven head that go into this sale belonging to him will prove his worth as a sire and all that we say about him. There are several yearling and two-year-old stallion colts in this sale sired by Narcisse that are good enough to go anywhere. They have the bone and the quality, are exceptionally toppy and they will please the man that wants a good draft horse. These horses must be seen to be appreciated, and anyone who is looking for a good draft stallion will do well to arrange to be present when the sale takes place. There are some splendid mares in the sale, among which are some good matched teams. One of these will have a colt at side, and all the mares that are old enough will be bred again and are safe in foal. There are some excellent fillies and brood mares in the sale, and were it not for the fact that Mr. Mills is leaving the farm they never would be disposed of. They also sell four head of registered Short-horn cattle, two young bulls and two cows that are safe in calf. Besides these will be seven head of Aberdeen Angus bulls, all eligible to registry, twenty head of cows and heifers, twenty-four head of Short-horn steers and twenty head of Duroc Jersey sows, all old enough to breed. Those who are wanting registered draft stallions or mares should not fail to attend this sale. Write for catalog at once and be kind enough to mention this paper.

THE LAST CALL FOR THE BALDWIN SHORT-HORN SALE.

On Thursday, December 13th, Mr. T. A. Baldwin will sell, at his farm adjoining the town of Emmetsburg, Iowa, a draft of thirty-six head of Short-horn cattle, among which are twenty-nine females and six bulls. This is practically a closing out sale, as he sells everything except a few young heifers. Imp. Primrose 6th, a daughter of the noted Abbotsford 2d, is decidedly the attraction of his sale, and she will be safe in calf to the Scotch bull, Morning View Lad. His imported herd bull, Grand View Chief, will also be sold in this sale. He is a son of the well-known bull, Rustic Chief, and he is a red roan in color and has a very shapely, drooping horn. There will be a couple of good daughters of that famous old show and breeding bull, St. Valentine, in the sale. One of these, Warden Dove 2d, was said to be one of the best heifers in the Geo. Ward sale at Chicago a few years ago, and she is still in her prime and in good condition.

TOO LATE TO CLASSIFY.

W. A. FORSYTHE GREENWOOD, MO.

Breeder of Choice Short-Horns.

I HAVE a few strictly first-class Scotch bulls ready for service; also a few Scotch-Topped fellows. I will also price right some very choice cows and heifers, bred to Bapton Valentine, a son of Imp. Bapton Arrow and out of a daughter of the great St. Valentine. A fine opportunity for a foundation herd that is individually right and bred right. Write me about them.

Percheron Stallions and Mares For Sale

I AM the breeder of Glades, second prize winner at the St. Louis World's Fair, the largest two-year-old mare in the world. My three-year-old stallions weigh 1,850 to 1,900 lbs. I also offer my herd stallion, a jet black, 2360 lbs.

NICHOLAS STAMM.

Letts, Iowa

ROYAL BELGIAN STALLIONS

THE best and largest collection of imported and native bred BELGIAN DRAFT HORSES.

Henry Lefebure, Linn Co., Fairfax, Ia.

Poland China Bred Sows and Gilts

FOR SALE.—Sired by great boars and bred to 1's Sunshine, 2d prize boar at Sioux City, and Onward, a son of Keep On, bred for April and May farrow. Write and describe what you want.

A. C. LANHAM, Battle Creek, Iowa

A FEW GOOD PIGS LEFT.

I HAVE for sale two Ohio Chiefs, one Zoo V. Orion and a few other Duroc Jerseys that are good ones.

W. D. PITTMAN, Lake City, Iowa

MILKING SHORT-HORNS.

WE have a number of yearling bulls for sale. We milk all cows and hand raise all calves. All animals guaranteed breeders and pedigrees furnished.

BLACKMER & NELSON, Albert Lea, Minn.

Farm one mile from town.

IMPROVED CHESTER WHITES

BOARS 200 to 250 lbs. at \$15 to \$25 each. Gilts bred or open. Four yearling sows at \$25 each.

E. J. TRUMBAUER, Patterson, Iowa

I HAVE Chester White boars and sows for sale that have the bone and quality to make their first-class and are sired by a State Fair prize winner. For particulars write me. Prices right. P. E. Wentz, Mexico, Mo.

KEAN'S Growthy Durocs—All ages, the best of breeding, extra large bone. Also one yearling and aged male. Frank Kean, Mt. Pleasant, Iowa

There will be several granddaughters of St. Valentine in the sale also. There is not a cow in the sale that has not had a calf within the last twelve months, so buyers may rest assured that when they buy here they are going to get a good, practical breeding animal. Many of the cows will have calf at foot, and everything old enough will be bred and safe in calf. There will be a choice lot of young bulls in the sale, also. Write Mr. T. A. Baldwin, of Emmetsburg, Iowa, for catalog and kindly mention The Homestead.

CRONIN'S SHORT-HORN SALE.

Mr. D. J. Cronin, the veteran Short-horn breeder, of O'Neill, Neb., is making a draft sale at Spencer, Boyd county, Neb., on December 20th, and is putting forward a very creditable lot of cattle. The offering consists of fifteen good select young bulls and twenty-five young cows and heifers. Mr. Cronin is making this sale to reduce his herd and to make a showing of a fair representative bunch from his good herd in this, his neighboring county, where he has many warm friends and good customers. This being his first sale away from home, he assures us that he is putting in some of his very best cattle to show his neighbors on the north that he appreciates their trade and wishes to distribute among them a class of cattle that will do them some good and be a credit to himself as a breeder. People of Boyd county and vicinity will find this a good place to buy good cattle, and when they buy from their neighbor, Mr. Dan Cronin, they will know that they are getting what they buy and that any representations made will be backed up to the letter. Mr. Cronin has built up a reputation for honest dealing, and for selling good cattle. Those who attended his home sales can bear testimony that his sales are always conducted fairly and honestly, every bidder being guaranteed a square deal. Parties attending this sale can feel assured of being treated honestly and courteously. The cattle will not be fat, but in good healthy breeding condition. Some of the best milking strains are represented and this in itself should recommend the cattle to the people of that territory. A good Short-horn cow that will pay her way in milk and butter and produce a calf each year that will sell for more in the fall than four scrub calves, is certainly the cow for the small farmer to keep. Catalogs are now ready and can be had by addressing Mr. Cronin, at O'Neill, Neb.

THE GRAND TRUNK PACIFIC RAILROAD AND WESTERN CANADA.

The railway facilities of western Canada have been taxed to the uttermost in recent years to transfer the surplus grain crop to the eastern markets and the seaboard. The large influx of settlers and the additional area put under crop have added largely to the grain product, and notwithstanding the increased railway facilities that have been placed at the disposal of the public, the question of transportation has proved to be a serious one. It will, therefore, be good news to everyone interested in western Canada to know that an authoritative statement has been given out by Mr. C. M. Hays, president of the Grand Trunk Pacific Railway, that that railway will do its share towards moving the crop of 1907, from Alberta, Saskatchewan and Manitoba to tidewater, and thus assist in removing a serious obstacle which has faced the settler during recent years. Mr. Hays, who has just completed a trip from Portage la Prairie to Edmonton in a prairie schooner, a distance of 735 miles, which was covered in eighteen days, is enthusiastic about the country. This will be gratifying to settlers in the Canadian West, even if Mr. Hays declines to be bound to a time limit with the exactitude of a stopwatch. The Grand Trunk Pacific road will be in a position to take part in the transportation of the crop of 1907, and that will be satisfactory to the settlers in that country when the harvest is garnered. The wheat crop of 1906 in western Canada was about 90,000,000 bushels and, with the increased acreage which is confidently expected to be put under crop next year, it is safely calculated that fully 125,000,000 bushels will be harvested in 1907. The necessity for increased transportation facilities are, therefore, apparent, and the statement made by Mr. Hays will bring encouragement to the farmers of the Canadian West, new and old; a vast new country with an almost illimitable number of homesteads is being opened up.

LAST CALL FOR THE HEALY SOUTH OMAHA SALE.

On Tuesday, December 11th, at South Omaha, is the date set for the all Bates sale of Mr. O. M. Healy, of Bedford, Iowa, and Mr. O. E. Osborn, of Weston, Iowa. It has been a long while since such a well-bred lot of Bates cattle has been offered here in the West, and those who are now looking for the dual-purpose Short-horn will certainly find them in this sale. A perusal of the catalog reveals the cleanest lot of Bates pedigrees that has ever been offered at public auction. The famous Duchess, Wild Eyes, Kirklevingtons and Barringtons are there in goodly numbers, and a cleaner lot of Bates cattle have never been offered here in the West. There are a choice lot of bulls in the sale, including the pure Duke hull, Duke of Wapsie 223370, a 2,200-pound hull and a splendid breeder. Airdrie Duke of Hazlehurst 117846, one of the most noted Bates bulls ever used in the West, and formerly chief herd bull in the Healy herd, is represented in this sale by fourteen head of females. This grand old hull was the sire of the second highest priced cow ever sold in the state of Iowa, and his daughters that are to be sold here are great big cows, with broad backs, good udders and are invariably good milkers. A large proportion of the Healy cattle are with calf or will have calf at foot by Duke of Wapsie. He will be sold in the sale and any breeder who wants a tried and proven Bates hull had better get after him. Mr. O. E. Osborn, of Weston, Iowa, contributes six head to this sale. One of these is a three-year-old herd hull, bred by Messrs. Wornall & Son, of Liberty, Mo., and a fine individual. Two are cows, two are two-year-olds and one a yearling heifer. All are reds and excellent individuals. In Mr. Healy's section of the sale will be three of his excellent young Duke hulls. We are more than glad to direct the attention of our readers to this sale. We have seen a large proportion of the cattle and are glad to say that they are directly in line with all the statements Mr. Healy makes for them. Catalogs are now ready for distribution and may be had by addressing Mr. O. M. Healy, Bedford, Iowa.

ANNUAL SALE OF Short-horn Cattle AT Conrad, Ia., Thurs. Dec. 20, 1906

45 Head of the Best Short-horns Ever Offered.

There will be twelve bulls in the offering, eight of which are Scotch, and decidedly the best lot that I have ever put on the market. Of the Scotch females represented in my offering are two Victorias, two Orange Blossoms, one Dorothy, one Duchess of Gloster and one out of Imp. Bell of the Archers, one Nonpareil, etc. There are fifteen Scotch females in the sale and fifteen calves sell with their dams. In other words there is at this time sixty head of cattle in sight that sell as forty-five catalog lots. I am very fortunate in having at the head of my herd two most excellent herd bulls, and both of the same Cruickshank family, the Victorias. I refer to Double Victor, the eight-year-old red bull that is included in the sale, and to Fearless Victor, the other herd bull that I paid \$1,450 for. Perhaps the top of the sale in the females is the beautiful roan heifer, Pleasant Ridge Athene. She is a thick, massy heifer, wonderfully good in the crops and chine, and is possessed of a very smooth, broad, thick-fleshed back. She was sired by Double Victor and is now bred to Fearless Victor. This is a heifer that would command attention wherever shown. She has a fitting stable companion in Pleasant Ridge Gladness, also a daughter of Double Victor. This is a thick, tidy, red heifer that is attractive throughout, and one of the kind that ought to stay in the breeding herd.

THE HERD IS IN CHARGE OF MR. GEO. PIERCE.

The sale will be held on the Lister farm four miles from Conrad and applications for catalog should be made to

JOHN LISTER, CONRAD, IA.

TOO LATE TO CLASSIFY.

Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on olds. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 yearlings, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder of

PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (36577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

CHRISTMAS GREETINGS

12 Scotch and Scotch Topped Short-horn Bulls for sale at modest prices, any of which would make a valuable Xmas present to friends engaged in the cattle business. Six are by Golfman, five by Melba's Victor, one by Violin's Prince. Eight of them are more than a year old, four just about a year old. Among the Scotch bulls is one red show bull 14 months old by Golfman and out of Melba 2d. Will sell them singly or as a bunch at prices that you can afford to make Xmas presents of them to your friends. Address

A. L. STUTZMAN, Mentioning the Homestead, NEW SHARON, IOWA.

SYLVANUS HAWORTH, New Sharon, Iowa

PUBLIC SALE of Chester Whites December 19, 23 brood sows, 10 boars. Good railroad connections. B. R. Burt, Coggon, Iowa.

Grand Dispersion Sale of Short-horn Cattle.

On December 14th, at Mason City, Iowa, will occur the dispersion sale of Short-horn cattle, Scotch and Scotch topped, the property of Messrs. Marston Bros., but under the management of Dr. Chas. Marston. It was decided early in the season by these wide-awake gentlemen to make a draft sale on December 12th, but later Dr. Marston sold the farm on which these cattle were kept; now this dispersion sale is imperative. It will include each and every animal in the sale, among which are a number of splendid Scotch females and several Scotch bulls, including the herd bulls. Imported cows are listed in this offering. We will speak of the bulls first. Conqueror's Best is the chief herd bull and was sired by Imp. Conqueror and out of Imp. Zoe 5th. A richer pedigree could not be penned on paper. Imp. Conqueror belongs to Marr's Upper Mill Missie tribe, and is one of the best-bred Missie bulls living. He is also a sire of many prize winners, while the dam of Conqueror's Best is Imp. Zoe 5th, belonging to Mr. Cruickshank's famous Clipper tribe, the family that Mr. Cruickshank himself said had furnished him more herd bulls than any other family in the herd. In addition to this bull is Lovely's Comus, a straight Scotch bull of the celebrated Lovely family, having for his dam the prize-winning cow, Lovely 30th. She was the undefeated yearling heifer of 1901. Comus' sire was the Scotch bull, Royal Favorite, out of Imp. Corea. The blood lines of this young bull are certainly choice and Comus is giving a good account of himself in development. He is solid red, calved April 1, 1905. Meteor is another splendid red Scotch bull that has been used on the herd with marked success and is also a Missie, but is contributed by Mr. Avery, near Mason City. Mr. Avery purchased this bull in Canada at a long price, and is selling him for no fault only that a change must of necessity be made, as he has a goodly number of Meteor's heifers. The other Scotch bull is Earl of Prairie View. This is a four-year-old bull whose dam was Flora Princess, a choice cow bred by Messrs. Purdy Bros., of Missouri. Among the Scotch females will be included the six-year-old imported cow, Zoe 5th, also her yearling daughter by Scotland's Crown, the bull that stood at the head of the Iowa Agricultural College herd, and was selected in Scotland by Prof. C. F. Curtiss. This beautiful heifer has just been bred to Lovely's Comus. These are not only two of the choicest females in this offering, but the very choicest that will go through a sale ring this winter. The imported cow is also a splendid individual and is well forward in calf to Lovely's Comus. She is a beautiful red and has always been a regular producer. Flora Princess and her two-year-old daughter are two other plums in this sale among the Scotch cattle. From an individual standpoint there is perhaps no better female in the offering than Flora Princess. Andromeda 2d and her heifer are both splendid individuals suitable to grace the pastures of any herd. The older cow is in calf to Conqueror's Best, while her heifer is by this same bull and is one of the choicest young things in the sale. The remainder of the offering are richly Scotch-topped American sorts. Some of them are somewhat thin in condition, due to the fact that they are heavy milkers and have been suckling big calves until a late period. Messrs. Marston Bros. will sell fifty head and Mr. Avery contributes six. Mr. Avery also contributes one registered Shire stallion, four years old, while Messrs. Marston Bros. contribute four Percherons, including one registered Percheron stallion four years old weighing about 1900 pounds. There are two mares, one three and one ten years old, in the sale. This stallion is a dark bay with black points and is broken to work. The ten-year-old mare is black and the three-year-old a dark gray. Certificates of registration will be furnished with each of these horses and delivered on sale day. Every known defect concerning any of these animals will be pointed out on sale day. Inasmuch as this is a dispersion sale, the cream of this herd that has hitherto been priceless is now thrown on the market to the highest bidder. Certainly this sale will afford opportunities that do not present themselves at any draft sale. Some cattle of superior breeding that have cost Messrs. Marston Bros. plenty of money will be sold December 14th without regard to the price. Catalogs can be had by addressing Dr. Chas. L. Marston, Mason City, Iowa.

Last Call for the Short-horn Sale of J. W. Hanna and Andrew Robertson.

On Wednesday, December 12th, at the farm of Mr. J. W. Hanna, six miles south of Garrison and six miles north of Van Horn, will occur the joint sale of Short-horns, consisting of forty-five head, from the well-known herds of the two above named gentlemen. As has been previously stated these cattle are of the useful, prolific, heavy-milking strain. They are the ideal dual-purpose sorts. The principal families represented are the Zelia, Rose of Sharon, Lady Newham, Matilda, Young Mary, Iantha and Fisher's Roan. A goodly number of the last named family are consigned by Mr. Robertson, while the principal part of the Rose of Sharoons comes from Mr. J. W. Hanna's herd. The offering of bulls is unusually large for this season of the year, fourteen of the forty-five head being bulls. A very large number of the bulls are yearlings and sired by such good Scotch bulls as Sittytown Fame, Golden Gem and Scottish King 3d. The last named bull was by Red Knight, he by Pro Barmpton and out of Home Mysie by Home Secret, and he by Spartan's Hero. Scottish King 3d's dam was Scottish Queen by 17th Scottish Lord and traces to Imp. Violet Bud by Barmpton, he being the sire of Imp. Spartan's Hero. Scottish King 3d is the property of Mr. Andrew Robertson, and he is fortunate indeed in having at the head of his herd so good and thick a Scotch bull as this fellow. Sittytown Fame and Golden Gem are owned by Mr. J. W. Hanna and are his two herd bulls. The first named was got by Commodore, he by Imp. Bandmaster, his dam being Clementina Queen 3d by Imp. Master of the Mint. Sittytown Fame's dam was Home Autumn Rose by Home Secret. She belongs to the famous Cruickshank family of Rosemarys, tracing to Imp. Rosemary by Breadalbane. Golden Gem was sired by Goldenrod and out of the Campbell Ury cow, Ury Gem by Village Boy 6th, she out of Imp. Ury Maid by Vermont. Some good hulls used by Mr. Hanna prior

to the above named were Golden Thistle, Scottish Lad, Regulator and other hulls of similar character and breeding. Scotland Lad was by Red Knight and out of Violet Queen by Blocky out of Imp. Violet Glen by Imp. Favorite, tracing to Imp. Violet Bud by Barmpton. Regulator was perhaps one of the best hulls used by Mr. Hanna. This is Regulator 19th got by Regulator, a pure Cruickshank bull got by Double Gloster out of Imp. Princess Royal O. E. F. by the celebrated Field Marshal. We speak of these hulls at length to show to the Short-horn world that these gentlemen have been using as good Scotch hulls as the country afforded, both from the standpoint of pedigree and individual merit. The Waverly Rose Branch of the Rose of Sharon family are represented in Mr. Hanna's herd just as they were in the celebrated Linwood herd of Col. W. A. Harris. In fact, it was through Colonel Harris that these cattle were secured. The best hull ever owned by Mr. Benjamin Whitsitt, at Pre-emption, Ill., was old Waverly, a bull bred by Colonel Harris and out of Waverly Rose. No bull ever did so much for the Prairie Heart herd as did old Waverly. Farmers of central Iowa who are contemplating the purchase of Short-horns this winter will do well to keep this sale in mind, as it doubtless will afford them a splendid opportunity to secure good, practical, everyday Short-horns that will yield a good profit on the investment. Application for catalogs of this sale should be made either to Mr. J. W. Hanna or Mr. Andrew Robertson, at Garrison, Iowa. In doing so, kindly mention The Homestead.

The Audubon Short-horn Sale.

The first annual sale of the Audubon County Short-horn Breeders' Association, under the management of Mr. J. C. Hardman, will be held at Audubon, Iowa, on Thursday, December 20th, the day following the C. A. Saunders sale. Included in this sale will be found some remarkably well-bred cattle, there being about ten or twelve head of straight Scotch cattle in the offering. The bull offering is particularly strong, there being nine head of straight Scotch bulls, and some of these are good enough to head any herd in the West. Mr. Hardman consigns two of these Scotch bulls, one of which is his herd bull, Improver 192264, the other being Roan Victor 2d 265482. The former bull is a son of the noted Golden Drop Victor and had for his dam Imp. Countess of Aberdeen. While not a large bull, he is nevertheless a most excellent breeder and some of the best things in the Hardman herd are sired by him. He is a four-year-old and some man who wants a tried herd bull will get a bargain in him. Roan Victor 2d is a March calf out of a daughter of Canute, and he is one of the best young bulls in the sale. He is a Cruickshank Victoria, is bred in the purple and he bids fair to make a great herd bull if he goes into good hands. He is a roan in color, is a very mellow, thick-fleshed fellow and one that will catch the eye of some good breeder on sale day. Messrs. J. A. Harris & Son, of Atlantic, Iowa, sell a two-year-old bull called Rockford Boy 265449. He is a son of the Harris-bred bull, Linwood, that formerly headed their herd, and his dam is Queen of Beauty 8th by Double Lavender. He is one of those richly-bred Queen of Beauty hulls, is red in color and will easily make a 2,400-pound bull when matured. Mr. W. D. Pratt, of Anita, Iowa, sells two of the best hulls in this sale. Both of these are sired by his well-known Victoria bull, Victoria Prince 3d 172512. One of these is Crabstone Chief 255554 out of Imp. Crabstone Shepherdess, is red in color and is a Miss Ramsden, and we unhesitatingly recommend this bull to any man who is looking for a herd bull. The other is Iowa Chief 251909 out of Petuna C. by Count Amaranth, and his grandam is Imp. Petuna 2d, a second-prize cow at the Banff show in Scotland. Both of these young bulls deserve the attention of our best breeders, and especially those that are looking for good herd bulls. They are half brothers to the bull that sold in the Thurman sale for \$500, and they are just as good as he was. Mr. J. T. Jenkins puts in three well-bred Scotch hulls. One of these is a Mysie, one is a Duchess of Gloster and another is a Dainty Dame. These three bulls are bred in the purple and are good, growthy young hulls. Besides these there will be a number of good Scotch-topped young hulls. One of the best cows that goes into the sale is Mayflower of Pine Grove, bred by Messrs. W. C. Edwards & Co., of Rockland, Ontario. She is a five-year-old and is a daughter of Imp. Scottish Minstrel, one of the best hulls ever used in Canada. She is a large roan cow, a good breeder and will be safe in calf to Improver. He will also have a number of other good Scotch-topped cows in the sale, some of which will have calves at side, or bred to the Scotch bull, Improver. Messrs. Harris & Son will consign eight head of cows and they are all good ones. They are large, broad-backed cows, most excellent milkers and are bred or will have calf at side by their Queen of Beauty bull, Sultan of Sulu, now at the head of the Harris herd. Mr. H. P. Bonneson, of Audubon, Iowa, puts in a splendid bunch of females and these we will speak of in our next issue. The sale is made up of a lot of good cattle and the bull end of it is one of the best that has been made this year. Kindly write Mr. J. C. Hardman, manager, Brayton, Iowa, for catalog and please mention The Homestead when doing so.

A Word to Short-horn Breeders Who Need a Good Bull.

Mr. A. L. Stutzman, of New Sharon, Iowa, has not only been a breeder of good Short-horns for several years, but has been an exhibitor, successfully, too, at the Iowa State Fair. Few breeders of Short-horns have had more choicely-bred Scotch bulls at the head of their herd than has Mr. A. L. Stutzman. Being a thoroughly practical and common sense man, Mr. Stutzman has naturally made a study of the Short-horn business one of the strong features of his life work. At this particular time Mr. Stutzman has twelve hulls from one year to twenty-three months of age now ready to place on the market. A fair portion of these hulls are Scotch; the remainder from three to five Scotch tops. Mr. Stutzman's herd bull, Golfman, is unquestionably one of the thickest-fleshed, mellowest Cruickshank hulls in America, and he is certainly as well bred as any bull living. He was sired by the show bull, Baron

SECOND ANNUAL SALE OF SCOTCH AND SCOTCH TOPPED SHORTHORNS

From the Grand Meadow Brook Herd of
G. W. HARRISON, WASHTA, IOWA.

TUESDAY, DEC. 18, 1906
55 Head Offered For Sale 55

Thirty cows, twenty yearling heifers and five bulls, also a car load of range bulls that will be sold in one lot. The great show heifer, Victoria Crown, a son of the noted bull, Imp. Scotland's Crown, will be one of the great attractions of the sale. The cows are a lot of large table-backed, thick-fleshed kind and are grand, good milkers, with five and six Scotch-tops. Note these pedigrees:

Herd bull, for reference—many of the cows bred to him are the sire of young bulls and heifers in sale.

A CAR LOAD OF SHORT-HORNS FOR SALE

On Tuesday, Dec. 18, '06, at Humphrey, Neb.

I will sell a car load of choice, young Short-horn cows, heifers and bulls. There will be a choice lot of young bulls, some old enough for immediate service, and will include some prize winners at the New Sharon (Iowa) District fair. These cattle will be sold off of pasture, but will be in good thrifty condition.

F. E. TERRELL - - - Montezuma, Iowa.

Cruickshank 3d, and he by Imp. Baron Cruickshank, while Golfman's dam was no less than the celebrated cow, Gwendoline 2d, a daughter of Imp. Cupbearer and out of Imp. Gwendoline. She was a show and champion cow; a dairy cow as well; in fact, Gwendoline 2d was held up by our best-informed judges of Short-horns as the ideal Short-horn cow, possessing all the good points and qualities and traits of character that go to make the perfect and ideal general purpose animal. This splendid bull, Golfman, is assisted by Melba's Victor, a son of that famous cow, Imp. Melba. Possibly aside from Golfman, no other hull has ever been used by Mr. Stutzman that is so good individually or that is proving himself such a worthy breeder. Melba's Victor is a solid red bull and is siring red calves right along from roan cows. Of the young hulls offered for sale, six are by Golfman, five by Melba's Victor and one by Viola's Prince. One of the good Scotch hulls is by Golfman and out of Rose 8th of Maine Valley. This fellow is a solid red and is about twenty-three months old. The reason that he is still in the herd at this age is because Mr. Stutzman thought so much of him that he kept him to use some. He being a tried and sure breeder, no risk is run whatever by prospective purchasers. Perhaps the plum of the lot is also a son of Golfman, out of Melba 2d, she being a daughter of Imp. Fearless Archer and Imp. Melba. A full brother to this splendid bull is now at the head of Mr. R. H. Hadley's herd at New Providence, Iowa. This bull is fourteen months old, has a typical Short-horn head and horn, quite close to the ground, very heavy bone and great depth of body, with good rib expansion and in fact is possessed of about all the good qualities that it takes to make up a strictly first-class Short-horn

bull. It is indeed doubtful if Mr. Stutzman has ever had anything better than this fellow to place on the market. Melba 4th also has a splendid son by Golfman, while she herself was by Baron Aylesby, Baron Aylesby was by Prince Royal and out of Imp. Princess Alice. Thus it will be seen that the breeding of these hulls mentioned is about all that could be asked. A splendid rich roan young hull out of Gay Lassie 3d, she by Baron Aylesby, and her dam by Baron Cruickshank 3d, while the third dam was by the celebrated show and breeding bull, Gay Monarch, so long at the head of the herd of J. G. Robbins & Son. This bull is certainly related to as much of the aristocracy in Short-hornedom as one could well wish. This bunch of twelve young hulls are without question the very best that Mr. Stutzman has ever had to offer. They are up for private sale. Kindly mention this paper when writing.

Von Seggern's Hereford Sale.

On Wednesday, December 19th, Mr. J. G. Von Seggern, of Wisner, Neb., will sell at his farm twenty-four head of Hereford cattle. There will be twenty cows and heifers and four bulls. The bulls will range in age from ten to twenty months and two of these are sons of his splendid herd bull, Columbus 25th. Another of these is a grandson of Monarch of Heslod 29th and the other is a son of Monarch of Shadeland 10th. There will be about a dozen granddaughters of the noted Lamplighter in the sale and a few good heifers sired by Columbus 25th. Those who want Hereford cattle should write Mr. Von Seggern for catalog and then go to the sale. Kindly mention The Homestead when writing.

Last Call for the Lakewood Sale of Percheron Stallions and Mares.

This is our last opportunity to call attention to the eighth annual sale of registered Percheron stallions and mares from the Hon. H. G. McMillan's famous Lakewood breeding establishment at Rock Rapids, Iowa. Wednesday and Thursday, December 12th and 13th, are the days set apart for this, the largest event of its kind in history. On this occasion Cols. F. M. Woods, Pat McGuire and Dan Sayre will part ownership with the choicest bunch of young stallions and mares that has ever gone under the auctioneer's hammer in America at one offering. As has been before stated, there are 100 head of horses cataloged in this sale, thirty-two of which are stallions of the choicest breeding and individual merit. At least twenty of these stallions are two and three years old, weighing from 1,750 to 1,950 pounds at the present time. They are just the class that stock companies are selling to the farmers at from \$2,000 to \$3,000 each. It is not expected that these stallions will sell high, as it has never been the experience of Mr. McMillan in his public auctions to receive more than one-half the price for his stallions that the same quality were bringing when put on the market by salesmen. This saving of course will accrue to the wise and sagacious buyer who attends the sale. There are a combination of reasons why this particular sale will afford an unusual opportunity to secure high-class stallions and mares at modest prices. The chief reason is in the fact that there is such an unusual amount of horses thrown on the market to one crowd of buyers. It is generally known among those who attend auction sales, that from forty-five to sixty animals is as many as will usually be taken at good prices by any one gathering of people, and when 33-1-3 per cent more than that are forced on the market to the same crowd, it will be altogether unusual if some rare bargains will not be the order of the day. It will be radically wrong for prospective buyers to stay away from the sale thinking that, because of the high character of these stallions and mares, being either sired by or bred to two of the best Percheron stallions in America, prices may go beyond their reach. While it is true that Mr. McMillan has paid fabulous prices for some of his breeding stock, and particularly his two international prize-winning stallions, Calypso and Olbert, nevertheless he has reared the most of these horses on the Lakewood Farm and is prepared to take whatever prices the public set fit to place on them. As has been the practice in all other Lakewood sales, every animal offered will be sold, if there is a bid made on it. The writer has been present at other Lakewood sales and we speak knowingly when we say that there has never been any protection thrown about any of the animals in the McMillan sale. It is true that the prices have been so low in many instances that it caused the owner to wince somewhat, yet he took his medicine, and thus gained the confidence of the buyers that whatever he offered would be sold if there was a bid made. This sale will be conducted in the same straight-forward manner as will all its successors, as Mr. McMillan is not given to dodging the issue in any way. Among these stallions are some that are capable of standing side by side with other stallions that have sold as high as \$3,000 each and still giving a splendid account of themselves in every way. We have seen stallions at Mr. McMillan's sales sell for \$1,000 or less that were the equal of many others bringing two and three times this sum, coming from other sources. The mares in this lot, which number some sixty-five or more are the choicest band that has ever gathered together for sale purposes. They are largely the get of Calypso and bred to Olbert. The show record of the McMillan stallions in 1905 and 1906 is the greatest ever made by any one breeder or firm. We will conclude this article by producing the show record for 1905-6 at some of the leading state fairs. The catalogs may be had by addressing Mr. H. G. McMillan, Cedar Rapids, Iowa, or Mr. Casb M. Dent, Rock Rapids, Iowa. Show record 1905: Iowa State Fair—First, stallions four years and over (Calypso); no two and three-year-olds shown; first and second, stallion one year; second, stallion colt; first and second, mare four years and over; first and second, mare three years; first and second, mare two years; second and third, mare one year; first, mare foal; first and second, mare over three bred by exhibitor; first and second, mare under three bred by exhibitor; first, sweepstakes stallion showing four of his get (Calypso); first and third, produce of mare; first, grand display bred by exhibitor. Sioux City Interstate Fair—First, stallion four years and over (Calypso); first and second, mare four years and over; first and second, mare three years; first and second, mare two years; first and second, mare one year; second and third, stallion one year; first, stallion foal; second, mare foal; first, sweepstakes stallion showing four of his get (Calypso); first sweepstakes, produce of mare. Minnesota State Fair—First, stallion four years and over (Calypso); first and second, mare four years; second and third, mare three years; first and second, mare two years; first and second, mare one year; third and fifth, stallion one year; first, sweepstakes stallion showing four of his get, open to all draft breeds (Calypso); first, champion mare; first, sweepstakes mare showing two of her produce, open to all draft breeds. American Percheron Society Specials—First, stallion three years; first and third, mare over three years; first and third, mare two years; first and second, mare one year; first and second, best American-bred mare; first, four best mares any age; first, stallion and four mares any age. Show record 1906: Minnesota State Fair—Champion stallion any age (Olbert); champion mare any age; sweepstakes stallion showing four of his get, open to all draft horses (Calypso); sweepstakes mare showing two of her produce, open to all draft breeds; first, stallion four years and over (Olbert); fifth, stallion three years and under four; second, stallion one year and under two; first and fifth, mare three years and under four; first and second, mare two years and under three; second and third, mare one year and under two. American Percheron Society Specials—Champion stallion any age; champion mare any age; reserve champion American-bred stallion; champion American-bred mare; best three mares; champion group of five American-bred animals. Sioux City Interstate Fair—first, stallion four years and over; second, stallion three years and under four; first and

DISPERSION SALE OF SHORT-HORN CATTLE

AT WEST LIBERTY, IOWA, DECEMBER 18, 1906

HERE WILL BE THE OPPORTUNITY TO BUY CHEAP
SCOTCH AND SCOTCH TOPPED SHORT-HORNS.

AS I will sell every Short-horn I own on the above date, numbering 55 catalog lots, there will be offered to breeders of the middle West an opportunity seldom equaled. There is 26 head of Scotch cattle, 29 cows of breeding age, 10 bulls including Imp. Favorite. Five Top Notcher Scotch bulls in this offering. Twenty calves sell with their dams. Instead of the two days' sale contemplated, I have concluded to sell the calves with their dams in this one day sale. Address for catalog,

C. S. BARCLAY, WEST LIBERTY, IOWA

COLS. F. M. WOODS AND R. W. BARCLAY, AUCTIONEERS.

third, stallion two years and under three; second and third, stallion one year and under two; first and third, mare four years and over; first and second, mare three years and under four; first and second, mare two years and under three; second and third, mare one year and under two; sweepstakes stallion showing four of his get; sweepstakes mare showing two of her produce. Iowa State Fair—Sweepstakes stallion showing four of his get (Calypso); first, grand display bred by exhibitor; first, mare over three years bred by exhibitor; first and second, mare under three years bred by exhibitor; second, stallion over three years bred by exhibitor; third, stallion under three years bred by exhibitor; second, four-year-old stallion; third, stallion two years and under three; third, stallion one year and under two; fourth, aged mare; first and third, mare three years and under four; first and second, mare two years and under three; second, mare one year and under two; third, produce of mare. American Percheron Society Specials—Champion stallion (Olbert); champion mare (Iolanthe); champion American-bred mare; champion group of five American-bred animals.

Dispersion of C. S. Barclay's Orchard Farm Herd.

Short-horn breeders throughout the United States will no doubt be surprised to see the announcement of the dispersion sale of Mr. C. S. Barclay's famous Orchard-Farm herd of Scotch and Scotch-topped Short-horn cattle. For more than one-third of a century Mr. C. S. Barclay has been a prominent figure in Short-horn circles and has an acquaintance from coast to coast. It is almost sad to think of the dispersion of this herd at this time when it has arrived at that period when the life work of Mr. Barclay would in the future have counted for much, were conditions such that he could go on with the breeding of Short-horns. A representative of The Homestead who has been familiar with Mr. Barclay's breeding operations for twenty years, has recently inspected the herd to be dispersed. It had been the plan to make a two days' sale of this herd, December 17th and 18th having been the dates claimed, but in order that the sale could be pulled off in one day, Mr. Barclay has dropped the 17th, and has doubled up some twenty calves with their dams, selling them as one lot. This will certainly make the sale a very attractive one. Just half of the entire offering are Scotch cattle, the remainder of the choicest families Scotch topped from two to seven times. The makeup of the offering is as follows: Twenty-nine cows of breeding age, sixteen yearling heifers and ten bulls, including the herd bull, Imp. Favorite. There are five very choice Scotch bulls about one year old or over included in the sale, suitable for herd headers, both from the standpoint of breeding and individual merit. It would seem from the reputation of the Orchard Farm herd and the wide circle of friends and acquaintances of Mr. Barclay, that the mere announcement of this dispersion sale would bring together a very large aggregation of Short-horn breeders, with nothing more said than this announcement. The great Scotch bull, Iowa Champion, that has been doing good service at Orchard Farm, has recently met with an untimely end, caused by a very serious accident that removed him from the herd. This is not only a great loss to Mr. Barclay, but is a serious loss to the Short-horn breed, as

DISPERSION SALE OF SHORT-HORN CATTLE

ON DECEMBER 14TH

WE will disperse our entire herd of Scotch and Scotch Topped Short-horn cattle consisting of 56 head including our two Scotch herd bulls and several other young bulls. A goodly portion of the offering are Scotch cattle; the remainder are Scotch Topped of the most desirable sorts. Some 15 or more calves will sell with their dams. As this is an entire dispersion, it will afford an unusual opportunity to Short-horn cattle breeders of Iowa and Minnesota particularly to secure the plums of our herd at bargain prices.

There will be two four year-old Registered Percheron Stallions, one of them weighing near a ton and an extra fine individual. They are both bays. There will also be two mares, one gray three year-old and one black ten year-old. These are good mares and will undoubtedly go at a bargain.

For catalogs and other information address, Dr. Chas. L. Marston, Mason City, Iowa.

MARSTON BROS., PROPS.,
Mason City, Iowa.

COL. WOODS ASSISTED BY COLS. BARCLAY AND TURNURE, AUCTS.

this bull was one of the best breeding bulls that Mr. Barclay has ever used. It has been a toss up in the mind of the proprietor of Orchard Farm as to whether his most valuable bull lay in Imp. Favorite or Iowa Champion. We trust that in the very near future a complete catalog will be in our hands so that more detailed mention can be

made of the choice lot of cattle to be sold in this dispersion sale. In all probability this sale will afford buyers an opportunity to secure a very cheap lot of richly-bred Short-horn cattle, the foundation of which has cost Mr. Barclay a fortune. Application for catalogs should be made to Mr. C. S. Barclay, West Liberty, Iowa.

W. A. Forsythe's Short-horns.

Short-horn breeders throughout Missouri and Kansas need no introduction to Mr. W. A. Forsythe, of Greenwood, Mo., but to many breeders further north throughout Iowa, Nebraska and the adjoining states Mr. Forsythe is not so well known. To these we will say that he is not a new man in the business, as he has bred Short-horns for years, has used as good bulls as are found and has today a herd numbering upwards of 150 head. Throughout Mr. Forsythe's herd visitors will find as much Short-horn character, uniformity, scale and quality as is often found. The writer has on various occasions within the past two years visited Mr. Forsythe's herd and it has always been the source of much satisfaction to look over these broad-backed females and to observe how smooth and evenly they laid on flesh. These are points that Mr. Forsythe has striven to keep and to improve in the herd, and that he is succeeding will be seen by any who visit the herd. As to the breeding of Mr. Forsythe's cattle, we will say that there is not an animal in the herd that has a faulty pedigree. Many of the cows are Scotch and Scotch herd bulls have been in service since the herd was founded. Among these bulls was Imp. Bapton Arrow, bred by Mr. J. D. Willis and got by Sittytton Archer, he by Scottish Archer and out of Sittytton Lavender. As a sire Imp. Bapton Arrow would have been, had he lived to the present day, rated among the great bulls of the breed. Unfortunately Bapton Arrow was lost, but among his get are several animals that show how great a sire he was. Among these is King Edward, a bull that was shown all over the western coast in 1905, winning wherever shown. A daughter of Imp. Bapton Arrow was sold in 1903 by Mr. Forsythe to Mr. H. F. Brown, of Minnesota, who in turn sold her to Mr. W. I. Wood, and in Mr. Wood's 1906 spring sale she sold for \$800, the second highest selling animal in the sale. Other good sons and daughters of Bapton Arrow are left, among which is the heifer Mr. Forsythe showed in 1904 with much success. Perhaps the best of his get is Bapton Valentine, a bull Mr. Forsythe reserved for a herd bull. He is out of a daughter of the great St. Valentine, a show and breeding bull that has a national reputation. Bapton Valentine is an August two-year-old. Had he been of the right age Mr. Forsythe would have shown him this year. Should he develop as much the coming year as he has in the past Mr. Forsythe will have a three-year-old bull that will easily stand well up in the money if indeed he does not put up a great fight for first honors in any of the larger shows. Today Bapton Valentine weighs 1,700 pounds. For thickness of flesh he has few superiors, if any. A better underline is not found; over crops, loin and rump he is well high perfect. He has that smoothness over the shoulders, the fullness in the lower front rib, the well-let-down flank and all set low on four good sound legs. His head, too, is the right kind with medium horns set about right. In color he is a rich roan. That Mr. Forsythe made no mistake in saving Bapton Valentine for a herd bull is proven by his calves now coming on. They all have that width of back, the depth of body and the feeder's make up. The families represented in the herd are mostly Violet, Lavender, Alexandrina and other popular Scotch sorts with the Rose of Sharon and Young Marys representing the Scotch-topped sorts. Mr. Forsythe is now offering some young bulls that are just ready for service. Among these are two Violets. One is a red with just a little white on hind legs and a white switch; the other is a solid red. The first is one of those bulls that has quality from end to end, with an extra strong back, level to the tail head. He is even in all his lines, well developed over loin and crops and is decorated with a fine head a 1 good horns. His sire, Improver, was used by Messrs. Cookson Bros., of Iowa, with much success. Improver's sire was out of Gondola's Pride by Commodore, he by Orange Chief, an Orange Blossom bull that sired many good things, among which was Mr. Geo. Burge's first-prize calf at Des Moines. The dam of this young bull was Violet Cloud 5th that was got by Marquis Craeida and out of White Cloud 3d by Golden Crown, then follow such sires as Imp. Troubadour, Chancellor, Lord of the Isles, etc. The man looking for quality and a breed-looking bull that is fashionably bred should look to this fellow. The other Violet will please the man who likes an all red and a bull that will make a 2,500-pound animal.

This fellow is exceptionally strong in hind quarters, is an evenly-balanced fellow and a rapid grower. He is bred much the same as the other Violet, being by Improver but out of a daughter of Imp. Count Amaret 2d. After this cross the pedigree runs the same as the other Violet. A Lavender bull is also one that will please many. He is a wonderfully well-quartered bull, good over loin and a thick fellow. A nicely-bred Orange Blossom out of a daughter of old St. Lavender and Lavender of Hill Farm, of Dustin's Lavender family, will be found a promising youngster. The man who is looking for a neat, compact bull, and a red, will find an Alexandrina at Mr. Forsythe's that should please him. A roan Scotch-topped Bates fellow is also among the good ones and the man who likes a good handler will like him. Mr. Forsythe can fit out most any man looking for a good bull and one that is bred from the most reliable tribes. Mr. Forsythe will also price right a number of females, among which are a string of two-year-old heifers that for general conformation, true Short-horn character and promise of future usefulness are the equal of any lot of females the writer has seen in some time. A few cows and a string of yearling heifers the equal to the two-year-olds are also being offered. To the man who contemplates founding a herd or wishes to add some choice females to his herd we say go and see the cattle Mr. Forsythe offers. He is not asking you to buy any decrepit or old cows, but offers as good as he expects to keep and at such prices as will make money. All of breeding age are in calf to the grand young herd bull, Bapton Valentine, which adds much to their value. Mr. Forsythe's advertisement of these Short-horns will be found elsewhere in this and future issues, this week on page 37. Kindly mention this paper when writing him.

Short-horns at Auction at Holdrege, Neb.

Short-horns of approved scale, conformation and blood lines will go under the hammer at Holdrege, Neb., on Saturday, December 15th. We have commented upon some of the bulls of the offering and Mr. F. M. Marshall, of Blackwater, Mo., who consigns twenty-five head to the auction, writes as follows concerning the females consigned by him: "The female part of the offering is very desirable and good, all being under five years old and a great many with calves at foot. It is an unusually uniform lot and quite a number of show animals will be found among them. Especially is this true of the daughters of that great breeding bull, Orange Hero. This bull has spent his entire days in the Blackwater herd, and will spend the remainder of them there." Mr. Marshall is one of the leading breeders of both Scotch and Bates cattle in America. He has won numerous honors in the show rings of the greatest shows and his cattle have sold well at public auction. The Messrs. Wilkinson, of Edinburg, Ill., who consign about an equal number with Mr. Marshall, are old established, extensive and reputable breeders and are sending both bulls and females that will render good service for western Short-horn interests. The catalog can be had upon application to Mr. W. C. McGavock, sale manager, Springfield, Ill.

Choicely-bred Duroc Gilts from the Polk County Herd.

Breeders of Duroc Jerseys will always find a good supply of choicely-bred individuals at the Polk County herd, owned by Mr. Roy West, of Bondurant, Iowa. Mr. West has been long enough in the business to know a good individual and he has selected his herd with great care. He is now ready to dispose of some choicely-bred individuals representing the following: Proud Orion, Manly Orion, and a number of granddaughters of Proud Advance and of Bill K. stuff, Malcolm's Model pigs and also some Improver 2d, Ecco King and King Perfection gilts. The sows he is offering for sale are bred to one of these noted boars, a son of Tip Top Notcher, the \$5,000 hog which was first and grand champion at the World's Fair, also a son of Kan't Be Beat, the \$2,500 individual that was first in class at the World's Fair. A number of choice gilts are also bred to a son of old Orion, the sire of more prize

Good American Bred Stallions, \$800 to \$1000.

First Class Imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.

NOTICE

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars. The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stables, where we have over 200 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered. Send for catalog.

TAYLOR & JONES, WILLIAMSVILLE, ILLINOIS, IMPORTERS AND BREEDERS OF PERCHERON, SHIRE AND BELGIAN STALLIONS.

WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DUHAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

PERCHERONS AND PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS AND MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

SHIRES, PERCHERONS, BELGIANS—Imported horses, \$1,000; home-bred stallions, \$250 to \$750; also Shire mares. A. LATIMER WILSON, successor to L. Banks Wilson, CRESTON, IOWA.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home-bred draft stallions, \$250 to \$800. Hart Bros., Osceola, Iowa.

EIGHTH ANNUAL SALE OF

LAKESWOOD PERCHERONS

Sioux City, Ia., Wednesday & Thursday, Dec. 12-13

STATE FAIR WINNERS UNDER THE HAMMER.

100 Registered Stallions and Mares 100

Thirty-two stallions and sixty-eight mares and fillies. Everything offered is of the highest quality and will be sold regardless of price. A number of our state fair winners are included. The stallions are a grand lot, by far the best we have ever offered. All of our winners at Iowa and Minnesota State Fairs have been reserved for this sale. The mares and fillies are of the choicest breeding; all but five are under seven years of age and nearly all are bred to our famous stallions, CALYPSO and OLBERT, the STATE FAIR CHAMPIONS and INTERNATIONAL WINNERS. The great opportunity of the year to buy Percheron stallions and mares of the highest class. Catalogs mailed on application.

Percheron and Belgian Stallions.

Our Buying Facilities Unsurpassed.

The senior member of our firm, Landschaftstrat O. V. Oltmanns, resides in the German Coach horse district and within four hours' ride of the Percheron and Belgian horse districts of France and Belgium and is ever on the lookout for the finest and best the Old Countries produce.

We buy better horses at less expense than any other importer can possibly do and for that reason can give you a better horse for less money than you can buy elsewhere.

WRITE US FOR FULL PARTICULARS OR CALL AT OUR BARN.

OLTMANN'S BROS., - - - WATSEKA, ILLINOIS.

THE Lafayette Stock Farm

Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International will surprise the hundreds of thousands of visitors that will attend. We can and do sell our stallions as low as they can be sold at any place in America.

DEPARTMENTS

SEDALIA, MO. NASHVILLE, TENN. SAN JOSE, CAL.

S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors. 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coaches you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

HORSES.

FRANK IAMs

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill!"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMs \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

LIVE STOCK AUCTIONEERS.

MISSOURI AUCTION SCHOOL

TRENTON, MISSOURI.

..... NEXT TERM OPENS JANUARY 1, 1907.

The only auction school in the world where students are given actual practice selling in bona fide sales. This school's first term had double the enrolment of any other school's first term. All branches of auctioneering, oratory and live stock judging taught by instructors of from five to thirty years' experience. We only require one-half of tuition down on entering school, the other half to be paid after you have made it out of the business. What could be more fair? Write for our large, 40-page illustrated catalog, which gives testimonials from our students in all parts of the United States.

W. B. CARPENTER, PRESIDENT.
President Missouri Auctioneers' Association.
President for State International
Auctioneers' Association.

COL. C. A. EWING, VICE PRESIDENT.
First President of International Auctioneers' Association.
Twice President of Missouri
Auctioneers' Association.

The Jones National School of Auctioneering and Oratory

It is the original school, and has had five times as many students as all other auction schools in the world combined. The instructors are practical auctioneers of national reputation. Their reputations have been made by a careful study of the auction work and by conducting all classes of sales throughout the United States and Canada. A special instructor is employed in each department. Students conduct sales every day. The school does not advertise to instruct students in work we do not understand ourselves. When spending your time and money to secure an education the school should be considered, not the price. The eighth term opens December 10, 1906, and following this term the school will practically be open all the year round, with the possible exception of a short summer vacation, and there will be classes opening at short intervals, enabling those who desire to attend to enter at almost any time, the tuition remaining the same, and each class will be given a six weeks' course, with an opportunity to graduate in four weeks if proficient. Write for free catalog, list of graduates, and other information, mentioning this paper, and come when you are ready.

Jones National School of Auctioneering and Oratory, Phone West 1228, 231 Ashland Boulevard, CHICAGO, ILLINOIS.

DISPERSION SALE OF

Short-horn Cattle

AT

Stanwood, Iowa, December 20th.

OWING to old age I am leaving the farm and offer at auction my entire herd of Short-horn cattle, consisting of 36 females and 7 bulls. They are all richly Scotch topped and are a very prolific and useful lot. I will include my 2 herd bulls, Baron Taylor 172837 and Diamond King 234716. Both are reds and exceptionally thick. This will be a splendid opportunity to buy good Short-horns at your own price. Address for catalog and further particulars

JAMES BURKE, - STANWOOD, IOWA
Col. GRIFF JOHNSON, AUCTIONEER

POLAND CHINA HOGS.

14 BIG STRONG, GROWTHY

March Poland China Boars

FOR SALE.

TWELVE of them by Gay Perfection 2d 97251. One by Radium (a sow of Perfection R. L.) and one by Impudence 97557. These boars are of the most aristocratic blood known to the breed. Will sell them at \$25 each while they last, except the Impudence boar which I hold at \$35. Impudence was the sweepstakes boar at Des Moines last year. The greatest hog show on earth. The dam of the fellow cost me \$187.50. For further particulars address the owner Joe Steward, Ames, Iowa. Also two yearling scotch bulls, one by Revenue, the other by Golden Diamond.

....ONLY A FEW LEFT....
But They're Good Ones.

OUR boars have been selling like hot cakes; only have 20 boars and 10 spring pigs left. Some of these by the double sweepstakes boar Matchless Jr. Fall and spring gilts bred and ready to ship. These by matchless Per., Matchless Jr., B's Chief Tecumseh 2d and Correct I know.

HENRY BROS., - LE MARS, IOWA.

BRIDGEMAN & NESBITT, R. R. No. 3, ALEDO, ILLINOIS.

POLAND CHINA HOGS.

POLAND CHINA BOARS

WE have 20 March and April boars sired by R's Keep On, Iowa Chief and other noted boars. Long, growthy fellows, good colors, heavy boned. Smooth as an apple and out of large, roomy sows. They weigh from 175 to 200 lbs. If you need more size in your herd, it will pay you to get one of these pigs. We guarantee our pigs as represented and always satisfy our customers. We cannot afford to send out a poor pig, as we are in the business today, and expect to supply our customers again in the future. Below is a copy of one of the many letters we receive from our customers:

RUEBEL BROS., Rockwell City, Ia.
DEAR SIRS:—We got the pigs Friday evening, the 2d, O. K. We are all well pleased with them. They are just as you said they were. Respectfully Yours,
Nels Nortved,
E. O. Peterson,
M.H. Peterson.

Callender, Iowa.

All correspondence cheerfully answered.

IOWA HERD OF DUROC JERSEYS.

(Successor to Wm. Roberts & Son.)

I AM offering eight fall boars by Lord Roberts 17329, my herd boar and Snadell's Fancy. These boars are extra good in back and foot, with desirable length. Am now booking orders for spring pigs. A nice lot by King West 26163, assistant herd boar. Write me for good ones.

A. T. Sundell, - Paton, Iowa.

WOODLAND HERD OF DUROC JERSEYS.

Herd Headed by Munley Orion 3709.

2D prize boar in 18 months class Iowa Fair, 1905. 2 Munley Orion, Proud Advance, Keep On 2d boars ready to go; also boars by Tintin, that are full brothers to Ruberta, 1st in Junior Yearling Class, Iowa State Fair, 1906.

S. P. Freed, Ames, Iowa.

Buddy K. IV.

1ST prize aged Duroc boar and champion at Illinois State Fair, 1905, heads herd. I have an extra good lot of fall and spring boars for sale by this noted boar. High scoring Rhode Island Red cockerels for sale at reasonable prices. Write your wants.

ED. A. BAXTER,
PAWNEE, - ILLINOIS

WHITE OAK HERD

OF Recorded Duroc Jersey Swine. We have a number of well selected males of March and April farrow; sired by Top Notcher Model 37663; he is the same breeding as Tip Notcher Chief, that won first in class and first as grand champion at St. Louis in 1904. Our sows are the blood of Fred's Banker and Advancer and Advance and Top Notcher Chief. Write, phone or come and see them. Satisfaction guaranteed. Prices way down for quality and breeding. We can ship over the C. & P. or Northwestern R. R.

J.W. Troy & Bros. Props., Rosehill, Mahaska Co., Ia.

Thos. Bennett,
Rossville, Ill.

HOM again and find 143 spring pigs, the best Duroc Jerseys I ever saw. 5 fall boars for sale. Bred gilts all sold. Write for prices, mentioning Homestead.

ROYAL RUBY HERD OF DUROCS.

I NOW have a line lot of spring boars for your inspection. They are sired by Osceola Chief, a very large heavy boned hog, also by Proud Perfection, one of the best sons of Perfection Chief, a side fair winner of 1905, also took 2d at St. Louis in 1904. Come and look them over and be convinced that they are blue. They have been closely culled and nothing but the best is for sale. Free delivery and entertainment. Telephone connections. Rural Route No. 2.

Gus A. Pederson, - Ocheyedan, Iowa.

Duroc Jersey and Tamworth Boars

FOR SALE—We have a grand lot of Duroc and Tamworth boars for sale, every one of which is sired by a prize winner. Prices are always right. Address, Norrish & Brington, Kingsley, Ia.

40 TOPPY DUROC JERSEY BOARS 40

Sired by Junior Jim, 2d prize winner at Des Moines, Glendale Critic, 2d prize boar at Nebraska state fair, and Long Alex, litter brother to the sweetest sow Alex II. Good ones.

ALFRED RENSCHAW, Blair, Neb.

BOARS! BOARS!

BY Tip Top Notcher, Top Notcher Chief, Ambition, Hunley, Big 1 Am, and other noted sires at reduced prices. Write for descriptions.

H. B. GRIFFITHS, - Bowen, Ill.

MAY & PORTER,

REHINGTON, IND.
MAYOR'S CHIEF 40727 and Top Notcher Best 37663 head herds. An excellent lot of pigs of spring farrow to select from. Write for prices. Inspection invited.

PLEASANT DALE STOCK FARM

W. F. DORSCH, Prop., Cook, Neb., Breeder of Duroc Jersey swine.

Dan Patch 1:55, The Pacing King, Cresceus 2:02 1/4, The Trotting King, THIS BEAUTIFUL PICTURE IN 6 BRILLIANT COLORS MAILED TO YOU FREE.

We have just published a large, colored lithograph of the above Photo-Engraving, which shows our World Famous Stallions, Dan Patch 1:55 and Cresceus 2:02 1/4 in an exciting contest and at extreme speed. The picture is 16 by 21 inches and shows both horses in their natural colors and as life-like as if you saw them racing on the track. It is a picture that would sell for \$2.00 if gotten out in a small edition. You can have one of these Large and Beautiful Colored Pictures of the Two Most Valuable Harness Horse Stallions and Champions of the World, Absolutely Free and we will prepay the postage. This picture was made from life and every lover of a great horse should have one.

WRITE FOR ABOVE PICTURE AT ONCE.

1st, Name the paper in which you saw this offer. 2nd, State how much live stock you own and then we will mail the picture promptly. 3rd, Picture will not be mailed unless you give us this information and address.

INTERNATIONAL STOCK FOOD CO., MINNEAPOLIS, MINN., U.S.A.

AFTER EATING "INTERNATIONAL STOCK FOOD" EVERY DAY FOR FOUR YEARS DAN PATCH OPENS THIS SEASON AS FOLLOWS:

First Start, Galesburg, 1:57 1/2.

Third Start, Minnesota State Fair, 1:56 1/2.

Second Start, Dubuque, 1:58.

Fourth Start, Minnesota State Fair, 1:55.

DUROC JERSEY HOGS.

Prairie Glen Herd of Duroc Jerseys.

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 43327 N, 15723 A, he by J. J.'s Chief 12445 A; first at Indiana state fair last year, a thousand-pound hog, he by Winchester Chief 10077, he by Morton's King 8725, Tintin 17261, Imp. Wonder 43561, A. L. Advance 43331, Olebalt Chief 38271, a son of Perfection Chief 425 hog, Pleasant Hill Advance No. 44251, and other good sires; last, but not least, Ohio Chief, two sons of this great sire and show boar. Tintin No. 17261 for side, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable; quality best. Address,

P. S.—Eight November males of rare quality; three Top Notcher bred. A. L. MOSSMAN, TELEPHONE 88-3, RADCLIFFE, IA.

Ohio Chief Male Pigs For Sale

I HAVE three extra good Ohio Chief male Duroc Jersey pigs that I will price right, if taken at once. Also pigs by Adams Express, a full brother to Crimson Wonder. Male pigs by ten leading sires. I can suit you. Write me at once.

FRANK ALLDRITT,
FRIEND, NEBRASKA

CRIMSON WONDER I AM 34697 Heads the American Herd

BOARS sold from this herd made sensational winnings at Des Moines this fall. I have boars now ready to go out that equal their illustrious relations in style and quality. If you are looking for a show boar or herd header, come and see me. Choice gilts also for sale. Will breed sows of quality and reputation to Crimson Wonder I Am for \$100. U. G. DAVIDSON, MANSON, IOWA.

CLOVER-WAVE DUROC JERSEYS.

Sires in service, Red Orion 23793, by Orion 5393; dam Rose Bud 50186 by Jumbo Red 7975, a half brother to Ohio Chief. Belle's King II 44113, by Belle's King, a son of Echo King and Nebraska Belle. Dam of Belle's King II is Lou Dillon 109830 by Orion, dam Cherry Blossom II 56574 by Jandelon 12165. Duroc Standard 44117 by Duroc Paragon 29181, by King Perfection 16235; dam Paulina Queen II 88492, by Duroc Challenger 11163. We have 110 pigs mostly of March and April farrow, sired by these boars and others, and from us good a lot of sows as can be found in any herd. We are better prepared than ever before to furnish choice breeding stock. Visitors welcome at all times.

STOW & GINGRICH,

HAMBURG, IOWA.

Pleasant Grove Herd Durocs

BOARS ready for sale, by the famous old hog Top Notcher Again, Proud Advance and others of equal merit. Satisfaction guaranteed. Brood sow sale, January 22, 1907.

HANKS & BISHOP PROPS., NEW LONDON, IOWA.

A CHOICE LOT OF PROUD ADVANCE PIGS.

I HAVE the best lot of Duroc pigs ever sired by Proud Advance. Also have pigs by Keep On II, the Iowa State Fair prize winner. A choice lot of pigs by other boars also. Don't overlook me if you want the best. Address,

GRANT WHITE,

AFTON, IOWA.

ROSEMARY DUROCS.

GOLD Finch, champion International 1903, heads herd, 76 extra good spring pigs sired by him for sale at reasonable prices.

HARRY RIGGIN, PETERSBURG, ILL.

OAKWOOD DUROCS.

CHICAGO Lad 12367a heads herd. An excellent lot of pigs sired by this prize winning boar for sale. Also good litter by Proud Advance. Address,

C. T. ROGERS, PETERSBURG, ILL.

RED SIDE DUROCS.

FALL gilts bred for summer farrow to extra good boars, Double Track and Fashion Boy, for sale at low prices for next 30 days.

Fred Schweizer, Elwood, Ill.

WE WON 79 RIBBONS

OUT of ninety-two showed for including fourteen Champion Sweepstakes at Ohio, N. Y. state fair and Lexington, Ky. We bred and fitted all but one. We breed the winners. Stock of all ages for sale. Write or come.

WATT & FOUST, - CEDARVILLE and XENIA, OHIO

3 FEEDS FOR ONE CENT

My stallions, Dan Patch 1:55, Cresceus 2:02 1/4, Duroc 2:05 1/4, Arion 2:07 1/4, Roy Wilkes 2:06 1/4, Bentonwood 2:11 and my one hundred high-class brood mares at "International Stock Food" every day. Dan Patch has set an "International Stock Food" every day for over four years and during this time has broken fourteen World Records and his physical condition has been marvelous. It will pay you to use it for your Stallions, Brood Mares, Colts, Race Horses, Show Horses, Carriage or Coach Horses and Work Horses because it gives more Nerve Force, Endurance and Strength. "International Stock Food" is prepared from finely powdered medicinal roots, herbs, seeds and bark and is fed in tablespoonful amounts as an addition to the regular grain feed. It is equally good and very profitable to use for Horses, Colts, Fattening Cattle, Cows, Calves, Hogs, Pigs, Sheep or Lambs, because it purifies the blood, tones up and permanently strengthens the entire system. Keeps them healthy and greatly aids digestion and assimilation so that each animal obtains more nutrition from all grain eaten. In this way it saves grain and will make you a large extra profit. We have thousands of reliable testimonials on file in our office, and every pound of "International Stock Food" is sold, by over 125,000 dealers, on a "Spot Cash Guarantee" to refund your money if it ever fails. Constantly used by over two million stockmen throughout the world. If you desire any further information I will be pleased to have you write me.

M. W. SAVAGE, Prop. of International Stock Food Co., International Stock Food Farm.

DUROC JERSEY HOGS.

INDIVIDUALITY and breeding combined. About 70 Duroc pigs sired by Luther H., by Hambleton (winner at Neb. and St. Louis.), Malcolm Model, Belle Echo, Morrison Bell Top and Won't Be Beat by the great Kan't Be Beat. Pigs are doing nicely. Good colors and plenty of size. Inquiries answered promptly. E. K. Young & Son, Havelock, Neb.

Prolific Herd of Duroc Jerseys

I AM offering some very promising male and female pigs sired by Billy K., Medoc, Forty Kings, Billy K. Jr., and Frank's Choice by Belle's Echo. Can give you good herd headers at prices to suit purchasers. Address, H. Van Patten, Sutton, Nebraska

SPECIAL RATES ON DUROC JERSEY BOARS.

FOR the next thirty days I will make a low rate on boars just to move them. Write quick if you want one.

J. E. WEHR, - Portsmouth, Iowa

Duroc

Bred sows that carry the blood of Gold Dust Jim, Improver II, 2d Surprise, Red Chief 1 Am, Glendale Critic. Remember our guarantee. Dice & Garber, Beaver Crossing, Neb.

Fashion Improver Jr. at Head of Herd.

I HAVE several choice spring male pigs that will be priced to sell. I sell at private sale and these must go. Sired by Fashion Improver, winner at Nebraska State Fair, '05. Will make good price on young gilts as well. Write today. F. A. Kruse, Waco, Neb.

Sutter's

GROWTHY DUROC fall males got by Neb. Wonder, he by Crimson Wonder, he by now ready to ship. Write me. WM. SUTTER, Liberty, Neb.

ATHELRED 28069 for sale. The best pig ever sired by Tip Top Notcher. He was 4th prize boar at Nebraska as well as siring 3d prize sow at same show in 1906. "The best Tip Top Notcher pig I ever saw," it J. Harding. "He should have borne blue ribbon," S. R. McKelvie, Twentieth Century Farmer. Price \$1,000. A. Wilson, Bethany, Neb.

12 GOOD ORION BOARS

FOR SALE. These are one of some of our very best Duroc sows and it is about the best chance to get an Orion boar. Write quick if you want one. MANLEY & CO., LYONS, NEB.

SHORT-HORN CATTLE--DUROC JERSEY HOGS

80 CHOICE spring pigs sired by Fairview Wonder 44051. Fairview Col. 25803, one of choice sows. My prices always insure a sale. A few good short-horn bulls for sale.

JAMES T. DOLLISON, SALT CITY, IOWA.

WELCH'S POPULAR PRICED DUROC JERSEYS I HAVE 90 choice spring pigs sired by grandson of Proud Advance and a son of Pericles out of Tolstoy and Duroc Challenger sows. Prices within reach of all. I have some extra good boars for sale. Address,

S. I. Welch, Cherokee, Ia.

40 DUROC-JERSEY BOARS. 40

Sired by Chief of Chiefs, a son of the great S. W. Henshaw Chief out of Gold Dust Jim and Surprise sows. Choice pigs at reasonable prices. DELMAR McCANN, - KENNARD, NEB.

PIONEER HERD DUROCS.

WE have several good boars sired by Royal Top Notcher 23639, Sure Winner and Echo King 18415. If you want the tops come to us; we have the best. Correspondence promptly attended to. Address Arch Brown & Sons, Waterloo, Nebraska.

THE ICE HOUSE.

The following communication has been received from a subscriber, Mr. Wm. Sorensen, of Howard county, Neb.:

Even though ice is not so important in these days of separators, no butter maker, be it on the farm or in the creamery, ought to be without a stock of ice so as to have complete control of temperature when churning. Nor can the value of ice to the farmer's wife and family be overestimated, and it is not a very great job for a few neighbors to join together and scoop out a pond if no river or lake is within reasonable distance. Even if such pond ice is not fit to use in cream directly, it will cool as well as the best. The cost of an ice house need not prevent anyone from having one.

I have seen ice preserved by stacking it on a two-foot layer of sawdust and covering it in the same manner. A small orifice was left in the center of the pile, the entrance being protected by two feet of straw packed between boards. There meat could be kept fresh for a week or more. Such an ice vault should not be opened more than two or three times a week, as otherwise the ice will melt too fast. This is not the best way, however, and houses may be built to suit each one's purse. In this, as in other matters, co-operation between three or four neighbors is the thing.

If the floor is absolutely tight and laid on a layer of sawdust, that is the best, but it will do very well to pile it on a thick layer of sawdust or even straw provided good drainage is secured (not necessarily direct drainage, but a layer of gravel, for instance). Both inner and outer walls should be made of matched material in order to get the best results. The inner wall may be dispensed with and the insulating done as the ice is piled up, but this will waste more material. Such a wall filled with dry sawdust or chaff will stop the air circulation even better than a whole lot of board and paper partitions and will, as a rule, be much cheaper in the country. A series of air spaces allows circulation in each and unless there are many of them the insulation will not be perfect, but they are cleaner and are not so apt to get damp and rusty as the solid sawdust or chaff which every few years must be taken out and dried.

A combination of the two systems might possibly be the best, say twelve or eighteen inches solid in the center and an inch air space on either side. The floor should slant toward the center so that the ice will lean that way and not in melting press on the walls. It is enough to cover the ice with a foot or so of the insulating material, but above this free circulation of the air should be allowed. If exposed to the sun it is a good thing to have a sort of tent roof above the regular roof so as to provide shade. The value of various insulating material may be ranked in the following order: Cotton, husks of barley, wheat or oats, leaves, chaff, husks of rice, wheat straw, sawdust and peat—all losing value if not dry. Chaff, leaves and husks should be used under the ice in the bottom, as when damp they easily ferment and develop heat.

If a refrigerator is desired, small double boxes may be constructed on the farm with from two to four inches thickness of felt or six inches of sawdust, and will do nicely, though refrigerators can now be bought at reasonable prices.

We heartily concur in what Mr. Sorensen has to say about the value of ice to every family. However, we doubt if under all circumstances it is practicable for neighbors to go in together on this proposition, by building a house large enough for three or four families. We are inclined to think that under such circumstances the refrigerator would too often run empty, while on the other hand if the ice is within a few feet or a few rods of the dwelling house, it only requires the matter of a few minutes for the men to put in a block before going to the field in the morning. One essential feature in the building of an

ice house is to see that no air enters through the foundation or through any part of the walls. Where such occurs the ice will very soon be perforated by air currents and when once these work their way through the supply will soon run short. The matter

of drainage is also important, though we have known one or two instances where a pit three or four feet deep held ice wonderfully well without drainage. Of course it is always desirable to place cinders or sawdust in a goodly quantity on the floor of the house.

Shall We Select the Best Looking Ears of Corn For Seed?

BY ALBERT N. HUME, ILLINOIS.

The question has arisen a number of times of late as to whether or not it is advisable to select ears of corn for seed that conform to any particular set of characteristics. Can we tell by looking at an ear of corn whether or not it will be a good seed ear? Someone has written words to the effect that the principle of selecting seed corn by the appearance of the ear is unmitigated nonsense. Granting that it may be partly nonsense, there still remains a question whether it is unmitigated.

I am certainly not writing for the purpose of arguing with anyone concerning the merits of seed selection by score-card points. In fact, we have evidence to show that careful breeding by the row method is the only means yet discovered for securing seed of the highest productive power. Lest I be understood as not in favor of the most careful breeding of corn, the following table is given. It illustrates the advantage of the most careful breeding, especially as it is affected by cross fertilization:

VARIETY TESTS AND EFFECT OF DETASSELING—ILLINOIS EXPERIMENT STATION—1905.

Name of Variety.	Yield Per Acre.
Golden Eagle	65 bushels
Riley's Favorite	67 bushels
Beatty's Yellow	64 bushels
Leaming	59 bushels
Reid's Yellow Dent	63 bushels
Reid's Yellow Dent	63 bushels
Reid's Yellow Dent	67 bushels
Reid's Yellow Dent	63 bushels

EXPERIMENT STATION LEAMING BRED FOUR YEARS.

High Protein detasseled	73 bushels
High Protein tasseled	67 bushels
Low Protein detasseled	73 bushels
Low Protein tasseled	63 bushels

Now the above data is the result of one year's work and must be considered as such. Disregarding the Leaming plot that grew from weak seed and

comparing the others, it is obvious that the highest yielding corn on any of the plots was the High Protein Detasseled Leaming. Why? Because it had four years of breeding, including the fact that it was carefully cross pollinated. So we certainly advocate the breeding of corn by the row method and the detasseling of alternate rows to secure greater vigor. We believe in using every means to secure greater yields in corn.

But this does not argue that we should not pick out the best-looking ears for seed, and that they be not carefully tested before planting. It does not mean that we should not have a score card, and use it to create good, healthful enthusiasm in our corn shows. At least if it does not mean this, someone will have to explain it to me further. There seems to be some apprehension that the use of the corn score card will do harm rather than good—simply because one cannot tell all about the breeding of an ear of corn by looking at it. But for one, I am in favor of the score card, because it has been and still is a means toward advancement.

It is difficult to prove with figures just how much score card selection has accomplished. Moreover, the opinion of anyone without statistical data to support it is of small value. The best we can say is that figures indicate that past methods of seed selection according to the score card have not been harmful—have indeed been good.

During five years from 1896 to 1900 the average yield of corn per acre in the United States was 24.8 bushels. The average yield from 1901 to 1905 was 26.9 bushels. We are at least raising more corn since we began to study the proposition than we did before. We seem as little likely to discontinue the corn score card now as we seemed like-

ly to discontinue the live stock score card some years ago. Neither one is infallible; both have a legitimate use.

The state of Illinois during the four years just passed has produced 36.8 bushels of corn per acre per year; the highest average yield for four years that has ever been produced in the state, and this practically without the use of any commercial plant food. The average for the earlier four years (1897 to 1900) was 33.8 bushels-per acre. From these figures it is evident that this state, which I mention because it is the one I am most conversant about, has increased in corn production per acre during the four years just passed. Further, this can hardly be ascribed to any increasing richness of the soil, for as in other states the soil of Illinois has been somewhat depleted.

Corn production is certainly greater than it otherwise would have been, due to better methods of seed selection, planting, and cultivating. The enthusiasm which engendered these better methods has been due to a very great extent to the use of the score card. For instance, the enthusiasm led men who had formerly gone to the crib for seed corn to select seed in the fall and store it with care. It led men to carefully select corn for seed, which was best according to their judgment instead of hurriedly running it through a corn sheller in the morning of the 10th day of May.

If one is to start a herd of animals of unknown pedigree, he will not find a few of the poorest-looking scrubs. Neither will one who begins to breed corn and has only ears of unknown pedigree be content with scrubs. The ears he selects will conform somewhat nearly to the score card. So the score card has had its mission. It has helped us along the way and will continue to do so.

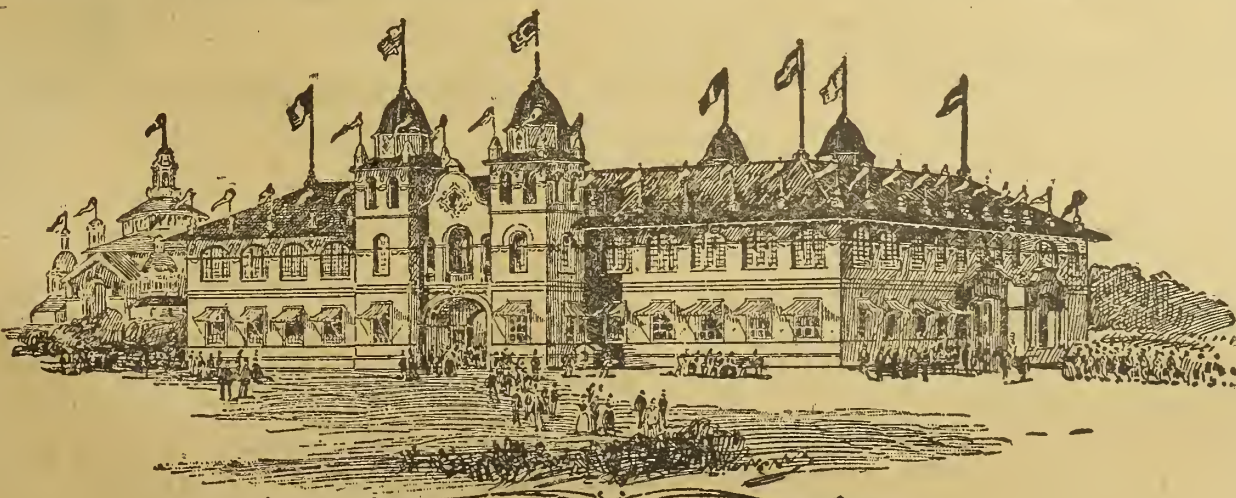

Having selected seed corn intelligently one may well conduct a breeding plot, providing the arrangement can be made. Such a procedure would be advised by everyone. When good ears come from the breeding plot, that are known to be the highest yielders, do not cast them aside in case they fail to come up entirely to score-card requirements. The score card must not interfere with the best corn.

Only those points should have place on the score card which have a basis in reason. If any of them are found to be incorrect they must be discarded. Thus only can we hope for improvement.

KILLING HOG LICE IN WINTER.

The following communication has been received from a subscriber, Mr. Thomas Thompson:

I have been somewhat interested in the discussion of the subject relating to killing lice in winter, and I note that you invite subscribers to give their experience along this line. The best plan that I have ever come across for killing lice on hogs in cold weather is to use lard. Last year I bought a hog and found after he was brought home that he was covered with lice. I warmed some lard and rubbed it around his neck and ears and down the backbone to the tail

The new coliseum at Bloomington, Ill., in which the combination sale of Percheron, French Draft, Shire and Clydesdale stallions, mares and fillies will be held on January 9th, 10th and 11th. See field notes.

and the lice all disappeared without any spraying or disinfection whatever.

This plan is very satisfactory where one only has a few hogs affected, but we have known instances where a hunch of fifty or 100 fattening hogs got in very bad shape, and yet it was not possible to deal with the individual hog. In such an instance one must resort to the practice of cleaning out their quarters and disinfecting them, though we would hesitate long before advising any man to spray or dip his hogs in cold weather.

A plan was suggested last winter by one of our subscribers that was said to be effective, and it was exceedingly simple. He tied some old gunny sacks around posts and kept them moistened with kerosene. The hogs would rub against these old sacks and consequently get fairly well daubed with kerosene and yet not enough to remove the hair. That plan, in connection with cleaning out their quarters and disinfecting them, soon got rid of lice on a big hunch.

THE AGRICULTURAL PRESS.

The agricultural press of the United States never held so high a position in the public estimation as it now occupies. This favorable attitude of the general public results in part from the superior service the farm press is rendering to the farmer, commanding his respect, confidence and appreciation; and in part from the success following that honorable relation of the farm paper to its clientele. That these mutually advantageous relations have produced a satisfactory condition in agricultural journalism, was clearly apparent at the annual meeting of the National Agricultural Press League at the Grand Pacific Hotel in Chicago last week. The attendance at the meeting was the largest in the history of the league; the membership had recorded a fine increase, and the enthusiasm evoked by the interchange of views and plans was of the heartiest and most contagious sort.

The election of officers for the coming year resulted as follows:

President, James M. Pierce, of Des Moines, Iowa.

Vice-President, M. W. Lawrence, of Cleveland, Ohio.

Secretary, John M. Stahl, of Chicago.

Treasurer, B. F. Billiter, of Huntington, Ind.

Director, A. C. Halliwell, Chicago, Ill.; J. H. Neff, Kansas City, Mo.; W. D. Hoard, Ft. Atkinson, Wis.; Norman J. Coleman, St. Louis; Wm. J. Thompson, New York City; H. L. Simmons, Springfield, Ohio.

Plans were matured for broadening and extending the work of the league in the editorial, advertising and circulation departments and to make the future sessions more helpful in these and other respects. Committees were appointed to carry forward the work so auspiciously begun at the meeting. The work of Mr. Wilmer Atkinson, of Philadelphia, in championing the rights of the agricultural press respecting postage rates was heartily commended. Suitable action was taken on the question of the distribution of common garden seeds by the department of agriculture, a more progressive policy being favored. The meeting closed with a banquet.

The Utility of Line Breeding.

To the Editor of The Homestead:

The value of understanding a good pedigree and of breeding along family lines so as to improve and keep in control a certain fixed type and characteristics of the herd is one of the most important and essential phases of the successful and intelligent breeding of a herd of pure-bred swine, and the new breeder should familiarize himself with it, for it is worthy of his attention and study, and much, if not all, of his success will depend on his knowledge of how to mate his animals to obtain the best results. The matter of selecting foundation stock is of supreme importance and from practical experience in the business for a number of years my advice would be to select the foundation stock from some established herd whose owner has a good reputation and where the animals had been bred along family lines until they had certain fixed qualities and would have the power to transmit these qualities and characteristics to their descendants.

These descendants will be sure of possessing in a marked degree certain permanent and fixed qualities that can be depended upon to do the certain thing for which they were created.

Most all of our successful breeders agree that the only true way to develop and perpetuate a certain fixed type is by breeding along family lines. In this way the infusion of new blood nec-

essary to counteract the effects of close in-breeding will be kept in control, so that the type will not be lost and spoil the results of years and perhaps the lifetime of systematic breeding. The fixed principle upon which all of the rules of breeding are centered is termed heredity. This is the principle which causes a resemblance, a similarity, and fixes in the individual the type and characteristics of its ancestors.

Man by selection has been able to work in unity with the principles of heredity until he has developed an animal that will produce more meat on a certain amount of feed in a shorter time, thus enabling the farmer and feeder to realize a larger amount of profit on the amount of feed consumed than with its ancestors, the old time, common hogs or scrubs.

While I do not hope to state any new truths—anything that those who are breeders do not understand, yet I hope that this may prove of benefit to the readers who are contemplating going into the business of breeding pure-bred swine. The new breeder oftentimes orders his pigs from some well-known breeder by letter, as follows: "Two good sows and a boar not akin." It is more than folly for a breeder to try and induce him to accept the sows and an excellent boar that has been bred along similar lines until he can be depended upon to produce uniform litters of the same type when he is mated with the two sows ordered. The result is that right at the start the new breeder introduces a too-violent outcross and invites the very elements that will destroy the result of years of practical and systematic breeding.

By mixing the blood of these animals he invites a conflict between contending forces and the type is destroyed, the model lost and heredity leads the animal back to the original scrub, or worse.

The breeder condemns the breed and tries another with similar results until it becomes fixed in his mind that the pure-bred hog is no more profitable than the scrub.

The value of inbreeding to the extent of fixing and perpetuating a type is settled in the minds of our leading breeders. Outcrossing is risky, but unless there is a constant infusion of new blood that has been held in control for one or two generations, the results of inbreeding will prove disastrous and lead the animal back to the scrub.

In this manner of introducing new blood into the herd it can best be secured by the occasional purchase of sows, thus enabling the breeder to grow and develop his own boar pigs for use in his herd.

There is more real credit in growing and developing one excellent sire than it is to purchase ten of the same kind. It clearly shows the index of the breeder's ability in caring for his hogs and intelligent breeding and selection. In all cases I would prefer to have a boar of my own breeding at the head of my herd.

The man who stands at the very front of the breeders of one of our leading breeds of swine has not purchased a boar for over twenty years. This man has given the world four of its most famous boars and his name is well known in all places where pure-bred swine are appreciated.

The application of line breeding with good care and liberal feeding has given the world most of its famous sires and dams.

It has given the Tom Corwins, Tecumseh, Perfections and Mischiefmakers to the Poland China breed of swine. The Longfellows, Lord Lees and Masterpieces to the Berkshire breed and so on, through all of the leading breeds of swine.

The value of a good pedigree and breeding for a definite purpose is well worth the most careful consideration of everyone who is thinking of investing in pure-bred stock. Wm. M. Kelly, Kansas.

Heating Water for Hogs.

To the Editor of The Homestead:

In reply to you very timely article asking if any of your readers could furnish information concerning an inexpensive, satisfactory and convenient means of watering the hogs in winter, I will say that there is one subscriber who has given this matter attention and solved the problem to his own satisfaction. I am pleased to explain how I succeeded along the lines you mentioned and in

what ways having warm water to drink mornings and nights benefited our hogs. After more or less complaint about running in and out of the house after warm water we resolved to invent some plan to eliminate the nuisance, please the women folks and make our own work easier, to say nothing of improving the condition of our herd of swine.

We found that having warm water also solved another problem that is of much importance to a breeder and also the grower of market hogs—that of keeping fall pigs growing during the winter. We noticed more favorable results from using warm water for drinking and mixing the cut alfalfa and mill feed among the growing pigs and the breeding herd than among the bunch we were fattening, but of course they were being fed a more fattening and heat-producing ration than the breeding herd and pigs. A young animal or a thin one is more susceptible to cold than a fat one, but everyone who has had experience among hogs realizes that nothing will put a hog's digestive system in good shape quicker than warm water, and much of the indigestion and piles among the hogs is due to drinking ice water and chilling the digestive organs.

While my plans could not be put in practice on every farm, it is practical on all farms that have a windmill or spring water that can be raised to the second story of the house for use in the storage tank above the water boiler that is heated by the kitchen range. We placed our pipes from the pipe that carried the hot water into the sink, down into the cellar and then through the cellar wall three feet under ground to the piggery, a distance of 460 feet, and then up into the feed room into a tank that held about 200 gallons and from that we piped it into their cement troughs. We mixed the water in the tank to insure it being of a uniform temperature for what stood in the pipe between the house and the piggery was cold, and when that was hot from the hot-water boiler reached the tank and was mixed it was all about 90 degrees temperature. In this way we could have the seventy gallons of hot water from the boiler and mix as much cold as we wanted to let run, but of course all that passed through the hot-water boiler was heated more or less and we could keep all we used at an even 90 degrees, if we were at all particular.

This plan was used in New York state before we moved part of our herd to Kansas, and while the entire cost of the outfit amounted to about \$110, it included the expense of piping the water into the house, the storage tank upstairs, the seventy-gallon, two-hundred-pound-pressure boiler and the hot-water front in the kitchen range, yet the main cost should not be charged to the hog end of the business, for every up-to-date farm house should have this arrangement for the house alone. Therefore, the only cost that could be charged to the hogs would be the necessary pipe to carry the water to the piggery, couplings, etc., and a shut-off under ground to keep the water at a sufficient depth to prevent it from freezing during zero weather. The total cost of the outfit complete from the kitchen sink to the troughs in the piggery, outside of our own labor, amounted to less than \$35.

I never considered this plan anything more than a practical necessity and I am giving my ideas hoping that they may help some fellow breeder. It is easy enough to plan a system of water works for the farm that will work all right during moderate weather, but unless great care is taken in putting them down below all danger of freezing there will be trouble when the extremely cold weather comes, and any man who has had experience in thawing out pipes in the winter with all of his stock waiting for water will not be apt to think lightly of my advice to look out for trouble in putting down your pipes. Water standing in an iron pipe will freeze unless every precaution is taken to guard against it.

It takes considerable thought and some practical experience to place a system of water works on a farm that will not be practically useless during a week or ten days of extremely cold weather. If any man wishes to please his wife and women folks, make his own work easier and keep his pigs growing and in better condition, he will do well to study these simple plans.

The loss of one fine sow by drinking cold water immediately after farrowing would pay all the expense of piping from the house to the piggery, and I am sure you can get a good many dollars'

Is Your Farm For Sale?

Is your farm for sale? Have you other land you would like to sell or exchange? Do you wish to hire help? Have you poultry, eggs, pets, machinery, implements or other articles for sale that other farmers need? If so, insert an advertisement in The Homestead's department of classified advertising. It will cost you only five cents a word for each insertion, no insertion being accepted for less than \$1.20, and cash always to accompany the order, as we keep no books on this kind of advertising. By special arrangement every classified advertisement in The Homestead is inserted without additional charges in The Farmer and Stockman, Kansas City, Mo., and The Wisconsin Farmer, Madison, Wis. These three papers have a combined circulation of over 165,000, covering the great, rich agricultural states of Iowa, Illinois, Missouri, Nebraska, Wisconsin, Minnesota, the Dakotas, Kansas and Oklahoma. Tell the farmers of these states what you want to buy, sell or exchange and you will almost certainly find a customer. Copy for your advertisement should be in our hands on or before Saturday of the preceding week. Address, The Homestead, Des Moines, Iowa.

We would like to call our readers' particular attention this week to the way the serial story by the Litchfield people analyzes the position their machine occupies at the present time, going thoroughly into the question of "Foundation" and "Quality." See page 5.

THE GALLOWAY WAGON BOX MANURE SPREADER.

We are reproducing here an illustration of the wagon box manure spreader of the William Galloway Company, which is destined from this time forth to cut a considerable figure in the manure spreader business. By reference to the large Galloway advertisement on page 9 it can be seen in the headlines how the new Galloway spreader is destined to affect the trade. There is to be a saving of just about one-half on the cost of the spreader at the prices now prevailing. The state of Iowa has been a good territory for manure spreaders for years. All the manufacturers have invaded it in force. The Galloway Company, located at Waterloo, Iowa, have been the first to take advantage of an excellent opportunity to greatly lessen the price and still, so they claim, not decrease the real value of the spreader. Every farmer has his own wagon gears. Why not use them to carry his spreader? The box with its gearings and attachments are the whole of the spreader. The gears are the same as the ordinary wagon. There is no

occasion for the farmer to buy duplicate gears. The point is well stated in a line in the advertisement, thus: "Why tie up \$65 in a spreader truck, useless eleven months in the year?" The new Galloway wagon box spreader is sold at \$59.50 with freight paid to destination. It is also sent out on thirty days' free trial, so that the purchasers may know that it is easily fitted to their wagon trucks, and that is really all that is claimed for it. The Galloway Company are not unknown to our readers. Many are now using the labor-saving new model riding harrow cart which was perfected by Mr. Galloway and has had such remarkable sale for the last few years. The guarantee of the Galloway Company on the new spreader is backed by a \$25,000 bond. If you are considering the purchase of a spreader it would be well to look up the Galloway advertisement and write for the booklet there mentioned, giving particulars. Address William Galloway Company, 109 Jefferson St., Waterloo, Iowa, and say you saw the advertisement in The Homestead.

Farm Furrows

Turned by a Practical Farmer.

They tell me that some of the business men in town are now dictating their letters into a phonograph; that this phonograph talks it back again into the ears of the typewriter and she puts it on paper. This they say will do away entirely with the science of stenography. Wonders will never cease. The next thing that will happen will be that some smart fellow will start up an agricultural paper and edit it with the "funnygraph."

I heard a clothing man the other day in town deploring the fact that we were having so much fine weather. He said he couldn't sell anything these days, but I was putting corn in the crib at the rate of about 200 bushels a day and wasn't growling at all. It all depends on the view-point. Any business man ought to be able to figure out that good weather now means good business later on. Of course it is man's prerogative to kick, and let him kick.

I think the old question, "Which is the most destructive, fire or water?" was settled years ago, because these days I never hear of it being debated. I suppose most of our readers who are getting toward life's western horizon, like myself, will remember the day when this important matter was being decided. If the little schoolhouse on the corner had done nothing more, it would be worthy a place in our affection, as it was always headquarters for important debates like these.

Leading land owners now protect the wild game on their domains. Signs on posts and trees are now commonly seen about the country. It seems like a small thing to the town hunters and boys who regularly make the rounds, but think of it in this way: Which would you prefer—to allow some careless hunter a few hours of sport or to shelter a covey of quails or flock of chickens and enjoy the pleasure and benefits which their presence affords throughout the year?

I don't have to vouch for everything being true that is passed along from the daily papers. I noticed recently in one of them that a woman became infatuated with a "hay box" as a cooking utensil. Hubby was prevailed upon to make one and the thing was given a trial. Later he was complaining to a friend about the whole proceedings. "Wasn't the pudding good that was cooked in the hay box?" said the friend. "Yes, the pudding was all right, but it spoiled the hay for the cows," was the reply.

I lost a very nice hog the other day as a result of a piece of fool business on the part of the hired man. He acknowledges the foolishness, but I am out the value of the pig. He tried to drive this pig through a gate and of course he (the pig) turned and went down the lane lickety-split, man after

More Thrift—More Profit.

WE guarantee that Standard Stock Food will put and keep every animal on your place in a vigorous, healthy, thrifty condition at less cost to you than will any other means you could possibly employ.

We sell Standard Stock Food to you on that square-deal guaranty.

The modern domestic animal kept on high feed needs a little help from day to day—not medicine or dope or physic, but something to give variety to the ration and to make it taste better.

The animal needs something of this kind, a condiment, a flavoring, a seasoning, just as you need salt and pepper, mustard and horse radish and various kinds of flavors and seasonings to help you digest your food.

Standard Stock Food makes the ration taste better so that the animal eats it with a greater relish.

The very smell of it makes the animal's "mouth water"—that is, it stimulates the flow of saliva and other fluids which perform the work of digestion so that the animal digests its feed more quickly, more easily and more thoroughly.

Hence it makes the feed you feed go farther because less of it passes through the animal undigested.

Its tonic properties quicken the circulation, aid assimilation and put the entire system in that prime condition which makes for finer finish and bigger profits.

We say Standard Stock Food does this better than any other stock food because it is made of purer, better ingredients, more scientifically compounded.

STANDARD STOCK FOOD
"IT MAKES STOCK THRIVE"

As to its quality, you don't even have to try it to be convinced. If your dealer will open packages of various stock foods and let you compare them, you will find that the Standard looks better, smells better, tastes better and is better than any of them. It is stronger, richer and more concentrated.

That's why you need feed so little

STANDARD STOCK FOOD CO.,

1516 HOWARD ST.

OMAHA, NEBRASKA.

of it and that's why it costs you less per animal per month than any other stock food made.

Do not be misled by a low price per pound. Examine the directions for feeding on various packages and you can see for yourself that a dollar's worth of Standard Stock Food will last longer and go farther than any other. It is the most economical stock food made.

Our Square-Deal, Money-Back Guaranty.

You buy Standard Stock Food on a money-back guarantee. If it does not do exactly what we say it will do, you get your money back. You know the editor of this paper would not print this advertisement if he did not know that we will do exactly what we agree to do.

Go to Your Dealer

and ask him to supply you; if he cannot, do not take a substitute but send to us direct. We will ship immediately and protect you with our square-deal, money-back guaranty.

Free to You.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

him and by the time he brought hoggy back the porker was all in—died in less than a minute after he stopped running. Never run a fat pig.

The Furrows man is not an expert chemist, but he has made a little study of the subject. Such terms as carbohydrates, protein, etc., used to bother him, but now the difference is very clear. Protein, it seems, contains the element nitrogen, while carbohydrates do not contain this element. Nitrogen, no matter in what form it is found, is always expensive and costs practically fifteen cents a pound. That is why by-products of mills sell high—they are rich in nitrogen.

Had a new experience this year. Put out ten acres of pumpkins and corn and expected to gather several trainloads for a big bunch of hogs. I do not believe that one blossom in one hundred ever made a pumpkin and I am utterly unable to tell the reason. I only had ten or twelve wagonloads from the whole field—I think I should have had five or ten times as much as that. A neighbor of mine had a similar experience. I shall

save but little seed of that variety, as I do not believe the number of staminate and pistillate flowers are suitably balanced to bring forth a good crop.

I don't like the word "kid" as a term for children. Of course, like everybody else, I use the term, but it is more or less vulgar in my opinion. A twelve or fourteen-year-old boy that can husk out fifty or sixty bushels of corn a day is too good a boy to be called a "kid." He is a little man, and deserves a new rifle or a new overcoat or anything else that he likes after the corn is out.

I visited a friend recently whose farm adjoins an interurban right-of-way. Cars go by his place at the rate of about forty-five miles an hour, and they stop at every cross road to pick up passengers. Land has doubled in value during the last five years since that road was established, and the end is not yet. It costs a cent and a quarter a mile to ride on this electric road, and the cars seem to be about full all the time. I am told that the line is immensely profitable. In every way these electric lines seem to me to be a good thing.

The Furrows man expects to ask a good many questions during the next few months, and he would like them answered, the answers to appear in this paper. Take the problem of feeding hogs: If you have in mind making a bunch of hogs weigh 275 or 300 pounds by the time they are ten months old, does it pay to feed something besides corn? Of course mill feeds and oil meal and tankage cost money, but does it not pay to feed a little less corn and use some of these flesh-forming foods? Let us have a discussion of that subject in this paper.

I can think of no expenditure that will add so much to the comfort of living as the instalment of a furnace in a home. The interest on the investment of installing a furnace will not be more than \$5 or \$6 a year, though the comfort from its use will pay dividends up in the hundreds if it could be computed. Of course it takes a little more coal to run a furnace than it does to keep a house half heated with a stove or two. But why not be comfortable? In addition to the extra warmth, you have all the extra dirt in the furnace room and all the heavy work of keeping up the heat can

A Knox Big Grinder

Will Make \$6.00 a Day for You

THERE'S nothing like it for a neighborhood feed grinding proposition.

You know lots and lots of your neighbors grind their feed—rather they take it to the custom mill and have it ground.

If you have a fast grinding mill like the Big Knox you can get nearly all that trade that passes your place.

No trick at all to get it if you go after it, and can take care of it. They pay the town miller 3c to 5c a bushel. You might as well have that.

Mr. B. C. Bennett, Ashawa, Iowa, writes: "I can grind 50 bushels shelled corn per hour with my Knox Big Grinder. Made \$6.00 in 5 hours grinding for my neighbors."

You or anybody else can grind your 50 bushels an hour—easily.

Just figure a little. Suppose you charge the lowest price, 3c a bushel. That's \$1.50 an hour. Grind 4 hours, and you've made your \$6.00.

The neighbors will easily keep you busy that much of the time. And the four hours don't break into your day so very badly either.

Western Harness and Supply Co., Box 53, Waterloo, Iowa.

And then think what it means to always have the Big Knox ready for all your own grinding. Remember, it's a mill, not a toy. Weighs 800 pounds. No limit to the work it will do.

You can buy a Knox Big Grinder direct from us for \$23.25. Such a mill, bought of a local dealer, costs \$40.

Will it pay to own one? Don't you see you can make it pay and pay big?

10 Days Free Trial

You are welcome. See for yourself its strength, its light draft, simplicity, its cup oil bearings, why it can't wear out. Just one set of burrs has ground 10,000 bushels.

You ought to have it. Write for free catalog today.

FEED MILLS

be done by the men. If you have stoves the women do most of the tussling with the fuel. It isn't too late to install one yet this year. If you have a place for it in your cellar a good man will put one in in about two days, and it is not a very big job to insert pipes through the walls.

Nothing is more common than to hear men say that the Poland Chinas are not so prolific as they formerly were. The department of agriculture at Washington has looked into this matter and finds that during the period from 1882 to 1886 the average size of the litters was 6.91, while from 1898 to 1902 the average size of the litter was 7.44. These figures are not based on guess-work, but are computed from the records of several thousand sows. The man who has it in for the Polands, however, will not put this item in his hat-band for reference.

I have met a large number of mean men in my lifetime, but there is one who stands out in my memory like a wart on a baby's nose. About twenty years ago I hired a man to husk corn at so much per bushel. When he came in at noon we would measure the load and then I would go off about my business. He would put it off and of course go to husking again. One of the kids got in to ride to the field with him one day and discovered that he didn't shovel off the whole load, but took to the field with him again several bushels of corn. I watched for him the next day, and sure enough he marched into the field with about ten bushels of corn. To say the least, the atmosphere around there was a little sultry for half an hour.

THE INTERNATIONAL EXPOSITION

Since its inception in 1900, the International Exposition of Chicago has been regarded as the crowning event of the year from the standpoint of those who are interested in live stock improvement. The years of its history have been fat years and each succeeding event seems to eclipse former records. The mammoth crop in the corn belt for 1906 naturally led to the belief that this year would sustain past records, if not go beyond them. The history made last week rounds out a notable record thus far for this exposition.

In spite of the fact that very disagreeable weather prevailed during the week, the attendance, especially from outside Chicago, was most gratifying, though the raising of the entrance fee from a quarter to half a dollar possibly cut down the number of Chicago people in attendance. Yet it must be acknowledged that there were enough there for the comfort of all, and not infrequently the attendance amounted to a jam. Never before were the exhibits placed to better advantage, considered from the standpoint of their educational effect. The free use of placards in stall and on animals in ring gave to the public an ideal opportunity to study the individuality of animals, and in this respect it means that the International is going forward as an educational event.

Barring the fact that the hog entries were less than in former years, the show this year was possibly more balanced than ever before. The sheep, cattle and horses were all exceedingly strong. On every hand you could hear it remarked that the quality of exhibits was never so high as was the case this year. Every man who had time to take his seat at the ringside and hold it for a day would vouch for the statement that the classes in practically every instance were large and that a larger number of animals than usual were superior in point of type and fitness for the show. True, that all classes were not superior to all classes at former expositions. There were those who claimed that in the steer classes there could be found no Shamrock, no Chal-

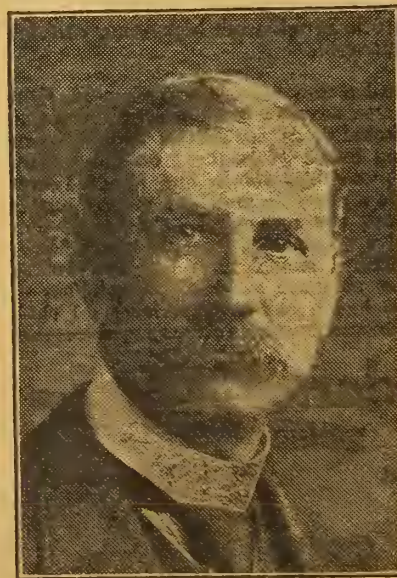

lenger, no Clear Lake Jute, and no Advance, and yet no one denies that the champion steer this year was, for his age and weight, one of the most difficult to improve on that has ever been led into an International ring. The noted foreign judge stated unhesitatingly that he was the best individual calf that he had ever looked over. This is a most glowing tribute from a very high source for the 1906 International. Speaking of the steer classes it must be acknowledged that more than one piece of new history was made. In addition to the fact that a calf won for the first time, the great Short-horn breed had a representative in the line-up for the grand championship prize. This should be encouraging, but there is need for more concerted action on the part of Short-horn breeders in improving the character of the steers shown at this great exposition. The general run of Short-horn steers this year were below par—scarcely comparable at all with the showing made by the white faces and the doddies. The reason is not hard to find, however, as the good ones of this breed are not unsexed as they are in the other breeds.

Rules relating to the veterinarians' examinations were possibly more strictly enforced this year than ever before, and naturally some feelings were ruffled. Dr. McNeil, who was official veterinarian this year, drew the line straight and hewed very closely to it, but in doing so he doubtless had the support of the great majority of those who believe that nothing but sound animals should be shown. In one instance all the animals in a class were sent to the barns without a ribbon, on the score of unsoundness. If this ruling is kept up it may to some extent cut down the number shown at future expositions, but it will certainly improve the quality. Individual states here and there are giving much attention to the examination of stallions for soundness that are used within its borders, and this being true, it would appear that the time has arrived when there should be strict rulings on this point at the great annual show held in Chicago. The province of Ontario alone employs sixteen men, who spend practically their whole time going about the province, their duty being to examine all stallions used for service and put out of business those that are unsound. When we find the people supporting a movement of this kind, it is most commendable to encourage the same thing in shows to the greatest possible extent, and the International is rightly taking the lead in a matter of this kind. No man should complain of the ruling if he has his horses disqualified for unsoundness, because this only leads to better things in the future.

We stated before that the entries of hogs this year were light—so light, indeed, that it would appear as though the day has arrived when the hog department must be cut out entirely or the breeding classes admitted. In the very nature of the case this department is hard to handle. Men, as a rule, will not bring their best breeding hogs to the Union Stock Yards and take them home again, as the danger of spreading disease is too great. On the other hand, it appears that good breeders do not see their way clear to unsex their good hogs and afterwards fit them for this show. It is claimed that a good barrow is often made from a very poor male, and that a barrow show, therefore, throws little light on the type to breed from. Some exceedingly strange

history was made last week in the barrow pens, when the grand championship prize for the best barrow in the show fell to a 600-pound lean hog—a Yorkshire. Against him there were three or four extra good ones between 200 and 300 pounds and also a Poland fat-back weighing about 435 pounds. Yet the committee of judges passed by these lighter types, as well as the fat-back, and placed the ribbon on the big barrow. One of the stock yards men who took part in the judging was asked if a car load like this champion would top the market the day the prize was awarded, and he admitted it would not. He was then asked if such a car load would ever top the market, and he said it would not. Even the Yorkshire men themselves admit that this is a very undesirable kind of hog, inasmuch as he was carried too long, and they propose in the future to cut the heavy hogs out of their classes. We have no criticism to pass on the committee of judges who placed the grand championship prize, but we ask our readers not to take their ratings too seriously.

The entertainment feature of the International, as furnished by the evening program, continues to improve and the program carried out every evening during the week exceeded in interest and in variety anything ever put on at the International. The showing of horses and cattle and the display, especially of the horses to halter, as well as those in heavy harness, made a spectacular feature that no man can quickly forget. Everything went off with a snap and a dash that completely eliminated any tediousness, and no theater

Arthur P. Turner, England, Judge of grade and cross-bred steers.

in Chicago gave greater value for the admission fee than did this great show. In this connection it must be acknowledged that the public is somewhat indebted to those firms in Chicago that have gone to the expense of finding the best geldings in the world, to bring them to this show. England, Scotland, Belgium, Canada and the United States were represented in the gelding classes, and it is not putting it too strongly to say that the showing made in these classes during the week could not be duplicated elsewhere on earth.

The experiment stations again made a great showing in the steer classes, and

though they failed to win the grand championship prize this year, they came within an ace of it, inasmuch as the Minnesota station furnished the reserve champion. The number of good ones shown by these institutions this year again brings up the old question as to the advisability of admitting them. Private individuals who went to the expense and to the trouble of fitting one or more steers took their medicine gracefully this year when defeated by the colleges, and yet it was not uncommon to hear men state that they were in it for the last time so long as these institutions were allowed to compete with private individuals. Of course this has been said before, and yet there is a good showing the following year; nevertheless the feeling is growing that the time has arrived when the colleges and stations should compete with one another and not with the private individual. Their showing was superb this year, and the International would greatly miss them if they dropped out; but it may be if they were out of the way of the private individual that there would be created greater inspiration in fitting exhibits for the steer classes of the great show.

The students' judging contest continues to hold its share of interest, though this event takes place before the judging of the regular classes begins. For the second time the boys from the province of Ontario carried away the trophy for general proficiency in the judging of cattle, horses, sheep and swine. Iowa was second in the general contest, Ohio third, Kansas fourth, Michigan fifth and Texas sixth. The trophy for the best judging in the horse department, done by students, was won by the Iowa institution, Texas being second, Ohio third, Ontario fourth, Michigan fifth and Kansas sixth. The contest this year, without doubt, passed off better than ever before, though even yet there is some room for improvement. Greater pains should be taken to see that the students of all institutions, together with the judges, are given exactly the same instructions, so that each boy and each institution shall have exactly the same chance. It is not inferred that there was any unfairness this year, but there were a few misunderstandings that might have seriously affected the results, if it did not. If this event is a good one, and we do not see why it is not, other institutions should take part in it, thereby making the contest hotter and adding greater glory to the winners, and of course, best of all, giving more boys the experience, which is the end of it all.

Generally speaking, the premium list that we shall give complete in the next few pages tells an accurate story of the relative merit of animals in all classes. There is always side talk about passing things around to satisfy men rather than to make merit in animals the supreme thing, but close observation on the part of a number of members of our staff leads us to the conclusion that in the main the judging was conscientiously done and the animals that won made their final record for 1906 last week, and that record must stand for all time. We have known the public to growl a good deal over decisions without having the opportunity of close inspection—a fact that in many instances makes the public "wrong" and the judges "right." There were a few withdrawals on account of the judges selected to do the work, and this is only a matter to regret. The requests of men who withdrew their animals were in the main reasonable, but that they were not granted is not equivalent to saying that those in charge failed to keep faith with the public. We repeat that the great majority of the awards made at the International were just, and the result of most of the judging was in an educational sense of great value to those who looked on.

The meeting of the International Association, held, as has been the custom, on Monday night, was not well attended, and because of this a motion was unanimously carried to hold the annual meeting in the future on Tuesday instead of Monday evening. The only other item of business transacted this year was the election of International directors. Those elected for one year were: Richard Gibson, E. H. Ingwersen, Robert Taylor, O. E. Bradfute, W. W. Cargill, W. S. Dunham, James W. Martin, A. J. Lovejoy; for two years, W. E. Skinner, F. W. Hard-

1000 Fifty-Cent Boxes of Swain's Backache and Kidney Pills "FREE"

We want to prove to 1,000 readers of The Iowa Homestead that Swain's Backache and Kidney Pills will cure Bright's Disease, Diabetes, Gout, Rheumatism, Lumbago, Dropsy, Backache, Too Frequent, Scanty or Difficult Urination, Catarrh of the Bladder, Incontinence of Urine, Blood Poison, Heart Palpitation, Bladder Trouble, Constipation, Biliousness, Sick Headache, Nervousness and many other diseases that come from the kidneys being weakened and failing to separate the deadly uric acid and other impurities from the blood.

If you have any of the above named diseases and will send 10c in silver to pay postage and mailing we will send you a full 60c box of Swain's Backache and Kidney Pills "FREE." Thousands of people who suffered from kidney troubles whose case had been considered incurable by Physicians have been cured by Swain's Backache and Kidney Pills; that is why we offer you the first box absolutely free.

Do not delay, but write for the free box before you lay this offer aside. Address Swain Medicine Co., Dept. 12, Kansas City, Mo.

ing, C. F. Curtiss, Tom Clark, Edw. Morris, John Clay, Mortimer Levering and W. A. Harris; and for three years, A. H. Sanders, John A. Spoor, A. G. Leonard, J. Ogden Armour, G. H. Davison, I. M. Forbes, J. S. Cooper and Robert S. Ogilvie.

This is the last International that will be held under the management of Mr. W. E. Skinner. As announced some time ago, Mr. Skinner is obliged to change his location on account of the health of certain members of his family, so that his work in Chicago comes to an end when the affairs of the 1906 International are wound up. Mr. Skinner has been an efficient general manager, and while he has been well supported by the Union Stock Yards and by the board of directors, yet to a large extent he himself has been instrumental in making the International the largest show of its kind on earth. Stockmen generally regret the necessity that has brought about Mr. Skinner's resignation. His duties in the future will fall to one who is eminently well fitted for discharging them. We refer to Mr. Bernard Heide, who has been chosen by the directors to succeed Mr. Skinner. Mr. Heide has been closely associated with the management of the International since its inception. He has a broad acquaintance with stockmen throughout the whole country, and he holds the affection and esteem of these individually and collectively. We ask for Mr. Heide the hearty co-operation that was secured by Mr. Skinner in carrying forward this great exposition.

CATTLE.

SHORT-HORNS.

The exhibit of the Short-horns made a show in itself. It was as a sequel to a story told in the fall circuit. Contests of the past few months were forgotten in the great friendly strife for honor. In some of the classes where a score of the finest kind of specimens awaited the inspection of the judge, it seemed to onlookers as if it were merely a case of a draw. The splendid success of the contest was in no way marred by any friction between exhibitors and judges. John Lewis, Lafayette, Ind.; Wiley Fall, of Iowa, and J. H. Miller, of Peru, Ind., applied themselves most assiduously to the task allotted them. The Short-horn association had liberally added to the list of prizes and as many as

ten moneys were awarded in some instances. In answer to the inquiry regarding the best class, one is compelled to say there was no best. The supreme excellence of nearly every class entered made such comparison beyond the judgment of most of the onlookers.

Exhibitors with herds are found in the following list: Adkins & Stevenson, Bement, Ill. (12 head); W. W. Brown, Amanda, N. D. (6 head); H. S. Bright, Versailles, Ky. (11 head); E. W. Bowen, Delphi, Ind. (5 head); C. E. Clarke, St. Cloud, Minn. (15 head); F. W. Cotton, Manilla, Ind. (10 head); Carpenter & Ross, Mausheld, Ohio (9 head); W. H. Dunwoody, Minneapolis, Minn. (16 head); W. C. Edwards & Co., Rockland, Ontario (8 head); I. M. Forbes & Son, Henry, Ill. (9 head); U. Z. Green, Indianapolis, Ill. (10 head); F. W. Harding, Waukesha, Wis. (21 head); C. Hurtz & Sons, Fremont, Ohio (9 head); Herr Bros. & Reynolds, Lodi, Wis. (7 head); D. R. Hanna, Rayenna, Ohio (11 head); F. O. Lowden, Oregon, Ill. (11 head); N. A. Lind, Rolle, Iowa (6 head); Purdy Bros., Harris, Mo. (12 head); Abram Renick, Winchester, Ky. (5 head); J. G. Robbins & Sons, Horace, Ind. (17 head); C. A. Saunders, Manilla, Iowa (5 head); D. B. Searle, St. Cloud, Minn. (7 head); E. R. Stangland, Marathon, Iowa (9 head); N. W. Wagner, Fremont, Ohio (9 head).

AGED BULLS.

First, Harding on Whitehall Marshall 209776.
Second, Robbins & Son on Scottish Prince 250444.

Third, Purdue Agricultural College on Lord Matchless 207763.

Fourth, Adkins & Stevenson on Invincible Hampton 206226.

Fifth, Hanna on Missie's Diamond 221080.

Sixth, Clarke on Bapton Favorite 231780.

There was a great improvement in the aged bull class over last year's lineup. Three great bulls for first occupied the close attention of the judges for some time, yet there were none who feared for Whitehall Marshall finding his usual place at the head. His freshness and faultless makeup and natural show-ring character, like his famous sire, make him an outstanding winner. Following him came Scottish Prince, a massive rugged roan, lacking some in finish and quality, but withal possessing a great strength of Short-horn character. As some saw it, third choice was made largely on a basis of a straight-lined, well-proportioned conformation. However, as an all round sire he deserved well the recognition. From here on the reasons for places were not so clear and many would have made changes. Bapton Favorite, a very popular bull this fall, deserved probably a higher place and he certainly would have looked well at second, being an excellent type of refined sire with lots of covering and an attractive individuality.

TWO-YEAR-OLDS.

First, Herr Bros. & Reynolds on Royal Sultan 223948.

Second, Forbes & Son on Victor Linwood.

Third, Cotton on Lucky Pride 2d 228570.

Fourth, Ardmore Stock Co. on Superbus 224710.

Fifth, Carpenter & Ross on Highlander 265092.

Sixth, Brown on Bapton Chief 227581.
The roans were again at the head and for sappy, rugged individuals they have few equals. Royal Sultan, a massive fellow, held his place quite easily and is a promising future champion. He afterwards gave Whitehall Marshall a fight for senior champion bull. Second choice of considerable less scale and of a more refined makeup was crowded in over a bull that was a match for him in every particular. A very smooth red filled fourth and had many supporters, as his quality, combined with scale the equal of any in the class, made him stand high in favor at the ringside.

SENIOR YEARLING BULLS.

First, Fletcher on Nonpareil Star 238402.

Second, Edwards & Co. on Royal Favorite 56149.

Third, Summers on Bud White 262802.

Fourth, Forbes & Son on Matchless Robin.

Fifth, Hanna on Diamond's Mariner 241073.

JUNIOR YEARLING BULLS.

First, Renick on Signet 248501.

Second, Purdy Bros. on Lord Champion 254700.

Third, Carpenter & Ross on Avondale 245144.

Fourth, Bowen on Merry Boy 247991.

Fifth, Robbins & Son on Grand Lad 269385.

Sixth, Tietjen on Straight Marshall 247519.

Seventh, Dunwoody on Woodhill Starlight 2d 241260.

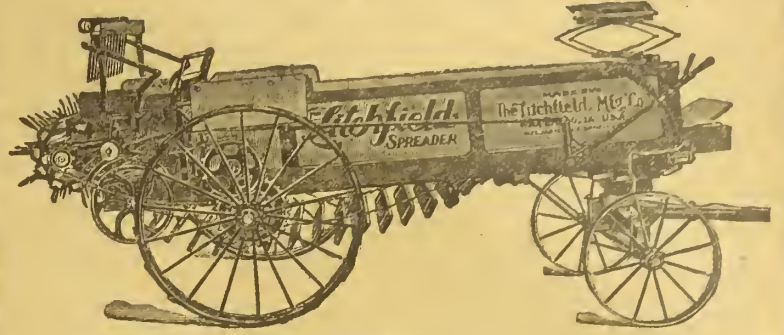

Ninth, Adkins & Stevenson on Lad's Champion 266723.

Tenth, Madden & Son on Gay's Lad 263159.

While seventeen entered the race for honors here the number was only an index of what was to follow in the coming classes.

Signet, the bull that received so much praise at the Royal, was easily first for his elegant style, rich mellow coat and smoothly-inlaid

THE QUESTION

WHY SUCH RAPID GROWTH.

THE QUESTION as to why such a rapid increase in the sales of the Litchfield Spreader, is constantly asked by our friends (competitors and customers alike)—they want to know how we do it, how we find so many new customers, and what our selling methods are. They want to know where we advertise and how, and who sells our goods.

Occasionally a man will ask what there is about the Litchfield Spreader that causes its rapid bid for popularity, but most people do not consider this. They think more about how many canvassers we have out or how many good agencies or what newspaper we advertise in, and don't get right down to the meat of the question and dig to find what there is in the machine itself that causes one customer to make us a great many more.

It is difficult for some people to understand why the Litchfield Spreader which five years ago was unknown to the public, with its entire career ahead of it and its reputation yet to be made—it is hard to make these people understand just how we have succeeded in putting this wonderful spreader at the head of the list and a leader in its line; with a sales record to its credit and hosts of enthusiastic owners fighting for it all over this country, in a manner not equaled by any other machine in existence.

In the beginning our endless conveyor (or apron) was criticised and it was a serious question among many as to its being entirely practical. Time has told the story and answered this question better than anything else could. When we began working towards fewer parts and pieces, we were referred to the old-time machines (some of them on the market for thirty years) and cautioned not to be too radical; our one lever spreader with half the parts and pieces found on most other machines proves that our position was right.

The reason for the wonderful growth and popularity of the Litchfield Spreader can be summed up in two words, "Its Foundation." We have not tried to build up a large spreader business without having as a foundation the best machine that modern experience and facilities can possibly produce. We can say that our large sales are a result of our not trying to sell, but trying to build. It is our belief that a machine well built is well sold, and the record of the Litchfield Spreader is the evidence that we are correct.

Continued next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

frame. For second, the honor fell on a rugged fellow, a mellow handling red of flesh and conformation not common in many rings. In third place was put a stylish youngster, carrying his head pleasingly, though in make-up some faulted his lines and middle which could be overlooked on account of his wide, full developed front and hind. Fourth found himself at a slight disadvantage for being higher above the tankard than his fellows, otherwise he made good his selection, which had many strong candidates.

SENIOR BULL CALF.

First, Forbes & Son on Linwood's Favorite.

Second, Harding on Anoka Sultan.

Third, Bowen on Bouncing Boy.

Fourth, Hanna on Diamond's Crown 258864.

Fifth, Purdy Bros. on Monarch's Viceroy 264469.

Sixth, Douglas & Son on Marigold Prince.

Seventh, Saunders on Consumer 268124.

Eighth, Bowers on Gay Emperor 267526.

Ninth, Clarke on Fair Knight 262490.

Tenth, Clarke on Choice Knight 253397.

JUNIOR BULL CALF.

First, Clarke on Knight Commander 263720.

Second, Robbins & Son on Clara's Choice 269384.

Third, Purdy Bros. on Monarch's Model 2d 264468.

Fourth, Cotton on Mister Lad 269140.

Fifth, Harding on Sultan Commander 263132.

Sixth, Renick on Pantheon 270338.

Seventh, Harding on Marshall's Star 263131.

Ninth, Madden & Son on Gay's Secret 266019.

Tenth, Adkins & Stevenson on Hampton's Monarch 266721.

AGED COW.

First, Clarke on Welcome of Meadow Lawn 9th.

Second, Robbins & Son on Lad's Emma.

Third, Wagner on Lady Marshall.

Fourth, Hanna on Ballachroggan Favorite.

Fifth, Green on Kirklevington Duchess of Maple Hill.

Sixth, Bowen on Victoria of Linwood 8th.

The crowd gathered dense on all sides of this ring, for it appeared at once as the magnificent line filed into the arena, that a royal contest was on. Good judges said it was the best ring of Short-horn cows gathered together for years, possibly the best unconditionally. Extreme fitting should not and did not receive encouragement in such a class and some few found themselves with excellent animals at a discount for excessive fatness. Fourteen were in the lineup. First was a cow of sweet elegance and show type, fitted by the prince of showmen, Leslie Smith. Second was much on the same order, while ruggedness and vigor were most striking points in third choice. Proportion and massiveness were lacking in fourth in comparison to those above, though she is a very sweet matron and handles as mellow as most of them. Fifth place went to a great, wide-spread, matronly female giving less of the finished appearance of those ahead.

TWO-YEAR-OLDS.

(18 in class.)

First, Harding on Anoka Broadhooks.

Second, Clarke on Duchess of Lancaster 13th.

Third, Robbins & Son on Lottie.

Fourth, Clarke on Dorothea 2d.

Fifth, Drummond on Queen Ideal.

Sixth, Carpenter & Ross on Zoe.

This was an exceptionally strong collection, even though it followed such an extraordinary aged one. It was not so difficult to pick the winner here, but after that they looked all about the same to the judges. While the first was younger by some months than her closest rivals, her unequalled show ring character and almost perfect conformation won at once the admiration of all. Larger heifers followed and of the kind of character and proportion that is hard to excel anywhere.

SENIOR YEARLING HEIFER.

(17 in class.)

First, Purdy Bros. on Viscountess of Fairview 6th.

Second, Robbins & Son on Slippers.

Third, Bright on Glen Brook Butterfly.

Fourth, Wagner on Lucy.

Fifth, Adkins & Stevenson on Amy 2d.

Sixth, Purdy Bros. on Fairview Orange Blossom 12th.

Seventh, Harding on Clara Belle.

Eighth, Lind on Lovely Belle.

Ninth, Brown on Phyletta.

Tenth, Clarke on Lady Mysie 2d.

The first heifer in this class was afterwards made the junior champion female Short-horn and she later gave Welcome of Meadow Lawn a warm fight for the championship prize on Short-horn females.

JUNIOR YEARLING.

(22 in class.)

First, Harding on Missie of Browndale.

Second, Clarke on Alice of Meadow Lawn.

Third, Dunwoody on Woodhill May Blossom 3d.

Fourth, Lind on Beaver Creek Arabella.

Fifth, Purdy Bros. on Fairview Orange Blossom 13th.

Sixth, Searle on Winsome Lassie.

Seventh, Harding on Fancy Lovell.

Eighth, Bright on Sarah McCubbing.

Ninth, Adkins & Stevenson on Lady Challenge.

Cownie Fur Coats

Are the only Fur Coats made that have a two year written Guarantee.

NOT one skin is used in a Cownie coat that is not taken off in Dec. or Jan. when the fur is the best. Not one drop of strong acid or chemicals is used in the tanning of these hides. That's why we can guarantee a Cownie Coat twice as long as any other fur coat made. If your dealer cannot supply you write us.

Champion Two-year-old Steer, all breeds. Tim, shown by Kansas Agricultural College.

Tenth, Forbes & Son, on LaBelle 2d.

SENIOR HEIFER CALF.

(36 in class.)

- First, Searle on Merry Maid.
 Second, Lowden on Smississippi Lady 2d.
 Third, Harding on Anoka Gloster 2d.
 Fourth, Purdy Bros. on Monarch's Ruby.
 Fifth, Purdy Bros. on Viscountess of Fairview.
 Sixth, Harding on Claret.
 Seventh, Searle on Violet Pearle.
 Eighth, Clarke on Lady Dorothea 3d.
 Ninth, Robbins & Sons on Lady Craggs.
 Tenth, Bowen on Mayflower 8th.
 Eleventh, Harding on Broadhocks Sultana.
 Twelfth, Purdy Bros. on Lady Mary 4th.
 Thirteenth, Lowden on Smississippi Countess.
 Fourteenth, Lind on Victoria Countess.
 Fifteenth, Bright on Victor Missie's Victoria.

This was the sensational class of the Short-horn display, and out of the thirty-six that were led into the ring there were more than enough good ones to take the premiums, and the fifteen that fell heir to ribbons were a bunch that has seldom, if ever, been duplicated in this country. The first-prize heifer, Merry Maid, was right at the half ton mark and was a sensational heifer in every way. For thickness and scale you might expect such a heifer to be placed on shorter legs, and her character in head and neck would stand improving. The Smississippi heifer that stood next to her was lower to the ground and had more character about the head, but lacked a little in scale compared with her successful rival. The Harding heifer that stood third was exceedingly strong in the crops and was throughout a graceful, thick-fleshed individual. It was a stubborn class throughout to place, and the judges waded through it with much credit to themselves and reasonably good satisfaction to exhibitors.

JUNIOR HEIFER CALF.

(25 in class.)

- First, Dunwoody on Woodhill Duchess 2d.
 Second, Bowen on Purity.
 Third, Purdy Bros. on Fairview Orange Blossom.
 Fourth, Dunwoody on Woodhill May Blossom.
 Fifth, Robbins & Sons on Roan Bracelet.
 Sixth, Dunwoody on Lady Mary 6th.
 Seventh, Robbins & Son on Lavender Lass.
 Eighth, Carpenter & Ross on Sweet Duchess of Gloster.

Ninth, Saunders on Countess Cumberland.
 Tenth, Dunwoody on Juno of Woodhill 2d.
 Senior Champion Bull—Whitehall Marshall.
 In the choice of the best senior bull was enacted one of the outstanding events of the show. Here two sons of Whitehall Sultan fought as it were in combat royal. For one side there was much to gain; the other a great deal to lose. But the worthy junior, Royal Sultan, was compelled to be content with the honor of having engaged a veteran in a spirited contest, an honor, too, of no small significance.

Junior Champion Bull—Signet.
 Champion Cow—Welcome of Meadow Lawn.
 Champion Heifer—Viscountess of Fairview.
 Grand Champion Bull—Whitehall Marshall.
 Grand Champion Cow—Welcome of Meadow Lawn.

AGED HERD.

- First, Harding.
 Second, Clarke.
 Third, Robbins & Sons.
 Fourth, Hanna.
 Fifth, Brown.

YOUNG HERD

- First, Purdy Bros.
 Second, Clarke.
 Third, Robbins & Sons.
 Fourth, Dunwoody.
 Fifth, Harding.

CALF HERD.

- First, Purdy Bros.
 Second, Clarke.
 Third, Robbins & Sons.
 Fourth, Searle.
 Fifth, Lowden.

PRODUCE OF COW.

- First, Forbes on produce of Victor of Linwood 4th.
 Second, Clarke on Dorothea.
 Third, Purdy Bros. on Victoria of Giltspur 3d.
 Fourth, Dunwoody on produce of Imp. May Blossom 4th.
 Fifth, Robbins & Sons on produce of Imp. Emma 32d.

GET OF SIRE.

- First, Harding on get of Whitehall Sultan.
 Second, Purdy Bros. on Orange Monarch.
 Third, Forbes & Sons on get of Cock Robin.
 Fourth, Robbins & Sons on get of Lad for Me.
 Fifth, Clarke on get of March Knight.

The grand finale of the contest was enacted when four of the sons of Whitehall Sultan, four of the daughters of Orange Monarch and a group by Cock Robin, also one by Lad for Me were entered. Contemporary groups of excellent individuals completed the list of ten. It was a situation that requires the strongest of imaginations to picture. By the magnificence and strength of masculine character, the first group was placed; the second by the wonderful uniformity and feminine sweetness of character.

HEREFORDS.

The select of the white faces only, came to the greatest of American annual shows last week. Many went into winter quarters after the Royal at Kansas City. Numerically the display at the International barns was not a subject of unusual comment, though visitors and supporters in the ring found much to admire in the first-class quality of the animals brought out. Every lover of this rustling breed went away satisfied. Prizes were more liberal than last year and the work of placing the groups passed off successfully in the hands of N. H. Gentry, of Missouri. In all a dozen full herds gathered at the final contest of the year. Wisconsin and Indiana figured most prominently and the former state secured three of the championships. Perhaps for bloom and high fitting this breed was at the top, while the tidy compact forms in the young classes were the recipients of much praise and admiration from the crowd that surrounded each entry. In the senior heifer calves eighteen exceptionally fine ones lined up and to the majority of the crowd the task of finding the best quintet was a question of tedious solution. Competition was keen from start to finish, somewhat more in fact than the awards might indicate. Those with herds at the show are found in the attached list: S. L. Brock,

Macon, Mo. (13 head); Cargill & McMillan, LaCrosse, Wis. (22 head); Edmonds, Shade & Co., Kingsley, Iowa (6 head); W. S. Van Natta & Son, Fowler, Ind. (16 head); G. W. Harness, Galveston, Ind. (4 head); G. H. Hoxie, Thornton, Ill. (9 head); F. A. Nave, Attica, Ind. (15 head); J. C. Robinson & Son, Evansville, Wis. (7 head); Studebaker Stock Farm, Van Buren, Ind. (11 head); Sanford Bros., Eminence, Ky. (7 head); H. N. Thompson, Woodstock, Ill. (12 head); J. B. Wellcome, Waterloo, Mont. (10 head). The awards:

AGED BULLS.

- First, Cargill & McMillan on Princeps 4th 143394.
 Second, Wellcome, on Young March On 144768.
 Third, Harness on Keep On 26th 136177.
 Fourth, Thompson on Capricornus 109735.
 Fifth, Watson on Norwood 106907.
 Princeps has been the talk of the season and any place but first for this great Hereford sire could not be thought of. In some points he might have been equaled by second choice, a bull that has a wonderfully well-carried back. A bit of unevenness detracted from the low, solid-bodied bull in third, while the fourth choice stood a bit above his fellows and lacked that massiveness of his rivals.

TWO-YEAR-OLDS.

- First, Cargill & McMillan on Privateer 2d 182133.
 Second, Nave on Prime Star Grove 184760.
 Third, Nave on Royal Dale 192281.
 Fourth, Sanford Bros. on Beau Donald 71st 187358.
 Fifth, Van Natta & Son on Prime Lad 3d 197984.
 First choice maintained his usual position, and while his proportions are not the most pleasing, he is remarkably strong on top line and shows that rugged character of an impressive sire. Throughout this class scale was good and second choice went to a well-made fellow of better proportions, though less of show ring character in his makeup. Fourth fell to a Beau Donald bull, while one of Prime Lad get completed the quintet of excellence.

SENIOR YEARLINGS.

- First, Cargill & McMillan on Bonnie Brae 3d 203317.
 Second, Van Natta & Son on Prime Lad 9th 213963.
 Third, Hoxie on General Manager 2d 205604.
 Fourth, Nave on Beau Wash 208144.
 Fifth, Haven on Druld 3d 200479.

JUNIOR YEARLINGS.

- First, Van Natta & Son on Prime Lad 16th 213969.
 Second, Huxley on Merry Donald 213387.
 Third, Fluck on Paderewski 225263.
 Fourth, Cargill & McMillan on Donald 207195.
 Fifth, Wellcome on Red Knight 213368.

SENIOR BULL CALF.

- First, Cargill & McMillan on Fulfiller 3d 230508.
 Second, Hoxie on Peerless Perfection 10th 235454.
 Third, Van Natta & Son on Prime Lad 25th 234343.
 Fourth, same on Prime Lad 28th 234346.
 Fifth, Nave on Javan 230564.

JUNIOR BULL CALF.

- First, Van Natta & Son on Prime Lad 30th 234348.
 Second, Brock on Disparter 238025.
 Third, Brock on Dislodger 238024.
 Fourth, Nave on Harold 235794.
 Fifth, Schoonmaker on Nelson M. 240098.

AGED COW.

- First, Cargill & McMillan on Heliotrope 159451.
 Second, Nave on Nutbrown 9th 188681.
 Third, Cargill & McMillan on Twilight 167464.
 Fourth, Van Natta & Son on Rosalind 169015.
 Fifth, Thompson on Cherry Pie 8th 102356.
 Heliotrope has carried herself through the show circuit in remarkable shape for a cow of her flesh. In second place was a beautiful cow with all the qualities of a breeding matron, though more scale would have been acceptable. Twilight kept close to her mate, as always, and was a strong candidate for her place against Rosalind, rather a bit too light to satisfy the critics on weights.

TWO-YEAR-OLDS.

- First, Cargill & McMillan on Miss Donald 17th 184573.
 Second, Van Natta & Son on Princess 197988.
 Third, Nave on November Maid 176654.
 Fourth, Cargill & McMillan on Golden Lassie 182126.
 Fifth, Robinson & Son on Dewdrop 182727.
 Miss Donald set the pace with a type of the highest excellence, having that very compact, smooth form, close to the ground, with a width and depth that gives those surprising weights in this breed. Second possessed scale, but less finished, while third was very near her counterpart.

SENIOR YEARLING.

- First, Cargill & McMillan on Ethel 2d 203170.
 Second, same on Crocus 2d 203169.
 Third, Brock on Lady Ruth 217109.
 Fourth, Brock on Lady Ann 204805.
 Fifth, Nave on Juliet 207960.

JUNIOR YEARLINGS.

- First, Van Natta & Son on Prairie Queen 213961.
 Second, same on Suzette 2d 213976.
 Third, Brock on Lady Lucy 212289.
 Fourth, Nave on Jemima 207959.
 Fifth, Cargill & McMillan on Priscilla 3d 207198.

SENIOR HEIFER CALF.

- First, Van Natta & Son on Margaret 234336.
 Second, Brock on Lady Welmore 233131.
 Third, Cargill & McMillan on Miss Filler 2d 230514.
 Fourth, Brock on Disturber's Lassie 233124.
 Fifth, Cargill & McMillan on Miss Filler 4th 230516.

JUNIOR HEIFER CALF.

- First, Cargill & McMillan on Miss Filler 6th 239659.
 Second, same on Miss Filler 5th 230577.
 Third, Brock on Lady Belinda 238028.
 Fourth, Sanford Bros. on Lady Donald 242908.
 Fifth, Huxley on Alleen Donald 2d 239435.
 Champion Senior Bull—Princeps.
 Champion Junior Bull—Bonnie Brae.
 Champion Cow—Heliotrope.

IOWA STOCK FOOD

FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing.

Gentlemen:—
 I purchased some of the Iowa Worm Powder last February and I don't think I ever made a better investment. The Iowa Worm Powder can be depended upon. I had some of it left that I fed to my spring pigs and it surely done the business.
 I gave your Mr. Deal an order today for some more of the Worm Powder, as I want it on hand. An occasional feed of it keeps the worms from accumulating in my pigs. Feeding to prevent sickness beats curing after pigs are sick. Most of the pig losses are due to worms and the Iowa Worm Powder is sure death to worms.
 Truly yours,
 Alex. Norman.

ABERDEEN-ANGUS.

Another Angus show has become history and the score of breeders of the doddies that met at the Chicago show last week in friendly contest know now that they were in one of the keenest contests of the year. Visitors were very favorably impressed with the exhibit, not so much from its magnitude as from the excellence displayed in the individuals. One hundred and thirty entries were made and nearly all reported on hand. Professor Rutherford, of Manitoba Agricultural College, worked carefully and found many stubborn problems to solve which he did in a very satisfactory manner. Val's Rosegay, the first choice in the aged bull class, found about the same situation to meet as at last year's contest. In place of the rival that crowded him hard at that time a new one appeared last week in Jim Delaney, standing third in 1905. These two have in fact been buffeting each other steadily for the last few months and even though the awards at Chicago are considered final for the year, each sire is undefeated in the minds of their admirers. P. J. Donohoe furnished the champion bull in Glenfold Thickset 2d. In the contest for grand championship he lost to Val's Rosegay. A. C. Binnie's young stock received a full share of attention and were found at the top of the lists generally, which again proves the worth of their noted sire, Heaster Lad of Emerson 2d. In the produce of cow a strong combination was brought out in Jim Delaney and Fitz Enterprise out of the cow, Corda 15630. The latter was owned at the time by H. M. Brown, of Ohio. Those who came with herds follow in alphabetical order: O. E. Battles, Maquoketa, Iowa (5 head); H. M. Brown, Hillsboro, Ohio (8 head); D. Bradfute & Son, Cedarville, Ohio (10 head); A. C. Binnie, Alta, Iowa (12 head); H. L. Cantine, Quimby, Iowa (6 head); P. J. Donohoe, Holbrook, Iowa (10 head); W. N. Foster, Stone Bluff, Ind. (10 head); H. J. Hess, Waterloo, Iowa (8 head); Geo. Kitchen, Jr., Gower, Mo. (8 head); J. B. Kurt, Bellevue, Iowa (4 head); W. J. Miller, Newton, Iowa (15 head); W. A. McHenry, Denison, Iowa (12 head); F. L. Sullivan, Atton, Iowa (5 head).

AGED BULL.

First, Sullivan on Val's Rosegay 63745.
Second, Binnie on Jim Delaney 62767.
Third, Herendun on Khartoum of Ballindalloch 96807.

Fourth, McHenry on Baden Lad 61883.

Fifth, Cantine on Edward R. 61744.

You needn't figure on roof-repairs when you use asphalt for the waterproofing.

Genasco Ready Roofing is made of Trinidad Lake Asphalt, the permanent natural waterproofer. Rain and snow do not affect it; summer suns do not dry up or melt it; winter cold does not crack it. Genasco does not go to pieces the way coal-tar and other substitute roofings do, but protects your property for years without requiring the slightest attention.

Several weights; smooth or mineral surface.

Easy to apply. Ask your dealer for Genasco Ready Roofing.

Write today for Book N and samples.

THE BARBER ASPHALT PAVING COMPANY

Largest producers of asphalt in the world
PHILADELPHIA

New York San Francisco Chicago

Sixth, Miller on Black Prince of Estill 33626.

Seventh, Daughner on Blackset 54462

There were three strong numbers for first in this class. However, the contest soon settled on the two bulls which have been the common talk of the fall fairs among the admirers of this famous polled breed. For type and style Binnie's entry was the most in favor, while for extreme utility of conformation from a beef standpoint the bull brought out by Sullivan has seldom had an equal. He is wide from end to end and right near the ground, while he is much less striking in type and style than his adversary, he is none the less masculine and of strong bull character. An imported bull found third, and for scale he had all competitors worsted, but hardly suited the judges on type, lacking somewhat of that close-made, compactly-put-up conformation represented by first and second choice. Baden Lad was a strong candidate for his position and is a very splendid type of heavy-meated, massive farm, carry great rounds, but not so strong in his middle.

TWO-YEAR-OLDS.

First, Donohoe on Morning Star 2d 75716.

Second, Kitchen on Louis of Meadow Brook 72459.

Third, Miller on McDonald's Lad 66952.

Fourth, Hess on Birtley of Quietdale 71646.

Fifth, Battles on Brookside Fame 73640.

Sixth, Foster on Eraste 2d 78634.

This was another class of quality with the same number of entries, all of which are given, as in the former class. First choice was made quite easily as he represents an admirable type of low-set, well-balanced thick form. Second is not so pleasing in his lines and quality, which made it possible for third to crowd him, leaving the field open to fourth without competition from this source.

SENIOR YEARLINGS.

First, Kitchen on Melbert 2d 84196.

Second, Allaud on Newton King Dodo 81603.

Third, Foster on Echoito 83734.

Fourth, Kerr on Black Major K. 78131.

Fifth, Miller on Belshazzar 2d 83909.

Sixth, Melvin on Black Joe of Rubicon 86215.

JUNIOR YEARLINGS.

First, Donohoe on Glenfold Thickset 2d 88142.

Second, McHenry on Star of Denison 82426.

Third, Hess on Eglamour of Quietdale 82111.

Fourth, Brown on Wells Highlander 80963.

Fifth, Bradfute & Son on Alden of Meadow Brook 84615.

Sixth, Binnie on Elmar Lad 84122.

Seventh, Miller on King Donald 80599.

Eighth, Cantine on Borama 85747.

Glenfold Thickset put up the show in this class that won for him the junior championship. He has the essentials of a good bull well displayed in his fine character and blocky proportions. Many predicted this place for the champion at many fall fairs. Next him was a plainer fellow in style and conformation, though of good scale. Hess followed with a fairly good yearling, while fourth went to an Ohio bull very nearly a match for him.

SENIOR BULL CALF.

First, Sullivan on Beau Ito 84175.

Second, Brown on Fitz Enterprise 86293.

Third, Off on Quaint Fellow 94277.

Fourth, McHenry on Prince Pico 93306.

Fifth, Kurt on Golden Gleam 93256.

Sixth, Bradfute & Son on Leroy 3d of Meadow Brook 95635.

Ten entered this contest and the awarding talent soon found in Beau Ito a strong number for the top. He is by Prince Ito 50006 and has a very promising future. Next him stood a smooth youngster sold to the Minnesota Agricultural College. Next in order came Quaint Fellow and here he exchanged places with Beau Ito, the order in which the two ranked at Kansas City in October. Prince Pico held his place easily and some would have had him promoted, as his neat blocky-type is quite taking.

JUNIOR BULL CALF.

First, Withers on Dalgamo 94796.

Second, Binnie on Even Lad 95008.

Third, McLachlan & Johnson on Sweetheart's Pride 2d 95568.

Fourth, McHenry on Blackbird Barney 93324.

Fifth, Kitchen on Mayor of Oakland 94308.

Sixth, Battles on Black Gaylawn 91941.

AGED COW.

First, Binnie on Gussie of Kirkbridge 64008.

Second, Donohoe on Blackbird Favorite 2d 59234.

Third, Miller on Snowflake 2d of Kirkbridge 64016.

Fourth, McHenry on Glenfold Rose 63489.

Fifth, Hess on Cressida of Home View 66354.

Sixth, Kurt on Barbara of Woodlawn 2d 49584.

Seventh, Kitchen on Mina of Alta 3d 33539.

A type of graceful, full-made female with silken quality has yet to be found to equal the first named selection. Still a very close approach to her was to be seen in the second selection, though of more scale, but less of stylish appearance. Third pick, a half sister to the first choice and sired by Lotterer 63959, was two places above the one just above her at the Royal. Still further rearrangement placed Glenfold Rose a notch lower than at the same place, which tells the reader better than description the even excellence of the three after first choice.

TWO-YEAR-OLDS.

First, Donohoe on Eileen Lass 73102.

Second, Bradfute & Son on Winnie of Meadow Brook 72461.

Third, Binnie on Mina of Alta 5th 73111.

Fourth, Donohoe on Pride of Clover Leaf 73969.

Fifth, McHenry on Barbara McHenry 18th 71677.

Sixth, Bradfute & Son on Twill of Meadow Brook 724460.

Seventh, Hess on Pride of Fashion 68592.

Eighth, Battles on Marguerite D. 72307.

Eileen Lass, which later proved to be the champion female, is a wonderfully full made block of a cow. This is the first impression she gives one. Her character is not as sweet and refined as some others, but nothing serious enough to be faulted. The second place fell to a heifer older by eight months, and with more scale, though far from being as balanced. Third went to a very well developed heifer in Mina of Alta with lots of

Classified Advertisements

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted under this heading. Each number and initial letter or abbreviation counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 165,000, reaching a farm population of at least 825,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

PLYMOUTH ROCKS.

EVERGREEN Lawn Farm, M. Hummel, prop., Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, has for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize-winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

KEEP your hands warm with a pair of Russian Bear fur gloves or mittens. Sold direct to the wearer at wholesale prices. Write today for catalog. Russian Fur Co., Gloversville, N. Y.

PRIDDY'S Patron's Milk Record presents misunderstandings when selling. Samples free. Show your creameryman. W. N. Priddy, Box B, Bloomer, Wis.

Binnie has a hard pair to beat in the two top ones and the two heifers have been out in many different places this fall. It was no reproach for third choice to be beaten here even if the decision at the Royal had put her above both, for the three had each many admirers in the ringside. Hess slipped up to fourth here with a very deserving female while fifth was secured by Sullivan with a heifer sired by Prince Ito.

JUNIOR YEARLINGS.

First, Donohoe on Brookside Pride 4th 93254.

Second, Sullivan on Eolau 90699.

Fourth, McHenry on produce of Privet of Careston.
Fifth, Foster on produce of Erica of Heatherton.

GALLOWAYS.

While perhaps some of the best herds of this breed were not at the great show on the lake front last week, their places were well filled by others that have made this breed the talk of many show rings this fall. The two judges, Professor Dinsmore, of Ames, Iowa, and Judge Ewing, of Youngstown, Ohio, rendered careful decisions that were received quite favorably by onlookers and exhibitors. True, in some of the classes the difference in entries was hardly perceptible to many and some rearrangement of former decisions was inevitable. In the aged bulls Pat Ryan of Red Cloud was unquestionably the favorite and continued so until he received the highest honor of the show. While second in place has many claims for excellence, many of his strong points are overshadowed beside the noted veteran of many contests Bales & Son filled the next two places with bulls that will help to bring the breed to the front. Only one two-year-old ventured out, though his ribbon was won with credit, as he would have been a bull to be reckoned with in good company. The two-year-old cows supplied the senior champion a heavy, well-spread form of a female with not quite so much sweetness of character as was seen in some of her companions. A strong rivalry existed in the herd classes, especially the aged one where from the previous standings various ratings could be figured. Not a great mistake could have been made in placing the blue and red, although each

THE HAWKEYE Grain Grader and Cleaner

BUILT EXPRESSLY
FOR FARMERS

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.
It will clean and grade seed wheat.
It will clean and grade seed oats.
It will separate oats from wheat.
It will separate timothy from clover.
In short, it will do any work required of a fanning mill and grade seed grains besides.

If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by
PARSONS HAWKEYE MFG. COMPANY,
NEWTON, IOWA.

Just Ask for Our Special Price on this CHATHAM Fanning Mill

Our answer will be a genuine surprise to you. Why? Well, there will be a whole package of surprises, but the biggest ones are these:

First, the low price that we will quote you.
Second, the easy terms on which we will let you pay for the mill.

As a matter of fact, the Chatham Fanning Mill is a continual source of surprise to every man who buys it, for it does so many more things than we mention in our advertising and does them so well.

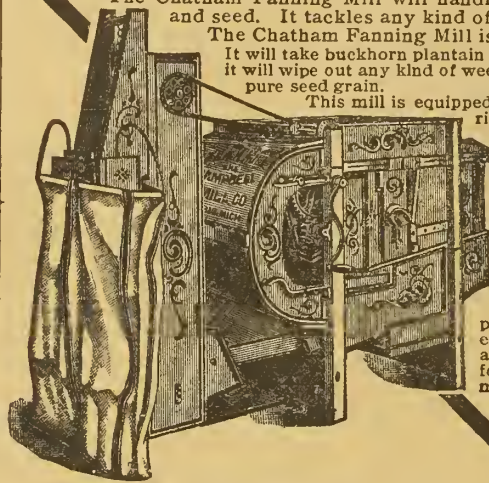

Now, this mill will actually clean, separate and grade (yes, sir, we said *grade*, and we mean it!) from 40 to 80 bushels per hour. Its *capacity* is wonderful, its *ease of operation* is remarkable, its all-around *usefulness* and its importance as a *profit-maker* makes its owner wonder how he ever got along at all without a Chatham.

The Chatham Fanning Mill will handle all kinds of grain and seed. It tackles any kind of a job.

It will take buckhorn plantain out of clover—in fact, it will wipe out any kind of weed pest by giving you pure seed grain.

This mill is equipped with 17 screens and riddles. It has a patent bagging attachment which saves one man's time. It's got more special features than we have space even to name here. They're *practical*—every one of them!

Our idea, in building the Chatham, is to make it so complete and perfect that each mill sold will be a big advertisement for us and bring us more orders.

In other words, we let the mill sell itself. We will ship you a Chatham Fanning Mill on

30 Days' Free Trial Freight Prepaid

no matter where you live. You can have the use of it all that time, *free*, while you are making up your mind whether to buy it or not. If it doesn't do all we say it will, send it back at our expense.

We're not going to let you keep it if it doesn't do the work and do it *right*! Selling Fanning Mills on the plan we do—direct from our factory to the actual user—the *very life of our business depends upon the satisfactory working of the mills we put out*.

So we just leave the whole question for you to decide.

All we ask is that you *try* the Chatham. Let it *prove itself*. Let it show you what it can do—how it can quickly put its own cost back in your pocket and make a profit for you. The Chatham Fanning Mill isn't a luxury. It's a necessity! You need it right on your farm and you need it NOW!

Chatham Book Free!

Send for it.

It tells of over 100 ways to increase farm profits. Tells how to stop the losses and make every cultivated acre on your farm yield crops in abundance. It is a regular Bureau of Free Information on Grain, Breeding, Planting and Seeding. It talks right out. Tells the very things every farmer wants to know, in a mighty sensible, interesting way. Get it. Read it. Profit by it.

It will be sent promptly, postage paid, if you just ask for it on a postal card. If you live west of the Mississippi, write our Topeka office; if east, write to Detroit.

THE MANSON CAMPBELL CO., Ltd.

Fourth, Bales & Son on Bonnie McDougall 28812.
Fifth, Brown & Son, on Forester 28936.
Sixth, Craymer on Grandee of Rivers 28774.

AGED COWS.

First, Lindsey on Favorite 16th of Lockin-kit 21205.
Second, Clarke on Nora of Durhamhill 21203.
Third, Bales & Son on Imp. Graceful 3d of Garliestown 19297.

Fourth, Brown & Son on Acushla 18386.
The type of cow in first is one that is making a name for the breed. She is just about as low and blocky, and fills the eye as well, as any female at the show, while her matronly character at once makes friends for her on all sides. Size was a deficient point in next selection, though strout lines and a symmetrical contour smoothly finished won the heart of the judges. A lively little baby curly coat at foot of third enlivened the dignity of the surroundings, while the mother made a good showing of her thick type carried low and with much attractiveness. Lack of pounds was no failing in fourth, for she had several hundred in her favor. How-

ever, her covering was not placed to the best advantage.

TWO-YEAR-OLDS.

First, Brown & Son on Myrtle of Avondale 24942.
Second, Clarke on Saucy of Meadow Lawn 24818.
Third, Lindsey on Lady Charlotte 24814.
Fourth, Bales & Son on Annie Davids 5th 26977.

SENIOR YEARLING.

PRODUCE OF COW.

First, Clarke on produce of Saucy 3d of Kilquhanity 21209.
Second, Bales & Son on Annie Davids 2d.
Third, Brown & Son on Dalnty of Waver-tree.
Fourth, Craymer on Lula 6472.

RED POLLS.

For a breed of animals in which there is such a good chance for lack of uniformity, the display of this dual-purpose class was surprisingly good and indicated a growing popularity among a certain class of stockmen. Only once this season was a better showing made—that at Springfield. Professor Plumb, of Ohio, found a difficult task on hand in placing the awards. It is safe to say that in no breed on the fair circuit today can there be found such a variance in the findings of different judges. We are not placing blame on anyone. However, there should be an effort made in the future to avoid as much unpleasantness in the showing as possible. Everyone knows the difficulty there is encountered in describing an ideal form for the breed. This obstacle has led some to unreasonably assert that the dual-purpose idea is a myth. Let the Red Polled breeders gather their forces and disprove such a claim by fostering more harmony in future contests. Herds came from five states, though Ohio proved the winner of the most ribbons at the final rating. All the championships went to one breeder. Indications of the highest type of utility were marked in the cows that took ribbons. In the bulls it was a different matter and some individuals of the best breeding from this standpoint were not recognized. Hence the difficulty of making consistent decisions. Next year a dairy test has been suggested and it is hoped will materialize. It should prove a good innovation. Those who entered the contest are Adolph P. Arp, Eldridge, Iowa (17 head); George B. Buck & Co., Orion, Ill. (14 head); Borden Stock Farm, Tonti, Ill. (16 head); Herbert S. Garmon, Adeline, Ill. (11 head); F. H. Hawley, LeRor, Ohio (11 head); Frank Hartline, Strasburg, Ohio (8 head); Joseph Kestil, New Lenox, Ill. (10 head); J. Shimmer, Wausau, Wis. (12 head). The awards:

AGED BULLS.

First, Buck & Co. on King George 7279.
Second, Kestil on Monarch 11941.
Third, Buck & Co. on Money Maker 11944.
Fourth, Garmon on Bounce 11287.
Fifth, Hartline on Patriarch Jr. 12009.
Sixth, Arp on Nailer 7396.

First choice is a well-made, masculine fellow, near the ground and he fills the eye well. A somewhat plainer bull followed, though of desirable character. Third was very taking from a side view, but inspection from other positions proved less favorable to this bull. It was generally considered a class representative of the best in the breed.

TWO-YEAR-OLDS.

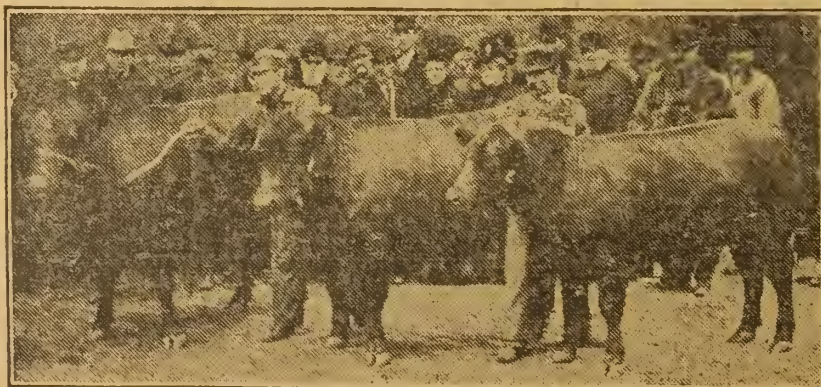

First, Hawley on Water Boy 12735.
Second, Borden Stock Farm on Nefod 12699.
Third, J. Shimmer on Dare 13485.

YEARLINGS.

First, Hawley on Dasher 13481.
Second, Kestil on Show Boy 15368.
Third, Kestil on Rube 15369.
Fourth, Hartline on January 14613.
Fifth, Buck & Co. on Linder 14166.

BULL CALF.

First, Kestil on Bruce 15625.
Second, Buck & Co. on Rambler 14607.
Third, Arp on Nailer Again 15337.
Fourth, Borden Stock Farm on Poplar 3d 14227.

Grand Champion Steer Herd, owned by Minnesota Agricultural College.

Fifth, Borden Stock Farm on Broken Tail 14677.

AGED COWS.

First, Hawley on Jessie 19812.
Second, Slimmer on Miss Brown 15442.
Third, Arp on Nanny 20180.
Fourth, Hartline on Celia 18033.
Fifth, Borden Stock Farm on Glemoir 3d 21261.

A long string of females made this a difficult and slow class to place. Large udders were not uncommon and their owners found a royal road to the top of the list. First choice was good in her width, but showed less of the smooth contour of those next her. Some good ones were overlooked along the line. A few of these were deficient in that important essential, constitutional vigor, which accounted for their not being placed.

TWO-YEAR-OLDS.

First, Kestil on Davy Belle 3d 22558.
Second, Borden Stock Farm on Aleda Lass 22528.
Third, Arp on Laura's Perfection 3d 24125.
Fourth, Hawley on Pert 4th 21826.
Fifth, Slimmer, on Duke's Parthenope 23777.

As usual, this class brought out some uniformly straight lined helpers. The first prize displayed these qualities well and was a very attractive heifer, though in those next her there were a trifle better indications for doing well at the pail.

Senior Champion Bull—Water Boy.
Junior Champion Bull—Dasher.
Senior Champion Cow—Jessie.
Junior Champion Heifer—Rosalind.

AGED HERD.

First, Hawley.
Second, Borden Stock Farm.
Third, Slimmer.
Fourth, Kestil.
Fifth, Arp.

YOUNG HERD.

First, Hawley.
Second, Borden Stock Farm.
Third, Buck & Co.
Fourth, Garmon.
Fifth, Slimmer.

YEARLINGS.

First, Hawley on Louisiana 24025.
Second, Borden Stock Farm on Ultrada 7th 24099.
Third, same on Marion Charlotte 24101.
Fourth, Garmon on Violet 24537.
Fifth, Borden Stock Farm on Juliette 3d.

HEIFER CALF.

First, Hawley on Rosalind 25805.
Second, Hawley on Pretty Lassie.
Third, Borden Stock Farm on Charlotte 2d 25913.

Fourth, same on Diantha 24477.
Fifth, same on Juliette 4th 25099.

PRODUCE OF COW.

First, Borden Stock Farm on produce of Charlotte 12109.
Second, Kestil on produce of Leola 18489.
Third, Borden Stock Farm.
Fourth, Arp on produce of Laura Paulina.
Fifth, Slimmer on produce of Parthenope F.

GET OF SIRE.

First, Borden Stock Farm on get of Pochto 12042.
Second, Hawley on get of Eclipse 9220.
Third, Kestil on get of Irwin 8253.
Fourth, Garmon on get of Bounce 11287.
Fifth, Slimmer on get of May Duke 8th.

FAT STEERS.

SHORT-HORNS.

The Short-horn show in the fat classes was a poor representation of the utility of this breed for beef purposes. However, a Short-horn stood in the line up for the grand championship steers prize, making him one of the best three on the ground. Competition was

only fair in any of the classes and the work of judging in the hands of the committee, J. H. Miller, Wiley Hall and John Lewis, passed without any features of note extraordinary. In the two-year-old class, Tim, of the Kansas Experiment Station, won first quite easily. In finish and depth of flesh and handling he was rather more medium than extreme. However, a good conformation made him a splendid all round animal and when he failed to be made champion of the breed, many were disappointed. In this race he was outstripped by Sleepy Lad, nine months younger but lacking only a few pounds his weight. The champion was a meaty fellow notably on ribs, but the evenness of his covering could have been considerably improved. Sixteen entries lined up in the yearling class and among the winners were some of the best in the breed. Second choice lacked 200 pounds the equal of the first, yet was of the same age. In the class under one year weights ran well and many crowded the thousand-pound mark. The two top ones were picked with no difficulty and between them there was some discussion for rank, as the second choice was a much larger steer. Money was distributed in the following order:

TWO-YEAR-OLDS.

First, Kansas Experiment Station on Tim.
Second, J. D. Douglas & Son on Juniper.
Third, Abram Renick on Ensign.
Fourth, J. R. Peak & Son, on Sunray.
Fifth, C. S. Barclay & Sons on My Choice.

YEARLINGS.

First, J. G. Robbins & Son on Sleepy Lad.
Second, University of Nebraska on Valet.
Third, Abram Renick on My Hope.
Fourth, Kansas Experiment Station on Captain Primrose.
Fifth, C. F. Rice on Sangamo.

UNDER ONE YEAR.

First, E. W. Bowen on Will Wild Eyes.
Second, J. G. Robbins & Son on Silver Cloud.
Third, Purdue University on Match Maker.
Fourth, Abram Renick on Amaranth.
Fifth, J. G. Robbins & Sons on Splasher.

CHAMPION STEER.

Sleepy Lad.

LOT OF THREE HEAD.

First, J. G. Robbins & Son.
Second, Kansas Experiment Station.
Third, Abram Renick.
Fourth, C. F. Rice.
Fifth, J. R. Peak & Son.

HEREFORDS.

The white faces were out in small numbers, but they were eyed from the start. It was generally thought that this breed would supply the grand champion, though from the two-year-olds rather than from the calf class, as was the case. The winning youngster, Peerless Wilton's 39th Defender, made good his name and his selection was accepted in good part by all exhibitors, although he is the first calf to win this great honor. In conformation the champion approaches the ideal very closely and there were good judges who looked him over and failed to fault him. At eleven months he shaves the half ton closely, and carries his flesh in the right place. He has two good ends and these are well joined, and though but a calf he was not vealy, but was beef. His owner, F. A. Nave, Attica, Ind., was the recipient of showers of congratulations and justly so. Another good steer was General Manager, first in the two-year-olds, shown by the Iowa Agricultural College. His frame is inlaid with sufficient flesh, though he is not a high-class handler, a point more or less characteristic of the Perfection breeding. Aside from being a bit too narrow behind he filled the eye well and made a good bid for the highest honors. He was bred and fitted by H. J. Fluck, Goodenow, Ill., but recently sold to Mr. Nave. W. S. Van Natta, Fowler,

Saves You 50%

30 Days Free Trial

Wagon Box Manure Spreader

\$59.50 Freight Prepaid

Guaranteed and Backed by a \$25000.00 Bond
FITS ANY TRUCK.

Miller Testimonial Letter.

I have thoroughly tried your two horse spreader. Have hauled over 300 loads of manure of all kinds and it did the business to a queen's taste. It has caused no trouble whatever. My 13 year old boy used it without any trouble. I am recommending it to my neighbors and friends. I thought all spreaders were troublesome but you have changed my mind.

LEWIS MILLER.

No spreader made a third as simple as the Galloway. But one operating lever. Many new features such as our endless apron conveyor, solid bottom box and double chain drive.

We positively guarantee the Galloway to handle any kind of manure.

Sold direct to the buyer without one cent paid to us in advance. We pay the freight and save you 50%.

My Spreader Booklet tells you all about this New Spreader—for every farmer. I want you to read in it what my customers think of it; and some interesting things about the future of your land in fertilization. It's free.

Just write me personally a letter or postal.

WILLIAM GALLOWAY, President,
WILLIAM GALLOWAY COMPANY,
108 Jefferson St., Waterloo, Iowa.

Write your name and address plainly on this Ad., cut it out and send it to me.

William Galloway,
Builder of the Only Wagon
Box Spreader called the
"Galloway."

SOLD direct from my factory to you.
Built on honor.
Not how cheap but how good, is my motto.

After I have made them as good as I can, then I make the price as low as I can.

A spreader for \$59.50.

A spreader that I personally guarantee to work as well or better than any other spreader on the market to-day.

My guarantee is the broadest possible—and backed up by a \$25,000 legal bond.

To show you my confidence I will send you one, you take it out in the field and use it, or abuse it if you want to, for 30 days, and if you don't find it worth more than the \$59.50 I ask for it, just take it back to the depot and ship it back to me. I will pay the freight both ways. You can try it for nothing—and at no risk.

My free trial plan is such that you don't have to send me one cent in advance. You get my plan when you get my booklet.

I save you over one half the price you would have to pay for any other spreader as you use your own wagon truck. Why tie up \$65 in a spreader truck, useless 11 months in the year?

An important feature of the Galloway Spreader is its light draft. Two horses will haul it. Read what Mr. Miller says about it.

Ind.; Thos. Mortimer, Madison, Neb., and Thos. Clark, Beecher, Ill., placed the classes to the general satisfaction of all.

TWO-YEAR-OLDS.

First, Iowa State College on General Manager 176624.
Second, F. A. Nave on Ambassador 2d.
Third, Cargill & McMillan on Roundup 186699.
Fourth, Benj. & W. George on Georgetta 1st 184994.

YEARLINGS.

First, F. A. Nave.

Second, Cargill & McMillan.

CHAMPION STEER.

Peerless Wilton's 39th Defender.

ABERDEEN-ANGUS.

The blacks were quite a prominent part of the fat classes, as they always are. While they came out in fair numbers and presented some very neat, well-finished models for the eye of the critics, there were also not a few that fell below the highly-creditable line. Louis Praelzer, of Chicago, made the awards and some could hardly accord with the ratings as given. However, the "hand" in many cases revealed to critics some of the mistakes of the eye. In the mature class nine came forth and produced a first in a steer from Minnesota, a large, growthy fellow none too high in quality, but covered with a good, even thickness of flesh over all. For second place there were many that favored either of

The Champion Steer and the judge who picked him.

two. Forest Mill Dot stood very poorly and seemed none too well fitted. The second class was very uneven in general characteristics and was not the best kind of an Angus display, though this class supplied the reserve champion steer shown by the Minnesota Agricultural College. Those under a year left a good impression, for three very splendid types fitted accordingly, kept interest centered around them for some time. Of the trio it was generally felt that Syberian 3d was the least appreciated. A very trim, tidy fellow was he, of an early-maturing sort and perhaps would have lacked some in weight with age to make the best impression. The awards follow:

TWO-YEAR-OLDS.

First, Minnesota Agricultural College on Black Jack 1342.
Second, Ohio Agricultural College on Forest Mill Dot.
Third, W. J. Miller on Dutch Lad.
Fourth, University of Nebraska on Ruby Zenoleum.
Fifth, Chas. J. Off on Exilio.

YEARLINGS.

First, Minnesota Agricultural College on Andy.
Second, M. J. & S. E. Lantz on Syberian 2d.
Third, W. J. Miller on South Oak Chance.
Fourth, Chas. J. Off on Proud Fellow.

UNDER ONE YEAR.

First, Kansas Experiment Station on Ideal.
Second, Minnesota Agricultural College on Blaylock 1414.
Third, M. P. & S. E. Lantz on Syberian 3d 1434.
Fourth, Chas. J. Off on Edison 1446.

One of the best daughters of the Iowa Agricultural College bull, Scotland's Crown, to be sold in the G. W. Harrison sale, at Washta, Iowa, December 18th.

Victoria Crown.

Dark roan; calved July 30, 1904. (Vol. 64.) Bred by F. E. Mattoon, Washta, Iowa.

Third, M. P. & S. E. Lantz.
Fourth, W. J. Miller.
Fifth, A. C. Binnie.

GALLOWAYS.

The curly coats upheld their end of the fat stock show in a very creditable manner. Entries were generally uniform in excellence and indicated that breeders had been more careful in the fitting of their charges than in some other cases. The best steer proved to be a two-year-old crowding the 1,600-pound mark and carrying a great deal of flesh well placed. Owing to the small classes the work of judging in the hands of Judge J. Calvin Ewing proved not a tedious task. The results stand viz.:

TWO-YEAR-OLDS.

First, Ohio State College on Roger of Brookside 23340.
Second, C. E. Clarke on Royal Chancellor 24283.
Third, Minnesota Agricultural College on Black Joe.
Fourth, C. S. Hechtner on Hechtner's 1st.

CHAMPION.

Roger of Brookside.

LOT OF THREE HEAD.

First, C. E. Clarke.
Second, J. E. Bales & Son.
Third, C. S. Hechtner.

RED POLLS.

Professor Plumb, of Ohio, passed on this breed and although there were but two exhibitors, the showing was interesting in that it was an object lesson on support of the claim for beef that the adherents of this breed make. F. B. Turnbull, Cedarville, Ohio, took the major part of the ribbons and furnished the champion, while Adolph P. Arp, Elridge, Iowa, was a close second in all places.

POLLED DURHAMS.

Prof. Thos. Shaw, of St. Anthony Park, Minn., made the awards, which were about equally divided between Fletcher S. Hines, W. Clarke, Oscar Hadley and Shaver & Deuker, the first named exhibitor giving the champion, Solidity's Knight.

GRADES AND CROSS-BREDS.

The entries in these classes are defined as a "grade," an animal having but a portion of pure blood or the get of a pure-bred bull from a native cow. A "cross-bred" means one whose sire and dam are of pure blood but of different breeds.

TWO-YEAR-OLDS.

First, Kansas Agricultural College on Kansas Laddie.
Second, North Dakota Agricultural College on Boh.
Third, G. H. Hoxie on Thorn Creek Exchange.
Fourth, W. J. Miller on Wild Tom.
Fifth, Iowa State College on Black Prince.

CHAMPION LOT OF THREE.

To Minnesota Agricultural College.

GRAND CHAMPION STEER CLASS.

The call for this class brought out the two-year-old Short-horn steer, Tim, shown by the Kansas Agricultural College; the yearling Angus, Andy, shown by the Minnesota Agricultural College, and the Hereford calf, Peerless Wilton's 39th Defender, bred and fitted by H. J. Fluck, of Goodenow, Ill., but shown by F. A. Nave, of Attica, Ind.—all purebreds. The judge, Arthur Philip Turner, of Herefordshire, England, found his ideal in his own breed—the white faces—but in picking the calf pleased the great bulk of on-lookers. The Kansas steer was thirty-four months old and weighed 1,800 pounds. For his weight he was a smooth one and brought the Short-horns nearer to the championship goal than this breed has ever landed at the International. The yearling steer, Andy, shown by the Minnesota Agricultural College, was a winning calf in the hands of Stanley Pierce in 1905 and he came back this year showing excellent fitting at the hands of Georgie Craig. He is an exceedingly trim steer, is well fleshed and his covering is even. The college is taking him home and he is the kind that will go on for another year. But the calf, Peerless Wilton's 39th Defender, was too many for the yearling

Short-horn Steer Herd, shown by Kansas Agricultural College.

and two-year-old. At eleven months this calf shaved the half ton mark closely, but without question was the kind you read about. He had scale enough for his age and a most satisfying covering for a youngster. The strange part of it was that he did not handle vealy, but was indeed "beef." A calf never won this great honor before, so that Judge Turner established a precedent; but, as we understand it, there is no reason why precedents cannot be established at the International as well as elsewhere. It was merely coincidental that the foreign judge should find a winner in his own breed, but his decision met with the approval of the great majority of ringsiders. This notable Hereford was sired by Peerless Wilton's 39th 90610, out of White Rose 61284.

Let Me Quote You a Price on the AMERICAN Manure Spreader

30 Days' FREE Trial

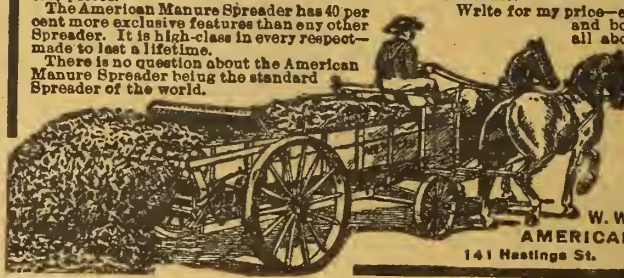

We manufacture and sell the celebrated American Manure Spreader to the consumer direct from our factory—saving all the middle profits made by jobbers and dealers. These profits are left out of consideration in the prices that I want to make you direct from our factory on an American Manure Spreader.

This means that you can buy from our factory at factory prices—be a Wholesale Buyer. And that isn't all! We don't ask you to pay cash in advance.

We sell the American Manure Spreader on Time—

liberal time payments—giving our customers easy terms to pay for their Spreaders—letting the Spreaders really pay for themselves as it earns for you. We are the only concern in the United States manufacturing and selling Manure Spreaders direct to the user on time and on trial at low factory prices.

The American Manure Spreader has 40 per cent more exclusive features than any other Spreader. It is high-class in every respect—made to last a lifetime. There is no question about the American Manure Spreader being the standard Spreader of the world.

To prove all of our claims for the celebrated American Manure Spreader, we allow 30 days' trial on every Spreader we sell.

This permits the customer to use the Spreader on his own farm for a full month to be satisfied that it is just as represented. If not as represented it can be returned to us. We pay all freight both ways—trial being FREE.

The low price I want to quote you on an American Manure Spreader will be for the Spreader delivered at your station.

We Pay All Freight

This price will be for the Spreader on time—this price will be for the Spreader on trial—and this price will be a price that is lower than dealers are charging for Spreaders that are not nearly so good as the American. When you examine all the exclusive features of the American you will agree with me.

Write for my price—and write for my catalogue and book. They will tell you all about the American Manure Spreader and give you a lot of good information on the question of fertilizing—a question that every farmer is interested in and wants to know all about. Just write me today on a postal card. I will see that you get our book and my special price at once.

HORSES.

PERCHERONS.

The Percheron judging was arranged just like a good story, where the reader is kept in suspense all of the time until the end of the tale. Tuesday morning the exhibitors brought into the ring their aged stallions, according to custom, but for some reason they were ordered back and calls sent out for the aged mare class. This caused no little delay in the work, but brought out some good mares as starters. There was one peculiarity of the exhibit in these classes and that was the comparative absence of the grays and dapples. Only two mares, and but a few more stallions, were other than the glossy black. This most excellent breed continues to enjoy its great popularity among users of draft horses, as was proven by the numbers who witnessed the judging and by the denseness of the throng in the Percheron stables. That they must be popular is also attested by the large number of excellent entries shown. In the mare classes only a few were shown, but some great mares were brought out. It would benefit American breeders if more mares were exhibited at the various fairs and expositions. The champion mare is an American-bred animal and won over an imported mare. Some exceptionally strong stallion classes came before Judge C. F. Curtiss, of Ames, and gave him all the work he cared for. Especially in the aged and three-year-old classes were the entries of an unusually high class and Professor Curtiss did some very creditable work in these two rings. The more fortunate exhibitors were McLaughlin Bros. in the stallion classes and McMillan in the mare and home-bred classes. Lew Cochran showed a high-class stallion of his own breeding that compared very favorably with older imported animals. The foal classes deserve especial notice for the good quality of the little fellows shown: Exhibitors: Robert Burgess & Son, Wenona, Ill. (9 head); H. A. Briggs, Elkhorn, Wis. (10 head); Lew W. Cochran, Crawfordville, Ind. (6 head); J. Crouch & Son, Lafayette, Ind. (19 head); William Crownover, Hudson, Iowa (5 head); C. B. Dunbar, Darlington, Ind. (1 head); Dunham & Fletcher, Wayne, Ill. (21 head); Finch Bros., Verona and Joliet, Ill. (4 head); J. A. Gifford, Beloit, Kan. (1 head); Mag-

Reserve Champion Steer, Andy, owned by Minnesota Agricultural College.

nuson & Cutler, Lockport, Ill. (1 head); Lonzo McClain, Lima, Ohio. (8 head); McLaughlin Bros., Columbus, Ohio (21 head); H. G. McMillan, Cedar Rapids, Iowa (10 head); Niles & Hough, Crown Point, Ind. (7 head); Oltmanns Bros., Watsoka, Ill. (9 head); A. M. Storm & Son, New Lenox, Ill. (9 head); W. C. & W. B. Straight, Keosauqua, Iowa (1 head). The awards:

AGED MARES.

First, Dunham & Fletcher on Fosette (45225).
Second, Lonzo McClain on Rose (50734).
It was the winner here which attracted the attention, being a large, strongly-made mare, with lots of breediness of character and excellent limbs. Her feet are not all that could be expected, but are not at all bad.

THREE-YEAR-OLD MARES.

First, McMillan on Iolanthe (40925).
Second, Dunham & Fletcher on Britomart (40427).
Third, McMillan on Antoinette (40922).
Three good mares made up the three-year-old class. Iolanthe, by Calypso, bred on the farm of H. G. McMillan, had no trouble in carrying away the blue from Dunham & Fletcher's Britomart, a Picador colt, which is not so massive and lacks just a little in substance as compared with Iolanthe. Another good Calypso colt stood third.

TWO-YEAR-OLD MARES.

First and second, McMillan on Adrienne 45565 and Rosamond 45547, respectively. Here again old Calypso demonstrated his value as a sire, for these two fillies are good ones and would have stood well against strong competition.

YEARLING MARES.

First, Dunham & Fletcher on Pink Coral.
Second, McMillan on Lucia.
Pink Coral is a roan of exceptional character, and she also carries the requisite bone and feet, while Lucia is not quite so drafty.

AGED STALLIONS.

First, McLaughlin Bros. on Etrageant.
Second, Dunham & Fletcher on Pink.
Third, McLaughlin Bros. on Sam.
Fourth, Briggs on Sansonnet.
Fifth, Crouch & Son on Conde.
The competition among the aged Percheron stallions was the keenest sort. Only twelve entries came into the ring, but they were twelve good ones. The battle for first honors was close between McLaughlin's four-year-old Etrageant, winner all around the fall circuit, and the twice champion, Pink. Pink, in his six-year-old form, has lost none of his attractiveness and has matured into a wonderfully smooth and drafty stallion. Etrageant is a dark gray, almost black, has an abundance of that flashy, vigorous action one likes so well in the Percheron. Both are horses of great character. In action, Pink did not come up to his usual standard, both at walk and at the trot, while Etrageant made more than good. The McLaughlin horse also had a hit more home, especially below the knee. Pink had plenty of friends for first place, but Etrageant continued his unbeaten record and carried away the ribbon. McLaughlin Bros. came third with a black, not possessing so much substance or so strong acting as first and second. He is a stallion far above the common lot, but had two wonders about him. For fourth place Briggs had a dark gray, of good top, but not quite so good at the ground. Conde won fifth over a bunch of good ones, but was a little leggy to go higher.

THREE-YEAR-OLD STALLIONS.

First, Dunham & Fletcher on Cartilage (59302).
Second, McLaughlin Bros. on Valseur (58964).
Third, Dunham & Fletcher on Salvator (59293).
Fourth, Crouch & Son on Minet 44897.
Fifth, McLaughlin Bros. on Presbyterian (60934).

The three-year-olds formed a splendid class, there not being one out of the eighteen which entered the ring that could be termed really poor. This with the class of two-year-olds made up a hard afternoon's work. First money went to a big black, with as showy a top as one could desire, great character about the head, a nicely-sloping shoulder and action enough for any horse. The second here, Valseur, was first at Kansas City, but didn't have Cartilage to compete against. He went

above Salvator, another Oaklawn entry, being a trifle lower set and stronger muscled at hind quarters, but not quite so heavy in his middle. Minet took the spectator's eyes in his action, but failed to find such appreciation in the eye of the judge. Presbyterian, which went fifth, is of the growthy kind that do not finish up so soon as the type at the head of the class. Several stallions of high merit were forced to return to the stables without any awards.

TWO-YEAR-OLDS.

First, McLaughlin Bros. on Dragon 41341.
Second, Crouch & Son on Eglantior 41455.
Third, Crouch & Son on Capitaine 41449.
Fourth, Dunham & Fletcher on Marquis (61842).
Fifth, Dunham & Fletcher on Argentnell (62969).

This was also a good class, being, in point of numbers, in advance of the three-year-old stallions. As to general quality it was also very good throughout. The winner of first place is a good specimen of the refined Percheron, and yet has plenty of substance, is low set and has large hard feet. He was followed by a very good horse, Eglantior, an iron gray, of the sturdy, blocky kind, standing very squarely on his legs and with feet not quite so large as the winners. He is just a little small. Third place was assigned to another Crouch entry, which when sized up with the two on their side of him seemed a little under size. His exceptionally good feet, strongly-muscled limbs, with finely-balanced action and his being lower set gave him the place over a big growthy fellow, with lots of action, and strength standing out all over him. The fifth place was well filled by another big black, not quite so drafty as the one just above him, but a strong horse. There were several in this class, also, which were hard to keep one of the money.

YEARLING STALLIONS.

First, Cochran on MacDuff 41257.
Second, Burgess & Son on Roget 45996.
Third, McMillan on Lochinvar 45546.
Fourth, Gifford on Keota Pioneer 46117.
Fifth, Dunham & Fletcher on Pink Paragon 43929.

Ten promising youngsters lined up before the judge in the yearling stallion class. MacDuff, which has won at other fairs on the fall circuit, was here allotted his rightful place, for he possesses more frame, carries more finish and has a little more strength of build than Burgess' colt which went second. This one, Roget, is a great colt, too, and gives promise of developing into a superior horse. He is more drafty in type than the third one, Lochinvar, McMillan's entry. Fourth place went to a new man, on Keota Pioneer, a colt that lacked somewhat of the snap and vigor of Lochinvar, but withal is a deserving colt.

FOUR ANIMALS GET OF ONE SIRE.

First, McMillan on get of Calypso.
Second, McLaughlin Bros. on get of Avise.
Third, Dunham & Fletcher, sire not given.
Fourth, McLaughlin Bros. on get of Den-seur.

Fifth, McClain on get of Excelsior.
This was the most interesting collection of Percherons shown in any ring. McMillan's four mares by Calypso are a splendid lot. For uniformity of type they are almost unapproachable and Mr. McMillan is surely to be congratulated on the great sire at the head of his stud. They won over some good ones, however, for McLaughlin's had five stallions, the get of Avise, that showed excellent individuality, but are not quite the uniform lot that the mares are. The five that Dunham & Fletcher brought in are worthy of good notice, but do not give one the drafty impression that the first and second winners do. The last two entries, there were five in all, are not so uniform, but had some excellent individuals among their number.

TWO ANIMALS, ANY AGE, PRODUCE OF SAME DAM.

First, McLaughlin Bros. on produce of Reseda.
Second, Dunham & Fletcher on produce of Bellone.
Third, Burgess & Son on produce of Wenona Lillie.
Fourth, McMillan on produce of Eloise.
Fifth, McLaughlin Bros. on produce of Cou-drette.

As interesting a collection of horses were shown here as in the class just preceding. Eight pairs were shown, bringing out some of the very highest class animals of the

Your year's reading at one-half price

Our readers say it is the best for the farmer and stock grower because—it is issued Weekly (52 times a year)—its Feeds and Feeding Department is the best—its Dairy and Creamery, Poultry, Live Stock, Veterinary and Farm Topics Departments cannot be excelled—its Departments for the Women and Children are most interesting and entertaining—it has more and better illustrations, and more and better special articles by practical writers than other similar publication.

Address THE TWENTIETH CENTURY FARMER, 1726 Farnam St., Omaha, Neb.

breed. It was indeed a superlative pair which won first ribbon. Etrageant and Dragon, winners in class of aged stallions and later sweepstakes stallion, and Dragon, first prize two-year-old, are a most notable pair. Cartilage, first prize three-year-old stallion and another good one, were second, and in such competition second was indeed an honorable position to hold. They were out of Bellone 50739. Several other very good pairs were shown, but were compelled to bow to their superiors that day.

CHAMPION STALLION.

Etrageant had no trouble in maintaining his position to which he has been assigned so many times this fall, and needs no further comment.

CHAMPION MARE.

Gold Medal—McMillan on Iolanthe.
Reserve—Dunham & Fletcher on Pink Coral.

This prize brought out four good mares, all of championship caliber, but McMillan's wonderful three-year-old was a good winner over Pink Coral, Dunham & Fletcher's yearling, a Pink colt which gives unusual promise of a great future. Dunham & Fletcher's old mare, Fosette, is also a mare of exceptional merit, and helped make the judging difficult. The special classes were many and offered good rewards for those competing.

SPECIAL "A"—AMERICAN-BRED STALLION FOAL UNDER ONE YEAR.

First, McClain on Victor.
Second, same on Valiant.
Third, Magnuson & Cutler on Besique.
A wonderfully chunky little fellow, of splendid muscling and character for one of his age won first, over his mate, a black of good quality, but not quite so much substance. The third entry was only an ordinary colt.

SPECIAL "B"—AMERICAN-BRED MARE, UNDER ONE YEAR.

First, Storm & Co. on Mowica.
Second, Cochran on Mishap.
Third, McClain on Rosaline.
A little black of refinement and good bone won for Storm over Cochran's Mishap, another black, with more quality, but lacking the size.

SPECIAL "C"—BEST FIVE ANIMALS BRED BY EXHIBITOR.

First, McMillan.
Second, Dunham & Fletcher.

SPECIAL "D"—BEST AMERICAN-BRED STALLION.

First, Cochran on MacDuff.
Second, McMillan.
MacDuff is a credit to the American Percheron breeding fraternity and well deserves the honor of winning the gold medal for Mr. Cochran.

SPECIAL "E"—BEST AMERICAN-BRED MARE.

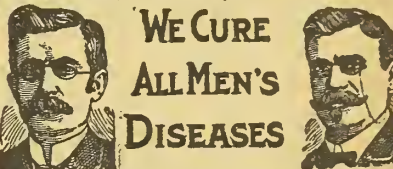

McMillan on Iolanthe.
If MacDuff is a credit to home breeding, Iolanthe is an honor, for she won championship as a mare, which MacDuff did not do as a stallion, although he had stronger competition.

CLYDESDALES.

Users of the draft horse throughout the country are coming more and more to recognize the breed from the braes of bonny Scotland, as a type eminently fitted for moving heavy loads. To the farmer in doubt as to the breed he wished to take up, the impression gained from watching the Clydes at Chicago was in every way an argument in favor of the feathered legs. Always possessing quality, a character which no other breed possesses so universally, nicely-rounded hodies and a walk which keeps on striding most

I Am Perfectly Cured

This is the testimony of thousands who have consulted us. If you are weak or diseased due to habits, excesses or over work and are discouraged and despondent, don't give up, but instead consult us and be cured. Twenty years of successful practice in Des Moines guarantees you honest, skilful and up-to-date service. Our cures are quick, safe and permanent. What we have done for others we can do for you.

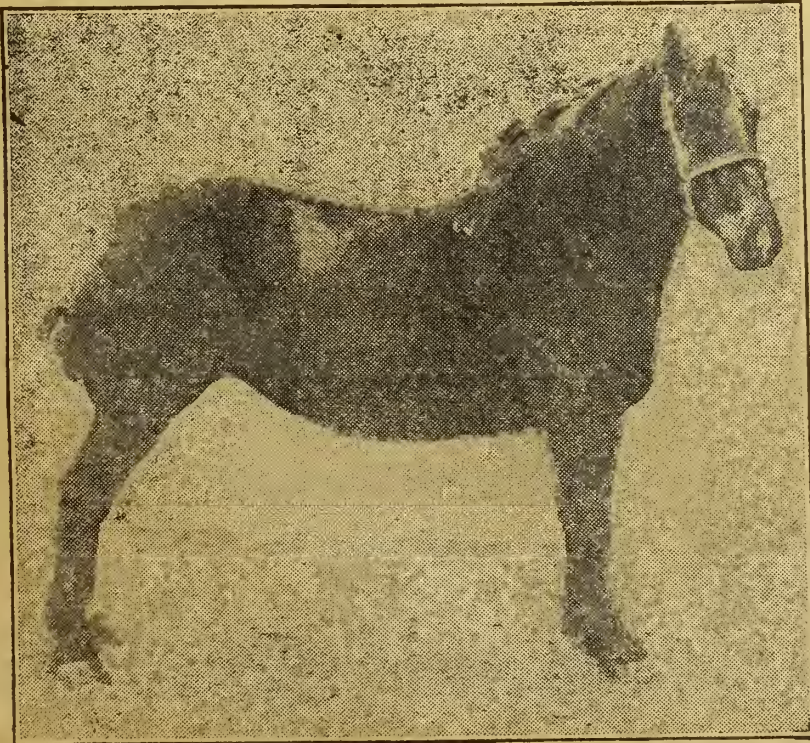

WE CURE ALL MEN'S DISEASES

Our reputation and name is too favorably known to make promises we cannot fulfill. We effect life long cures in NERVOUS DEBILITY or LOST VITALITY, whether due to habits, excesses or overwork. VITAL WEAKNESS, VARICOSE or ENLARGED VEINS, RUPTURE, BLOOD POISON, SKIN DISEASES, PROSTATE, STRICTURE, URETHRAL, KIDNEY and BLADDER diseases cured to stay cured. COME AND SEE US AND RECEIVE OUR LEGAL GUARANTEE TO CURE OR NO PAY. Reference, any bank or newspaper in Des Moines. Examination free. Write for free book if you cannot call.

Drs. Fellows & Fellows Co.
323 W. Walnut St. Des Moines, Ia.

manfully to follow, they gain friends almost everywhere. International visitors of a few years past remember what a wonderful six-horse team the Morris geldings made, and know that the geldings of the breed can be as good as the stallions in the show ring. This year's exhibit, in point of quality and numbers, was one of the bright spots of a most luminous horse exhibit. The best Canadian animals, together with the later importations from their native country, stood side by side with the best our country affords. The bulk of the awards went to our friends from across the line, but they went to winners. Graham Bros. won the lion's share of the premiums, but they had exceptionally good horses. The judges were from even more widely-separated districts than the exhibitors. Professors Marshall, from Texas; Humphreys, of Wisconsin, and Carlyle, of Colorado, journeyed far to make the awards. There were a few decisions which came as a surprise to on-lookers, and yet the placing of the rings was generally satisfactory. The Clyde exhibitors were Carpenter & Ross, Mansfield, Ohio (1 head); Ethelwold Farms, Mondovi, Wis. (7 head); Alex. Galbraith & Son, Janesville, Wis. (4 head); Graham Bros., Claremont, Ont. (12 head); Graham Renfrew Co., Ltd., Bedford Park, Ont. (7 head); Hodgkinson & Tisdale, Beaverton, Ont. (2 head); W. V. Hixson, Marengo, Iowa (3 head); Iowa State College, Ames, Iowa (2 head); William Moffatt & Bro., Paw Paw, Ill. (1 head); W. F. McCoy, Pleasant Plains, Ill. (5 head); McLay Bros., Janesville, Wis. (13 head); A. G. Soderberg, Osco, Ill. (8 head); Niles & McMillan, Hebron, Ind. (6 head). Awards: STALLION FOUR YEARS AND OVER. First, Graham Bros. on Right Forward. Second, Wm. Moffatt & Bro. on Urieside. Third, Graham-Renfrew Co., on Caliph.

Champion Percheron Mare, Iolanthe, owned by H. G. McMillan, Rock Rapids, Ia.

Fourth, McLay Bros., on Prince Punctual.
Fifth, Alexander Galbraith & Son on Bulwark.

This was one of the strong classes of the Clydesdale show. First choice fell to an exceedingly creditable draft specimen, and the award pleased all ringers. Right Forward carries the middle of a Belgian, with ends to match, and he has the underpinning of a typical Clydesdale. He goes straight and strong, and there were those who claimed him to be the best Clydesdale stallion ever shown at the International. Second choice was what you might call a heavy-topped horse, though he was not without a goodly supply of bone of good quality. He was a little loggy, but a gelding like him would be a very desirable type. Third choice fell to a more upstanding horse and one that might be improved in the middle. He appeared a little long in the back, but this was possibly due to lightness of dinner basket. He moved well and would be a horse to notice in any company. McLay's Prince Punctual might have stood higher without any criticism, and there were those who would have put him next to Right Forward. The Galbraith entry was also by no means a poor individual, though he also could be improved in the middle. This horse was at a slight disadvantage on account of being somewhat thin in flesh as compared with the entries above him.

THREE-YEAR-OLD STALLIONS.

First, Graham-Renfrew Co. on Evander (12573).
Second, Galbraith & Son on Baron Donne (12613).
Third, Graham Bros. on Celtic Pride (5412).
Fourth, Soderberg on Ethelbert 12025.
Fifth, McLay Bros. on Baron's Nisbet 12563.
It was this class that caused a little ring-side comment, regarding the placing of the Des Moines and Kansas City champion, fourth place being his lot instead of first. First place was hotly contested for by Evander and Baron Donne, the former winning the coveted blue ribbon on his more typical action and because he was a little better constructed at the ground. Baron Donne had his favorites among the laymen for first, having a bit more substance and plenty of character. Style was an important factor in placing Evander first. Celtic Pride is an excellent animal, better perhaps a little at hocks, but for good all round qualities, Ethelbert, it seemed to many, was more horse. He's a good one in any company and many thought Mr. Soderberg in hard luck that he did not get higher. Nine came before the judges in this class.

TWO-YEAR-OLD STALLIONS.

First, Graham-Renfrew Co. on Flash Baron (12978).
Second, same on Baron Hamlet (12827).
Third, Ethelwold Farms on Prince Winsome 12045.
Fourth, Graham Bros. on Colonial 6119.
Fifth, McLay Bros. on Collingwood 12553.
Out of a class of ten two Baron's Pride colts won first and second, showing much of the old Baron's quality and character. Flash Baron was a trifle more sloping at the shoulder, had a little advantage at the ground and showed a slight advantage in quality. Third, fourth and fifth places went to good animals of excellent Clydesdale character. One well-bred colt, McQueen's Crest, by the famous McQueen, was shown in this ring, but didn't carry quite enough good points with his breeding to get inside the money.

YEARLING STALLIONS.

First, Graham Bros. on Blacon Swagger (6121).
Second, Ethelwold Farms on Grand Triumph 12047.
Third, McLay Bros. on Golden Prince 12346.
Fourth, same on The Favorite Prince 12347.
Fifth, Ethelwold Farms on High Mark 12043.
A toppy class of five youngsters answered the call, first place being awarded to a bay of first-class quality and Clyde character.

AGED MARES.

First, Graham-Renfrew Co. on Lanark Queen.
Second, McLay Bros. on Lady Elegant 10422.
Third, McLay Bros. on Princess Goodwin 9849.
Fourth, Galbraith & Son on Flossie 12604.
Fifth, McLay Bros. on Princess Handsome 9758.

Just enough mares were in this class to take up the money and leave none out. Lanark Queen took first by virtue of her strong-

ly-coupled loin, her breediness of character and a typical Scotch action. She is just a little light in the middle. Lady Elegant out-acts Princess Goodwin, the Des Moines winner, but is not quite so massive. Flossie has plenty of quality and type, but is a little on the rany order, her advantage over Princess Handsome being at the ground.

THREE-YEAR-OLD MARES.

First, McLay Bros. on Lady Graceful 11118.
Second, Galbraith & Son on Strathendrich Jean 12605.
Third, Soderberg on Osco Sweetness.
Lady Graceful is a roan of excellent style and beautiful finish, better-made feet and a more typical build. The second prize was awarded a bay because of more bone, substance and action than the only other entry in the ring.

TWO-YEAR-OLD MARES.

First, Hodgkinson & Tisdale on Fifeshire Lass, Vol. 29.
Second, McLay Bros. on Mayoress 12582.
Third, same on Point Lace 11586.
Fourth, Soderberg on Osco Bloss 12056.
Fifth, McCoy on Katy May 11606.
Out of eight entries shown the bay, Fifeshire Lass, was considered more of the typical form and action, but the black that went second had lots of quality and more middle than Point Lace, the winner at Des Moines. The others were fairly good mares also, and by no means was this class a mediocre one.

YEARLING MARES.

First, Iowa Agricultural College on Peach Blossom 12155.
Second, Hodgkinson & Tisdale on Palmers-ton's Darling 123332.
Third, McLay Bros. on Patroness 12572.
Fourth, Niles & McMillan on Lady Wil-bray.
Fifth, Ethelwold Farms on Princess Winsome 12044.
The Iowa Agricultural College brought out the winner of the seven yearling fillies in a little peach, a light bay, of pretty type and character. Queen's Maid isn't quite so typical, yet has more of a body, especially deeper at flank.

BEST FOUR ANIMALS BY ONE SIRE.

First, Graham Bros.
Second, Ethelwold Farms.
Third, W. F. McCoy.

TWO ANIMALS PRODUCE SAME DAM.

First, McLay Bros.
Second, Soderberg.
Third, Ethelwold Farms.

McLay's pair were more typical in quality, action and form. Soderberg's pair were good ones and the mare that produced them must have been a good one.

Champion Stallion—Graham's Right Forward.
Champion Mare—Graham-Renfrew Co. won with Lanark Queen.

SPECIAL "A"—STALLION FOALS.

First, McLay Bros. on Royal Gordon.
Second, Soderberg on Osco Captor.
Third, Ethelwold Farms on Challenger.
The winner is a brown, fine in quality and more of a Clydesdale than the light bay which stood second. Third place went to a colt with rather crooked legs, but an attractive fellow.

SPECIAL "B"—FILLY FOALS.

First, McLay Bros. on Lady Like.
Second, Niles & Hough on Lady Robgill.
Third, Ethelwold Farms on Winsome Princess.
Fourth, McLay Bros. on Fair Helen.
Fifth, McCoy on Fair Helen.
A light-colored little female of promising character won first in this class of seven youngsters.

SPECIAL "F"—PAIR OF GELDINGS.

First, Morris & Co.
Second and third, Union Stock Yards Co.
Morris' pair was a fine example of draft geldings and won easily.

BELGIANS.

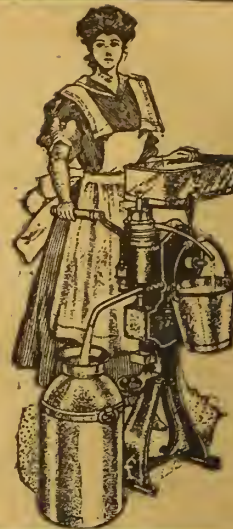

The Belgians at this year's International made an attractive showing, for the most part, at least. If the good promise given by the first two stallion classes had prevailed throughout the whole exhibit of this great breed, horses of other breeds would have been forced to look well to their laurels. To see such heavily-made fellows moving about with such apparent ease certainly sends a thrill to the heart of a lover of good horses. For massiveness, combined with strength and

U. S. CREAM SEPARATOR

The Large Illustrated Catalog is Free.

BOYLES COLLEGE, 1804 HARNEY ST., OMAHA, NEB.

quality of bone, the Belgians are surely near the top. The horse which perhaps attracted more attention than any other was Crouch & Son's newly-imported Perce 2276, a big dapple gray five-year-old of most sensational qualities. As hinted above, the mare classes did not attain the standard set by the stallions. Notwithstanding the good points of many of the horses, unsoundness would occasionally crop out and one entire ring of mares was thrown out by the judges for this defect. The Belgians were the first before the judges Monday morning and the work was completed long before night. The judges were Prof. Wayne Dinsmore, of Iowa, and Mr. W. E. Fritchard, of Illinois. Exhibitors: J. Crouch & Son, Lafayette, Ind.; Robt. Burgess & Son, Wenona, Ill.; H. A. Briggs, Elkhorn, Wis.; Finch Bros., Joliet & Verona, Ill.; McLaughlin Bros., Columbus, Ohio; Henry Lefebure, Fairfax, Iowa; Oltmanns Bros., Watseka, Ill.; H. & H. Wolf, Wabash, Ind. The awards:

AGED STALLIONS.

First, J. Crouch & Son on Perce 2276.
Second, H. A. Briggs on Monton de Feiny.
Third, Finch Bros. on Fraseur 2142.
Fourth, Crouch & Son on Mon Sanhalt 1582.
Fifth, Burgess & Son on Garibaldi de Bel Air 23864.

Sixteen head responded to the call of the superintendent in this class, and some very good ones, too. There were some culls, however, as might be expected in so large a number. A short leg of eight, however, brought out some extra good ones and it was only after careful deliberation that the above order was fixed. Those interested in horses were curious to see Crouch's newly-imported and widely-heralded Perce 2276. He is surely a splendid animal and took first place easily. A head of great character, a massive body, a wealth of muscling and strength of underpinning, all go to make him a great horse. For second place H. A. Briggs held a heavy strawberry roan, of low-down type, well muscled and a good mover. Finch Bros. came third with another strawberry roan, which seemed to be the prevailing color in the breed here, but it was fourth place which caused comment. Mon Sanhalt, Crouch's beautiful chestnut, champion at other shows, was forced to fourth place here, because of a slight lameness resulting from an accident in transportation. The fifth prize winner was not of the same type as his competitors, being a little long of body and somewhat up-standing.

THREE-YEAR-OLD STALLIONS.

First, Burgess & Son on Forten de Saint Jean 2072.
Second, Crouch & Sons on Charon 2379.
Third, Crouch & Sons on Thomas 2277.
Fourth, H. & H. Wolf on Jamin 1950.
Fifth, Briggs on Champagne de Berthen 1886.

There was less tendency toward unsoundness in the twelve head of three-year-olds than was noticed in the aged stallions. First prize went to a blocky fellow of the prevailing strawberry roan color, a stallion with snap and vigor in his action. Crouch & Sons' glossy brown came second. This horse showed more quality and a little better movement than the winner of the blue, but lacked the massive frame of his more fortunate rival from the Burgess stables. Crouch & Sons had the third prize also, on a heavy-framed fellow, with plenty of muscle, but a little small in his feet, and close in his traveling.

TWO-YEAR-OLDS.

First, Crouch & Sons on Nelson 2274.
Second, Lefebure on Major d'Ob.
Third, Crouch & Sons on Herman 2270.
Fourth, Finch Bros. on Ange Pilon 8561.
Fifth, Burgess & Son on Remi 2323.
Out of a class of twelve head, mostly of medium quality, Crouch & Sons took first on a home-bred colt of good quality, strong level action and sound feet of fine texture. Lefebure won second with a horse a trifle light in the body on sturdy, well-muscled legs. Herman was inclined to a heaviness of bone and lacked trimness in his makeup, also being just a little slow and uncertain in his action.

bure won second with a horse a trifle light in the body on sturdy, well-muscled legs. Herman was inclined to a heaviness of bone and lacked trimness in his makeup, also being just a little slow and uncertain in his action.

YEARLING COLTS.

First, Finch Bros. on Madire.
Second, Lefebure on Bizar 1994.
Third, Lefebure on Hercules.
The Finch colt was easily the best of the three, being heavier with rather more finish than second and third.

MARE CLASSES.

The aged mares were all declared unsound and no ribbons were handed out.

THREE-YEAR-OLD MARES.

First, H. & H. Wolf on Pistille 272.
Second, H. & H. Wolf on Lionnette Roissia 270.
Third, Lefebure on Lisa de Hemp 254.
Fourth, Lefebure on Mynette 188.

Only four entries appeared in this ring and they were led by Pistille 272, a strawberry roan of good width, a roomy middle and good action. Second went to a rolf mare, not quite so heavily made as her mates, but good of movement, strong on her feet and clean of limb. Lefebure came third and fourth with a pair somewhat lighter made than either of the two which went first and second.

TWO-YEAR-OLD MARES.

First, Finch Bros. on Pratche de Aloam 277.
Second, Lefebure on Manizelle de Don 256.
Third, Lefebure on Josette 283.
Only three mares answered the judge's call for two-year-old mares. The first mare carries the usual color and was the superior in type of the other two.

YEARLING MARES.

First, Finch Bros. on Riger de Scailmont.
Second, Finch Bros. on Julia.
A couple of ordinary colts made up this ring, the first prize going to the one with the most scale and quality.

FOUR ANIMALS ANY AGE, GET OF ONE SIRE.

Lefebure won, being the only entry, on get of Ruban 1062.

TWO ANIMALS ANY AGE, PRODUCE OF SAME DAM.

First, Finch Bros.
Second, Lefebure.

CHAMPION STALLION ANY AGE.

Crouch & Sons on Perce 2276.

CHAMPION MARE ANY AGE.

H. & H. Wolf on Pistille 272.

"C"—CHAMPION STALLION.

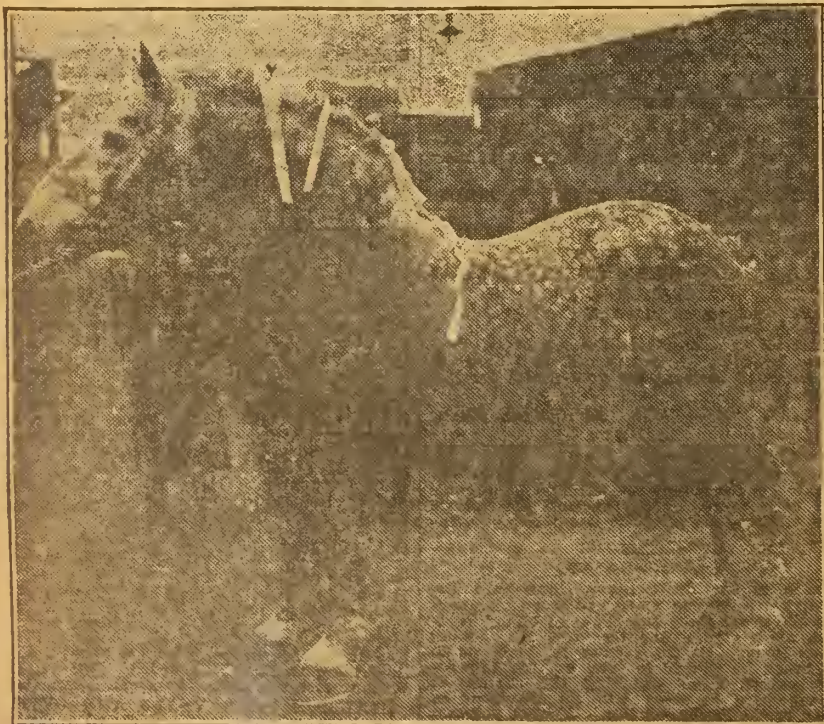

Crouch & Sons on Perce.

"D"—CHAMPION MARE.

H. & H. Wolf on Pistille 272.

GERMAN COACH.

Although two studs were entered for competition in the German Coach classes, as a matter of fact, only one, that of Crouch & Sons, of Lafayette, Ind., led out. Oltmanns Bros., of Watseka, Ill., were there with a good string, but withdrew from competition. The fact that only one exhibitor was competing lessened the general interest somewhat, but the crowds in the auditorium were more than delighted with the great showing made

Champion Belgian Stallion, Perce, owned by J. Crouch & Son, Lafayette, Ind.

by the Crouch firm. Old Hannibal has lost none of his charm as a high-class actor and was first all through the competition, in whatever class he was shown. His most assuredly fills the eye as a horse of substance, quality and action. An exceptionally good two-year-old stallion was brought out in Amadent 3719. This young horse has remarkably graceful action, both front and rear. The mare classes only served to show the superiority of that splendid three-year-old, Mute 390. She is perfectly mannered and almost as graceful and sensational an actor as Hannibal. Messrs. Crouch are to be congratulated on their splendid string of coaches, and it was unfortunate that competition was lacking in all the classes.

SHIRES.

This most excellent breed of English draft horses has been attracting more attention during the show season just past than any other breed of heavy horses shown on the entire circuit. It is certainly to be hoped that the prominence given them will make them approach somewhat the popularity and general usage to which they are accustomed in England. In an exhibition of horses not equaled elsewhere on the continent, the Shires made a showing which would compare most favorably with that of any breed when their comparative scarcity in the United States and Canada is considered. The animals shown at various places throughout the United States and Canada by His Majesty the King of England and the Baron Rothschild have been a drawing card wherever they have been shown. The French horse just at present is the most widely used drafter in our country, but the two British breeds are just coming into their own, if the showings at the various fairs and expositions are any criterion. The Shire lacks a bit of the snap and vigor, and it may be a little of the exceptional quality of the Scottish Clyde, but your Englishman thinks no other breed is so adapted to the draft requirements of the larger cities. He is a more closely-built animal, and heavier made than the Clyde, possessing a heavier feather, but many individuals of each breed would readily pass for the other. The best of recently-imported stock met the cream of home-bred animals in keen competition in every class. Awards were made by Alex. Galbraith, of Janesville, Ill., a large importer of Clydesdales, a man who, by much travel through the Shire district of England, has become familiar with them in their native land. The order of judging, as in the Clydesdales and the Percherons, was somewhat unique, beginning with the aged mares, following down the female classes, then starting on the yearling stallions and working up to aged stallions. The placing in some cases was a trifle difficult to understand from the standpoint of Shire type. The exhibitors were His Majesty King Edward VII., Sandringham, England (3 head); Lord Rothschild, Tring Pk. Herts., England (1 head); Roht, Burgess & Son, Wenona, Ill. (6 head); Lew W. Cochran, Crawfordville, Ind. (5 head); William Crowner, Hudson, Iowa (9 head); Finch Bros., Verona and Joliet, Ill. (25 head); F. M. Mountjoy, Atlanta, Ill. (2 head); L. N. & O. R. Sizer, Fisher, Ill. (6 head); A. G. Soderberg, Osco, Ill. (3 head); Trumans' Pioneer Stud Farm, Bushnell, Ill. (18 head); Taylor & Jones, Williamsville, Ill. (16 head). Awards:

AGED STALLIONS.

First, Burgess & Son on Premvictor (19947).
Second, Lord Rothschild on Girton Charmer (20515).
Third, Burgess & Son on Bank Nil Desperandum (21096).
Fourth, Finch Bros. on Stuntney Bounder 7296.
Fifth, Burgess & Son on Blaze of Worsley III. (21156).
Six stallions lined up for inspection in this
